This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

COMMUNICATION

FROM

HIS HONOR THE MAYOR,

DANIEL F. TIEMANN,

TRANSMITTED TO THE COMMON COUNCIL OF NEW YORK,

JANUARY 5th, 1858.

DOCUMENT No. 1.

NEW YORK:
CHAS. W. BAKER, PRINTER, 29 BEEKMAN STREET.
1858.

DOCUMENT No. 1.

BOARD OF ALDERMEN,

JANUARY 5, 1858.

The following communication from His Honor the Mayor, was received, laid on the table, and ordered to be printed.

D. T. VALENTINE, *Clerk.*

MAYOR'S OFFICE,
January 5, 1858.

To the Honorable the Common Council of the city of New York:

GENTLEMEN:—The distinguished position of Mayor of the city, to which I have been elected by my fellow-citizens, imposes upon me highly responsible as well as most arduous duties, and I cannot better evince my appreciation of the generous confidence they have thus reposed in me, than by devoting my earnest efforts toward securing for them an honest, efficient and economical administration of the city government.

I shall, at all times, be ready, heartily to co-operate with you in any action tending to promote the security, prosperity and good government of the city, expecting, at the same time, to receive your cordial support in behalf of such measures as I may have occasion, in the performance of my duty, to suggest to you.

It is made my duty, by the Charter, to communicate to you "a statement of the condition of the city in relation to its government, finances and improvements," and also "to recommend such measures, as I may deem expedient, connected with its police, security, health, cleanliness and ornament."

Among these subjects, the

FINANCES

properly demand the first place.

The total debt of the city, on the first of January instant, was $18,113,194, composed of the following accounts:

The permanent city debt, redeemable from the Sinking Fund	$16,489,168
Less stocks and securities held by the Commissioners	5,715,874
Actual permanent debt	$10,773,294
The funded debt redeemable from taxation	1,104,000
The treasury loan account	3,486,900
The Central Park assessment bonds	1,600,000
The assessment bonds	1,149,000
Total	$18,113,193

PERMANENT DEBT.

The permanent debt redeemable from the Sinking Fund consisted of the following items on the first January, 1858:

5 per cent. Water Stock, redeemable in 1858..		$3,000,000
" " " " " " 1860..		2,500,000
" " " " " " 1870..		3,000,000
" " " " " " 1875..		255,600
" " " " " " 1880..		2,147,000
5 & 6 per cent. Croton Water Stock, 1890.....		1,000,000
5 per cent. Fire Indemnity Stock, 1868.....		402,768
" " Building Loan No. 3, 1870.....		75,000
" " " " 4, 1873.....		115,000
" " Water St'k (new res.) 1875.....		29,100
6 " " " " 1875.....		988,300
5 " Central Park F'd St'k 1898.....		713,200
6 " " " 1887.....		1,765,700
" " " (arsenal) 1898.....		197,500
" " Central Park Improvement Fund Stock, 1887		300,000
Whole amount.....		$16,489,168
Less investments by Commissioners Sinking Fund in city stocks.....	5,093,880	
Bonds and mortgages.....	621,994	$5,715,874
Amount unprovided for, January 1, 1858.....		$10,773,294

The debt has been increased, during the past year, $2,[illegible] in consequence of stocks issued for payments on account of the Central Park and the new reservoir.

Three millions of stock, issued for the construction of

the Croton aqueduct, were due on the first instant, and arrangements were made for its redemption.

The Sinking Fund, it will be perceived, is in a highly prosperous condition. Created by the act of the legislature of 1812, it has met promptly all its liabilities.

By the ordinance of the Common Council of 1845, certain specified revenues were pledged to this fund, the receipts from which, the last year, amounted to $570,513 59.

By the same ordinance, a separate fund for the payment of the interest on this debt was created, to which were pledged the Croton water rents, and various other sources of city revenue.

This fund has not only paid the interest on the permanent and funded debts, but on account of the great increase since 1851, in the revenues appropriated to it, has accumulated a surplus, amounting, on the 1st instant, to $1,773,906 41. A part of this surplus has been advanced to the Permanent Sinking Fund, and invested in the purchase of City Stocks and Revenue Bonds.

FUNDED DEBT.

The funded debt of the city redeemable from taxation is as follows:

5 per cent. Public Building Stock No. 3, payable from 1858 to 1866	$450,000
5 per cent. New York Stock for Docks and Slips, payable from 1867 to 1876	500,000
Public Education Stock, 1873	154,000
Total amount	$1,104,000

The greater part of this debt has been created in accordance with several acts of the legislature, passed since 1848, for the erection of public buildings, and the construction of wharves, piers and slips. It is redeemable from taxation, at the rate of $50,000 annually.

To this fund is also charged a stock, called the Public Education Stock, created for the purpose of paying off the mortgages on the property transferred by the Public School Society to the city, for the use of the Board of Education, and for the redemption of which $4,657 36 is to be annually raised by tax, for twenty years, at the expiration of which time it becomes due.

The interest on all this funded debt, as well as on the permanent debt, is now paid from the Sinking Fund interest account.

TREASURY LOAN ON REVENUE BONDS.

The Treasury Loan account consists of Revenue Bonds of 1857, issued in anticipation of the taxes of that year, and outstanding January 1st, 1858, $3,486,900.

This debt is made in anticipation of the annual taxes, by authority of a provision in the charter, as follows: "The Common Council shall not have authority to borrow any sums of money whatever, on the credit of the Corporation, except in anticipation of the revenue of the year in which such loan shall be made, unless authorized by a special act of the legislature."

The expenditures from the city treasury, on account of the city government, are principally made during the year,

before the bulk of the taxes are received, and hence the necessity of this provision of the charter,

A large sum is thus rendered necessary in the annual tax list, for the payment of interest on these revenue bonds. Last year the amount was $295,000. The amount called for this year is $325,000.

FUNDED DEBT REDEEMABLE FROM CENTRAL PARK ASSESSMENTS.

This debt consists of six per cent. Central Park Assessment Fund Stock, payable February 5, 1859, $1,600,000.

On the awards for the Central Park becoming due, the treasury was unable to meet them, in consequence of the difficulty of negotiating the stock authorized by the legislature, for its payment, by reason of the low rate of interest, (five per cent.) Bonds were, therefore, issued under an ordinance of the Common Council, passed on the recommendation of the Comptroller, under the authority of an act of the legislature of 1813, to the amount of $1,600,000, redeemable from the assessments on the property benefited by the improvement, and which assessments were pledged for its redemption.

These assessments will, no doubt, be sufficient to pay the bonds thus issued.

ASSESSMENT BONDS.

In 1852, the legislature passed an act, authorizing the Common Council to issue assessment bonds, for the payment of contractors, for work done in the construction of sewers, regulating and paving streets, and other work,

payable from assessments on the property benefited. The purpose of the law is, that contractors may be paid for their work, in advance of the collection of the assessments, so as to enable contractors of small means, to compete with large capitalists for contracts, and so reduce the cost by greater competition.

The Common Council, in 1852, passed an ordinance, based on this act, by authority of which, contractors were paid eighty-five per cent. of the amount of their contracts, upon a proper certificate of the completion of the same and the balance after confirmation of the assessment. This ordinance was amended in 1854, so as to authorize the Comptroller to pay monthly, to contractors, on all contracts over $10,000, seventy-five per cent. of the work done, as it progressed, and the balance when the assessment was confirmed.

Previous to the passage of the act of the legislature of 1852, contractors were paid only as the assessments were collected, the city then acting *truly* as trustee. Since then assessment bonds have been issued to pay contractors in advance of the receipts of the assessments, and as the law authorizing them, makes no provision for the time of their redemption, they have been made payable within the year of their issue.

The collections of assessments not being sufficient to redeem these bonds thus issued, as they became due, advances were made, from time to time, from the city treasury, for that purpose: The total advances thus made, amounted, in 1856, to more than $2,000,000. In that year, on the recommendation of the Comptroller, an ordinance was passed by the Common Council, under an act of the legislature of

1853, authorizing him to issue bonds, payable in five years, to reimburse the treasury for these advances.

The following statement gives the amount of these bonds, and also the assessment bonds issued and payable within the year 1857, viz:

6 per cent. Assessment Bonds, five years, payable 1861	$789,600
7 per cent. do., payable 1862	178,000
6 do. do., do 1 year	182,000
Total	$149,1,000

To redeem these bonds, or those which may hereafter be issued to further reimburse the treasury for advances, there are assessments in arrear, amounting to $2,680,809 17, and property purchased by the city for assessments, amounting to $138,429 13, making a total of $2,819,238 72.

By the present law, no proceedings for the sale of property for assessments can be taken before the expiration of three years from the time when they become absolutely due. In consequence of this provision, each year has added to the amount of these arrears. The collection of a portion of them may, however, under the provisions of the law, be enforced this year.

From information that I have obtained, I fear that the whole amount of the arrears of assessments will not be realized. In some cases, the property may not sell for the amount of the assessments, and the returns of several of the collectors are so imperfect that it is impossible to ascertain the amount of assessments paid to them, for which no returns have been made.

Whether the public interests are promoted by advances to contractors before the collection of the assessments for the work, I am not at this time possessed of such full information as will enable me to decide.

After further examination, I shall make another communication to you on this subject.

STREET OPENINGS.

The treasury is also in advance on this account, to the amount of $776,535 01.

In these cases, the property is sufficient to reimburse the treasury, as the assessments are equal to the award, except in a few instances, where remissions have been made by the Common Council. These remissions, in my judgment, are made without authority of law.

ANNUAL TAXATION.

The taxation annually levied on the owners of property real and personal, for the current expenses of the government, and other trust and special charges, authorized by law, is a subject of primary importance to the community, and the officers to whom its imposition and expenditure are intrusted.

Were the administration of public affairs conducted so as adequately to protect property, health and life, our citizens might overlook the heavy burdens annually imposed on them by excessive taxation, but when these ends are not attained, when property is rendered insecure through inefficiency; health endangered, and epidemics, at times, engendered, by neglect of the indispensable sanitary laws of

cleanliness, and life daily sacrificed by violence, ruffianism and crime, through the want of energy in bringing the guilty to trial and punishment, they may well complain of these heavy drafts for the maintenance of such a semblance of government.

The great increase in our annual tax list, now largely exceeding the expenditures of any of the state governments, demands a careful inquiry into the causes to which it is due.

The amount of taxation for the support of the city government in 1848, was $2,715,510. The levy for the last year was $8,066,506, and the following table exhibits the increase from 1848 to 1857 inclusive, and the valuation of the real and personal estate for the same years, as well as the rate per centum of taxation:

Year.	Value of real estate.	Value of personal est.	Total Value, real and per'l est.	Amount raised by tax.	Rate
1848	$193,029,076	$61,164,147	$254,163,523	$2,715,510 25	$107 80
1849	197,741,919	58,455,224	256,194,143	3,005,762 52	118 34
1850	207,146,176	78,939,240	286,085,416	3,230,780 47	113 75
1851	227,013,806	93,094,501	320,108,358	2,924,384 99	91 28
1852	253,278,384	98,490,042	351,768,426	3,378,335 08	96 70
1853	294,637,295	118,994,137	413,631,382	5,069,650 05	123 42
1854	330,564,452	131,721,338	462,285,790	4,841,255 54	105 77
1855	337,038,526	150,022,312	487,060,838	5,843,822 89	120 60
1856	340,971,498	172,767,783	513,730,279	7,075,425 72	138 30
1857	352,958,803	168,216,449	521,175,252	8,066,506 62	155 64

In a prosperous and growing city, the increase of annual taxation is unavoidable, but there is no good reason why the rate should advance more rapidly than population, and the increase of its property.

From the foregoing table, the increase on the amount of taxation of 1857, over 1850, is as follows:

1857	$8,066,566
1850	3,230,780
Increase	$4,835,786

Being an increase of 149 per centum.

The principal items of increase, during this period of 1857 over 1850, are as follows:

	1850: APPROPRIATIONS.	1857: APPROPRIATIONS.	INCREASE.
State Mill Tax	$143,04	$511,740	$368,698
Common Schools, State	8,14	383,805	375,661
Common Schools, City	267,968	1,100,200	832,232
Commissioners of Record	.....	350,000	350,000
Alms-house	400,000	800,000	400,000
Interest on Revenue Bonds	90,000	295,000	205,000
Interest on Assessment Bonds	.....	75,057	75,037
Arrearages of previous year	290,000	488,370	198,570
Central Park, interest	.....	255,000	255,000
Lighting Lamp District	185,000	456,490	271,490
Paving Bowery and Chatham street	.....	100,000	100,000
Iron Pavement	.....	125,000	125,000
Repairs and Supplies	50,000	89,544	39,544
Rents	2,000	30,000	28,000
Real Estate Expenses	10,000	100,000	90,000
Roads and Avenues	30,000	75,000	45,000
Police	492,000	825,000	333,000
Salaries	200,000	412,500	212,500

Can there be any reduction made in the expenditure, on account of these items or either of them?

It will be seen, by reference to the tax levy of 1858, that the state mill tax will be $1,171,226 88; last year it was $511,740 50. There is here an increase of $659,486 38 instead of a reduction.

The rate last year was one mill, this year two and a quarter mills. This tax is imposed for the support of the state government, in pursuance of laws of the legislature.

Its amount is no doubt considerably increased by reason of the higher relative valuation of property in this city, as compared with that of other parts of the state.

If an equalization in the valuations in assessments of property were adopted by the state, we might reasonably expect a reduction of at least $200,000 dollars on this account. The attention of the legislature has been frequently called to this subject, but it has, as yet taken no action, I would recommend, that the Common Council renew their application for the appointment of a Board of state assessors, for the equalization of the valuations of property throughout the state.

This city has also been compelled, by the adoption of an erroneous system of levying and collecting the state tax for the common schools of the state, to pay more than its just proportion of the amount ($800,000) raised by the whole state for this purpose. The following table gives the amount raised in the several years since 1852, by this city, the sum apportioned and paid back to it, and the excess paid by it beyond what it has received.

	Tax.	Apportionment.	Excess of Tax.
1852	$314,350 62	$93,606 65	$220,743 97
1853	225,670 80	95,699 15	129,971 65
1854	257,616 11	95,648 06	161,968 05
1855	271,839 40	95,648 06	176,191 34
1856	214,257 92	88,140 95	126,116 97
1857	383,805 37	152,345 06	231,460 31
1858	390,408 96	152,345 06	238,063 90
	$2,057,949 18	$773,432 99	$1,284,516 19

Thus it will be seen, that the city was taxed by the state, last year, an excess of $231,406 31, over the amount which

was apportioned to it by the state. This year, the excess will be $238,063 90, and the total excess for seven years, from 1852 to 1858, inclusive, is $1,284,516 19. The inequality of this tax upon New York, is occasioned by the defect in the state law, in relation to the apportionment. I would recommend, that the legislature be memorialized to amend this law, so as to make it bear with less injustice on the different sections of the state.

COMMON SCHOOLS.

In addition to the large tax for the common schools of the state, there was raised by the city, last year, the sum of $1,100,410 82, for the common schools of the city, being an excess of $842,441 96 over the tax of 1850 ($267,968 86), raised for the same purpose. The amount submitted in the tax levy, for this year, is $1,016,050 19, a slight reduction from that of last year. The people of this city are no doubt in favor of liberal expenditures for education, and desire the public school buildings to be so constructed and furnished, as to attract there all the children of the city, where early associations may be formed, likely to have a beneficial influence through life. The Board of Education has charge of the common schools of the city; in my opinion some changes may be introduced with advantage in the organization of this department.

There are now twenty-two local Boards, each controlling the schools of their respective wards, independently of each other, and to a great extent of the Board of Education itself. A considerable portion of the expense of the system is due to this cause. If, therefore, instead of these numerous local Boards, the whole system were under the

control and government of a single Board of intelligent and educated citizens, and if the Board, thus constituted, were to select a local committee for each school, from among the numerous respectable and intelligent citizens, who would be happy to serve the public in this honorable capacity; a great reduction of expenditure, probably to the extent of $200,000, would be affected, without at all impairing the efficiency of the schools.

The mode in which the Board should be constituted, whether by election or by appointment, is a question which can only be determined after careful deliberation; and I commend the subject to your serious consideration.

COMMISSIONERS OF RECORDS.

There has been also a large expenditure of money, on account of a body, known as the Commissioners of Records, appointed for the purpose of causing the records and other papers in the County Clerk's, Surrogate's and Register's offices, to be indexed and printed. There has been already raised by the Board of Supervisors, on their requisition for this work, the sum of $550,000. When I obtain more full information in relation to this commission, I shall make a communication on the subject to the Board of Supervisors, who properly have control of the matter.

SALARIES.

In addition to the causes, which I have thus enumerated for the increase of taxation, I call your attention to the great increase of salaries, during the last few years. In 1850, the total amount paid for salaries was $200,000, it was last year over $400,000, and the amount called for this year is $537,000, I recommend a revision of salaries, based upon the consideration of the labor and responsibility involved

in the discharge of the duties of the respective offices, being well satisfied, that in many cases, offices may be abolished, and in others, the compensation may be reduced without detriment to the public service.

SURPLUS IN THE SINKING FUND.

It will be seen also, on reference to the Sinking Fund account, for the payment of interest on the city debt, that a surplus remains every year after the payment of such interest. The sources of revenue heretofore pledged for the payment of such interest now yielding more than sufficient for the purpose, and increasing from year to year, they should be reduced, or the excess of the revenues from these sources be restored to the city treasury. In this way the tax levy may be materially reduced. I call your serious attention to this subject.

If then, we could have relief from the unequal taxation for state purposes, a saving would be effected of at least.....	$250,000 00
The common schools of the city, conducted with equal efficiency, on a new and more economical system, would make an additional saving of at least.....	200,000 00
The excess of Sinking Fund interest account paid into the city treasury, would allow a further reduction of at least.....	450,000 00
A proper economy in the police, salaries, repairs and supplies, and other accounts, would no doubt effect a further saving of	500,000 00
Total.....	$1,400,000 00

making a deduction from our annual taxation of at least one million four hundred thousand dollars.

I have thus exhibited to you a full statement, so far as I have been able to obtain the facts, within the limited period since my election, of the condition of our finances, and of the causes of the great increase of taxation, and the means by which a reduction may be effected. I now invite your attention to the several departments of the city government.

FINANCE DEPARTMENT.

The twenty-second section of the new charter, which provides for the organization of this department, gives to it the control of all the fiscal concerns of the Corporation. The auditing bureau has the revision, auditing and settling of all accounts in which the city is concerned; it is required to keep an account of each claim for, or against the Corporation, and the sums allowed upon each, and to certify the same, with the reason for the allowance, to the Comptroller. The intention of the legislature was doubtless to introduce a more rigid scrutiny of all claims against the city, and that the bureau should be so arranged as effectually to secure this object. The amount passed upon by this bureau last year was about $16,500,000.

The offices now assigned to the Finance Department are inadequate to this enormous business, and the consequence is, that it presents a scene of confusion, which would not be tolerated in any respectable mercantile establishment. I earnestly recommend, therefore, that better accommodations be assigned to the Comptroller, and that a system of auditing accounts be prescribed by ordinance, which will guard against the frauds and errors so likely to arise in the absence of a proper system and adequate checks.

Another important branch of the Finance Department is, that which has charge of the *issuing, canceling and transfer-*

ring the stocks, bonds and other securities of the city. I am informed that these operations are conducted in a loose and irresponsible manner. Every guard against fraud, however honest the chief officer may be, should be provided, and I would, therefore, suggest that a new bureau be properly organized in this department for registering, transferring and canceling the stocks or certificates issued, and that all the checks, employed in the same branch of the financial business of the general government, be adopted in this bureau.

BUREAU OF THE RECEIVER OF TAXES.

Another bureau in this department is the Bureau of the Receiver of Taxes. He is charged with the collection of the annual taxes.

The following is the tax levy of 1857, and the taxes received thereon, to, and including December 31, 1857:

Amount of levy			$8,055,00 69
Taxes received	September	$914,691 03	
" "	October	1,282,321 22	
" "	November	3,390,377 67	
" "	December	698,092 51	
Total tax received			6,285,482 43
Tax yet due			$1,769,526 12

The Bureau of the Clerk of Arrears is also in this department. The arrears of personal tax extend as far back as 1844, and amount to about $750,000. From the long period, that a considerable part of these arrears have been due, it is not probable that the whole amount can be collected. If the means provided by the law, for the collection of personal taxes, had been properly

applied, this large amount of arrears would not have accrued. There is no security for the collection of personal taxes, other than the responsibility of the individual. Delay in their collection often results in total loss. I recommend that the Counsel to the Corporation be instructed to take immediate measures to enforce, as far as possible, the collection of these arrears. A large amount may thus be saved to the city treasury. If the power of the Common Council be insufficient to enforce their collection, application should be made to the legislature for the requisite authority.

The office of

CHAMBERLAIN OF THE CITY OF NEW YORK,

is declared to be a bureau in the Finance Department. In my opinion the ordinances regulating this bureau should also be revised and amended. The office should be regulated upon the principles of the Treasury of the United States, with ample checks upon the accounts and drafts of the Comptroller.

THE ALMS-HOUSE DEPARTMENT.

This department was entirely under the control of the Common Council until the year 1849. In that year it was placed, by an act of the legislature, under the direction and control of a Board of Ten Governors. Its expenditures have, since that time, considerably increased, owing to the increased number of persons maintained in the Alms-houses, nurseries, hospitals and prisons, the support and control of which belong, exclusively, to this department. The property in use, by this department, belonging to the city, is valued at $1,700,000. The expenses of this department, in 1850, were about $400,000. There was raised, last year,

by tax, for its support, the sum of $843,600, of which, only about $650,000 will be expended. This year, the amount called for, is $605,000. The institutions under the charge of this department are all in a good condition, especially the

NURSERY ON RANDALL'S ISLAND.

In this institution over 1,300 children, from two to fourteen years of age are maintained and educated. Many persons of respectability and worth, in all parts of the country, owe all that they are to the beneficent policy of this institution. Of these facts I can testify, from a personal connection with this department, for several years.

LUNATIC ASYLUM.

The management of the Lunatic Asylum merits approval. There are now 627 inmates under treatment. A steady and satisfactory improvement is exhibited, both as to the general arrangements of the institution and condition of its patients.

BELLEVUE HOSPITAL.

The Bellevue Hospital has received extensive improvements within the last year,—a large wing and an additional story have been added, by means of which the hospital is capable of accommodating, at least, 1,500 patients. There are, on an average, about 800 patients within its walls, who receive the kindest nursing, and the most skillful medical and surgical treatment. It is one of the largest and best conducted hospitals in the country.

ALMS-HOUSE.

The Alms-house proper, together with the island hospital, now provides shelter for about 2,000 persons. The

number is, of course, greater at this season of the year, and, especially, in consequence of the large number of persons thrown out of employment by the recent financial disasters.

The other institutions connected with this department, including the Work-house, Penitentiary and its hospital, and the prisons in the city, contain, at present, about 3,000 inmates, making, with the other institutions, nearly 8,000 persons, of all ages and countries, supported by the city.

This department, also, at this season, assists a large number of out-door poor. At the present time aid is afforded to 2,300 persons, a larger number than ever before at this time of the year.

CROTON AQUEDUCT DEPARTMENT.

The economical and judicious management of the Croton Aqueduct Department, during the entire period of its existence, merits the highest commendation.

The Aqueduct itself is in excellent condition. The annual examination, made last month by the Chief Engineer, demonstrates the solidity of its structure and the skill of its builders. No injury or defect of any extent was found throughout its whole length, a distance from the dam to the High Bridge of thirty-eight miles. Within the past year, additional fencing has been erected to protect the Aqueduct and its grounds, making, with the fencing previously done, a length of about thirty-six miles. During the past year the Department has commenced a hydrographic survey of the Croton river above the dam, which is to include the entire valley, as well as the "water shed" of the Croton river. This survey has been undertaken to

ascertain suitable points for storage reservoirs, in which to collect the surplus waters of the river in favorable seasons, so that in periods of drought a full supply of water can be furnished to the city.

The department has also laid, during the last season, four miles of water pipe, making, with that previously laid, a total length of pipe of all sizes of two hundred and fifty-nine miles.

The annual receipts for water rents were, for the year just ended, $697,370 51—a larger sum than ever before received. The following table will exhibit the rapid increase in these rents:

Year.	Amount received.
1850	$458,951 87
1851	458,789 78
1852	533,955 16
1853	579,966 30
1854	608,966 15
1855	674,736 42
1856	662,949 57
1857	697,370 51

In addition to the above, the arrears of rent collected during the last and previous years by the Comptroller, Receiver of Taxes and Clerk of Arrears, will amount to at least $100,000; and there remains, including the rents unpaid for the last year, about $80,000 still to be collected. The income of the work is now more than sufficient to pay the interest on the debt created for its construction, (about $14,000,000,) although no charge is credited to the department for the use of the water in the public buildings of the city, and on Blackwell's and Randall's Islands.

The department, in consequence of the rapid increase of population in the city, and the necessity of a greater supply of water, recommended several years since the construction of a large receiving reservoir in the upper part of the city. The application was made by the Common Council to the legislature, and an act passed in 1853, authorizing the land between Eighty-sixth and Ninety-sixth streets and Fifth and Seventh avenues to be taken for a

NEW RESERVOIR.

The award of the Commissioners for which, amounting to $708,000, was confirmed by the Supreme Court. The department has since exchanged lands with the Commissioners of the Central Park, by virtue of an act of the legislature, passed at the last session, by which the new reservoir will conform to the natural contour of the ground, reducing the cost of its construction at least $200,000, and by its irregular and curved exterior line giving it the appearance of a natural lake, and making it one of the most attractive features of the park. This immense work will cover an area of over one hundred and six acres, with a water surface of ninety-six acres, and a depth, when full, of thirty-eight feet. Its capacity will be 132,035,916 cubic feet, and will contain 1,029,800,145 gallons, New York standard measure. But for the suit brought by two parties, whose bids for its construction were rejected, this immense work would have been by this time in an advanced stage of progress. No further delay is anticipated, as the general term of the Supreme Court has decided in favor of the action of the department in the award of the contract. If the work be not delayed, it will be entirely completed and the Aqueduct continued to it in about two

years. When thus completed, it will, together with the present upper and lower reservoirs, be capable of containing a supply of water for sixty days when the population of the city shall exceed 1,000,000.

SEWERS.

The construction of sewers has since 1849, been under the charge of this department. The sewerage of the city has only become general during the last few years. Most of the sewers have been built since 1838. Prior to 1849 they were constructed in an imperfect manner, and many of them proving insufficient have been rebuilt by this department. There are now sewers, making together a total length of 160 miles. Twenty-three sewers have been constructed during the last year. One of these, in point of capacity and solidity of construction, is unequaled. It is intended with the lateral sewers which will discharge into it to drain a superficial area of seven hundred acres. I recommend as a sanitary measure, that an ordinance be passed providing that all cesspools, drains, &c., hereafter constructed, shall be connected with the sewer in the street, where one exists. The sewers themselves should, as far as practicable, be carried to the current of the river, so that their contents may be swept away by the tidal currents, instead of being deposited in the slips.

PAVEMENTS OF THE CITY.

The control and direction of the pavements of the city is now by the recent charter, placed in charge of the Croton Aqueduct Department. This change is a fortunate one, as the repairs are now much better done and at a greatly reduced cost.

CITY INSPECTOR.

The department of the City Inspector has, by the charter, the cognizance "of all matters affecting the public health, pursuant to the ordinances of the Common Council, and the lawful requirements of the Commissioners of Health and the Board of Health."

STREET CLEANING.

In this department is the bureau of Sanitary Inspection and Street Cleaning. That the streets be well and thoroughly cleaned is demanded by our citizens, and is indispensable to the preservation of the public health. In most of the cities in Europe, and in several cities in this country, the cleaning of the streets is a source of revenue to the municipal authorities, the manure being more than sufficient to pay all the expenses. In this city, however, a large annual expenditure is required for this purpose. This is shown by the following table—

TABLE OF EXPENDITURES AND RECEIPTS FOR CLEANING STREETS:

YEAR.	EXPENDITURES.	RECEIPTS.
1840	149,976 73	38,711 72.
1845	150,905 77	28,308 82.
1850	158,637 68	32,191 60.
1851	179,991 75	52,090 99.
1852	288,924 63	30,077 90.
1853	289,625 97	26,837 22.
1854	313,186 47	7,009 04.
1855	278,262 42	4,745 12.
1856	396,251 73	10,502 83.

This table shows the receipts from the manure, and the striking decrease in the receipts from this source for the last four or five years.

The streets should not be swept during the business hours of the day, when the cost of the work must be greatly enhanced by constant interruptions. The manure should be immediately removed from the streets, and should not be allowed to remain upon the wharves.

It has been much debated whether the streets should be cleaned by contract or by persons employed directly by the department. In my opinion, it should be done by contract, and the contractors held to a strict accountability.

THE MARKETS.

The markets are under the charge of this department; with their sites they are valued at $1,176,000. Including in the expenses, the interest on the property in use, their maintenance involves annually a large expenditure beyond the revenue received. The following table details the several items of expenditure and receipts for the last three years.

	FEES.	RENTS.	STANDS.	TOTAL.	EXPENDITURE.
1854	$70,645 67	16,155 25	15,236 00	102,090 43	44,000
1856	70,572 67	17,867 69	15,047 67	103,488 23	44,000

Valuation of property in use by markets	$1,176,000
Interest at 6 per cent. per annum	70,560
Expenses in 1856	44,000
Total	$116,560
Total receipts, 1856	103,488
Loss	$13,072

I recommend that application be made to the legislature to confirm in the city, beyond dispute, for market purposes, the title to the land which has been made west of West

street, at Washington market, that a market may be erected thereon, and that the site of the old market be disposed of, unless it be deemed necessary to retain it to meet the future growth of the business. The business transacted at the present market, in dilapidated sheds, erected amidst and surrounded by filth, is immense.

STREET DEPARTMENT.

The Department of Streets will require your close scrutiny and supervision. An entire change in the system of conducting the business belonging to and under charge of this department, is absolutely required. A better and stricter accountability of the collectors of assessments and of the manner of making their returns should be adopted.

The charter has abolished the department of Repairs and Supplies, and has made it a bureau in the Street Department. The ordinance lately adopted regulating the Street Department, and its bureaux has, I am informed, created more officers in the bureau of Repairs and Supplies than existed in the old department. I recommend a careful revision of this ordinance. Under this department is also the bureau of Lamps and Gas.

LAMPS AND GAS.

The expenditures on this account for the last year were about $400,000. The amount required in the levy of this year is $460,634. The cost of lighting the lamp district has increased largely since 1850, when it was about $185,000. The district, however, has been greatly extended since that time. The several gas companies having con-

tracts with the Corporation, light the following number of lamps:

COMPANIES.	NO. OF LAMPS.	COST EACH PER ANNUM.
New York	3250	$25 78⅔
Manhattan	7898	25 00
Harlem	750	28 80

Besides these, there will be an addition probably of 1500 new lamps during this year.

The cost of the gas for the City Hall, Station-houses, Police offices, and other public buildings, is estimated at about $30,000. The cost of lighting the city has also been enhanced by reason of the general substitution of gas for oil lamps. The expense of lighting the latter is estimated at $52,700 for the present year.

THE FIRE DEPARTMENT.

The Fire Department is now composed of fifty-two engine companies, sixty-two hose companies, fifteen hook and ladder companies, and four hydrant companies, with a force of over two thousand men. The apparatus is generally in good condition.

The estimate for this year for apparatus and their repairs, hose, &c., is $60,000, including a deficiency for last year, There are other large expenditures for buildings and repairs to them, salaries, lighting the engine and other houses, which may be estimated together at $50,000.

The real estate and houses on leased ground belonging to the Corporation in use by this department, are valued at $300,000, and the apparatus at $75,000, the interest on which, at 6 per cent., would amount annually to $22,500—

making the total yearly cost of protecting the city against fires, independent of the use of the water and hydrants, about $132,500.

The voluntary service of the members of this department, frequently bestowed at the hazard, and often the sacrifice, of their lives, have given them a strong claim to the good will of the Common Council and of our citizens.

The introduction of steam fire engines into the department has been the subject of consideration of previous Common Councils, and an appropriation was made, last year, of $19,500, for the purpose of testing the experiment. Nothing, however, has yet been done, that I am aware of, toward purchasing any apparatus of this description. I recommend the prosecution of the experiment.

The expenditure upon the Fire Department inures largely to the benefit of the fire insurance companies, whose profits have been largely increased since the introduction of the Croton water. It may well be considered whether these companies should not contribute to the support of the department to an extent beyond the tax now levied on their capital stock. I recommend the subject to your attention.

THE CENTRAL PARK.

The land for this park, taken by virtue of an act of the legislature, passed 1853, has cost as follows:

Total amount of award and costs.....	$5,141,426 30
Less amount assessed on property benefited..	1,657,590 00
Net amount of cost.....	$3,483,836 30

The Commissioners, appointed by the last legislature, have advertised for plans for laying out, embellishing and ornamenting the park, and a large number of men have been, for some time past, and are now, employed in clearing it of incumbrances, and doing other rough work.

When the plans contemplated are fully carried out, this park will be the greatest ornament of our city. Thousands will daily enjoy its magnificent gardens, shaded walks, extended views, and other objects of interest which it will then afford. Its area is over 700 acres. It is two and a half miles long by nearly two thirds of a mile wide.

London, Paris, Vienna, Berlin, and other cities of Europe, have their parks, walks and drives; but none of these will exceed the Central Park, in the variety of its features of attraction, when time has been afforded for its improvement

IMPROVEMENTS ABOVE FORTY-SECOND STREET.

The Central Park being in the course of improvement, the streets adjoining and in its immediate vicinity will, no doubt, soon be required for building purposes.

Many of these streets have not yet been opened according to law, as it is technically called, and I would recommend, in order to facilitate their regulation, and save expense to the property holders, as well as to induce improvements on them, that all the above streets, above Forty-second street and below One hundred and twenty-fifth street, be opened by one and the same proceeding. In this way, the title of the streets will be vested in the Corporation. The cost of doing this will be small, and, when done, the owners of property may actually open and work

the streets at their own cost and pleasure, instead of waiting for the slower and more expensive process of the public. The taxable property of the city will thus be largely increased, and much of the tide of improvements which have aided in building up the cities adjacent to New York, will be confined to this island.

CITY RAILROADS.

The necessity of compelling the city railroads to lay their rails as far as the several avenues are regulated, on which they are located, is seriously felt by all the residents of that portion of the city above the present termini of these roads. They should, in return for the grants they have received from the Common Council, willingly extend their several roads, as the same are required by the public. Population will always follow in their lead. This would materially promote the building up of this part of the city, and enhance the value of property.

HARBOR OF NEW YORK.

Encroachments having been frequently made, and obstructions placed in the harbor of New York, by reason of the cupidity or short-sightedness of interested parties, and it being evident to those acquainted with its "noble dimensions, and great capacities for commerce," that unless they were prevented, by legislative action, the harbor would be materially injured, if not entirely ruined for the purposes of navigation, an act was passed by the legislature, at its session in 1855, appointing a commission, denominated, the "Harbor Commission," for the purpose of ascertaining the condition of the harbor, and the encroachments which had been made on it, with instructions to report a plan of bulk-

head and pier line around the island and harbor of New York."

This commission having entered upon their duties, employed several intelligent and skillful engineers, among whom was Professor Bache, of the United States Coast Survey, General Totten, of the United States Engineers, and Commander Davis, of the United States Navy, under whose accurate surveys, plans were presented, not only of the pier and bulkhead lines around the island of Manhattan, but extending on both sides of the East river, as far as Throg's rock, on both sides of the Harlem river, to a point about a mile beyond Spuyten Duyvil Creek, on both sides of the Hudson, to the Narrows, and around Staten Island, laying down with great minuteness the depth of water, the tidal currents, and other information of great importance to the interests of commerce and the city.

This plan having been submitted by the commission to the legislature, at its last session, it was, with a slight amendment as to the bulkhead line on the East river, between Seventeenth and Thirty-eighth streets, adopted, and an act passed fixing the same as the permanent bulkhead and pier lines of the city harbor. A copy of these plans, then adopted, have been purchased by the Commissioners of the Sinking Fund, and are now deposited in the Comptroller's office of this city.

This work will secure to us forever, our great natural advantages for commerce, and enable us ultimately to grasp the commercial sceptre of the world, provided the lines established are not permitted to be changed on slight pretexts, by the action of the Common Council, and the state

legislature. To guard against such alterations, I recommend, that Congress be memorialized, to adopt and establish these lines, under the general power granted in the constitution to regulate commerce.

In connection with this subject, the Harbor Commissioners, on the reports of the scientific gentlemen employed by them, reserved, on the North and East rivers, large areas, to be used hereafter as wet basins.

WET BASINS.

That this city will, in a few years, if it does not now, require these for the purposes of her commerce, can not be doubted, by any one who has watched and studied the increase of her trade, as well foreign as coasting and internal. In fact, they have always been marked as the foundation of commercial greatness. The docks of London and Liverpool are admirable structures, of vast magnitude. What, now, are the accommodations for shipping in this port? Witness the delays in discharging and loading cargoes, even in the present condition of our trade, and that it is greatly to increase, must be evident, when we look back, for a few years, and see what its advance has been. This will be evident, on looking over the following table of the tonnage arrivals at this port since 1824:

	U. S. Tonnage.	Foreign Tonnage.	Total Tonnage.
1824....	236,080....	16,689....	252,769
1834....	352,225....	92,679....	440,904
1844....	438,074....	155,298....	593,373
1854....	1,442,278....	477,034....	1,919,313
1857....	2,126,945....	508,758....	2,635,703

The following table will also exhibit the imports and exports of this port, since 1697:

	Imports.	Exports.
1697	22,895	50,465
1773	1,446,000	381,230
1823	30,601,455	21,889,696
1833	60,944,044	24,723,903
1843	50,308,526	23,440,326
1853	178,270,999	78,206,290
1854	181,427,993	101,377,087
1855	164,776,511	99,972,302
1856	213,556,649	120,886,296
1857	230,618,129	117,724,329

This is independent of the coasting and internal trade by the Hudson, the canals and the lakes. The magnitude of the latter internal trade, and its rapid increase, since 1835, will be evident, on looking over the following figures:

	Tonnage of Agricultural products, Erie and Champlain Canals.
1835	753,061 tons.
1845	1,204,915 "
1850	1,850,247 "
1854	2,223,743 "

This statement does not include the tonnage brought by railroads, which is also very large.

I would, therefore, recommend to you, that such measures as may be necessary to carry out the suggestions I have made, in reference to this subject, be adopted, as early as possible.

I would, also, suggest that an improvement is necessary in the mode of the construction of

WHARVES, PIERS AND SLIPS.

They should be built on a plan of solidity, either of iron or stone, commensurate with the trade they are destined to accommodate.

The construction of our wharves and piers is inferior to that of most commercial cities, and their reconstruction must soon be commenced.

I suggest that the subject be taken into consideration by your Honorable Body, and that the opinion of scientific and practical men be obtained, as to the best material and plan of their construction.

CONTRACTS.

I am informed that in various departments, work is being done under CONTRACTS that have expired, or without any contracts at all. I shall give no facility to payments for work done under these circumstances, and I recommend that the heads of the departments be at once instructed to advertise for contracts in all such cases.

COMMISSIONERS OF EMIGRATION.

The Commissioners of Emigration have now the use of Castle Garden, by the assignment of a lease to them from the original lessee of the Corporation. By means of the accommodations afforded them here, they are enabled to protect and defend the emigrant on his arrival at his new home, from the frauds and impositions so frequently heretofore practiced upon him. This commission was established in 1847, and has invariably been composed of men known to the whole community for their high character and generous philanthropy; since that time 2,500,000 immi-

grants have arrived at this port, bringing with them, in numerous cases, large amounts of money, and what is of still greater importance, a vast addition to the active industry of the country. The Commissioners are bound by law to provide for all emigrants arriving from all foreign ports for five years from their arrival, from the commutation fund, which is made up of the $2 *per capita* paid by the agent or ship owner of the vessel bringing them. They have under their charge at present 2085 persons distributed among their several hospitals and refuges.

CITY PROPERTY.

The value of the property owned by the Corporation, has greatly increased within the last seven or eight years. In 1850 it was estimated at a valuation of about thirty millions of dollars. Its present valuation is at least forty-two millions.

The Corporation own real estate, under lease, in various sections of the city, worth.....	$797,000 00
The property in possession of the Almshouse Department, including Blackwell's and Randall's Islands, and the buildings thereon, the Halls of Justice and the block on which they are built, Bellevue Hospital and grounds, and certain lots on Ward's Island, estimated together at	1,700,000 00
Sundry lots and gores in several parts of the city.....	704,600 00
Lots at Brooklyn.....	15,000 00
The Croton Aqueduct, the Reservoirs and other property in charge of the Croton Aqueduct Department.....	16,182,000 00

Property in use of the Police.....	$175,700 00
Engine and other houses used by the Fire Department.....	315,400 00
Property in the use of the Board of Education.....	1,593,600 00
Market property.....	1,176,000 00
Central Park, and the several other parks belonging to the city, together, eighteen in number.....	13,984,369 90
Common lands.....	343,450 00
Ferries belonging to the city, nineteen in number, with the lots appertaining thereto.....	1,617,000 00
Piers and bulkheads on the East and North rivers.....	4,206,000 00
Commuted quit-rents and water grants...	460,750 00
Making a total of.....	$43,270,869 90

It will be seen that the increase alone of this property since 1850 is more than equal to the permanent actual debt of the city.

STREET COMMISSIONER.

I find the Street Department to be in a condition entirely unprecedented. There are two claimants to the important office of Street Commissioner, one of them in actual possession, and the other claiming that his title is perfect and needs only possession to enable him to discharge all the duties of the office. Each has appointed numerous officers under him, and the City Treasury is called upon to pay a double set of officials. Each claimant has invoked the aid of the courts to determine his title, and has put his compet-

itor under injunction restraining him from discharging the duties of the office until the title shall be ultimately determined. In this anomalous state of affairs which can only be relieved from embarrassment by the decision of the courts or the more prompt action of the legislature, declaring the office vacant and defining the manner in which it shall be filled. The safety of the public treasury will require me to refuse my signature to all warrants for the payment of their salaries, or for the payment for any work which either may undertake. Some inconvenience may hence result from delay in the execution of some public works, and I shall rejoice if any mode can be adopted, whereby the department may be relieved from its present paralysis, and be enabled to discharge with vigor its numerous and important duties.

NEW CITY HALL AND CENTRAL PARK COMMISSIONERS.

An act was passed at the last session of the legislature, appointing a commission, to superintend the erection of a new City Hall in this city, and authorizing the Common Council to raise, by law, a sum not exceeding two millions of dollars, by the issue of a stock, to be called the "New City Hall Stock of the city of New York," for such purpose, to be expended under the direction of five commissioners, named in the act.

An act was also passed, for the regulation and government of the Central Park, naming eleven commissioners, under whose exclusive control and management the park was placed. Both works should be pushed toward completion, as rapidly as possible: the City Hall to give the accommodations, now absolutely required for the public offices of the city; the park, for the health and recreation

of the people. But I would recommend, that instead of the work being done under the direction and control of the present officers, that application be made to the legislature to give the appointment of them to the Mayor, with the consent of the Board of Aldermen. Both works are strictly municipal, and the commissioners who execute them should owe their appointment to the city authorities, or to the people, who alone bear the expense. In my opinion, the number of the commissioners is too great, especially the one for the Central Park; a commission of three for the City Hall, and five for the Central Park, would insure greater expedition and economy.

EXECUTIVE COUNCIL.

It being evident to me, that harmony of action among the several heads of departments should exist, and also, that the Mayor, in order to fulfill satisfactorily his duties, should know the measures under consideration, and the several matters in charge of each department, I am decidedly of opinion, that the several heads of departments of the city government, should regularly meet in council with the Mayor, for the purpose of consultation, in relation to the business and interests of the city, and each of the departments of its government, to prevent the conflict of the departments with each other, and insure economy in the public expenditure. For instance, the Street Commissioner has cognizance of opening, altering, regulating, grading, flagging, curbing, guttering, and lighting streets, roads, places and avenues, and of other matters enumerated in the charter. The Croton Aqueduct Department has, by the same instrument, the charge of the construction of sewers, and of the paving, repaving and repairing streets,

and digging and constructing wells. Now, the Croton Aqueduct Department may have an application for the paving of a street; this cannot be done until it is regulated and graded, which work is to be done according to the charter, under the direction and charge of the Street Commissioner. By consultation together at the meetings, beforementioned, the necessary information would be obtained, and unity of action secured. The Mayor would also, at these meetings, have the opportunity of consulting the heads of departments in reference to matters before the Common Council, and which may be submitted to him officially. The want of such consultations has no doubt frequently prevented the Mayor, from exercising that supervision over the departments, which the charter requires of him.

It is apparent, however, that proper harmony of action cannot exist between the executive of the city and the heads of the departments, so long as any of them derive their appointment from the people, and not from the Mayor and Common Council. I am quite clear, that all the results of good government cannot be realized until the executive is made responsible for his administration, and clothed with the necessary powers to make it efficient. I, therefore, recommend that application be made to the legislature to give the appointment of all the heads of departments to the Mayor and Common Council, at the expiration of the terms of office of the present incumbents.

POLICE.

Several recent acts of state legislation, in respect to this city, have been the subject of great, and, in some respects, just, animadversion. Their execution was confided to

agents not selected by those who are taxed for their salaries and are immediately affected by the operation of these laws. The exercise of such power by the state legislature, in respect to the police, embodied in the act to establish a Metropolitan Police District, having been held by the Court of Appeals to be consistent with the constitution of the state, it becomes the duty of every good citizen to receive that decision as the law, but grave objections to such legislation still exist in undiminished force. It cannot be denied that instances of abuse and corruption in the city authorities may exist, rendering it necessary for our citizens to appeal to the law-making power of the state for redress. Reforms may be demanded which would be vainly sought through unfaithful agents. In such an extreme case for our citizens to invoke the interposition of the state for their protection, would be among the most sacred of rights. But we must not rashly abandon the duty and the right of local self-government. We must remember that it operates in this city on the peace and safety of a community embracing three quarters of a million of people, and affects most intimately the interests and comfort of every individual citizen. The system must not be abandoned, but be made to work well. Every good citizen must contribute his share of the attention, time and effort necessary to govern it, and instead of distrusting and deserting the system, we must act upon it and through it.

The interposition of state authority, to change without the concurrence of our immediate representatives the administrative system of the city, can only be justified by clear evidence that it is called for by the voice of our people. It involves the danger of rash and unwise legisla-

tion, and is exposed to the temptation of abolishing or creating public offices, to accommodate partisan necessities.

But the most important admonition which the subject suggests is to us, who are intrusted with the duties of the city administration. If we would maintain the right of local self-government, it must be by exercising the powers confided to us with efficiency, with wisdom, and with integrity, for the benefit of our common constituents. All human societies will try to provide themselves with government enough to preserve their existence. When one set of forms fail, they will take another, even though it be worse. Foreign usurpation generally succeeds through domestic misgovernment, which makes the people indisposed to resist it. There will be no successful appeals from the city authorities so long as they give the people good government.

It may be advisable to preserve that feature of the Metropolitan Police act, which extends protection to such portions of the adjacent counties as may fairly be considered the suburbs of New York. But there are provisions in the law, in regard to which well-founded objections are entertained; among these is the creation of a Board of Commissioners, not deriving their appointment from the local authorities of the city, and yet controlling a most important branch of municipal administration. I also think it decidedly objectionable, that the state government, besides creating the Board and appointing its officers, have also fixed their compensation, to be paid out of the city treasury, without a right on the part of the people of this city to regulate or control them in any degree; thus the people who pay, and who are best able to determine the

value of the service, are precluded from the exercise of a right properly belonging to them, and which should never be yielded.

I consider the police of a metropolis to be an army for preserving domestic order in time of peace, just as the regular army protects us from foreign invasion in time of war. I can see no reason why the organization of the one should not be assimilated to that of the other. It should be our object to elevate the guardians of our lives and property to a position of dignity scarcely inferior to the guardians of the national honor. I would recommend, therefore, that the police, in the designation of its men and officers, and also in their appointment, suspension, trial and removal, should be organized and governed according to like features in our military system, the Mayor being considered the head of the force. Under such a system we might reasonably expect that our domestic guard would cherish, by their mode of organization, that spirit of pride and devotion to duty which distinguishes the army of our nation.

In making these recommendations I do not wish to be understood as intending to reflect, in any degree, upon the efficiency of the force organized under the act, on the contrary, considering their hasty organization, and the excitement of the public mind, they have discharged their duties with commendable fidelity, and have been rapidly gaining the public confidence. In my opinion, they form the basis of a most efficient police.

CONCLUSION.

I have thus cursorily reviewed the leading matters pertaining to the administration of the city government. The

length of this document is the best evidence of the magnitude of the interests committed to our charge, and yet I am conscious that justice has not been done to any of the subjects to which I have called your attention.

The practical conclusion forced upon me, by this review is that the city of New York has not a good government, and that the just expectations of the public cannot be realized without great changes in the organic laws under which the public officers act. The organization of the departments is not yet uniform, some of them are partially subject to executive supervision, whilst others are wholly independent of that salutary control. They have the appointment of the heads of bureaux, and the clerks in their several departments.

The elective system has also been greatly extended, as to apply to the police and civil justices, school officers, and many minor places of trust and profit. There is no accountability, except to the people, who, in a great city are too much engaged in their private business, to pay much attention to the selection and conduct of public officers. This unfortunate state of things converts the officer into a politician, looking only to place and re-election.

I am satisfied that some of the evils of which our citizens complain, are due to the complicated organization of the executive branch of the government, in which unity and accountability are sacrificed in the pursuit of place and power. If the government of this city, and the mode of keeping the accounts and disbursing its revenues, were made to conform more closely to the general government, now approved by the experience of nearly three quarters of a century, I am satisfied that the people of this city

would at least have no greater grounds of complaint than the citizens of the United States have against the system of Federal administration, which in the main, has been economical and satisfactory.

To sum up this matter, I think that the Mayor should nominate the heads of departments, to be approved by the Board of Aldermen, that these officers should meet with him in frequent council, and be removable at his pleasure; that the appointments in the respective departments and bureaux should be subject to the approval of the Mayor, on the nomination of the heads thereof; that the Finance Department should be organized on the principles of the national treasury department, introduced by Alexander Hamilton, and which has been pronounced incapable of improvement by successive secretaries of the treasury; that all minor officers should be appointed by some competent authority, and not elected; that strict construction and enforcement of the statutes and ordinances and rigid adherence to the law, be made the duty of every public officer; and that the assumption of doubtful powers be carefully avoided.

Under this system, if the people elect an honest and competent Chief Magistrate, it will not become necessary to appeal to the superior legislative power of the state for aid; corruption and dishonesty will be visited by speedy punishment and removal; the public revenues will be raised without oppression to the tax payer, and expended without loss to the treasury, and the government of this great city be as much a matter of pride to its inhabitants, as now it has become a source of mortification and shame.

To you, gentlemen, the public look to bring about this

change, by framing proper memorials to the legislature for the grant of the powers required, and by an honest administration of the powers, which we now possess; and I beg to assure you, that in these efforts to secure a good government, you may rely upon my cordial co-operation.

DANIEL F. TIEMANN.

DOCUMENT No. 2.

BOARD OF ALDERMEN,

JANUARY 5, 1858.

The Annual Report of the Croton Aqueduct Department, was received, laid on the table, and ordered to be printed.

D. T. VALENTINE, *Clerk.*

CROTON AQUEDUCT DEPARTMENT,
December 31, 1857.

To the Honorable the Common Council
of the city of New York:

In obedience to law, the Croton Aqueduct Board beg leave to present the Annual Report for the current year, showing, in as succinct form as possible, under their appropriate heads, the expenditures for the year, and the objects of labor which have occupied the attention and time of the Board and its officers.

Aqueduct Repairs and Improvements.

The most important work paid for under this head, is that which is necessary along the whole line of the work, from the dam to the distributing reservoir. A most minute inspection and watchfulness has always been, and is daily kept up, by the superintendents along the entire line of the work, in order to detect and check, in its incipiency, any action of time or other imperfection which might endanger the safety of the work, and to guard against any encroachments on the city property connected therewith This care and this work is the duty of superintendents, whose ability, fidelity and prudence have been tested by experience varying from nine to seventeen years, and the result has been such as to fully entitle them to the greatest confidence.

The opposition, which has heretofore existed, to the erection of fences on the line of the aqueduct, to prevent encroachments or damage, still continues; but, through the conciliatory measures and firm assertion of the rights of the Corporation, constantly shown by the Board, it seems to be, in some degree, abated in violence. The quantity of fencing put up during the year is six thousand two hundred and fifty-seven lineal feet in length.

The examination of the interior of the conduit was made in the early part of the month of December. The water was shut off at Croton lake on the 2d December, and on the 3d the Chief Engineer entered the aqueduct at the dam, and, accompanied by his usual attendants, the Assistant Engineer and the superintendents of the divisions, respectively, made a careful and complete inspection of the

interior of the aqueduct through its entire length, coming out of the conduit, at the Receiving Reservoir, in this city, on Saturday, the 6th December. The gates at Croton lake were re-opened on the 6th, at noon, and the water reached the Receiving Reservoir on Sunday, the 7th, at 9·30 A. M.—having been shut off from the city ninety-four hours, being twenty hours longer than that taken during the past few years.

The cracks in the masonry on the embankments still continue, though yearly diminishing in size and importance; but, however slight they may be, it is the part of prudence to check their progress as soon as they are discovered. The state of the aqueduct, as shown in the examination this year, like those of the years preceding, is evidence of the durable character of this great work, and of the extreme care with which it was constructed. As soon as the new reservoir shall be completed, the large storage of water in the city will enable the Board to make more thorough and extended repairs on the line. With our present city storage, it would be attended with great inconvenience and extreme danger, in case of fires, to keep the water shut off a longer time than that usually taken for our annual repairs; but it is to be hoped that the speedy completion of the new grand reservoir will relieve us of this difficulty, by enabling us to take longer time for our work, and still supply the city with water during its progress.

The original houses for the superintendents were of the most cheap and frail description—the constant expense necessary to keep them in a tenantable condition, has forced upon the Board the conviction, that true economy required the construction of new houses, of such materials

and character as to insure entire permanency. These cottages have this year been completed throughout the lines. The one at the dam is a substantial stone building—in its style it is designed to be an ornament to the grounds about the dam, and in its size it is meant, not only to provide apartments for the superintendent of the dam and first division, but to furnish necessary accommodations for the engineers, whose duties frequently oblige them to be at that portion of the line, and also to accommodate the inspecting committees of the Common Council, and other members of the city government, whose taste may induce them to visit the Croton dam and lake—those magnificent works of nature and art, which contribute so essentially to the comfort, health and prosperity of this great city.

The other cottages, six in number, are plain and substantial buildings, intended solely for the use of the several superintendents.

The total cost of the supervision and the repairs of the aqueduct, both for the surface and the interior, together with the cost of fencing, and the construction of the cottages referred to, has been forty-four thousand six hundred and twenty dollars and seventy-two cents. The details may be found in schedule No. 7, in the appendix.

Croton Water Works Extension.

The chief work under this head, which has engaged the attention of the Board, during this year, is the new grand reservoir. The land for its site was acquired during the year 1856, as shown in our report of that year. The ground thus taken was rectangular in form, and was bounded by Eighty-sixth and Ninety-sixth streets, and Fifth

and Seventh avenues. Acting, however, under the authority of an act of the legislature, passed April 17, 1857, an exchange of property has been made between the Commissioners of the Central Park and this Board. By this exchange, an area, equal in extent to that originally acquired, was laid out in a shape conforming strictly to the existing contour of the ground—the line being run in such a manner as to take advantage of the aids to economy, and excellence of the work, which the natural shape and character of the ground presented. Much rock cutting, and heavy embankment, has been thereby avoided—a saving in cost of nearly two hundred thousand dollars secured, and the reservoir itself, by its shape and location, is made the chief ornament to the Park. When filled, this great storehouse will present the appearance of a beautiful lake and the Board suggest, that an appropriate name, by which it may be distinguished hereafter, would be "The Lake of Manahatta."

The maps of the land thus exchanged, signed by the Commissioners of the Central Park, and the members of this Board, are on file in the offices of the Comptroller, of the Central Park, and of this department respectively.

The ground taken for the reservoir comprises 106·75 acres in area. The water surface will be ninety-six acres in area; and the depth, when full, will be thirty-eight feet. Its total capacity will be 122,035,916 cubic feet, or 1,029,880,145 gallons, New York standard measure.

The scientific examinations and calculations necessarily preliminary to the exchange of land, and to the final preparation of the work for contract, have been, from their commencement, under the more immediate supervision of

George S. Greene, Esq., resident engineer of the work. The specifications have been drawn with extreme care, and in great detail, and, being fully carried out, the work produced cannot but prove perfectly substantial and durable, and adequate, in all respects, to the purposes required.

During the progress of the surveys, and other preparations for putting the main work of the reservoir under contract, a sewer was laid out and built, from near the proposed line of the reservoir in Eighty-sixth street, to the present waste sewer from the Receiving Reservoir, connecting with it at Eightieth street. It is four feet in diameter, and one thousand nine hundred feet long, and is intended as a conduit from the waste weir of the new reservoir, and as a means of drawing off the water therefrom, if required. Owing to circumstances, hereinafter explained, this is the only actual work yet done, toward the construction of the great work so much needed by our city.

All the calculations, plans and specifications for the reservoir being fully completed, the work was advertised for contract, and on the 26th August the proposals were opened according to law, in the presence of the Comptroller of the city, and the Board. As in all other cases where work is let by this Board, those proposals which were not in conformity with the requirements of the ordinance, were rejected as informal, and consequently not to be considered in the award of the contract. One of these informal proposals was put in over the name of Dinsmore, Wood & Co.

Before the Board had acted upon those proposals, which were adjudged to be in legal form, Messrs. Dinsmore, Wood & Co. commenced proceedings at law to enforce the consid-

eration of their bid. The next lowest bidders, were Fairchild, Coleman, Walker and Brown, and next above them were John P. and Thomas Cumming.

At about the same time with the suit of Dinsmore, Wood & Co. the Messrs. Cumming instituted proceedings to compel the Board to award the contract to them on the ground that the proposal of Fairchild & Co., was also, by the terms of the law, informal. The claim of Dinsmore, Wood & Co., was adjudicated in the special term of the Supreme Court, and the action of this Board sustained. An appeal was taken to the general term, and since that period all three of the parties claiming, have been heard at the general term of that court, and the action of this Board again sustained. The papers connected with the award, will accordingly be sent to your Honorable Body for confirmation.

Had it not been for the restraint thus placed upon the Board, the construction of the new reservoir would at this time have been in an advanced stage of progress; promising the early completion of a work much required by the city, and giving daily employment to upward of a thousand men. The specification, and form of contract for the reservoir, and the proposals received, are placed, as a matter of reference, in the appendix to this report.

Under the head also, of Croton Aqueduct Extension, the Board have this year commmenced a hydrographic survey of the entire valley of that portion of the Croton river, which lies above the point at which we take its waters, namely, at Croton Dam. The object of this survey is to establish suitable points for storage reservoirs, in which to collect the surplus water in favorable seasons.

When the daily consumption of the city shall exceed the quantity afforded by the river, in seasons of drought, these storage reservoirs will be required to make up the deficit. It is the part of prudent foresight to acquire the sites for these contemplated reservoirs at an early day, even though the actual construction of them should be delayed until called for by necessity.

With this view, the surveys now in progress have been carefully prosecuted, and when completed, will show the entire "water shed" of the Croton river, and that of each of its main tributaries, as well as the character and shape of every locality developed by the examinations as being favorable for the construction of dams, and the preservation, in proper condition, of large bodies of water.

The party engaged on this important work is under the immediate charge of James H. Morley, as engineer. The party went into the field in July, and continued in camp until the 21st December, having made a thorough examination of about two thirds of the whole area to be surveyed.

The party will take the field again, early in the spring, and the entire work will probably be completed before the end of the summer.

The cost, thus far, has been four thousand five hundred and ninety dollars and seventy-four cents.

Water Pipes and Laying.

The expenditures under this head, during the past year amount to ninety-one thousand two hundred and ninety-three dollars and twenty-seven cents.

The particulars of expenditures, and the new lines of pipe laid, may be found in schedules 9 and 17, respectively, of the appendix.

The quantity laid, since the introduction of the Croton water together with the number of miles put down under the Board, as at present organized, may be found in schedule 18, which also gives the size of each kind now in service.

Income from Water Rents.

The yearly receipts, notwithstanding the depression in the financial world, show a gratifying increase.

The amount received this year is six hundred and ninety-seven thousand three hundred and seventy dollars and fifty-one cents, being an increase over the largest yearly receipts yet known, of twenty-two thousand six hundred and thirty-four dollars and nine cents.

St. Nicholas Hotel.

Reports having been made to this department in 1855, bearing, in general terms, the enormous and extraordinary consumption of water by the St. Nicholas Hotel, five meters were in succession affixed to that immense establishment. After they had been in operation eight or nine weeks, the proprietors, or one of them, called at the office on several days and complained that the operation of the meters limited their supply of water so as to give dissatisfaction to the boarders, on one of these occasions, a gentleman was named, who threatened to remove from the hotel unless he could get more water.

Finally, the Assistant Commissioner agreed with Mr. Treadwell, one of the proprietors, in October, 1855, that the metres should be taken off, and that the hotels should be charged by the year, at the same ratio of consumption as should be ascertained by the metres, while they were on the buildings. This verbal understanding and agreement was made in the presence and with the consent of the President. The metres were accordingly taken off on or about the 1st November, completing an even period of three months, for the purpose of facilitating the calculation for the year. When payment, according to the agreement, was demanded, the proprietors refused, claiming that they were not obliged to pay by the measurement of the metre, but by the number of rooms contained in their buildings, in the form and manner prescribed by the ordinance.

It is sufficient to say, in answer to that objection, that the same ordinance, passed March 20, 1851, "establishing a scale of water rents for the Croton Aqueduct Department," ordains that "all manufacturing and *other business, requiring a large supply of water*, are to be charged therefor per one hundred gallons, on the average estimated quantity during the year."

The metre is the best estimator or measurer that has ever been discovered.

Surely a hotel, consisting of several buildings, of the largest class, which consumes as much water in one year, as the whole population of the city, (some six or seven hundred thousand people,) consume in one day, including the quantity used by street washers, sprinklers, horses, ships, steamers, manufactories, &c., must come under the designation of "other business requiring a large supply of water."

This position is unassailable and conclusive. But, independent of this authority, the Board claims the right of charging for the water and of cutting off the supply for non-payment, on even higher grounds.

The act of the legislature, creating this department passed April 11, 1849, enacts—

"§ 27. The rules and restrictions, printed on each permit, shall be notice to the water-takers, and shall authorize the exaction and recovery, by process of law, of any penalties which the Croton Aqueduct Board may impose, in addition to the cutting off the use of the water, for any violation of the rules; and this section shall be printed on each permit."

"Rule 8. The Department reserves to itself the right to apply a metre to any such premises as they may deem advisable."

Both the 27th section of the statute, and the 8th rule of the Board, were printed on the permit given to the St. Nicholas. The 19th section of the statute confers, by plain inference, power on the Board as well as on the Common Council, to regulate the extra rates, and this power has always been exercised by the Board, in cases in which the legislative power of the city has not sufficiently provided a rule by its ordinances.

As discovered by the metres which were affixed to that series of buildings, the St. Nicholas was taking thirty-six millions one hundred and seventy-two thousand seven hundred and seventy-four gallons a year. Is not the authority which has been granted most ample to enable the Department to procure payment for an extravagant and enormous supply—and may we not, in such a case, cut off the water

for the non-payment of thousands of dollars, when we cut it off for any delinquency in the payment of small sums. If the right to cut off the water for non-payment of the irregular or extra rates did not exist, what proportion of the rent would be collected? In a few years, the revenue from that source would disappear, to an alarming extent, at least—if not totally. The responsibility of preserving the supply of the water is imposed on the Commissioners by section 4 of the statute. Suppose there were ten or twenty such enormous establishments on the island—as there well may be, if the anticipations of the increase of its population and business are realized—how is the water to be preserved, if it is allowed to be used or wasted to the excess of more than thirty-six millions of gallons a year, and that without payment therefor.

By section 19 of the statute, the power to charge additional rents to hotels and other buildings and establishments which consume extra quantities of water, is sufficiently comprehensive to be exercised by the Common Council or the Croton Water Board. The whole subject is pregnant with interest, and sustained by the 27th section of the statute and 8th rule of the Board, the right of either the Corporation or the Croton Aqueduct Board to charge by metre cannot be considered doubtful—but, on the contrary, is rendered perfect and complete. There has been paid by the proprietors of the St. Nicholas Hotel, on the 19th day of December, 1856, two thousand six hundred and twenty-one dollars and fifty cents; and on the 7th day of November, 1857, one thousand dollars—leaving a very heavy balance of the account of the Registrar unpaid.

The question of the right of the Department to charge

by metre is still not finally adjudicated and submitted to by the proprietors of the hotel—though, as far as the judgment of the court has been pronounced, it is in favor of the right of the Department to make the charge.

A full exhibition was given, in the last annual report, of the situation of the claim made by the Department in behalf of the Corporation, against the state, for six years' supply of Croton water furnished to the state prison at Sing Sing.

The demand was finally settled by a law of the State for the amount claimed at the annual rent contended for by the president; and on the 9th day of September, a check for eight thousand six hundred and twenty-seven dollars and fifty cents, including one thousand six hundred and twenty-seven dollars and fifty cents of interest on the principal sum, was received from the Comptroller of the State.

The terms for a further supply, commencing on the first day of May, 1857, have not been settled—the legislature not having agreed to that section of the bill which proposed to charge the State at the rate of three-quarters of a cent per one hundred gallons, As our own largest consumers are obliged by ordinance to pay one cent for every hundred gallons, the concession of one fourth part of that price was deemed to be sufficiently liberal to the State to insure its agreement, and to induce the legislature to make provision in the law for its annual payment. The subject remains in that situation; but efforts to have it definitely settled will be renewed during the coming session of the legislature.

Waste of Water.

But very little can be added to the reports of former years on this subject. No restraint, in this regard, seems to be exercised by house-holders, and no efforts on the part of the Board seem to be of any avail in checking a degree of waste within the doors of private houses and stores, which is as unwarrantable and dishonest in itself, as it is unjust to the officers whose duties and cares it renders doubly harrassing. The waste, outside of buildings has been, in some degree, diminished by the prompt enforcement of penalties; but, within the houses, our inhabitants must be left almost to their own sense of right, and the Board have found that but little can be hoped for from the existence of such a principle.

Sewers and Drains.

The number, size and locality of the sewers, basins and culverts constructed during the year, amounting in length to ten thousand four hundred and thirty feet, are shown in Schedule No. 16.

The expenditures for repairing and cleaning the entire sewerage of the city, now amounting to one hundred and forty miles, will be found in Schedule No. 10.

The amount for cleaning necessarily increases from year to year, as the area of sewerage is extended. As the sewers built by this department, however, do not require repairs, and in most cases much less cleansing than those heretofore constructed, this expense does not increase in full proportion with the extension of area drained.

Schedule 3, gives the weekly receipts for permits to make connections with sewers, amounting in all to the sum of twenty-one thousand four hundred and twenty-five dollars and fifty cents.

Paving and Repairing Streets.

By the amended charter of 1857, the charge of paving the streets, and of repairing the pavements already existing, was transferred from the offices of the Street Commissioner and the Commissioner of Repairs and Supplies to this department, the change to take effect on the 1st May. Owing to many obstacles, the documents and property necessary for taking charge of the work, were not obtained by this Board until the 15th June. At this time it was found, that of the appropriation for the year, only thirty-six thousand five hundred and twenty-five dollars and sixty-six cents remained. With this small sum it was possible to repair only the worst places in the numerous streets which were found to be in a bad condition. In Schedule 19 there is furnished the particulars under this head. It exhibits the streets repaired, the number of days' work, and the amount of materials used.

The construction and repairs of pumps and wells were also transferred from the same offices to this department. No portion of the appropriation, however, remained unexpended, and they have been repaired, merely, so far as was actually necessary, to prevent accident. The money thus expended was, of necessity, advanced by the Comptroller from the Contingent Fund.

In conclusion, the Board have again the pleasure of presenting, as in former years, a report, showing a surplus of unexpended appropriation under each head of expenditure.

All of which is respectfully submitted,

MYNDERT VAN SCHAICK,
THEODORE R. DE FOREST,
ALFRED W. CRAVEN,
Croton Aqueduct Board.

WATER CHRONOLOGY OF THE CITY OF NEW YORK.

As a matter of future reference, and to many of present interest, the Board have appended to this report a succinct account of every proceeding connected with the water supply of this city, beginning with the earliest steps toward that end, and coming down to the present date: prior to 1854, shis history is copied from the Manual of the Corporation.

The first item on record bears date

1774. When the Corporation, adopting the plan proposed by Christopher Colles, commenced the construction of a reservoir and other works, on the east line of Broadway, between Pearl and White streets, for the purpose of supplying the city with water; and for defraying the expense of the undertaking, issued a paper money, amounting to two thousand five hundred pounds, under the denomination of *Water Works Money*, and bonds were executed in favor of certain individuals for land and materials, to the amount of eight thousand eight hundred and fifty pounds more. The original issue of money was in bills of

4,000	of the	value of	sixpence, each.....	£100
4,000	"	"	one shilling each.....	200
4,000	"	"	two shillings each....	400
2,500	"	"	eight shillings each...	1,000

August 2. An additional sum of twenty-six hundred pounds was ordered of the several denominations, following:

3,000	of the	value of	eight shillings each..	£1,200
4,000	"	"	four shillings each....	800
5,000	"	"	two shillings each....	500
2,000	"	"	one shilling each.....	100

1775. A spacious reservoir was erected, but in consequence of the war of the Revolution, and the occupation of the city by the British, the work was abandoned.

1785. In April, Samuel Ogden made proposals to the Corporation for erecting and establishing the water works to supply the city.

1786. In January, Hon. R. Livingston and John Lawrence presented proposals for a like object. The Corporation approved and ordered that proposals be received. The sense of the people was taken, and the opinion prevailed generally, "that the Corporation ought not to grant the privilege of supplying the city with water to individuals, but that the same ought, if possible, to be undertaken by the Corporation."

1788. The subject was again agitated, and in January the people petitioned that the plan of Mr. Colles be adopted, or any thing that the Corporation might deem more expedient.

1789. The Rumseian Society, of Philadelphia, notified the Board, that they would make proposals for a contract to supply the city, when the patent for Mr. Rumsey's engine was perfected. The Board passed a resolution inviting such proposals. Nothing further resulted from this proposition.

1792. In February, Zebrina Curtis and others, made proposals, which were referred to the Street Committee, and there died.

1795. In March, like proposals were made by Amos Porter, and a specific plan was submitted by Samuel Crane, to lead water from the Tea Water pump, through Roose-

velt street. Another project was presented by Benjamin Taylor.

1796. In February, a Committee of the Common Council were directed to advertise for proposals, and in December, Joseph Brown and associates, made offers to supply the city by means of pipes.

1797. Sealed proposals for supplying the city, by means of pipes, were advertised for, and some seven or eight different applications were received; among them, one from Christopher Colles, who had undertaken the work in 1774. These were referred to a committee.

1798. R. J. Roosevelt and Judge Cooper, of Otsego, made new applications. To this time the water from the Collect, the Tea Water Pump, and wells dug for the purpose, had been the sources relied on. Dr. Joseph Brown, in a communication to the Common Council, recommended the Bronx river as a source from which to obtain a supply of good water for the use of the citizens. This is the first indication on record, that a supply from without the city was looked to. A Committee of the Common Council reported favorably, and recommended an investigation, and that an application be made to the legislature for an act to invest the Corporation with power to effect the great end they have in view, and granting them the moneys arising from the tax on sales at auction, or by loans founded thereon, to defray the expenses necessary to the undertaking.

1799. Mr. William Weston, a civil engineer, recommended by the Committee in the preceding report, was employed by the Common Council to examine and report on the practicability of introducing the Bronx river into the city; and in March he reported favorably, only however on

information gained by walking over and viewing the ground. In April, of this year, the Manhattan Company was incorporated by an act of the legislature, the object of which was declared to be, to supply the city with pure and wholesome water, privileged by their charter to go over the whole island of New York, and into Westchester county to seek for good water. The company contented themselves with sinking a large well at the corner of Duane and Cross streets, and thence pumped up what *they* called pure and wholesome water.

1804. Under the mayoralty of De Witt Clinton, a committee was appointed to report upon the practicability of supplying the city with pure and wholesome water, and especially to confer with the Manhattan Company, as to the terms upon which they would cede to the Corporation their works and privileges of supplying water; but nothing seems to have come of it.

1816. A committee was appointed in March, to consider and report upon the propriety of making an application to the legislature, to invest the Mayor, Aldermen and Commonalty with all necessary powers to supply the city with water. The minutes contain no report from this committee.

1819. Robert Macomb presented a memorial for permission to supply the city with water, (collected at a reservoir at Harlem river,) for all domestic purposes. The scheme of Mr. Macomb and associates, was to bring the water from Rye pond, and they professed their ability to complete the work in two years, *without any aid or compensation from the Common Council*, asking only the privilege of laying down the pipes and selling the water. For the consideration of this subject, they asked the appointment of a committee,

and one was appointed to confer with them. After repeated conferences with Mr. Macomb, and being satisfied that he and his associates had the requisite means to carry their project into effect, they, in the spring of

1820, reported in favor of the project, with some resolutions, which were agreed to. The minutes, however, show nothing further.

1821. Stephen Allen, Mayor. Another resolution of inquiry into the best means of supplying the city with water, was adopted, and a committee appointed to procure plans, estimates, &c., provided the expense should not exceed two hundred dollars.

1822. The Mayor again brought the subject before the Common Council, which was referred to a Committee, of which he was one; and, at a meeting in April, they made a report of their observations, and recommended the appointment of an engineer to survey and profile the whole line between the city and the main source of the river Bronx. The recommendation was concurred in, and Canvas White was employed to make the survey and estimate.

1823. A new scheme was started, that of bringing the Housatonic river to New York, in an open canal, and an act of incorporation was obtained in Connecticut for this purpose. The Sharon Canal Company was chartered by the State, and among its duties was that of supplying the city with water. The work was not, however, undertaken.

1824. Mr. White made his report in favor of bringing the water of the Bronx to the city, taking it from the river at the Westchester cotton factory pond. The cost of bringing the water to a reservoir, near the Park, was estimated at one million nine hundred and forty-nine thousand five hundred and forty-two dollars.

1825. A company, called the New York Water Works Company, was incorporated by the legislature, with authority to supply the city with pure water. Canvas White was appointed engineer to this company, and in his report he recommended taking the water of the Bronx, at Underhill's bridge, at an estimated expense of one million four hundred and fifty thousand dollars.

1826. The charter of the New York Water Works Company proved so defective in practice, that they were unable to proceed under it, and applied to the legislature for necessary amendments, in which they were opposed by the Sharon Canal Company, who claimed, in their charter, all the water on the route of the canal.

1827. The Water Works Company, unable to proceed, surrendered their charter; and the legislature incorporated the "New York Well Company." The water was to be procured on the island by sinking wells in the most elevated grounds. The company made several attempts to procure water, but being satisfied, by their experiments, of the impracticability of the undertaking, the enterprise was abandoned.

1828. Levi Disbrow's plan of sinking an Artesian well and reservoir in each ward of the city, was the next plan. Though partially successful, the cost and uncertainty of supply forbade the prosecution of this plan.

1829. A report was made to the Common Council, by Alderman Samuel Stevens, in favor of the establishment of a well and reservoir in Fourteenth street, whence water might be distributed in iron pipes, was accepted and acted upon. The committee did not omit to urge, as an additional motive for laying down iron pipes, that whenever

the long desired object of supplying the city with water, for domestic purposes, should be carried into effect, these same pipes would serve. A reluctant assent was wrung from the Common Council to these recommendations, and a committee was empowered to provide the necessary site for a reservoir, and to contract for iron pipes. From this reluctant, feeble, and economical beginning, sprung the Croton Aqueduct.

1830. A motion was made in the Common Council, to apply to the legislature, for all needful power to supply the city with water, and to create two millions of stock to defray the expenses thereof, but did not prevail. May 17, a memorial from Francis B. Phelps, proposed, from different sources of supply, *First*, to bring the water from Rye Pond, the whole distance through, in twenty-eight inch iron pipes; *Second*, to bring the Croton river, by open canal, or by iron pipes; *Third*, to bring the water of the Passaic, taken above the falls, at Patterson, New Jersey, and cross the Hudson by iron pipes laid on the bottom of the river; *Fourth*, by a plan of his own, probably, wells and springs on the island.

1831. The Common Council referred the subject, with the various communications, to their Committee on Fire and Water, in the Board of Aldermen, consisting of Messrs. James Palmer, Samuel Stevens, and William Scott, who presented a report, adducing facts and arguments sufficient to prove the practicability of the project, and the ability of the Corporation to meet the expense; and appended to their report, was a letter directed to the Corporation, and signed, Cyrus Swan, who is "President of the New York and Sharon Canal Company," in which it is asserted, that

that river, (the Croton,) can be carried into the city of New York, and that without it, a supply, which shall be adequate to the present and future wants of the city, cannot be obtained.

1832. The Committee drafted an "Act" for the legislature to pass, which was approved by the Common Council, and presented to the legislature, but which failed in becoming a law. In November, a report was made by Timothy Dewey, and William Serrell to Benjamin Wright, Esq., recommending the Bronx as a sufficient source. The above-named Committee on Fire and Water, with Myndert Van Schaick, Esq., at that time a member of the Board of Aldermen, pursued the subject with energy. In December, De Witt Clinton, Esq., of the United States Corps of Engineers, made a report, in which he arrived at the conclusion, that an adequate supply could only be obtained from the Croton river. He proposed an open aqueduct, and estimated the cost at $2,500,000.

1833. February 26. The legislature passed an act, in compliance with the request of the Common Council, providing for the appointment, by the Governor and Senate, of five persons as Water Commissioners, whose duty it was, by said act, declared to be "to examine and consider all matters relative to supplying the city of New York with a sufficient supply of pure and wholesome water, for the use of its inhabitants, and the amount of money necessary to effect that object." This act, giving the first effectual impetus to the work, was drawn up by Myndert Van Schaick, Esq., then a member of the Senate from the city of New York. The following-named gentlemen were appointed under this law, the Board of Water Commissioners—Stephen Allen, William W. Fox, Saul Alley, Charles Du-

senberry, and Benjamin M. Brown. The Commissioners were directed to report the result of their examinations, both to the Common Council and the legislature, the city to defray all reasonable expenses. The Common Council having, on the 5th of June, appropriated $5,000, to enable them to carry into effect the objects of the appointment, the Commissioners engaged Canvas White and Major Douglass to undertake the requisite surveys, examinations and estimates. Mr. White was prevented from acting, and Mr. Douglass commenced his surveys late in June, and they occupied him and his party till late in September, and the result was a firm conclusion, that the Croton should be the source of supply. The plan of construction recommended, was a continuous tunnel or aqueduct of masonry.

1834. In February, the Common Council adopted a resolution, accepting the proposal of the Manhattan Company to enter into a negotiation for the sale of the company's immunities, rights, and privileges of every kind, relative to the supply of the city with water. May 2, an act, prepared like the former, by the Hon. Myndert Van Schaick, was passed by the legislature, giving additional powers to the Commissioners, and requiring them to report the result of their investigations to the Common Council, on or before the first day of January, 1836. In case the plan adopted by the Commissioners should be approved of by the Common Council, they should submit it to the electors. It further authorized the Common Council to raise $2,500,000, by the creation of a public fund or stock, to be called "The Water Stock of the city of New York." The Governor and Senate reappointed the same Commissioners, who, after thoroughly examining their former work, decided that the Croton river was the only source that would

furnish an adequate supply. The engineers now employed were David B. Douglass, John Martineau, and George W. Cartright. Various plans were again proposed to the Commissioners; among them that of Mr. Bradford Seymour, of Utica, who proposed to erect a permanent dam in the Hudson river, extending from the foot of Amos street to the Jersey shore. Messrs. Martineau and Douglass expressed themselves in favor of a closed aqueduct of masonry, from the Croton, estimating the cost at $5,412,336 72.

1835. A Committee of the Common Council, to whom was referred the report of the Water Commissioners, approved the plan adopted by the Commissioners, and recommended a reference of the subject to the electors at the ensuing election. These resolutions were adopted by the Common Council, and at the election in April, the question was submitted to the electors, with the following result:

WARDS.	YES.	NO.
1st	1,417	27
2d	1,248	25
3d	1,456	42
4th	1,794	51
5th	1,675	152
6th	1,305	103
7th	1,303	561
8th	1,511	702
9th	631	1,015
10th	966	1,030
11th	880	873
12th	545	136
13th	654	739
14th	1,233	209
15th	712	297
	17,330	5,963

To complete this view, and to show that the wards which contributed the largest amount of taxes, gave also the largest vote in favor of the Croton project, a list is annexed from the report of the Comptroller, of the taxes paid by each ward, for the year 1835.

Wards	
1st	$256,181 14
2d	73,187 38
3d	86,828 36
4th	50,278 29
5th	59,177 02
6th	49,315 30
7th	57,031 06
8th	51,529 09
9th	33,698 53
10th	26,834 78
11th	45,060 17
12th	60,032 55
13th	15,847 69
14th	37,150 06
15th	73,451 51
	$965,602 94

In three wards, Ninth, Tenth and Thirteenth, the negative vote preponderated. In all the others, the affirmative, in a large majority. As to proportion between taxation and the affirmative vote, the First Ward, paying $246,181, records but 27 negatives against 1,417 affirmative votes; while the Tenth Ward, paying but little more that one tenth the taxes of the First Ward, records 1,030 negative against 936 affirmative votes.

1836. In July, the Common Council ordered pipe to be laid, preparatory to the introduction of the water; and, in October, Mr. Douglass was superseded by the appointment of John B. Jervis, Esq., as Chief Engineer.

1837. Work on the aqueduct commenced in the early part of this year.

1839. The legislature passed an act, requiring Harlem river to be crossed by the aqueduct on a high bridge. In August, the High Bridge was contracted for, at $737,755, conditioned to be finished in August, 1843.

1840. Messrs. Samuel Stevens, John D. Ward, Zebedee Ring, Benjamin Birdsall and Samuel R. Childs, appointed Commissioners by the Governor and Senate.

1841. January 7. A freshet on Croton river, carried away the earth embankment forming a portion of the newly constructed dam, causing a great destruction of property, and the loss of three lives.

1842. The Common Council formed the Croton Aqueduct Board, by the appointment of Messrs. John L. Lawrence, President; Myndert Van Schaick, Cornelius W. Lawrence, Samuel B. Ruggles, and J. Phillips Phœnix, whose duties were to take charge of such portion of the work as lay south of Fortieth street, including the city distribution, and the collection of the water revenues. On the 27th of June, the water was received through the aqueduct, into the reservoir at Eighty-sixth street, with appropriate ceremonies; and on the Fourth of July the water was introduced into the Distributing Reservoir, on Murray Hill, and the event was hailed by the citizens, with an interest scarcely less than that pervading the whole American people at the remembrance of the event, the anniversary of which was, on that

day, celebrated. At an hour when the firing of guns, and the ringing of bells had aroused but few from their slumbers, and ere the rays of the morning sun had gilded the city domes, the waters of the Croton gushed up into the reservoir, and wandered about its bottom as if to examine the magnificent structure, or to find a resting place in the *temple*, toward which they had made a pilgrimage; the national flag floated out from each corner of the reservoir, and, during the day, thousands of the citizens visited it, giving demonstrations of joy and satisfaction at the accomplishment of this great work. October 14. The celebration of the introduction took place, and it was an occasion of unrestrained enthusiasm and joy; multitudes came in from the surrounding country, and from adjacent sister cities, all business was laid aside for the pleasing ceremonies of the day, and the Croton water met with a welcome, which showed that its value was appreciated.

1843. Messrs. Stephen Allen, William W. Fox, Thomas S. Woodruff, Saul Alley, and Charles Dusenbury, were reinstated Commissioners, by the appointment of the Governor and Senate, in place of the late incumbents; and James A. Coffin superseded John L. Lawrence, as President of the Water Board.

1844. The Water Board, this year, consisted of Messrs. James A. Coffin, President; S. B. Ruggles, M. Van Schaick, Horatio Allen, and Harvey Hunt. Up to this time one hundred and fifty-six miles of distributing pipe had been laid through the streets of this city.

1845. The water revenue, from all sources, amounted, this year, to $164,532.

1848. In May, the water commenced flowing over the

High Bridge, and, on the 23d, Mr. Jas. A. Coffin, President, deceased, when the Hon. Myndert Van Schaick was appointed by the Croton Aqueduct Board to fill the vacancy, which office he continued to fill with popular favor, until November 1, when he was superseded by Uzziah Wenman, Esq., who was appointed to office by the Common Council. June 21, Messrs. Philip Hone, Ambrose C. Kingsland, Nathaniel Weed, J. H. Hobart Hawes, and Marshall O. Roberts, having been nominated by the Governor, and confirmed by the Senate, as Commissioners, took the places of their predecessors. Mr. Van Schaick, in his report to the Common Council, proposed the purchase of ground for a new and much larger reservoir, also recommending a reorganization of the department, for which purpose he presented the draft of a law for the approval of the Common Council.

1849. A new line of thirty inch pipe, through Third avenue and Seventy-ninth street, laid. High Bridge completed, at a cost of $963,427 80. Ward's Island supplied with water. April 11, a law was passed by the legislature, based on that recommended by Mr. Van Schaick; creating the Croton Aqueduct Department, under the provisions of which, the Board of State Commissioners, and the Croton Aqueduct Board, as organized by the Common Council, ceased to exist; and all their powers were vested in the new Board, which was organized on the 18th of July, by the nomination of the Mayor, and appointment, by the Board of Aldermen, of Messrs. Nicholas Dean, as President, Theodore R. De Forest, as Commissioner, and Alfred W. Craven, as Engineer.

1850. The two lines of thirty-six inch pipe, on the Fifth avenue, between Thirty-fourth and Fortieth streets, were lowered, in consequence of a reduction of grade, under the

superintendence of Edward H. Tracy, Esq., Assistant Engineer, without breaking joint, at an expense to the city of $12,633 68. This work had been previously estimated to cost from sixty to one hundred thousand dollars. The iron stairway was erected at the High Bridge, and a plot of one hundred acres, immediately north of the Receiving Reservoir, was selected by the Board, as a location for the proposed new reservoir.

1852. The water was drawn off from the Distributing Reservoir for the first time, and the interior thoroughly cleansed; the solid matter on the bottom was less than one inch in depth, when dried; and the work itself, after ten years service, found as perfect as when received from the contractors. An iron bridge, composed of service pipe, was placed over the lip of the dam at Croton lake, which, from the novelty of its construction, constitutes one of the wonders of the locality.

1853. The great line of four feet pipe, being the largest ever laid, was commenced across Manhattan Valley. September 1, Nicholas Dean, Esq., resigned the presidency, and on the 1st December was succeeded by Elias L. Smith, Esq. The entire water receipts, from the introduction, to December 31, was $3,355,534 47; and the whole length of pipe on the island, for supply and distribution, amounted to two hundred and thirty-six miles and two thousand and fifty-one feet.

1854. April 30. A freshet, more extensive than had ever before been known, swept the valley of the Croton river, threatening, in the opinion of many, the destruction of the dam itself, the body of water on the crest of the structure being eight feet four inches deep; the dam, however stood the severe test, but the damages below were very great

and the summer was spent in the repair, at a cost of $26,706 29. In May, the Croton Board, consisting of Messrs. Smith, De Forest and Craven, were renominated by Mayor Westervelt, and in July the two last were confirmed, and the nomination of Mr. Smith rejected. Messrs. Edward C. West, Abraham Turnure, and Daniel Dodge, were appointed by the Supreme Court, as Commissioners of Appraisal, for acquiring the land for the new reservoir. The line of four feet pipes, across Manhattan Valley, were completed, and the water let into the same in May.

1855. Mr. E. L. Smith having failed in his confirmation as President of the Board, Mayor Wood nominated the Hon. Myndert Van Schaick to the office, and the nomination was approved. The Eighth avenue line of main pipe, from Eighty-first to Forty-second street, was laid down by days' work, in about one hundred and eighty days, under the superintendence of James P. Kirkwood, Esq., engineer in charge, at an expense of $160,564 24.

1856. The report of the Commissioners, on the appraisal of the land for the new reservoir, after many delays, was presented, and confirmed. The two thirty-six inch mains, on the Eighth avenue, between Forty-ninth and Fifty-fourth streets, were let down through the solid rock, a distance of one thousand three hundred feet in length, and eleven feet in its greatest depth, to conform to the new grade of that part of the city. This work was done without breaking or straining the joints, and proved to the Board a source of natural gratification. The number of buildings in the city, supplied with water, exclusive of those occupied for public purposes, was fifty-three thousand nine hundred and fifty-two. The survey for the new reservoir was commenced under the supervision of George S. Greene, Esq., Engineer in charge.

REPORT OF THE CHAIRMEN OF THE COMMITTEES ON CROTON AQUEDUCT, ON THE TRANSACTIONS OF THE DEPARTMENT, PRESENTED IN BOTH BOARDS, NOVEMBER 27, 1857.

The undersigned, Chairmen of the Committees on Croton Aqueduct, respectfully

REPORT:

That in pursuance of the directions of the sixth section of the act of the legislature of the 11th of April, 1849, entitled, "An act to create the Croton Aqueduct Department in the city of New York," they have visited the works, and have minutely and thoroughly investigated the entire business transactions of that department, for the year commencing on the 1st of November, 1856, and ending October 31st, 1857.

The books and accounts have been carefully scrutinized, and the cash receipts found to be balanced by corresponding certificates of deposit with the County Treasurer; and every expenditure is verified by a sufficient and satisfactory voucher.

The officers of that department have facilitated this examination by every means in their power, and in the most prompt and cheerful manner.

The undersigned have pursued their inquiries to a gratifying conclusion; and are fully convinced that the business of the Croton Aqueduct Department is ably, judiciously, and honestly conducted; that the methodical arrangement of its diverse duties and responsibilities, and the practical workings of its several divisions, in one efficient and harmonious system, make it, pre-eminently, a model department of the public service.

PETER MONEGHAN,
Chairman Committee Board of Aldermen.

BENJ. T. RHODES,
Chairman Committee Board of Councilmen.

Which was adopted.

BUREAU OF PIPES, SEWERS AND PAVEMENTS,
December 31, 1857.

The Water Purveyor respectfully submits the following statement of the work performed in this bureau, during the year 1857. It is arranged under the several heads, to wit:

Construction of Sewers.
Laying of Water Pipes.
Street Pavements.
Wells and Pumps.
Vault Permits, and
Repairs to Street Pavements.

Very respectfully,
Your obedient servant,
JOHN P. FLENDER,
Water Purveyor.

SCHEDULE No. 15.

CONSTRUCTION OF SEWERS.

Statement showing the locality, size and length of all sewers, with the receiving basins and culverts attached to each, for which contracts have been made during the year 1857.

Do. " (east side)	34th and 42d streets	2,044
Do. " (west side)	from 90th street, southerly	161
Seventh "	54th and 55th streets	200
Eleventh "	39th and 40th streets	255
Do. "	42d and 43d streets	255
Thirty-fourth street	Lexington and 4th avenues	481
Do. "	4th avenue, westerly	150
Thirty-fifth "	" "	200
Do. "	" easterly	50
Thirty-sixth "	" "	37
Do. "	" westerly	34
Do. "	2d av., and 375 feet west	382
Do. "	10th av. and 400 feet west	297
Thirty-seventh "	4th avenue, westerly	250
Do. "	Do. easterly	250
Thirty ninth "	4th avenue, westerly	48
Do. "	10th avenue, and 600 ft. west	637
Do. "	500 ft. w. of 11th av. & N.R.	467
Fortieth "	4th avenue, westerly	46
Do. "	Do. easterly	32
Carried forward		11,109

[illegible]	BETWEEN	FEET.
	Brought forward	11,109
[illegible]	11th av. and North river	952
[illegible]	4th avenue, westerly	34
[illegible]	easterly	25
[illegible]	150 ft. E. 2d av. and E. riv.	1,258
[illegible]	6th avenue and 50 feet east	50
[illegible]	100 feet west of 6th avenue, and 500 feet east 6th av.	600
[illegible]	6th av., and 250 feet east	255
[illegible]	8th and 9th avenues	850
[illegible]	2d and 3d avenues	850
[illegible]	Broadway and 8th avenue	680
[illegible]	3d avenue and 425 ft. east	425
[illegible]	Do., and 600 feet west	600
[illegible]	4th avenue, easterly	187
[illegible]	Do. westerly	471
[illegible] & fourteenth	1st and 3d avenues	1,785
	Total	20,131

TWELVE INCH

STAGE	BETWEEN	FEET.
Second avenue	45th and 48th streets	795
Thirty-eighth street	10th and 11th avenues	892
Forty-eighth	1st and 2d avenues	807
Do.	9th av., and 550 feet west	595
	Total	3,089

RECAPITULATION.

	FEET.
Of six inch mains	20,131
" twelve, do.	3,089
Total	23,220

or four miles and 2,100 feet.

VAULT PERMITS.

For permits to construct vaults, there has been received, from the 21st day of May, 1857, to this date, the sum of $9,901 00, for which see Schedule No. 4.

STREET PAVEMENTS—NEW WORK.

Under this head, a contract for the paving of the new Bowery, and parts of the intersecting streets has been awarded; and Twenty-first and Twenty-second streets, west of Tenth avenue, have been paved, at private expense; no other work has been done.

WELLS AND PUMPS.

The exhaustion of the appropriation under this head, before the control of the work was transferred to this department, has prevented the prosecution of any new work.

SCHEDULE No. 18.

PIPE OF ALL SIZES, FOR THE SUPPLY AND DISTRIBUTION OF CROTON WATER, TO DECEMBER 31, 1857.

NOTE—By reference to Schedule No. 12, it will be seen, that there has been expended in the purchase of paving stones, the sum of eighty-one dollars and twenty-five cents only; while, by the preceding statement, it is shown that 4,276 loads of stone have been used in making repairs to the different streets; it may, therefore, be proper to state, by way of explanation, that the greater part of the stones so used were taken from Chatham street, the Bowery, and Union square, preparatory to the laying of the Belgian pavement in those thoroughfares. The saving to the city, from this source, may be estimated at the rate of one dollar per load for the quantity thus obtained.

APPENDIX

REFERRED TO IN THE BODY OF THE REPORT, PAGE 11.

Contract and Specification

FOR

NEW RESERVOIR AT YORKHILL.

This Agreement, made and concluded this day of in the year one thousand eight hundred and fifty-seven, by and between The Mayor, Aldermen and Commonalty of the City of New York, by the Croton Aqueduct Board of the first part, and

of

contractor of the second part

Witnesseth, That the said part of the second part, ha agreed, and by these presents do agree with the said parties of the first part, for the consideration hereinafter mentioned and contained, and under the penalty expressed in a bond bearing even date with these presents, and hereunto annexed, to furnish at own proper cost and expense, all the necessary materials not found on the reservoir ground belonging to the Croton Aqueduct Department, within the outer slope stakes, and all other and to excavate for, and build a good, firm and substantial Reservoir of the dimensions in the manner, and under the conditions hereinafter specified, and he further agreed, that the said Board shall be, and are hereby authorized to appoint, from time to time, such civil engineer and assistants and inspectors under him, as they may deem proper, to inspect the materials to be furnished, and the work to be done under this agreement, and to see that the same strictly correspond with the specifications hereinafter set forth.

To prevent all disputes and litigation, it is further agreed, by and between the parties to this contract, that said engineer, shall, in all cases determine the amount or the quantity of the several kinds of work which are to be paid for under this contract; and he shall determine all questions in relation to lines, levels and dimensions of work; and he shall, in all cases, decide every question which may arise relative to the execution of this contract on the part of said contractors; and his estimate and decision shall be final and conclusive.

And it is further agreed by the parties to this agreement, that whenever the engineer aforesaid, shall be unable to act in consequence of absence or other cause, then the principal assistant employed under him, when required by the Croton Aqueduct Board, shall perform all the duties, and is vested with all the power herein given to said engineer.

SPECIFICATIONS.

(1.) The Reservoir is to be built between Eighty-fifth and Ninety-seventh streets and the Fifth and Eighth avenues, in the city of New York, according to the plans on file in the office of the Croton Aqueduct Department, subject to such modifications as may be made by the engineer under the direction of the Croton Aqueduct Board.

(2.) All work shall, during its progress and on its completion, conform to the lines and levels, which may, from time to time, be given by the engineer and his assistants; and all slopes and faces on embankments and cuts, shall be dressed true and even, according to the lines and levels given as the work progresses.

(3.) The Reservoir will be formed by an exterior bank forming the outer sides of the basins; there will be a division bank dividing the Reservoir into two basins; all the banks will have the inner and outer slopes of one and a half base to one perpendicular, all the inner or water slopes will be covered with eight inches of broken stone, on which will be placed the stone pavement one and a half feet thick; the outer slopes will be covered with soil one foot thick. The banks will, when finished, be fifteen feet wide on top, exclusive of the soil on the outer slope. The top of the outer bank will be four feet above water line; which is on the

[illegible] of the top of the intrados of the covering arch of the Aqueduct in the gate-house (on Seventh avenue,) of the Receiving Reservoir; the top of the division bank will be three feet below the water line. In the centre of each the banks, a puddle bank will be built, extending from the rock to the parting in the division bank, and to within two feet of the top of the exterior bank. It will be six feet two inches wide at top in the division bank, and four feet wide at top in the exterior bank, and sixteen feet wide at a place thirty-eight feet below the top of the exterior Reservoir bank. In the middle of the division bank there will be built a brick wall, and in cement mortar, four feet high, and twenty inches or two and one half bricks wide; the top of the wall to be connected with the bottom of the stone pavement. Eight inches in thickness of concrete is to be used on the top of the bank on each side of, and connected with the wall; on this the pavement, eighteen inches thick, will be laid in cement. The stone work on each side of the division bank will be laid in cement, as far down as directed in these specifications.

4. The work to be done is.—To clear the ground to be occupied by the Reservoir and its appurtenances of all soil and other matter not suitable for the embankments, to remove all stones and loose rocks from the ground to be occupied by the embankments, to excavate the interior of the Reservoir and Basin, and with the proper earth to form the embankments as far as available for that purpose, and with the rock to form the [illegible] of the Reservoir, slopes and other masonry on the embankments as specified, and to place the soil not required in embankments and surplus rock, in spoil banks; and to excavate drainage ditches and puddle ditches, and areas for the foundations of the gate-houses, aqueduct, pipe chambers, waste wells, sewers and pipes, and all accessories and to furnish so much clay, gravel and earth for the construction of the embankments and puddle banks, as may not be obtained from excavations within the Reservoir ground, as it may be laid out by the engineer and to cover the outer slope with the soil taken from the surface, and all other work called for in these specifications, or by any changes in the plan as provided for in the contract.

5. All soil and all vegetable matter and mud, to such depths as the engineer may at any points determine, is to be removed from all the ground within the lines of the outer slopes of the Reservoir banks, and

placed in spoil banks, free from stones or rocks, outside of the outer slopes, or on the outer slopes, at such points and in such manner as the engineer may direct, not requiring an extreme haul of more than fifteen hundred feet. All boulders or other stones, or loose rocks of more than two inches in any dimensions, and all other materials from the excavations, which the engineer may not deem suitable for embankment or puddle, shall be removed from the ground to be occupied by the embankments, and disposed of as hereafter directed. All stumps and roots shall be grubbed out of the ground to be occupied by the embankments, and all wood, roots and rubbish shall be removed from the ground, or burnt before the puddle or embankments are commenced.

(6.) Drainage ditches are to be formed in each Basin, two feet wide at bottom, with slopes of two bases to one vertical, from the drainage sewer near Eighty-sixth street, to such extent as the engineer may direct.

(7.) Puddle ditches are to be excavated to the rock under the centre of all the embankments, where the rock is not lower than forty-six feet below the top of the exterior Reservoir bank; and in any loose, broken, soft or porous rock, the ditches will be excavated to such depth as the engineer may direct.

Puddle ditches will be laid out with a slope of one base to two vertical, and the contractor will, in all cases, be allowed that width in measurements; the width at bottom (which can only be ascertained when the rock is reached,) will be that required for the puddle.

If planks are required to support the sides of the puddle ditches, the contractor will furnish them at his own expense; when plank are thus used, they will be placed one foot outside of the puddle at bottom, on each side; and whenever the sides of the puddle ditches cave or crack, the broken earth is to be removed, and the earth refilled and packed, as in the embankments. No measurement beyond that above specified, will be allowed, for an excavation or filling on the puddle ditches.

(8.) When the rock is more than forty-six feet below the top of the exterior Reservoir bank, and where else the engineer may deem it necessary, two rows of sheet piling are to be driven to the rock sixteen feet apart, and the material between them excavated to the depth of forty feet below the top of the exterior Reservoir bank, and as much further

as to remove all coal, muck, mud or vegetable matter. Should the engineer deem it advisable, the sheet piling will be driven in double rows, in which case, each row will be estimated and paid for per square foot, at the prices in the contract.

9 Sheet piling will be formed of spruce or pine plank six inches thick, tongued and grooved, the tongue and groove to be 1½ × 1 inch, according to the plan; the plank to be not less than ten inches in width, and each plank to extend from the top of the piling to the rock. The planks to be driven with the ram, so as not to be cracked or split. The timber to be sound and free from shakes. The top of the piling to be cut at the level of thirty-nine feet below the top of the exterior Reservoir bank.

10 The earth, within the working lines of the interior slopes of the basins, to be excavated to the depth of forty feet below the top of the exterior Reservoir banks, and as much lower as may be required by the engineer to obtain materials for the embankments or for the puddling. The surface of the bottom of both basins to be worked to the same depth, and to such slopes as the engineer may direct. The exact depth cannot be determined until the surface of the rock is uncovered. Whenever it may be necessary to go below the bottom of the Reservoir, as it shall be established by the engineer, to obtain materials for embankment or for puddle, the space so excavated shall be filled up with such suitable materials as the engineer may direct.

11 The material, whatever may be its depth, not less than six inches, which the engineer may deem suitable for puddling, will be excavated separately from other earth and appropriated to that purpose in the manner specified.

12 Rock is to be excavated to the depth of thirty-six feet below the top of the exterior Reservoir bank; the sides of the excavation to conform to the inner slopes of the Reservoir banks, care being taken not to shake or crack the solid rock, beyond the working lines, on or near the sides of the Reservoir. Whenever the rock is broken by blasting, beyond the slopes of the Reservoir banks, so as, in the opinion of the engineer, to be likely to cause leakage, the contractor will be charged with whatever expense the engineer may cause to be incurred as necessary to pre-

vent such anticipated leakage. When any fissures, seams, or soft rock are found within the basin of the reservoir, or under the banks thereof, the rock is to be excavated to such extent as the engineer may direct, and the space filled with concrete, puddle, earth or sand as may be required by the engineer. Where the paving is to rest on rock, the rock shall be so prepared as to make a bed on which the paving and lining will rest; this will be done by excavating a face on the rock at right angles to the line of slope. All rocks, stones and coarse gravel which may not be required for the paving and lining of the Reservoir, and for the masonry to be built thereon, nor for the embankments, will be deposited in such manner, within the space described in specification 1, as the engineer may direct. On the bottom of the basins, where the excavation in rock may be carried by the blasting below the working line, the spaces will be compactly filled with spauls or broken stone to the working line.

(13.) Excavations for the foundations of the gate-houses, pipe vaults laying pipes and the aqueduct, within the outer slopes, to bring water to the Reservoir, and all accessory work, are to be carried to such depth and to such lines and at such times as the engineer may direct, either in earth or rock.

(14.) Should any excavation be required lower than the bottom of the drainage sewer, near Eighty-sixth street, the Croton Aqueduct Department will furnish drainage for such excavation, provided, however, that if the contractor shall not keep such force on the excavation, as the engineer may require, then the contractor shall be charged with such part of the cost of such drainage as may be caused by such deficiency of force.

(15.) Puddling or puddle banks are to be formed in the puddle ditches and within all the Reservoir banks, to within two feet of the top of the outer Reservoir banks, and to the concrete on the top of the middle bank. At and below thirty-eight feet below the top of the exterior Reservoir bank, the puddling will be sixteen feet wide; above that height, the sides will approach each other with slopes of two inches base to one foot vertical, on each side. The puddle will be formed of clay, gravel, sand or earth, or such admixture of these materials, or of any of them, as the engineer may, from time to time, direct. The puddle to be laid in layers

of not more than six inches, and well mixed with such quantity of water as the engineer may direct, and worked with spades by cutting through vertically in two courses at right angles with each other; the courses to be one inch apart, and each spading to extend two inches into the lower course or bed; or it will be packed and worked with such tools and such quantities of water as the engineer may deem necessary for the perfect formation of the puddle; each layer must be well worked into and incorporated with the layer on which it rests, the object being to obtain an uniformly compact mass, impervious to water. Boards will be used when the engineer may deem them necessary to support or guide the sides of the puddle; such boards as well as all other tools and materials, excepting as herein specified, will be furnished by the contractor at his own cost. During the working of the puddle, the ditches are to be kept free from any water that is not required for its formation. Whenever the work is suspended the puddle must be covered with boards or earth to prevent cracking, which will result from too rapid drying, and whenever cracks do occur in the puddle, those parts must be removed and reworked; the spaces on each side of the puddle in the ditches will be packed with earth, well rammed, as the puddle advances. When temporary sheet piling is used to support the banks of the puddle ditches, the planks must be withdrawn as the puddle rises, and the spaces between the natural earth and the puddle, filled with earth and well rammed. The space between the permanent pile-planking will be filled with puddle to the top of the pile-planking. The puddling will extend to all the masonry and pipes, and along and around it and them, to such extent as the engineer may direct. No material to be used for puddling without examination and approval of the engineer.

(16.) The embankment will be fifteen feet wide on top, exclusive of the dressing of soil on the outer bank, with slopes of 1½ base to 1 vertical. All the earth to be used in filling the puddle ditches, and in forming the embankments, must be free from all stones more than two inches in any dimensions. The different kinds or qualities of earth will be distributed to such parts of the embankment as the engineer may direct. The embankments will be formed in layers of not more than six inches, well packed by carting and rolling, and in such places as the rollers cannot be effectually used, by ramming, to such extent as the engineer may

direct. The form and weight of the rollers and rammers to be determined by the engineer, from time to time, as the work progresses. The embankments will be worked to their full width as they rise in height, and not more than two feet in advance of the puddle; the puddle being always kept below the embankments. During the construction of the embankments, no sudden breaks will be allowed, nor will any slopes be allowed of more than five base to one vertical, on the surface which is being worked, excepting the slope in the puddle-trench.

Against the pipes and masonry, the puddle and embankments must be packed with rammers, to such extent as the engineer may direct. After the outer banks are formed the outer slopes will be covered with one foot in depth of soil, (measured at right angles to the slope) compacted by ramming.

When there is any deficiency in the embankments on the slopes, such deficiency must be made up with earth, or with soil, well rammed on the outer slopes, and with well rammed earth or broken stones on the inner slopes, at the discretion of the engineer; so that the slopes, when finished, shall be up to the working lines and plans. Any settlement of the embankments, or any washing or wastage of the banks, or other work, during the progress of the work, and to its final completion and final acceptance by the engineer, shall be made good by the contractor, by bringing the work to the proper lines and levels, as directed by the engineer.

The object is to make the embankment as compact and impervious to water as the nature of the material will admit of, and all work on the puddle and embankments must be done in a thorough workmanlike manner, with a view to accomplish this object.

(17.) Should the excavations within the outer slopes of the exterior Reservoir banks not furnish sufficient material of a suitable quality for puddling and embankments, in the opinion of the engineer, then the contractor will be required to furnish enough material, to supply the deficiency, and of such quality as may be approved by the engineer.

(18.) In the centre of the middle or division bank, there will be a brick wall, laid in cement, twenty inches, or two and a half bricks wide, and four feet high, resting on the puddle, and the puddle extending on each side to within eight inches of the top, according to the plan. The

top of the wall will extend to the pavement. The top of the middle bank will be covered with eight inches of concrete, on which the pavement, eighteen inches thick, will be laid in cement mortar. And the pavement, for ten feet in width, from the top on both slopes, as shown on the plan, will also be laid in cement mortar.

(19.) The interior slopes of all the banks will be covered with eight inches in thickness of stone broken to pass through a two inch ring. On this will be laid the paving, eighteen inches in thickness, of a single course of stones, set on the edge, at right angles with the slope, laid dry and well wedged with pinners. The stones to be laid in such manner as may be directed by the engineer; the base of the paving to extend to the rock, or to such depth as the engineer may direct; the stones to be sound and of proper shape, to make neat and compact work.

(20.) Concrete will be formed of clean broken stone, which will pass through a two inch ring, mixed with cement mortar.

(21.) The mortar for the concrete and for brick work is to be composed of two parts of sand to one of cement. The proportions of the mortar and stone in the concrete to depend on the capacity of the stone to receive the mortar, which shall be determined by the engineer. The mortar for stone work to be composed of three parts of sand and one of cement. The cement to be of fresh burnt Rosendale or Newark cement, and the sand to be sharp, clean and free from dirt or loam or mica. Concrete will be covered immediately after being laid to prevent cracking.

(22.) Bricks will be of the usual size used for sewers in the Groton Aqueduct Department. They will be of the best quality of sound hard bricks, burnt hard entirely through; no broken bricks or bats will be used but to break joints. All brick to be culled as they are brought to the ground, and to be subject to the inspection, and if not approved of, to the rejection of the engineer; and the contractor will, at any time, when requested, place at the disposal of the engineer so many men as may be required to overhaul and examine the bricks, and any rejected bricks are to be immediately removed from the ground by the contractor. Such men to be at the expense of the contractor.

(23.) Each barrel of cement after it is delivered on the work, shall be inspected, and it shall not be used until approved of by the engineer.

(24.) All brick shall be wet thoroughly by immersion, unless otherwise directed by the engineer. Mortar will not be reworked after having set, and no mortar will in any case be used which has been made more than two hours.

Every brick is required to have full mortar joints under bottoms, sides and ends, which for each brick, is to be formed by one operation, and in no case is it to be made by working in the cement after the brick is laid; not more than two courses of brick to be laid without lining.

(25.) The contractor will at all times when required by the engineer, place at the disposal of the Croton Aqueduct Board, any stone or rock which is found on the Reservoir ground, or which has been excavated, and which may be wanted for the construction of any masonry which is to be built in connection with the Reservoir, and deposit the same at such places and in such manner and form, within the space specified in specification 1, as the engineer may direct.

(26.) All masonry shall be covered in winter, by and at the expense of the contractor, to prevent injury from water and from freezing, to the satisfaction of the engineer.

(27.) During the construction of the masonry of the gate-houses, pipe vaults, conduit, the laying of pipes, and other necessary work, the Croton Aquednct Board reserves the control of so much ground as the engineer may deem necessary for the proper accommodation in the construction of such works, and of the persons employed on them.

(28.) All work in masonry and puddle banks is to cease positively on the 1st of November in each year, and not to be resumed until the 1st of April ensuing, except by written permission of the engineer. Neither masonry or puddle banks will at any time be built during freezing weather.

(29.) Embankments will not be constructed from the first of December to the 1st of April next ensuing in any season, nor at any time during freezing weather.

(30.) The puddle banks will be covered in the winter with earth or otherwise, to the approval of the engineer to prevent freezing.

(81.) Quantities estimated for the construction of the work, on which the comparisons of bids will be made.

*E. 792,519 cubic yards of excavation, composed as follows, viz: 63,304 cubic yards of soil and other materials not suitable for the construction of embankment, to be placed in spoil banks, within the space mentioned in specification (1;) (of which 17,362 cubic yards will be placed on the outer slopes of the banks,) and 25,000 cubic yards of excavation from the puddle ditches to be placed in embankment or spoil bank; 704,215 cubic yards of excavation, for puddle and embankments.

F. 284,894 cubic yards of rock excavation.

G. 78,988 cubic yards of puddle in the ditches and embankment.

H. 642,589 cubic yards of embankment, exclusive of the puddle bank.

I. 20,938 cubic yards of broken stone lining of inner slopes.

K. 47,111 cubic yards of stone paving or slope wall.

K² 2,009 cubic yards of paving laid in cement.

O. 555 cubic yards of brick wall, laid in cement.

P. 833 cubic yards of concrete on the middle bank.

Q. 54,000 square feet (superficial measure) of sheet piling.

In comparing the proposals, the time bid will be estimated at one hundred and fifty dollars per day.

Other quantities, dependent on developments in the progress of the work, are not estimated. The foregoing are the quantities which have been estimated, approximately, for the construction of the work; they form however no part of the contract, and persons bidding are cautioned, that the Croton Aqueduct Board do not hold themselves responsible that any of them shall strictly obtain in the construction of the work, and the contractors are required to examine the plans and the ground, and to judge for themselves, as well of the quantity, as the distance of haul, and other circumstances affecting the cost of the work, and to make their bids for each item, independent of others so far as relative quantities are concerned.

---

* These letters refer the quantities to the prices to be bid for the work under the same letters in the proposals. Letters L, M and N have no quantities ascertained.

(32.) In order to enable the contractor to prosecute the work advantageously, the said engineer shall make an estimate, from time to time, not oftener than once a month, as the work progresses, both of work done and materials delivered on the ground to be occupied by said Reservoir. The estimate for unfinished work shall not be required to be made by strict measurement, but by measuring and estimating, to obtain only an approximate result of the work done and its value under the contract, as compared with the whole contract; and it shall not be required of said engineer to measure at all for work that is in an irregular shape, but he may estimate the quantity of such on his judgment of the amount of the same. Between the months of November and May, the estimates shall not be made oftener than once in two months, and at no time for a sum less than $500; and it is expressly understood, that estimates shall be made only when the work is prosecuted, agreeably to the provisions of this contract, and with such progress as may be satisfactory to the engineer.

(33.) The contractors are required to preserve all stakes, street bounds, and bench marks in their proper positions, until authorized to remove them by the engineer. Any expense incurred in replacing any stakes, street bounds, or bench marks, which the contractor, or any person working under him, may have failed to preserve, will be charged to the contractor and deducted from the amount to be paid him for doing the work under this contract.

(34.) The contractor will, during the construction of the work, prevent any materials being taken from the Reservoir ground without the direction of the Croton Aqueduct Board.

(35.) No shanties or other buildings shall be erected, on the Reservoir ground in charge of the Croton Aqueduct Board, without authority in writing from said Board.

(36.) Whenever the contractors are not present on any part of the work where it may be necessary to give directions, orders will be given by the engineer, his assistants and inspectors, to and be received and obeyed by the superintendents and overseers who may have immediate charge of the men employed on the particular work, in relation to which the orders may be given.

(37.) The Contractor shall, when required to do so by the engineer, remove from the work, any overseer, superintendent, laborer or other person employed on the work, who shall refuse or neglect to obey the directions of the engineer, or his assistants, or the inspectors under him, in any thing relating to the work, or who shall perform his work in any manner contrary to the specifications and directions of the engineer, or who shall be deemed by the engineer to be incompetent or unfaithful, or who shall commit any trespass on the Reservoirs or other property in the vicinity of the work.

(38.) All work to be done under these specifications shall be to the satisfaction of the engineer, and all materials and workmanship shall be subject to the inspection and rejection of the engineer, or of the agents authorized to act under him.

(39.) Inspectors will be placed on the work to observe and direct the manner of construction, and no new party will be put at work on the embankments, masonry, or puddle, or preparing the ground, or materials, without three days previous notice to the engineer, to provide an inspector for such party.

(40.) No work is to be considered as accepted which may be defective in its construction, or deficient in any of the requirements of these specifications, in consequence of any negligence of any inspector or subordinate engineer to point out such defect or deficiency during the construction; and the contractor will be required to correct any imperfect work whenever discovered before the final acceptance of the work.

(41.) Any doubt as to the meaning of these specifications, or any obscurity as to the wording of them will be explained by the engineer; and all directions and explanations required, allude to, or necessary to, complete any of the provisions of these specifications, and give them due effect will be given by the engineer.

(42.) Whenever the word contractor is used in these specifications or in this contract, it is to be taken and used for the party who has entered into the contract to perform the work to be done under these specifications, or the legal representative of such party.

(43.) Whenever the word engineer is used in these specifications, or

in this contract, it refers to and designates the engineer who may, by the Croton Aqueduct Board, be appointed for the time being, to have charge of the construction of the Reservoir herein specified.

And it is further mutually agreed, by and between the parties to this contract, that the quantities to be paid for shall be measured by the engineer and his assistants, according to the plans and the working lines which may be given, when the work comes up to such line, and no allowance will be made for any excess above the quantity required by such plans or lines, on any portion of the work.

And it is further agreed, that the work shall be commenced and carried on at such parts, and in such order of precedence, and at such times and seasons as may, from time to time, be directed by the engineer, and all work shall be, in every respect, executed in a thorough and workmanlike manner.

And said part of the second part further agrees, that said Croton Aqueduct Board, or the engineer, may make alterations in plan, form or dimension of said work, either before or after the commencement of the construction, If such alterations diminish the quantity of work to be done, they shall not constitute a claim for damages, or for anticipated profits on the work that may be so dispensed with. If they increase the amount of work, such increase shall be paid for only according to the quantity actually done and at the price established for similar work under this contract; and the contract will be regarded as completely executed and fulfilled, when the work required by the altered plans is done and paid for, as herein provided.

And it is further agreed, that if the work shall be increased by the enlargement of any part of the same, or by any contingent work which the engineer may deem necessary to facilitate the execution, or render the work in any particular conformable to local circumstances, or which may be deemed by the engineer necessary for perfecting the work, beyond what is provided for in this contract and specifications, such increase shall be paid for at the same rate as similar work is herein contracted to be paid for; and if such work is not similar to work herein contracted for, it shall be paid for as an extra item, at a price to be agreed upon previously to the commencement of such extra work.

And it is further agreed, that no public or private road or building, or other improvement on the ground appropriated for said Reservoir, will be obstructed, injured or removed by the contractor, until special directions shall be given by the engineer to enter upon the same.

And said part of the second part further agree that will not, of or by agent or agents, give or sell any ardent spirits or intoxicating drinks to workmen, or any other person on or near said work, or allow any to be brought on the work by laborers, or any other persons, and will do all in power to discountenance and effectually prevent its use, on or in the vicinity of the work, by any person or persons whatever.

And it is further agreed, that if any material brought on the ground for the use of the work, or selected from the excavations for the same, shall be condemned by the engineer as unsuitable for the work, the contractor shall forthwith remove said materials from the work.

And it is further agreed, that if any work shall be condemned by the engineer as defective, or improperly done, such defective or improper work shall be taken down and rebuilt, or the defects otherwise remedied as the engineer may direct; and if said contractors decline, refuse or neglect to remove such condemned materials, or to rebuild such condemned work, or otherwise correct the defects as the engineer may direct, then the engineer may employ, in behalf of the Croton Aqueduct Board, men, animals, tools and implements to do the same, and the expense thereof shall be deducted from any money which may be otherwise due said contractor.

And the said part of the second part hereby covenant and agree that will give personal attention constantly to the faithful prosecution of the said work. And that will not sub-let the aforesaid work but will keep the same under own control; that will not assign, by power of attorney or otherwise, any of the moneys payable under this agreement, unless by and with the previous consent of the Croton Aqueduct Board, to be signified by indorsement on this agreement; and that will punctually pay the workmen who shall be employed on the aforesaid work in current cash funds and not in what is denominated store pay.

The said part of the second part further agree that if the work to be done under this agreement shall be abandoned. or if this contract shall be assigned by the party of the second part otherwise than is herein specified, or if at any time the engineer appointed by Croton Aqueduct Board to have charge of the construction of said work, shall be of opinion and shall so certify in writing to said Board, that the said work, or any part thereof, is unnecessarily or unreasonably delayed, or that the said contractor is willfully violating any of the conditions or covenants of this contract, or executing said contract in bad faith, they shall have the power to notify the aforesaid contractor to discontinue all work, or any part thereof, under this contract; and thereupon the said contractor shall cease to continue said work, or such part thereof as said Board may designate, and the said Board shall thereupon have the power to place such and so many persons, and obtain, by purchase or hire, such animals, carts, wagons, implements and tools, as the engineer may deem necessary, by contract or otherwise, as said Board may deem advisable, to work at and be used to complete the work herein described, or such part thereof, as the engineer may deem necessary, and to use such materials as they may find upon the line of said work, and to procure other materials for the completion of the same, and to charge the expense of said labor and materials, animals, carts, wagons, implements and tools to the aforesaid contractor, and the expense so charged shall be deducted and paid by the parties of the first part out of such moneys as may be either due or may at any time thereafter become due to the said contractor, under and by virtue of this agreement or any part thereof, and in case such expense is less than the sum which would have been payable under this contract, if the same had been completed by said contractor, then the said part of the second part shall be entitled to receive the difference; and in case such expense shall exceed the last said sum then the said part of the second part shall pay the amount of such excess to the parties of the first part on notice from the said Board of the excess so due.

And the said part of the second part hereby agree to receive the following prices as full compensation for furnishing all the materials which may not be found on the ground, and for labor in building, moving materials, and constructing, and in all respects completing the aforesaid

work according to the plan and specifications and the requirements of the engineer under them, to wit:

I. For all excavation, whether hardpan, quicksand, stones, boulders, or otherwise, excepting solid rock which requires blasting, and excepting boulders more than half a cubic yard in capacity, and for disposing the materials according to the specifications in spoil bank, or in refilling excavations made to obtain materials, or embankments, or puddle bank, or puddle, to be measured in excavation,

cents per cubic yard.

J. For all excavations of solid rock which requires blasting and of measure of a capacity of more than a half a cubic yard, and disposing the materials according to the specifications, to be measured in excavation,

cents per cubic yard.

K. For puddle bank, and all puddling required, including filling seams in the rock, when required, in addition to the price paid for excavation of the materials under item E, or furnishing materials under item M, to be measured in embankment,

cents per cubic yard.

L. For embankments, including the soil one foot in depth on the outer slopes and exclusive of all puddle and all masonry and broken stone on the slopes, in addition to the price paid for excavation in item E, or for furnishing materials in item N, when the engineer may direct, materials to be furnished from outside the Reservoir ground, to be measured in embankment,

cents per cubic yard.

M. For the lining of broken stone on the inner slopes of the embankments and placing the same as directed, and for all labor connected therewith to be measured in embankment,

cents per cubic yard.

N. For paving or constructing slope wall, the stone to be taken from the rock excavated after supplying the Croton Aqueduct Department with whatever they may require according to the specification, and for labor in constructing the same, to be measured in the wall,

cents per cubic yard.

(L.) For stone to be furnished for the paving, in case the stone for the excavation should not be deemed suitable for paving, by the engineer, in addition to the price above stated in item K, to be measured in the wall,

cents per cubic yard.

(M.) For all clay, earth, sand and gravel to be furnished for puddle, should the engineer deem the material from the excavations not suitable for that purpose, or should there be a deficiency in the quantity directed to be obtained, within the outer slopes of the exterior Reservoir bank, by the engineer, in addition to the price paid for puddle in item G, to be measured in embankment,

cents per cubic yard.

(N.) For earth to be furnished for embankment, should the engineer direct any to be obtained beyond or outside of the Reservoir ground, in addition to the price paid for embankment in item H, to be measured in embankment,

cents per cubic yard.

(O.) For constructing the brick wall in the middle bank, including furnishing all labor and materials,

cents per cubic yard.

(P.) For concrete, for all purposes required in the specifications, including furnishing materials, (the stone may be taken from the rock excavations not otherwise wanted,) and for all labor connected therewith, to be measured in the bed where placed,

cents per cubic yard.

(Q.) For each square foot of sheet piling, constructed according to the specifications,

cents per square foot.

And the said part of the second part hereby further agree that will furnish the said Croton Aqueduct Board with satisfactory evidence, that all persons who have done work or furnished materials under this agreement, and who may have given written notice to the said Board before or within ten days after the final completion and acceptance of the whole work under this contract, that any balance for

such work or materials is due and unpaid, have been fully paid or satisfactorily secured. And in case such evidence be not furnished as aforesaid, such amount as may be necessary to meet the claims of the persons aforesaid shall be retained from the moneys due the said part of the second part under this agreement, until the liabilities aforesaid shall be fully discharged, or such notice withdrawn.

And the said part of the second part hereby further agree that the said parties of the first part shall be and they are hereby authorized to deduct and retain out of the moneys which may be due or become due to the said part of the second part under this agreement the sum of one hundred and fifty dollars per day as liquidated damages for each and every day the aforesaid work may be uncompleted over and beyond the time hereinafter stipulated for its completion.

And the said part of the second part further agree that will indemnify and save harmless the parties of the first part from all claims, demands, suits or actions of every name and description, brought against them, for or on account of any injuries or damages received or sustained by any party or parties by or from the said part of the second part servants or agents in the construction of said work or by or in consequence of any negligence in guarding the same or by or on account of any act or omission of the said part of the second part or agents; and the said part of the second part hereby further agree that so much of the moneys due to under and by virtue of this agreement, as shall or may be considered necessary by the Croton Aqueduct Board, shall or may be retained by the said parties of the first part until such suits or claims for damages as aforesaid shall have been settled and evidence to that effect furnished to the satisfaction of said Board.

And it is further agreed by said parties to this agreement, that payments shall be made on the estimate of the engineer, which are required by specification 32, of eighty (80) per cent. only, of the amount of said estimates, and when the total sum so retained from the whole amount estimated shall have become ($75 000) seventy five thousand dollars then the full amount of the subsequent estimates, shall be paid, as they become due, without any deduction.

And it is further agreed, that whenever, in the opinion of the engineer, the part of the second part ha completely performed this contract on part, said engineer shall certify the same in writing to the parties to this agreement, together with his estimate, embracing both stipulated and extra work, as herein provided, on which the part of the second part to be paid.

And, it is further expressly agreed, that no money shall become due and payable under this contract, except on the certificate of said engineer, as herein provided.

And the said part of the second part further agree that shall not be entitled to demand or receive payment for any portion of the aforesaid work or materials, except in the manner set forth in this agreement, nor until each and every of the stipulation hereinbefore mentioned are complied with, and the engineer shall have given his certificate to that effect; whereupon the parties of the first part will, at the expiration of twenty days after such completion and the delivery of said certificate, pay, and they hereby bind themselves and their successors, to pay the said part of the second part in cash, the whole amount of money accruing to the said part of the second part under this contract, excepting such sum or sums as may be lawfully retained, under any of the provisions of this contract, hereinbefore set forth, provided that nothing herein contained be construed to affect the right hereby reserved, of the said board to reject the whole or any portion of the aforesaid work, should the said certificates be found or known to be inconsistent with the terms of this agreement, or otherwise improperly given.

And the said part of the second part further agree to commence the work herein contracted for, within days from the date hereof, and that all work to be done under this contract shall be fully completed and performed on part by the day of in the year eighteen hundred and

In witness whereof, the parties to these presents have hereunto set their hands and seals the day and year first above written.

For the Mayor, Aldermen and Commonalty of the city of New York.

SIGNED AND SEALED }
IN PRESENCE OF }

Know all Men by these Presents, *That We,*

of the city of New York, are held and firmly bound unto the Mayor, Aldermen and Commonalty of the said city, in the sum of two hundred thousand dollars, lawful money of the United States of America, to be paid to the said Mayor, Aldermen and Commonalty, or their certain attorney, successors or assigns; for which payment, well and truly to be made, we, and each of us, do bind ourselves, and each of our heirs, executors and administrators, jointly and severally, firmly by these presents. Sealed with our seals. Dated this day of one thousand eight hundred and fifty.

WHEREAS, the above bounden by instrument in writing, under hand and seal, bearing even date with these presents, contract with the said Mayor, Aldermen and Commonalty, to furnish all the materials and labor, excavate for, build, construct, and, in all respects complete, in the manner, on the conditions, and for the considerations in the annexed and preceding contract mentioned and contained, a good, firm, and substantial reservoir, according to the specifications contained in, or annexed to said contract, and the plans alluded or referred to in the same.

Now, therefore, the condition of the above obligation is such, that if the said shall well and truly, and in good, sufficient and workmanlike manner, perform the work mentioned in the aforesaid contract, and complete the same in accordance with the terms and provisions therein stipulated, and in each and every respect comply with the conditions therein contained, then this obligation to be void; or else to remain in full force and virtue.

Signed and sealed }

PROPOSALS

TO THE CROTON AQUEDUCT BOARD,

FOR BUILDING THE NEW RECEIVING RESERVOIR ON YORKHILL, BETWEEN EIGHTY-FIFTH AND NINETY-SEVENTH STREETS AND FIFTH AND EIGHTH AVENUES.

Made by

Dated

1. of the No. street, do hereby declare that the only person interested in this estimate; and that no other person than herein named, has any interest in this estimate, or in the contract proposed to be taken.

2. further declare, that this estimate is made without any connection with any other person or persons making an estimate for the same work; and is, in all respects, fair, and without collusion or fraud.

3. further declare, that no member of the Common Council, head of department, chief of bureau, deputy thereof, or clerk therein or any other officer of the Corporation of the city of New York, is directly or indirectly interested therein, or in the supplies or works to which it relates, or in any portion of the profits thereof.

4. further declare, that the names of the persons affixed to the consent hereto annexed, were written by said persons respectively; and that said persons are householders, or freeholders of the city of New York.

5. have carefully examined the annexed specification and form of contract, and the ground on which the work is to be constructed, and the plans of the same, will contract to build the reservoir and the appurtenances, of the dimensions. in the manner and on the conditions required by the specifications annexed, upon the following terms, viz:

(E.) For all excavation, whether hardpan, quicksand, stones, boulders or otherwise, excepting solid rock, which requires blasting, and excepting boulders, more than half a cubic yard in capacity, and for dis-

puting the materials according to the specifications in spoil bank, or in filling excavations made to obtain materials, or embankment, or puddle bank, or puddle, to be measured in excavation, cents, per cubic yard.

(F) For all excavations of solid rock, which require blasting, and of boulders of a capacity of more than half a cubic yard, and disputing the materials according to the specifications, to be measured in excavation, cents, per cubic yard.

(G) For puddle bank, and all puddling required, including filling same as the rock, when required, in addition to the price paid for excavation of the materials, under item E, or furnishing materials under item M, to be measured in embankment, cents per cubic yard.

H For embankments, including the soil one foot in depth on the outer slopes, and exclusive of all puddle and all masonry and broken stone on the slopes, in addition to the price paid for excavation in item E, or for furnishing materials in item N, when the engineer may direct materials to be furnished from outside the reservoir ground, to be measured in embankment, cents per cubic yard.

I For the lining of broken stone on the inner slopes of the embankments, and placing the same as directed; and for all labor connected therewith, to be measured in embankment, cents per cubic yard.

K For paving or constructing slope wall, the stone to be taken from the rock excavated, after supplying the Croton Aqueduct Department with whatever they may require, according to the specification, and for labor in constructing the same, to be measured in the wall, cents per cubic yard.

K' For the same laid in cement mortar, including furnishing all labor and materials, to be measured in the work, cents per cubic yard.

L For stone to be furnished for the paving, in case the stone for the excavation should not be deemed suitable for paving by the engineer, in addition to the price above stated in item K, to be measured in the wall cents per cubic yard.

(M.) For all clay, earth, sand and gravel to be furnished for puddle, should the engineer deem the material from the excavations not suitable for that purpose, or should there be a deficiency in the quantity directed to be obtained within the outer slopes of the exterior reservoir banks, by the engineer, in addition to the price paid for puddle, in item G, to be measured in embankment, cents, per cubic yard.

(N.) For earth to be furnished for embankment, should the engineer direct any to be obtained, beyond or outside the reservoir ground, in addition to the price paid for embankment in item H, to be measured in embankment, cents, per cubic yard.

(O.) For constructing the brick wall in the middle bank, including furnishing all labor and materials, cents, per cubic yard.

(P.) For concrete, for all purposes required in the specifications, including furnishing materials, (the stone may be taken from the rock excavations not otherwise wanted,) and for all labor connected therewith, to be measured in the bed where placed, cents per cubic yard.

(Q.) For each square foot of sheet piling, constructed according to the specifications, cents, per square foot.

will further contract to commence the said work, at such time as shall be designated by the Croton Aqueduct Board, and complete the same, within days, next thereafter, (Sundays and holidays to be excepted;) and to authorize the said board to deduct from the moneys which may become due to me, under the contract for the above work, the sum of one hundred and fifty dollars for each day the same may be unfinished, after the time above stipulated shall have expired.

Signed,

City and County of New York, ss:

being duly sworn, say, that the several matters stated in the annexed proposals are, in all respects, true.

DOCUMENT No. 3.

BOARD OF ALDERMEN,

JANUARY 5, 1858.

The following Annual Report of the Public Administrator was received, laid on the table and directed to be printed.

D. T. VALENTINE, *Clerk.*

PUBLIC ADMINISTRATOR'S OFFICE,
New York, January 5, 1858.

To the Honorable the Common Council of the city of New York:

GENTLEMEN:—In compliance with the requirements of the Revised Statutes of the State of New York, and the Laws and Ordinances of the Mayor, Aldermen and Commonalty of the city of New York, I hereby submit a statement of the Receipts and Expenditures of the Bureau of the Public Administrator, from the first day of January, 1857, to, and including, the thirty-first day of December, 1857.

THOS. C. FIELDS,
Public Administrator.

CASES HERETOFORE REPORTED.

THOS. C. FIELDS,
Public Administrator.

PUBLIC ADMINISTRATOR'S OFFICE,
New York, January 5th, 1858.

CITY AND COUNTY OF NEW YORK, *ss:*

THOMAS C. FIELDS, Public Administrator in the city of New York, being duly sworn, says, that according to the best of his knowledge, information and belief, the annexed account contains a true statement of the moneys received for commissions and expenses, and of the total amount of receipts and expenditures in each case in which the Public Administrator has taken charge of and collected any effects, or in which he shall have administered during the year 1857; with the names of the deceased; his addition; the place of his residence at the time of his death, if known; and the country or place from which he came, if he was not a resident of this state at the time of his death.

THOMAS C. FIELDS,
Public Administrator.

Sworn before me this 5th day of January, 1858.

AUGUSTUS J. BROWN,
Commissioner of Deeds.

THE CORPORATION OF THE CITY OF NEW YORK IN ACCOUNT WITH THOMAS C. FIELDS, PUBLIC ADMINISTRATOR.

THOMAS C. FIELDS, *Public Administrator.*

To the Common Council of the city of New York:

The Public Administrator in the city of New York, in pursuance of chapter second, section 449, of the ordinances organizing the city departments, and entitled "The Bureau of the Public Administrator," herewith submits the following report of the titles of actions prosecuted by or against him, and now pending and undetermined, together with other information in respect thereto.

ACTIONS PROSECUTED BY THE PUBLIC ADMINISTRATOR.

NEW YORK SUPERIOR COURT.

Thomas C. Fields, Public Administrator, and administrator of George Guynet, deceased,

agst.

James A. Stevens and Isaac Stevens.

Action for settlement and account of partnership business, and for other relief.

NEW YORK SUPREME COURT.

Charles A. May, Public Administrator, and administrator of Thomas P. Odames,

agst.

John P. Treadwell and Virgil Whitcomb.

Action to recover a note of $1,000.

Charles A. May, Public Administrator, and administrator of Hyacinth Van Damme,

agst.

The Albion Insurance Company, Leon Herckenrath and C. J. M. Dewolf.

Action to recover $10,000 on a policy of life insurance.

ACTIONS AGAINST THE PUBLIC ADMINISTRATOR.

NEW YORK SUPREME COURT.

Eliza A. Cropsey, by her next friend, Albert B. Ridgway,
agst.
Thomas C. Fields, Public Administrator, and administrator of James Ridgway, deceased.

Action to recover $40,000 for services rendered the deceased.

NEW YORK SUPERIOR COURT.

Peter H. Hopkins,
agst.
Thomas P. Odames.

Action of replevin, which the plaintiff seeks to revive against the Public Administrator, as administrator of the deceased defendant. The motion was denied by the Superior Court, at general term, and the plaintiff has appealed to the Court of Appeals.

NEW YORK SUPREME COURT.

John Chapman,
agst.
Henry W. Powell, the Mutual Life Insurance Company of New York, Thomas C. Fields, Public Administrator and administrator of Thomas O'Rourke, or Edwards, deceased, and others.

This is a special action on a policy of life insurance, for $4,000, to have the same decreed to be assets of the firm of which the deceased was a member, and to have a certain transfer of the policy, by the deceased, declared invalid.

Adolphus Van Winkle,

agst.

Thomas C. Fields, Public Administrator, and administrator of Duncan McEwing, Jr., deceased.

Action to recover a bill of goods for $1,121 50.

All of which is respectfully submitted.

THOS. C. FIELDS,
Public Administrator.

New York, January 2, 1858.

DOCUMENT No. 4.

BOARD OF ALDERMEN.

JANUARY 11, 1858.

The following Annual Report of the Counsel to the Corporation, was received, laid on the table, and ordered to be printed.

D. T. VALENTINE, *Clerk.*

OFFICE OF THE COUNSEL TO THE CORPORATION,
New York, December 31, 1857.

To the Honorable the Common Council of the city of New York:

The eleventh section of the ordinance passed June 30th, 1857, entitled "An ordinance to reorganize the Law Department of the city of New York," provides, that "the Counsel to the Corporation shall, on the 20th day of December, in each year, report to the Common Council, the titles of all actions in his hands, prosecuted or defended by him, as provided in section nine, of this ordinance, and then pending and undetermined, with such information, in respect thereto, as he may deem necessary or proper." A similar section was contained in the ordinance, organizing the departments, passed May 30, 1849, and the provision as

to the time within which the report aforesaid is to be presented, has uniformly been construed directory merely. The custom always has been to present the report of the Law Department at the first or second meeting of the Common Council, in January, in each year. In pursuance of the eleventh section aforesaid, and in accordance with previous custom, the Counsel to the Corporation has now the honor to present to the Common Council, his annual report. The Schedule annexed hereto, marked "A," contains the titles of all the actions which are now pending and undetermined, in which the Corporation is a party; and the Schedule hereto annexed, marked "B," contains the titles of all actions which have been tried, argued, discontinued, settled or decided during the last year. In presenting this report, which is, of necessity, by far the most voluminous that has ever emanated from this department, the Counsel to the Corporation deems it his duty to call the attention of the Common Council to some matters which are of the utmost importance to the tax payers of the city, and which are intimately connected with a proper regulation of the Law Department of this city.

NUMBER OF SUITS.

A cursory glance at this report will reveal the fact, that the number of suits against the Corporation has increased nearly four-fold within the past year. This increase is the result of various causes: one of the foremost of which, is the refusal of the Comptroller to pay bills against the city, of the validity or the legality of which, there can be no question. Many suits, as will be seen from the report, have been commenced, simply, because the Comptroller has thus refused, and the Corporation Counsel, through

such refusal, has been held up to the public as an officer who was not availing himself of all legal weapons to guard and protect the rights and interests of his clients. Lest this position may be deemed to be taken without foundation, the Counsel to the Corporation respectfully solicits the examination, by the Common Council, of a few cases, which are but samples of many others:

CORNELIUS L. PURDY.

Cornelius L. Purdy appears in Schedule B, to have been plaintiff in nine suits against the Corporation. These suits were brought on contracts which had been entered into by him with the Corporation, for the execution of the carpenter's work upon engine houses, and various other public buildings. The work had been properly performed by Mr. Purdy, to the entire satisfaction of the Comptroller in each case, but he refused to pay Mr. Purdy the various installments on his contracts as they became due. Before the time to answer these actions had expired, the Comptroller was called upon by the Counsel to the Corporation for his defence to these actions. In reply, he admitted that the contracts had been properly executed by Mr. Purdy, and the work under them properly performed, and subsequently, he certified in writing, that there was no defence to the actions. In each of these cases, in consequence of the refusal of the Comptroller to pay claims which he admitted to be perfectly just, the costs of suit and interest have accumulated upon each claim, and the Corporation, in the form of a judgment, has been compelled to pay far beyond the amount originally demanded.

CORNELIUS SMITH.

The case of Cornelius Smith, which is to be found in Schedule B., is also very much in point in this connection. That was an action brought to recover seven thousand eight hundred and fifty-two dollars and six cents. The amount due upon a contract regularly and legally made with Smith, for the construction of a sewer in King street. The contract provided that the contractor should be paid upon the confirmation of an assessment, for defraying the expenses of the work. The assessment list had been confirmed by the Common Council, and the work had been accepted and approved of by the Croton Aqueduct Board. And yet, the Comptroller refused to pay Mr. Smith the amount which was due to him upon his contract. When the summons and complaint in the action came to the Law Department, inquiries were made of the Comptroller as to the cause of his refusal to pay this claim. In reply it was stated that Mr. Cornelius Smith had refused to take revenue bonds payable in one year from date, in satisfaction of his demand. The Comptroller was then informed in writing, by the Counsel to the Corporation, that as the contract did not make it obligatory upon Mr. Cornelius Smith to receive compensation for the work he had performed, in revenue bonds, the Corporation was bound to pay him therefor in cash. That the refusal of Mr. Smith, to take such bonds constituted no defence to the action; and the Comptroller was requested to inform the Counsel to the Corporation whether there was any other defence to Mr. Smith's claim. The note containing these statements and requests was delivered to the Comptroller in person on the 5th day of December last, and to that note no reply was ever made by him, and judgment for the full amount

of his claim, with interest and costs added, was obtained by the plaintiff.

EDWARD LINNEN.

The case of Edward Linnen, against the Corporation, which was commenced in the Superior Court in October last, and which is also set forth in Schedule B, is another instance of the Comptroller's refusal to pay claims admitted by him to be legally due. That case was brought to recover one thousand and ninety-five dollars due to Linnen, on a contract for work and labor performed by him, and upon which a partial payment had been previously made by the Comptroller. It may be well to add that Linnen has just commenced a similar suit against the city, and the Counsel to the Corporation has been informed by the attorney for the plaintiff, that the Comptroller said he would pay Mr. Linnen, the amount of his demand as soon as he had obtained judgment for the same.

It is not necessary to pursue this detail further, as the above illustration will convey some idea to the Common Council of the number of suits which have been uselessly brought against the Corporation during the past year, for the results of which the Counsel to the Corporation has been held responsible. So impressed, indeed, has the Comptroller become with the idea that no claim against the Corporation should be paid which is not in the form of a judgment, that he has officially stated to various parties that he would much rather that they would sue and get judgment for their claims, as a judgment constitutes the best receipt. These remarks of the Comptroller have been testified to in open court by parties who have brought actions against the Corporation, and the minutes of their testimony in those actions, now on file in

the Law Department, will be produced as a verification of this statement, if the Comptroller should dispute its truth, or the Common Council desire it.

It is not the design of the Counsel to the Corporation in making these statements concerning the Comptroller's action, to impeach the integrity of that officer, or to maintain that he has not been influenced in the course he has pursued by a desire to promote the interests of the Corporation, but it is submitted that he has taken an erroneous view of the methods best adapted to secure the desired result, and that the facts above-stated demonstrate that the effect of his course has been to cast upon another officer, and another department, a responsibility which properly attaches to him and to his department alone. The difficulty is, that the Counsel to the Corporation is held responsible for the determination and settlement of actions brought agaist the city, and that the public very naturally suppose that where so many actions are successfully prosecuted against the city, there is some fault or neglect of duty on the part of its legal adviser.

THE STREET COMMISSION CONTROVERSY AND ITS EFFECTS.

Another, and the most prominent cause of the increase in the number of suits against the city during the past year, has been the controversy, which, since June last, has been maintained in relation to the office of Street Commissioner. The Counsel to the Corporation, at the outset of that controversy informed the Common Council that Mr. Devlin was the duly and legally appointed Street Commissioner of the city of New York, and he has throughout the protracted litigation which has since ensued, maintained that position.

The Comptroller, also, at the outset of the controver-

sy refused to recognize either of the contestants for that office, or to pay either of them, or their employees any salary or compensation, until the disputed title to the office had been determined. The question of title to the office of Street Commissioner, has never yet been passed upon by any other court than the Court of Common Pleas, which tribunal, at Special Term, decided that question in favor of Mr. Devlin. Mr. Devlin, and the officers appointed by him several months since, commenced suits, (most of which were prosecuted in the Second District Court of this city,) to recover the compensation allowed to persons filling the stations which it was alleged they respectively held; various actions were also instituted by the employees of Devlin in this court, and in the Marine Court, to recover compensation for work and labor, alleged to have been performed by them upon the streets and avenues and public buildings of this city. In the former class of cases the Counsel to the Corporation at first refused to interpose any other defence than a denial of the appointment of the subordinate officers, and the performance of their work, Mr. Devlin having been recognized by the Court of Common Pleas, and by the Common Council, as the legally constituted Street Commissioner; but recent occurrences, which are more fully set forth in a communication addressed by this department to the Common Council on the 30th of December, 1857, have induced him to alter this determination. In the latter class of cases while refusing to interpose any objections to the title of Mr. Devlin to the office of Street Commissioner, the Counsel to the Corporation and his assistants have steadily denied the performance of the work and labor alleged to have been performed by the

parties bringing suits. And each claimant has been compelled to prove performance of the work and labor for which he demanded compensation.

But by far the most numerous class of cases against the Corporation, arising out of the Street Commissioner controversy, is that brought by parties alleged to have been appointed by Mr. Devlin, as inspectors on the various public works, which have been in progress during the past six months. In each of these cases the parties have been examined, under the new law, in their own behalf, and have positively sworn to the rendition of the services for which they claimed compensation and the appointment in each case has been duly proven. Under such circumstances it has been beyond the power of the Law Department to avoid judgments against the city. If it be asked why the Counsel to the Corporation has not appealed from the judgments thus obtained, to the higher court, there are three answers to this inquiry. The first is, that the number of clerks which the Counsel to the Corporation is enabled to employ, is entirely inadequate to the performance of the mere manual labor which would be requisite in drawing the appeal bonds, and the notices of appeal, and in writing out the arguments which were, until a few weeks ago, required by the appellate court,—the Court of Common Pleas. And the second answer is that the law requires that whenever an appeal is taken from the judgment of a district court to the Court of Common Pleas, the costs in the court below, amounting, on an average, to fifteen dollars in each case, must be paid to the justice, before execution can be stayed. It has often occurred that twenty-five cases have been on the calendars of the district courts against the

city, in one day, and on one morning there were as many as eighty-eight cases upon the various calendars. To appeal from only twenty-five judgments, would require a disbursement by the Law Department of the sum of three hundred and seventy-five dollars in one day, and two thousand two hundred and fifty dollars in one week. There is no appropriation which would cover such large disbursements by the Law Departmont, and if the Counsel to the Corporation had advanced the same, he would have been unable to procure from the Comptroller a return of the amount advanced, until an opportunity had occurred to place the same in the tax levy for the ensuing year, and until the legislature had passed the annual tax bill. The last answer to the question is, that the Court of Common Pleas is the appellate court to which parties must resort, who seek to reverse a judgment of the Marine or District courts; and that that tribunal had already decided the title to the office of Street Commissioner to be in Mr. Devlin.

Under such circumstances it has been an impossibility, and would have been an impropriety to appeal all the cases in which judgments have been rendered against the Corporation in the District courts. Many of them, however, have been appealed, and the appeals are still pending. In the cases thus appealed, the procurement of the necessary funds to appeal with, has been a source of much embarrassment and difficulty to the Law Department.

NUMBER OF SUITS ARISING OUT OF THE STREET COMMISSIONER CONTROVERSY.

From an examination of the register of the Law Department, it appears that the whole number of suits thus

brought by Mr. Devlin, his clerks, officers, and employees, is about five hundred.

THE MAYOR.

It is but an act of justice to himself, and it is necessary for a full exposition of the truth, that the Counsel to the Corporation should also call the attention of the Common Council to another cause of the increase in the number of judgments obtained against the city; a cause over which he has had, and could have had, no control. On several occasions, the first intimation which the Law Department has received of the existence of a suit against the city, has been the presentation of a transcript of a judgment obtained in such suit to the Counsel to the Corporation, for his official certificate. Upon instituting inquiries in such cases, it has been ascertained that the papers in the same had been duly and legally served upon Mayor Wood, and that he had neglected to send them to the Law Department for examination and attention. Such cases do not, of course, appear upon the register of the Law Department; but their titles are known, and can be furnished, if the Common Council require them.

It has also been a practice for the Mayor to neglect to send to this department the papers served upon him in suits brought against the Corporation in the inferior courts, until the afternoon preceding the return day specified in these papers. The law now requires that where the complaints in such courts are in writing, and verified, the answer must also be in writing, and verified. Almost all of the complaints thus retained by the Mayor, have been in writing, and verified; and it has been almost impossible, in such cases, to get a proper answer ready for

the defendants, and verified by the Comptroller or other officer, in the requisite time.

The act enlarging the powers of the District Courts, and providing for their organization and regulation, which was passed last winter, renders it obligatory upon the justice of such court, where the claim or demand in any action exceeds one hundred dollars, to remove, upon the application of the defendants, such actions into the Court of Common Pleas, provided an undertaking, with one or more sureties, be executed by the defendants, conditioned to pay to the plaintiff the amount of any judgment that may be awarded against the defendants by the said Court of Common Pleas.

The Law Department has endeavored to avail itself of this provision in numerous instances, and bonds properly prepared, in accordance with the requirements of the statute, have been presented to the Mayor, as the chief executive officer of the Corporation, for his signature; and he has, in many cases, refused to execute the bonds, after being informed of the object for which they were prepared.

MARINE AND DISTRICT COURTS.

From the statements which have been already made, it must be apparent to the Common Council that a radical change in the jurisdiction of the inferior courts of this city, in Corporation cases, is necessary to preserve the rights of the tax payers of this already overtaxed community. The evils which have been before alluded to, are, in a great measure, the natural result of the increase of the jurisdiction of those courts. Cases are brought in such courts, against the Corporation, which the parties

bringing them are unwilling to submit to the enlightened examination of a court of record, it seeming to be supposed (but unjustly, as the Counsel to the Corporation believes,) that influences can be brought to bear upon the former courts which would have no weight with the latter. At all events, the Counsel to the Corporation is convinced of the fact, and deems it his duty to state this conviction to the legislative department of the city government, that the interests and welfare of the citizens of New York would be subserved by a reduction of the jurisdiction of the Marine Court in cases in which the Corporation is concerned as a party defendant, to an amount not exceeding two hundred dollars, and by taking away from the District Courts all jurisdiction of cases where the Corporation is a party defendant.

IMPORTANT CASES.

The Counsel to the Corporation respectfully calls attention to the opinions which are hereto annexed, respectively marked C, D, E and F. These opinions are upon points which have never been before settled, and involve conclusions which are extremely beneficial to the Corporation.

In conclusion, the Council to the Corporation asks the Common Council to duly and carefully examine into the matters stated in this report, and take such action in relation to the same as they may deem necessary and proper.

All of which is respectfully submitted,

RICHARD BUSTEED,
Counsel to the Corporation.

John Kempston, *agst.* The same.	July 9, 1857; judgment rendered for plaintiff; suit for reporting decision in in the Metropolitan Police case at Court of Appeals.
James Dally, *agst.* The Mayor, &c., of New York and Charles Vandervoort.	August, 1857; suit settled by Comptroller; brought to enforce mechanics' lien.
Joseph Swenarton, *agst.* The Mayor, &c., of New York.	August 21, 1857; cause tried and judgment rendered in favor of defendants.
Ernest F. Ames, *agst.* The same.	Nov. 2, 1857; cause discontinued without costs to either party.
William D. Swartz, *agst.* The same.	Same.
Charles McCarthy, *agst.* The same.	August 19, 1857; cause settled and discontinued.
Terrence Farley, *agst.* The same.	July 17, 1857; judgment rendered for plaintiff; suit for a payment due on a contract; after inquiry of Chief Engineer of the Croton Aqueduct Department, it was ascertained there was no defence to the action, and that the claim was due.

John Lawless and others, *agst.* The same.	Sept. 21, 1857; the plaintiffs withdraw their complaint.
John R. Farrington, *agst.* The same.	October 7, 1857, complaint dismissed.
No. 1. James Dennis, *agst.* The same.	October 1, 1857; judgment rendered for plaintiff; suit for fencing vacant lots; subpenaed Mr. Flagg as a witness, but he would not attend; the defendants consequently had no evidence to offer.
No. 2. James Dennis, *agst.* The same.	Same.
Cornelius L. Purdy, *agst.* The same.	August 5, 1857; judgment entered for plaintiff; suit for a payment on a carpenter's work; sent a note to Comptroller, asking for defence; received a statement from Comptroller that there was no defence to the action, and that the claim was due.

Francis H. Salters, *agst.* The same.	August 12, 1857; judgment entered for plaintiff; suit brought to recover ten per cent. of the purchase of property bought by the plaintiff at a Corporation sale, and since taken for the Central Park; ascertained, after inquiry at the Comptroller's office, that there was no defence to the action.
William Hayes, *agst.* The same.	Sept. 3, 1857; cause tried judgment of discontinuance directed to be entered by the judge, with costs to the defendants.
James A. Dolan, *agst.* The same.	Nov. 2, 1857; cause discontinued.
John Harpel, *agst.* The same.	Sept. 11, 1857; cause discontinued.
Samuel J. Lewis, *agst.* The same.	Same.
John J. Rabineau, *agst.* The same.	Same.

Frederick Stanbridge, *agst.* The same.	Same.
Cornelius L. Purdy, *agst.* The same.	August 28, 1857; judgment rendered for plaintiff; suit for a payment due on a carpenter's contract. After inquiry of Comptroller, as to defence, he stated that the appropriation for that object was exhausted, but that the payment was due plaintiff.
Robert H. Ellis, *agst.* The same.	Sept. 11, 1857; cause tried; Sept. 15, 1857; judgment rendered in favor of defendants.
Cornelius L. Purdy, *agst.* The same.	Sept. 3, 1857; judgment rendered for plaintiff: same remarks apply as in the last foregoing suit.
James N. Ryan, *agst.* The Mayor, &c., of New York, and Cornelius Collins.	October, 1857; cause tried; judgment rendered for the plaintiff against the contractor, Collins; the suit brought to enforce a mechanic's lien.
Thomas H. Ferris, *agst.* The Mayor, &c., of New York.	Sept. 22, 1857; cause tried, and judgment rendered for plaintiff; suit for salary as an appointee under Charles Devlin.

William A. McSpedon, *agst.* The same.	Same.
Christopher C. Ellis, *agst.* The same.	Sept. 23, 1857; cause tried; judgment rendered for plaintiff; suit for work and labor performed under direction of Charles Devlin, Street Commissioner.
Patrick Burns, *agst.* The same.	Same.
Richard Fitzpatrick, *agst.* The same.	Same.
John Fitzpatrick, *agst.* The same.	Nov. 7, 1857: same.
John M. Henry, *agst.* The same	Oct. 12, 1857; cause tried; judgment rendered for defendants; appealed by plaintiff to General Term; appeal still pending.
Timothy Donovan, *agst.* The same.	Oct. 8, 1857; cause tried; judgment rendered for plaintiff; suit for furnishing stoves, &c., to the old Board of Central Park Commiss'ers, composed of the Mayor and Street Commissioner.

John H. Welch, *agst.* The same.	The papers in this suit were not received at the office of the Counsel to the Corporation until two days after the time for appearing.
John H. Robertson and an'r, *agst.* The same.	Oct. 14, 1857; cause tried, and judgment rendered for plaintiffs; defendants appealed to General Term —same still pending.
James H. Welsh, *agst.* The same.	Oct. 14, 1857; cause tried; judgment for plaintiff; suit for printing proceedings of the Common Council in the N. Y. Leader.
Cornelius L. Purdy, *agst.* The same.	Judgment for plaintiff; as in foregoing cases, "no appropriation" was assigned by the Comptroller as the reason for not paying the claim; would pay on a judgment, &c.
George H. E. Lynch, *agst.* The same.	Oct. 8, 1857; cause tried; judgment rendered for the plaintiff; suit for salary as clerk in the office of Charles Devlin.

Walter O'Shea. *agst.* The same	Oct. 8, 1857; cause tried; judgment rendered for the plaintiff; suit for work performed under direction of C. Devlin.
Timothy W. Oakley. *agst.* The same.	Oct. 13, 1857; same.
Andrew McBride. *agst.* The same.	Oct. 13, 1857; same.
William Langdon. *agst.* The same.	Oct. 15, 1857; same.
William Turner *agst.* The same	Oct. 12, 1857; judgment rendered for plaintiff; the principle of res adjudicata applied in this case; suit for salary as clerk in the Street Commissioner's office.
James Agate *agst.* The same	Nov. 12, 1857, cause tried; Nov. 14, 1857, judgment rendered in favor of defendants; plaintiff appealed to General Term; same still pending.
Richard S. Gray. *agst.* The same	Oct. 21, 1857, judgment rendered for plaintiff; suit for inspector's pay.

Edward Merritt, *agst.* The same.	Nov. 4, 1857; complaint dismissed.
James G. Brinckman, *agst.* The same.	Oct. 14, 1857; judgment rendered for plaintiff; the principle of res adjudicata applied in this case.
Charles H. Ring, *agst.* The same.	Oct. 15, 1857; judgment rendered for plaintiff; the principle of res adjudicata applied in this case; suit for salary as an appointee in the Street Department.
William Turner, *agst.* The same.	Oct. 16, 1857; same.
Joseph B. Tully, *agst.* The same.	Same.
Charles Turner, *agst.* The same.	Same.
William H. McCorkle, *agst.* The same.	Oct. 19, 1857; same.
David C. Sturgis, *agst.* The same.	Nov. 12, 1857; cause tried; judgment rendered for the plaintiff; defendants appealed to General Term; appeal still pending.

John Ketchum, *agst.* The same.	Oct. 23, 1857; judgment rendered for plaintiff; suit for "inspector's pay."
Maxwell A. Oliffe, *agst.* The same.	Same.
Francis Stacom, *agst.* The same.	Same.
Daniel Carpenter, *agst.* The same.	Oct. 26, 1857; same.
John Butcher, *agst.* The same.	Oct. 29, 1857; cause tried; judgment rendered for the plaintiff.
Victor M. P. Lyon, *agst.* The same.	Dec. 14, 1857; cause tried; judgment rendered for the plaintiff.
James H. Welsh, *agst.* The same.	Oct. 27, 1857; judgment rendered for plaintiff. This action was brought to recover for advertising the proceedings of the Common Council in the New York Leader; the Comptroller refused payment, notwithstanding a resolution of the Common Council had been passed, designating that paper as the paper to print them.

George H. E. Lynch, *agst.* The same.	Oct. 27, 1857; judgment rendered for plaintiff; suit for salary as clerk in the office of C. Devlin, Street Commissioner.
Charles S. Sypher, *agst.* The same.	Oct. 29, 1857; cause tried; judgment rendered for plaintiff.
Henry Underwood, *agst.* The same.	Same.

The two last causes were brought for work and labor performed under the direction of Street Commissioner Devlin.

James C. S. Sinclair, *agst.* The same.	Oct. 27, 1857; cause discontinued.
John Hawley, *agst.* The same.	Nov. 4, 1857; cause tried; judgment rendered for the plaintiff; suit for work and labor performed by direction of Street Commissioner Devlin.
Joseph Zermans, *agst.* The same.	Oct. 24, 1857; judgment rendered for plaintiff; suit for inspector's pay.
Edward Bonnell, *agst.* The same.	Same.

Cornelius L. Purdy, *agst.* The same.	Nov. 10, 1857; judgment rendered for the plaintiff, without trial; Comptroller sent a communication in writing, stating that there was no defence to this action, and that the claim was due; offer to take judgment, accepted by the plaintiff.
Edward Dennis, *agst.* The same.	Oct. 28, 1857; judgment rendered for plaintiff; suit for inspector's pay.
John Mountjoy, *agst.* The same.	Same.
James Boyd, *agst.* The same.	Nov. 12, 1857; cause tried; Nov. 14, 1857, decision rendered for plaintiff.—This suit was brought to recover for repairing the court rooms and furniture of the Court of Common Pleas. The Comptroller, although he had promised to pay for the work before it was performed, afterward refused to do so, when requested, without a judgment.

James McLaughlin, *agst.* The same.	Oct. 31, 1857; judgment rendered for plaintiff; suit for inspector's pay.
Moses A. Pierce, *agst.* The same.	Same.
David Cargill, *agst.* The same.	Same.
James C. Stoneall, *agst.* The same.	Oct. 31, 1857; suit discontinued.
Samuel F. Engs, *agst.* The same.	Same.
Cornelius L. Purdy, *agst.* The same.	Nov. 10, 1857; judgment rendered for the plaintiff, without trial. This is another of Purdy's cases, in which the Comptroller communicated that there was no defence, and that claim was due; offer to take judgment accepted.
R. P. H. Abell, *agst.* The same.	November 5th, 1857, complaint dismissed.
Patrick H. Kelly, *agst.* The same.	November 5th, 1857, judgment rendered for plaintiff.

David M. Weed, *agst.* The same.	Same.

The two last suits were brought to recover for services rendered as inspectors, appointed by the Street Commissioner.

George Peckham, *agst.* The same.	November 5th, 1857, complaint dismissed.
Henry W. Genet, *agst.* The same.	Same.
Matthew D. Greene. *agst.* The same.	November 9th, 1857, cause tried, and judgment rendered for plaintiff.
Matthias Breen. *agst.* The same.	December 10th, 1857, cause tried and judgment rendered for plaintiff. defendants appealed to General Term, appeal still pending.
William Baird, *agst.* The same.	November 13, 1857, judgment rendered for plaintiff. Suit for salary as an appointee of the Street Commissioner.
William H. Martin, *agst.* The same.	Same.

Thomas J. Sheridan, *agst.* The same.	November 17, 1857, cause tried; judgment rendered for plaintiff. Suit for work and labor performed under Street Commissioner.
William P. Simpson, *agst.* The same.	Same.
Matthias Gooderson, *agst.* The same.	November 13, 1857, cause tried; judgment rendered for plaintiff.
George Peckham, *agst.* The same.	November 18, 1857, cause tried and judgment rendered for plaintiff. Defendants appealed to General Term.
Charles H. Ring, *agst.* The same.	November 9, 1857, judgment rendered for plaintiff. Suit for salary of plaintiff as Superintendent of Street Improvements, under Mr. Devlin.
George Mountjoy, *agst.* The same.	November 16, 1857, judgment rendered for plaintiff. Suit for salary as clerk in office of Street Commissioner Devlin.
Benjamin F. Pinckney. *agst.* The same.	January 6th, 1858, cause tried and the complaint dismissed.

George Weir, *agst.* The same,	November 16th, 1857, cause tried and judgment rendered for plaintiff, suit for pay as inspector appointed by Street Commissioner Devlin.
James H. Welsh, *agst.* The same.	November 14th, 1857, judgment rendered for plaintiff, suit for advertising proceedings of the Common Council, in the New York Leader.
Samuel F. Whiting, *agst.* The same.	November 20th, 1857, judgment rendered for plaintiff; suit for services performed under Street Commissioner Devlin.
Richard Fitzpatrick, *agst.* The same.	November 24th, 1857, cause tried; judgment rendered for plaintiff.
Roger Dolan, *agst.* The same.	Same.
John Goliver, *agst.* The same.	Same.
Hugh McCabe, *agst.* The same.	Same.

Joseph Murphy, *agst.* The same.	Same.
Thomas Kivlin, *agst.* The same.	Same.
Peter H. Dreyer, *agst.* The same.	Same.

The last seven suits were brought for work performed under direction of Street Commissioner Devlin.

George H. E. Lynch, *agst.* The same.	November 27, 1857, judgment rendered for plaintiff. Suit for salary as appointee under Mr. Devlin.
Morris Goetzel, *agst.* The same.	December 2, 1857, cause tried and judgment rendered for plaintiff.
Frederick C. Mehrer, *agst.* The same.	Same.
Patrick Sheran, *agst.* The same.	Same.
James F. Murray, *agst.* The same.	Same.

Peter Sclosser, *agst.* The same.	Same.
Francis Campbell, *agst.* The same.	Same.
Dennis Quinlan, *agst.* The same.	Same.
Dennis Tracey, *agst.* The same.	Same.
John W. Bennett, *agst.* The same.	Same.

The last nine suits were brought to recover for services rendered as policemen in the Central Park, appointed by the then Commissioners, Fernando Wood and Joseph S. Taylor.

James Tobin, *agst.* The same.	November 27, 1857, cause tried and judgment rendered for plaintiff.
John McGarley, *agst.* The same.	Same.

The last fifty-six suits were brought to recover, some for work performed under the direction of Street Commissioner Devlin, and some for pay as inspectors on streets, appointed by him. The majority of them, however, are assigned claims, to recover for work performed by laboring men on the roads and streets—assigned to grocers and others, in payment of groceries and provisions sold to the laboring men. The work on the roads and streets was all performed under John O'Toole, late Superintendent of Roads, under Charles Devlin.

The New York Leader, *agst.* The same.	The summons in this suit was returnable on the 10th of December, 1857. On the 19th of December, the papers were received at the office of the Counsel to the Corporation, in an envelop, bearing the official stamp of the Mayor's office, nine days after the time for appearing and answering had expired. Judgment was of course obtained in default of appearance of defendants.
George H. E. Lynch, *agst.* The same.	December 24th, 1857, judgment rendered for plaintiff; suit for salary as clerk in the office of Street Commissioner Devlin.

DISTRICT COURT

OF THE CITY OF NEW YORK

FIRST JUDICIAL DISTRICT.

Francis B. Bartlett, *vs.* The Mayor, &c., of the city New York.	May 26th, 1857, cause tried. Judgment rendered for plaintiff. This suit was brought to recover for injuries to plaintiff's wagon, received by driving into a hole in Nassau street.

Frank W. Harris, *vs.* Same.	Same.
Asahel Reed, *vs.* Same.	Same.

The last twenty-one suits were brought to recover the salaries of the appointees of Charles Devlin, as Street Commissioner. When judgment was rendered for the plaintiffs, the Comptroller desired to have the papers in the causes to send to some counsel to appeal the same. The Counsel to the Corporation gave the papers to the Comptroller, and the Comptroller put them in the hands of Mr. Tilden, as Counsel, to appeal the same. Mr. Tilden subsequently returned the papers to the Comptroller with his opinion, that no appeal could be sustained, as the cause had been tried, and no defence had been put in denying Devlin's right to the office of Street Commissioner.

Charles Mackin, *vs.* Same,	September 4th, 1857, cause tried; judgment rendered for plaintiff.
John Quin, *vs.* Same.	Same.

The last two suits were brought to recover for work performed under Charles Devlin.

James Clark, *vs.* Same.	September 17th, 1857, cause tried; judgment for plaintiff; suit for inspector's pay, appointed by Chas. Devlin.

The last nine suits were brought to recover pay as inspectors, appointed by Charles Devlin.

DISTRICT COURT,

IN THE CITY OF NEW YORK,

THIRD JUDICIAL DISTRICT.

Archibald Gordon, *agst.* The Mayor &c,. of the city of New York.	27th July, 1857, judgment for plaintiff, defendants appealed to Common Pleas, but in consequence of Judge Meech's refusal to approve of the undertaking on appeal, execution was not stayed, and the constable levied on "Old Hayes," portrait and sold it to satisfy the judgment.

Charles Hawkins, *agst.* Same.	Same. The last two suits were brought to recover salary as attendants in Judge Meech's court, under the new Act; the salary had not been fixed at that time, by the Board of Supervisors.
William P. Helon, *agst.* Same.	September 5th, 1857; cause tried, judgment for plaintiff, suit brought to recover salary as attendant in Judge Meech's court.
Martin Hanigan, *agst.* The Mayor &c., of the city of New York.	July 14th, 1857, order entered that cause be removed to Common Pleas.
Leonidas S. Osborn, *agst.* Same.	September 14th, 1857, cause removed to Common Pleas, by defendants.
William McLane, ass'g &c. *agst.* Same.	October 29th, 1857, cause tried, judgment rendered for plaintiff.
William Curry, ass'g &c. *agst.* Same.	Same.
Jas. McCormick, ass'g &c. *agst.* Same.	Same.

Barnett Britton, assi'g &c. *agst.* Same.	Same.
George Bailey, assi'g &c. *agst.* Same.	Same.
John Scott, assi'g &c. *agst.* The Mayor &c, of the city of New York.	Same.

The six foregoing actions were brought to recover the salary of two attendants on Judge Meech's court. The Act of April 13, 1857, sec. 65, in relation to District Courts, provides for attendants, and empowers the Board of Supervisors to fix their salaries. Their salaries had been fixed at the time these suits were brought; but the Comptroller refused payment.

John L. Martin, *agst.* Same.	November 10th, 1857, cause tried, judgment rendered for plaintiff.
John L. Martin, *agst.* Same.	November 10th, 1857, cause tried; judgment rendered for plaintiff. The two last suits were brought to recover salary of attendants in the Third District Court.

DISTRICT COURT,

IN THE CITY OF NEW YORK,

FOURTH JUDICIAL DISTRICT.

Charles Mettam and others, *agst.* The Mayor, &c., of the city of New York.	June 5th, 1857, cause tried; judgment for plaintiff; suit for plans furnished to Committee of Common Council, and ordered to be paid, by resolution of the Common Council.
James Green, *agst.* Same.	June 24, 1857, cause tried; judgment for plaintiff. Appealed to Gen'l Term of Common Pleas. Appeal still pending.
Jeremiah E. Burke, *agst.* Same.	June 24, 1857, cause tried; judgment for plaintiff.

This suit was brought to recover for plans furnished the Commissioners of Repairs and Supplies.

James Green, *agst.* Same.	July 23, 1857, cause submitted on demurrer and pleadings; judgment for plaintiff: defendants appealed to General Term of Common Pleas; appeal still pending.

James Durning, *agst.* Same.	August 6, 1857, cause tried; judgment for defendants. The cause went out of court, in consequence of the judge not giving decision within eight days.
James Green, *agst.* Same.	August 14, 1857, cause tried and judgment rendered for plaintiff; defendants appealed to Gen'l Term of Common Pleas. Appeal still pending.
Timothy Donovan, *agst.* Same.	September 15th, 1857, plaintiff withdrew his suit, by paying costs.
James Green, *agst.* Same.	September 15th, 1857, cause tried; judgment rendered for plaintiff; Oct. 5, served notice of appeal to Superior Court, and Common Pleas. Appeal still pending.
William D. Croft, *agst.* Same.	Oct. 3d, 1857, cause tried; judgment for plaintiff.
Abraham Drucker, *agst.* Same.	Same.
William D. Croft, *agst.* The Mayor, &c., of the city of New York.	Oct. 15, 1857, cause tried; judgment for plaintiff; res adjudicata.

[illegible] Drucker, [illegible]	Same.

The last [illegible] were for salary of attendants at the [illegible] Court.

[illegible], &c., [illegible]	August 4th, 1857, cause removed to the Common Pleas.
James Green, [illegible]	Oct. 31st, 1857, cause tried, and judgment rendered for plaintiff. Appealed cause to the General Term of the Common Pleas. Appeal still pending.
Abraham Drucker, [illegible] Same.	November 10th, 1857, cause tried; judgment rendered for plaintiff.
[illegible] D. Croft, [illegible] Same.	Same.

The two last suits were brought to recover for services rendered as attendants on the Fifth District Court, under the new act.

James Green, [illegible] The Mayor, &c., of the city of New York.	November 17th, 1857, cause tried; judgment rendered for plaintiff. December 7, 1857, appealed to the Gen'l Term of the Court of Common Pleas. Appeal still pending.

Albert Price, *agst.* Same.	December 9th, 1857, cause tried; judgment rendered for defendants.
Nicholas Cromer, *agst.* Same.	Same.
Edward Harrison, *agst.* Same.	Dec. 8, 1857, cause removed to the Court of Common Pleas by the defendants.
William Tucker, *agst.* Same.	Same.
Elisha Hibbard, *agst.* Same.	Same.
John Romaine, *agst.* Same.	Same.
William D. Croft, *agst.* The Mayor, &c., of the city of New York.	December 10, 1857; cause tried; judgment rendered for plaintiff.
Abraham Drucker, *agst.* Same.	Same.

These two suits were brought to recover salary of attendants in the Fifth District Court.

Joseph Gilso, assignee, &c., *agst.* Same.	December 30, 1857; complaint dismissed.

DISTRICT COURT,

IN THE CITY OF NEW YORK.

FIFTH JUDICIAL DISTRICT.

Michael Harrison, *agst.* The Mayor, &c., of the city of New York, impleaded.	May 8, 1857; proceeding dismissed
John L. Martin, *agst.* The Mayor, &c., of the city of New York.	October 21, 1857; cause tried; judgment for plaintiff. Appealed to Common Pleas; appeal still pending.
Christopher Dick, *agst.* The Mayor, &c. of the city New York.	October 17, 1847; cause tried; judgment for plaintiff; suit for cleaning yard and privy of engine house; claim about $20.
Richard Barnaby *agst.* Same	October 19, 1857; cause tried; judgment rendered for defendants.
[illegible] Sommer as [illegible], &c., *agst.* Same	October 14, 1857, cause tried; judgment rendered for plaintiff. Suit for salary of attendants at Fourth District Court.
[illegible] *agst.* The Mayor, &c. of the city New York	Same

Moritz Sommer, assignee, &c., *agst.* Same.	Same.
John L. Martin, *agst.* Same.	October 21, 1857; judgment for plaintiff. Appealed to Common Pleas; appeal still pending.
Daniel Connor, *agst.* Same.	November 27, 1857; cause tried; judgment rendered for plaintiff. Suit for the loss of horse which fell through a Corporation pier.
Emile Lippman, *agst.* Same.	December 19, 1857; cause tried; judgment rendered for plaintiff.
Moritz Somers, assignee, &c., *agst.* Same.	Same.

The two last suits were brought to recover the salary of an attendant in the Fourth District Court.

Thomas G. Van Cott, *agst.* The Mayor, &c., of the city of New York.	December 12, 1857; cause tried; judgment rendered for plaintiff.
John F. Secone, assignee, &c., *agst.* Same.	Same.

The two last suits were brought to recover the salary of an attendant in the Fourth District Court.

DISTRICT COURT,

IN THE CITY OF NEW YORK,

SIXTH JUDICIAL DISTRICT.

Charles B. Foot, *agst.* Azariah C. Flagg.	October 8, 1857, cause discontinued.
Jesse H. Ludlam, *agst.* The Mayor, &c., of the city of New York.	June 22, 1857, order entered removing cause to Common Pleas.
John Brainard, *agst.* Same.	August 21, 1857, cause removed by defendants to Common Pleas.
John G. Sperling, *agst.* Same.	November 9, 1857, cause tried; judgment rendered for plaintiff; suit for inspector's services.
Daniel Haight, *agst.* Same.	In this suit, judgment was obtained against the city in default of any appearance on behalf of the defendants, on account of the papers in the same, not having been sent to the office of the Corporation Counsel until two days after the time for appearing, mentioned in the summons, had expired.

John J. Rink, *agst.* The Mayor, &c., of the city of New York and others.	December 22, 1857, cause tried; judgment rendered for defendants.

DISTRICT COURT,

IN THE CITY OF NEW YORK,

SEVENTH JUDICIAL DISTRICT.

Garret Culbert, *agst.* The Mayor, &c., of the city of New York.	June 25, 1857, cause tried; complaint dismissed.
Gustavus O. Deckard, *agst.* Same.	September 3, 1857, cause tried; September 9, 1857, judgment rendered in favor of defendants.
James Kelly, *agst.* Same.	Same.
Alfred N. Brewer, *agst.* Same.	October 16, 1857, cause tried; judgment for plaintiff; suit for inspector's pay.
Richard F. Palmer, *agst.* The Mayor, &c., of the city of New York.	July 27, 1857, obtained order removing cause to the Common Pleas.

Cornelius S. Bogardus, *agst.* The Mayor, &c., of the city of New York.	September 4, 1857, cause removed by defendants to Common Pleas;—since abated by the death of the plaintiff.
Hiram Chandler, *agst.* Same.	December 4, 1857, cause tried; judgment rendered for plaintiff.
John B. Wordsworth, *agst.* Same.	December 29, 1857, cause tried; judgment rendered for plaintiff.—This suit was brought to recover for services rendered in making a preliminary survey of Ninety-third street.

[C]

NEW YORK COMMON PLEAS.

JONAS N. PHILLIPS,
vs.
THE MAYOR, &c., of New York.

JOHN GRAHAM, *for Plaintiff.*
A. R. LAWRENCE, JR., and RICHARD BUSTEED, *f*
Defendants.

INGRAHAM, F. J.—The parties hereto have a greed up a case containing the facts, which they submit to t court pursuant to the provisions of the code, for judgme thereon.

The plaintiff claims to recover, against the defendan for compensation as a councilman for eight days in Ma 1857, and for the same services rendered by Jesse Mitch during the same month, the latter claim having been du assigned to the plaintiff.

The defendants refuse payment of these claims upon t the ground that the provisions of the amended charter April, 1857, deprive the members of the Common Coun of any compensation for such services after the same to effect.

By the acts of April 12th, 1853, and June 14th, 185 conncilmen were substituted in the place of assistant alde men, formed a part of the Common Council of the sa

city, and were entitled to the same compensation as the aldermen.

The case admits that compensation to have been duly fixed at four dollars for each day the aldermen should sit in the Common Council.

The question then arises whether the amended charter of 1857 deprives the members of the present Common Council of such compensation.

By section 44 of this charter it is provided, that no member of the Common Council shall receive any compensation for his services as such member. Laws of 1857, ch. 446.

If this provision is applicable to the members in office at the time of its passage, there is no authority for the payment of compensation to the members of the Common Council.

The previous part of the section 44 refers to officers under this charter, and the defendants' counsel contend that the whole section must be construed as relative to such officers.

By the 51st section of the same act, it is enacted that the Mayor, Aldermen and Councilmen, provided for in this act, are to be elected at the first election for charter officers to be held after its passage.

I have had occasion, heretofore, to pass upon the provisions of this statute in the matter of Devlin, so far as the same was applicable to the present Common Council, and have held that the powers therein granted were conferred upon the present members of that body, so far as they were required for the purposes of government, to prevent an entire cessation of the powers of legislation during the year. If this construction of the charter be cor-

...ly follows that the provisions ... apply to the present members. Ma... ...s act have already been acted u... ...ncil and the departments are ... ...se provisions.

...mmon Council" is confined to th... ...then no ordinances for the org... ...rtments could be passed except by th... ...ted under this charter; and if the ... ...those now in office, there is no ... ...present aldermen from the Courts of C... ...Sessions, as provided in the 48th secti... ...w heretofore passed, therefore, is repea...

...Council itself can only exist under ... ...s powers must depend on the pres... ...without organization under it, there... ...recognizes such officers as councilm... ...statute provides in general terms that ...e Common Council shall receive any co... ...his services as such member, I see no way ...conclusion that the same refers to the pres... ...future members.

...mer part of the section is not entirely c... ...ture legislation. It provides for the disposit... ...ow or hereafter to be provided; and when ...s intended to apply to officers thereafter to ...r appointed, it is express in limiting its operati... ...cers under the charter," or "provided for by t...

...said that the act allowing such compensation to ...ers of the Common Council is not repealed. T...

provision of the 44th section, if applicable to the present members, would be a repeal of that statute, even if no express repeal was contained in the act; but by the 54th section, all laws inconsistent with the act are thereby repealed; and if the provision above referred to applies, then the statute would be inconsistent with the new charter, and could be expressly repealed thereby

The 55th section of the act, which provides that it shall take effect on the first of May then ensuing, also shows that the legislature intended that its provisions should be operative in some parts at that time.

It is concluded, also, on the part of the plaintiff, that the amended charter of 1857 is a local bill, and embraces more than one subject which is not expressed in its title, and is therefore unconstitutional.

The provision of the constitution is, that no private or local bill shall embrace more than one subject, and that shall be expressed in the title. Art. 3, sect. 16.

I am not prepared to admit that the act in question is either a private or a local bill. It can, in no sense, be called a private bill. It is intended to regulate the government of a city containing a large portion of the population of the state, authorizing the city authorities to exercise powers of legislation which, without it, would belong to the legislature. A private act is one of an entirely different character, relating to private and not public interests, and to individual cases and not to a whole community.

Nor do I think such an act, devolving upon others the powers which the legislature possess, for the purposes of government, can be called a local act. In the case of Conner *vs.* the Mayor, &c., 1 Selden, 285, an act was under

consideration providing for the salaries of certain officers elected in the city of New York, to which the same objection was made as in the present case. Judge Foot, in his opinion, referring to this objection, says: "In my opinion, the act is neither private or local." And again he says:

"Regulating the amount and manner of paying the officers, or a given number of the officers, of a county of this state for their official services, when such services are rendered in and form part of the administration and execution of the laws of this state, and affect the citizens thereof who come within their range, can neither be private or local, in the view contemplated by the constitution."

With much greater force may these remarks be applied to a statute providing for the government of a large portion of the territory and population of the state, delegating powers of legislation, and authorizing the passage of laws as well as the administration of them, which in their operation affect all the citizens of the state, who either in their persons come within their range, or whose property is within the limits of that jurisdiction.

Nor do I think the provisions of the statute can be said to be of more than one subject. The act was intended to provide or add to the charter of the city. The previous charters had conferred on the aldermen the right to sit as judges of the Oyer and Terminer and of the Sessions. In framing the new charter, as well as in the act to amend the charter of 1849, passed April 12th, 1853, it was deemed advisable to prohibit the aldermen from any longer exercising that power, and it was proper and consistent with the other provisions of that act, and a necessary part of the new system contemplated thereby, to prohibit those

who formed a portion of the city government, from exercising any longer such powers.

The further provision that the remaining judge in those courts should hold the same without the aldermen, was only necessary as declaring what would follow from the prohibition.

If, however, there was any doubt upon this question, it is not necessary to declare the whole act void; so much of it as is consistent with the title could be sustained. Such was the decision of the Supreme Court of the second district, in the town of Fishkill *vs.* The Plank Road Company, 22d Barb. S. C. Rep., in which the first section of a statute was held to be valid and the residue to be void, on account of the defect in the title.

It was also urged that the provisions of the 52d section brought the statute within the constitutional objection. That section provided a punishment for bribery offered to or committed by an officer of the city government. It was necessarily connected with the city charter, to preserve the purity and integrity of its members or officers, and should not, in my judgment, be considered as a subject separate from or unconnected with a city government.

It can hardly be necessary to discuss the question whether the legislature can take away the compensation of an officer during his term. In Warner *vs.* the People 2 Denio Rep., p. 272, Judge Bronson says: "I do not doubt that the legislature may regulate and reduce or take away the fees of the officer." And in Conner *vs.* the City of New York, 2 Sandford, 355, such right to alter or take away the compensation of a public officer is maintained.

The plaintiff also claims that the 54th section of the

amended charter declares that no right accrued before the act took effect should be prejudiced thereby. This did not apply to prospective compensation not then earned; so far as the plaintiff had rendered service so far as his right to compensation had accrued, but no such right can be claimed before the service was rendered. The cases above referred to show that the right to perform such service may be taken away; and it must of course follow that there was no accrued right in the plaintiff, by which he could insist on pay for discharging his duties, contrary to the provisions of the statute.

Judgment should be rendered for the defendants.

[D]

SUPREME COURT,

GENERAL TERM.

B. FITCH and another,
vs.
'OR, ALDERMEN AND
ALTY OF THE CITY
' NEW YORK,

.0th of January, 1852, the defendants, by their mmissioner, issued a notice for proposals for bulkhead to be 57 feet wide at top and bottom. h of the same month new specifications were sub- which alterations were made, and the bulkhead bed as to be 50 feet wide at the bottom, and a filled in *five* feet at the top. Mabie, the assignor ntiffs, put in his proposals to do the work at $50 g foot, and referred in it to the specifications of ry. This was accepted and an agreement in writ- gned by him and by the Street Commissioner for ants, in which the substance of the specification ied (not annexed,) and the width was agreed to wide both at top and bottom. Mabie says that heard or understood the dock was to be built the second specification required, until he was e bulkhead at Williamsburgh. He had raised it t, when the inspector (Mr. Farlan) said to him, going to frame that dock so?" and he answered, -I am framing it according to my specification." then looked at his own specification and at Ma.

bie's—"yours reads 5 feet and mine 45 feet wide at the top." Mabie told Mr. Farlan to go and see the Street Commissioner. He did so; and when he returned said, that officer said "it must be 45 feet wide at the top." Mabie says he told Mr. F. he would build it 100 feet wide if they wished it, but the city must pay for it. He did finish the work of this width.

The plaintiffs claim that they are entitled to extra pay for all the difference between 5 feet and 45 feet wide. They also show that the inspector inspected the work as it progressed, and that members of the Common Council saw it in its progress, and that the Corporation have rented out the lands since filled in and inclosed by the bulkhead. Mabie also testified that he could read with difficulty; that he did not read the specifications through, and signed the contract without reading it at all; that he made his estimate through his son, whom he directed to calculate what the work would come to at 5 cents the cubic foot, the length being 364 feet, the width 50 feet at the bottom and 5 feet at the top; that this he found would he somewhat short of $50 the running foot, and put in his bid accordingly. His son's testimony corresponded with his.

The specifications both of Jan'y 10, and of Jan'y 20, notified contractors that any work not strictly in accordance with the specification of their *contract* would be positively rejected; and that a strict compliance with the provisions of Title III, "of contracts for supplies and work for the Corporation" of the amended Ordinances passed May 60, 1849, would be required in all cases: and that work not specified and price fixed, in the *contract* would not be allowed for.

Immediately after the description of the width of the

in the specification held by Mabie, it was stated
s to be framed of timber, so placed as to form
feet square from centre to centre, Neither Ma-
s son nor any other witness ever saw or heard
head 50 feet wide at the bottom and five feet at
of one only 5 feet at the top, unless in a shallow
at Flushing, or where another dock was to be
e of the bulkhead; the general difference between
at top and bottom would not exceed 10 or at
eet.

uestions of fact were submitted to the jury and
d that there was no joint understanding between
s on 6th March, 1852, the date of the contract
o the width of the bulkhead at its top. 2d, That
as afterward authorized by the Street Commis-
make the bulkhead 45 feet wide. 3d, And that
titled to $11,375, with interest from 1st of Au-
, for the extra work.

the plaintiffs could only sue on the written con-
ess they could show that another was lawfully
d by mutual consent, or created by operation of
e contract required the work to be 57 feet wide at
bottom, and as the plaintiffs could not show a
ce with it, they must resort to equity to have it
This would be done only on such terms as
equitable to both parties. If, from the circum-
f the csae, a court of law should consider the
entitled to sustain an action, it would be only
ble grounds, and the relief, therefore, should be
red only on the same terms as a Court of Equity
minister it, so that no injustice should be done
fendants, in the attempt to relieve the plaintiffs.

The Street Commissioner was not a general agent of the defendants, to make whatever contract he pleased, but he was restricted by their ordinances. These ordinances must have been known to Mabie, as he was by trade a contractor, and his attention was specially drawn to them in the specification which he saw. They required contracts to be made after advertisement, and to be given to the lowest bidder. This was a matter of great importance to the city, to prevent favoritism to contractors, and to secure that work should be done for the city at the lowest fair rate. The Street Commissioner and the contractor could not, therefore, by express agreement, substitute a contract more favorable to the latter, in the place of that which he had signed; and they could not, by implied agreement, do what they have no power to do by express agreement. Neither could members of the Common Council, by their individual overseeing, raise an implied contract in place of the written one, the contractor knowing the ordinances as to contracts. Nor did either the Street Commissioner or the Common Council do any thing to lead Mabie to suppose that he would be paid extra if he proceeded to make the bulkhead 45 feet wide at the top. On the contrary, when he caused the Street Commissioner to be notified of the error in the written contract, the answer he received was, " that the bulkhead must be 45 feet wide at the top;" which was a declaration that, although the specifications which Mabie held called for 5 feet in width, at a certain price, and those which the inspector held called for 45 feet in width at the same price, the work must be made 45 feet wide, and at the same price; for no question was made to the Street Commissioner about the price, and both specifications were alike

spect. There were other considerations, also, e it inequitable to the defendants to change the e specifications held by the defendants called *ven feet square* from centre to centre; this showed was to be no space less than 7 feet wide, and must be a mistake. The evidence also shows lkhead is built in the city of New York so nar- et, and that the greatest difference between top ı, when the latter is fifty feet, would be 10 or Iabie, as a man in the trade, could not be igno- se things and if he knew them, he knew that the ı mistake, and should have been 35 or 45. This ve known when he made his bid, and there is 'or him that his specification was wrong; it did l him, or it did so merely because he chose to nt, and not to use the knowledge which he pos- e was warned by the answer of the Street Com- what the understanding of that officer was. vhen the work had been just commenced. His ıt moment was then to stop, and to have had a derstanding with the Street Commissioner, and d it reduced to writing, as warned by the specifi- ich he held. It is no excuse that he could not ut difficulty, or that he did not choose to read specifications or the contract through. He had to read and calculate without difficulty, and it be a foundation for an action in violation of vritten agreement, that the plaintiff did not vhole, when no imposition was practiced upon e opposite party. There was a map, or plan, company the specifications, which lay in the nmissioner's office, open to the contractors; and

on that Mabie could have seen the true width. Other persons put in bids, and knew that the width was to be 45 feet, and estimated accordingly.

Mabie, without gross carelessness, for the results of which he alone is accountable, could not have failed to have used the same means of knowledge which they did, and it is no excuse that he says he did not. The object of the public proposals was to give the contract to the lowest bidder. But for Mabie's blunder and gross carelessness, the contract would have been given to Hendricks, who put in proposals and estimated the work *at a little over* $50 "per running foot," and yet allowed in his bid for "45 feet width at the top,"; or else Mabie would have been contented to do the work at his bid. The fact that the Corporation could have had the work done at a price but little over that bid by Mabie, is a reason why he should not have the written contract altered to suit his mistake; the alteration, or any allowance to be made under it, should, under the most favorable circumstances, be made only to such an extent as would put the defendants in the same position as if Mabie had made no mistake or made no bid. That would, at most, allow him but little more than his bid, as Hendricks would have done the work for that in addition. Ferguson also had offered to do it at $63 the running foot, although he estimated for the top as 45 feet wide. Still, for either of these differences ,Mabie has no claim, as he should have refrained from going on with the work as soon as the error was discovered, until there might be a correction of that error, and the contract amended in writing. He had no right, when told that he must make the bulkhead 45 feet wide, to assume that he would do so and charge more than he had agreed to take, and more than others had agreed to do the full work for.

jury also found for the plaintiff $22,000, with inter-
m 1st August 1853, for damages or extra expense
ed to be caused to Mabie, by the misconduct of con-
s for filling in the adjoining land.

esolutions, passed October 1851, January 1852, and
1852, the defendants authorized the Street Commis-
to execute a contract with Kuler and Taylor, for
the space between the bulkhead and the mainland
payment by them of $3,000—they to complete the
within six months from the date of the contract.
the last date, and on the 9th of March, 1852, the
Commissioner had agreed with these parties to do
ork, under such directions as should be given by
1,000 were to be paid on notice from him to com-
the work; $1,000 in 30 days after the commence-
and the remaining $1,000 in 30 days thereafter; the
r the completion was to be six months after notice
e Street Commissioner to commence.

arly as the 23d of April, 1852, Mabie, in writing, com-
l that these contractors were filling in from the
nd, and that the effect was to cause his bulkhead to
ut, and, as he supposed, into deeper water, and said
ust be stopped instantly, or he would bring in his
or damages.

weight of evidence seems to be, that the contractors
have began to fill in from the bulkhead; that that,
e weight of the bulkhead when loaded with stone,
have sunk the latter into the mud, and caused the
ed mud in front of the bulkhead to rise toward the
nd; whereas the filling from the mainland pressed
placed mud against the bulkhead, and caused it to
urther out, and this considerably increased the ex-

pense. The evidence of Daniel Dodge is, however, to the contrary, and that the sliding was caused by Mabie loading with stone the outside of the bulkhead before the inside. He also had surveyed both spots—that where the bulkhead now is, and that in which it should be—and found each of nearly the same depth, the consequence of which would be, that the difference in cost of placing the bulkhead in the one place or the other would be but small. The jury did not concur with him, and found that the sliding out was caused by the operations of the contractors.

There was nothing in the contract which required the contractors to begin to fill in from the mainland—it was open in that respect. They were bound, therefore, to do it in such way as not to injure Mabie's work, and he is entitled to an action against them for the damages caused by their operations; he could also, have applied to the courts, and enjoined them from their unlawful proceeding, if he had made out his case as satisfactorily as he did to the jury. Instead of that, he relied on his claim for damages.

He and the contractors for filling in were engaged by the same employer to perform different parts of the same work. The bulkhead was incomplete without the filling in; and the filling in was but an injury to the navigation without the bulkhead. They are like servants or employees on the same work; neither can have a claim against the employer for the negligence of the other. Could a carpenter sue the owner of a building for injury caused by the negligent manner in which the mason did his work; or the mason on account of the negligence or delay of the carpenter, or the painter for the loss by the carelessness or delay of either of the others? If either had contracted to do work for a certain sum he would be

sh it without extra charge, although he were
enew parts of the work, on account of the
he carelessness of strangers. The owner is
ountable to one contractor for the mischief or
of another contractor, who has agreed with
her parts of the work, than he is for the acts
. The owner does not control their move-
is enough that the one suffering has his reme-
against the wrong-doer.

ion was also argued whether, under the char-
in force in 1852, and the ordinances of the
, necessarily to be presumed to be known to
or, the Corporation could not be made liable
ed contract from the benefit which it derived
rk done, and their using and renting the land
ed. The Corporation were entitled to the
, and to its rents—the part filled in by Mabie
ery small part of that which produced the
st of it came from the filling up of earth by
ntractors—and on the whole, as before shown,
were equitably bound to pay, was what they
o pay. This makes the decision of the ques-
l to unnecessary.

rdict was subject to the opinion of the Court,
hould be entered for the defendants, the opin-
their favor. Considering, however that some
ers partake of the character of questions of
t be more satisfactory to both parties to sub-
again to a jury under instructions correspond-
s opinion, if both so desire that course may be

1, 1857.

(E.)

SUPREME COURT,

GENERAL TERM.

THE PEOPLE, &c., on the relation of DINSMORE and WOOD,
agst.
THE CROTON AQUEDUCT BOARD.

THE PEOPLE, &c., on the relation of JOHN P. CUMMINGS and THOMAS CUMMINGS, jr.
agst.
THE SAME.

The first of these cases comes on appeal from a decision at Special Term, refusing a mandamus; the second is an original application for the same remedy for other persons.

The Croton Aqueduct Board advertised for proposals for making the new reservoir. Dinsmore and Wood presented their proposals, and were apparently the lowest bidders. But they were presented in the name of Dinsmore, Wood, & *Co.*, when there was no third person in partnership with them. They were signed in the name of Dinsmore, and in the name of Wood, as well as in the name of Dinsmore, Wood & *Co.;* and no person made the necessary affidavit except Dinsmore. Wood made no affidavit. At the appointed hour and place, the bids were opened by the Board, sitting as such, and the Comptroller

present, as also Dinsmore and other contrac-
omission of Wood's affidavit was then noticed,
l of the firm was declared by the Board defec-
on that account absolutely rejected by them.

nance seems to recognize that there may be a
from its requirements, which may be deemed an
rm, and that such error may be cured; but it
be that under "error of *form*," would be in-
utter neglect of *all* the required preliminaries.
y matters were required of the bidders, with a

view to prevent a violation of the laws and ordinances as to contracts; laws and ordinances which were passed with the intention of excluding certain classes of persons from being interested in contracts, on the supposition that, if interested, they would have opportunities of gaining unfair advantages, and sometimes would authorize work to be done more because they would wish the profit of the contract, than from the belief that the public needed it. The exclusion of these persons was not a matter of form, and so the due proof which the ordinances required, that no such persons were interested, could not be a matter of form. The entire omission of that affidavit would be fatally defective.

There are other matters required by the ordinance, which are matters of convenience only, such as the residence of the person making the bid, the furnishing of the estimate to the *head* of the department, at *his office*.

The 497th section requires the estimate to contain certain statements, amongst others, that no member of the Common Council is interested, and it is to state all persons who are interested. It is to be verified by the oath of the party making the estimate. The party making the estimate was not Dinsmore or Wood alone, but both of them; it was an appropriate use of the term "party," in this case, as it referred to a contract, in which those on each side or part of the contract are called parties or party. The object of the affidavit was like that of the old answer in Chancery, to search the conscience of the *affiant*—for this purpose the oath of each was equally necessary in both cases. It was not enough for one alone to make his affidavit; that did not gain the object of the law—the searching of the conscience of the other.

n a *mandamus*, the applicant must have a *clear*

s of the members elected to each Board order

racts are to be entered into by the heads
ents, and to be founded on sealed proposals,
ven to the lowest bidder who gives security
er required by the ordinances, and the terms
ntract must have been settled by the *Copora-*
in previous specifications, prepared as a pre-
his bid. Thus far, it does seem as if the heads
nts were assimilated to the heads of our state
l departments, who make contracts without
y of the legislature ratifying them; the legis-
ordering the contracts to be made, not making

them. But the contracts, in all these cases, are to be made under regulations established by ordinances of the Corporation. Section 32 of this act declares that the existing ordinances shall apply to the departments, so far as the same are applicable and not inconsistent with this act. Section 491 of the ordinances is consistent with the act, and forbids any contract to be made, signed, or executed, for a sum exceeding $250, until all the proposals, estimates, contracts, and papers relating thereto, shall have been laid before the Common Council and *confirmed* by them, and an appropriation made therefor. The acts of 1849 and 1853 were sufficiently similar to the act of 1857, to be guides as to the interpretation of the last; and the ordinance last quoted was deemed consistent with those acts. It is so, in fact; those acts gave power to the heads of departments to make contracts, in order to take the power of selecting a contract for the Common Council; to throw an additional check on the making of contracts, not to take off any *check* which the Corporation before held over them—not to throw into the hands of heads of departments, the absolute right to make a contract which had been found to be dangerous when exercised by the the Common Council *alone*.

In the spirit of those laws, the Common Council made this ordinance, (§ 494,) forbidding any contract to be made until it be *confirmed* by them, and an appropriation be made therefor. The Common Council thus retain a *veto* on all contracts; it cannot, of itself, make any; the heads of departments cannot make, sign, or execute any without the approval of the Common Council, but are the executive officers, who, when the work is ordered, are to originate the contracts, and complete them, when the Common Council confirms them. Before this is done by

n Council, no contract is made, no right of
es in favor of any contractor. The Common
ay consider all the bids too high, and refuse to
ork done at such prices; they may find such
their finances between the first suggestion of
nd the presentment of the bids, that what was
the first period, may have become wasteful ex-
at the last; they may have no funds to appro-
uch purposes, or the lowest bid may far exceed
which the law allows them to appropriate; for
other reasons, the power is reserved to them,
o incur and pay the debt, to decide whether
ncur it, or not, when the lowest price for which
one is presented to them. Besides, these vari-
ere made, not to give a right to the lowest
ave a contract made with him—they were not
his benefit, but for the benefit of the public
that the public might have the work done at
price.

iew of the law, the lowest bidder has no cause
if the work should now be done; nor any rem-
t the Corporation, if the work is given to an-
nough a higher bidder. The officers giving to
bidder might, perhaps, be responsible, and the
on might be exempt from any payment beyond
bid, and in those respects the law would be

COURT OF COMMON PLEAS.

SPECIAL TERM—*December* 12, 1857.

JAMES GREEN,
agst.
THE MAYOR, &c., OF NEW YORK.

INGRAHAM, F. J.

WESSELL S. SMITH, *for Plaintiff.*
A. R. LAWRENCE, JR., *for Defendants.*

The plaintiff sues the defendants to recover from them the salary due him on the 1st May, 1857.

Defendants admit the facts in the complaint alleged, but deny their liability therefor.

The answer also sets out the various acts of the legislature prohibiting the defendants from incurring indebtedness by loan of money except in anticipation of the revenue; the tax bill for 1857, in which the salaries for the justices were provided for at the rate of $2,000, being the amount at which the salaries were fixed by the Board of Supervisors—the provision, in the said act, that none of said moneys so to be raised should be applied to any purposes or objects other than those provided for in the act.

That by an act subsequently passed, the salary of the justices was raised to $3,000 per annum, payable out of the city treasury on the first day of each month.

That the legislature passed no act giving the defendants authority to raise any other or further sum to pay these salaries; that there is no money in the treasury out

e defendants are authorized to pay an increase
and that there is no power vested in the de-
raise the same by loan or tax.
wer also avers an offer to pay the plaintiff
lue at the rate of two thousand dollars per

nswer the plaintiff demurred, upon the ground
ains no defence to the plaintiff's claim.
emurrer, all the allegations of the defendants
d, viz: that the defendants are prohibited by
orrowing moneys to make this payment; that
raised by tax are all appropriated to the
poses for which they were to be assessed, and
sed to pay this claim; that there is no money
sury out of which the payment can be made;
o money can be drawn therefrom without a
propriation.
tion then arises, whether the legislature can,
iting the use of all means the defendants may
licable to this purpose, impose on them the
salaries without providing by law the means
, either by loan or tax, or by a repeal of the
before referred to.
be done for one thousand dollars, it can be for
d amount; and if the power can be thus exer-
y be productive of consequences disastrous to
s of the city government.
onstitution, the legislature is required to pass
iting municipal corporations from incurring
the legislature has so restrained the defend-
legislature has, in like manner, specially
use of all moneys to be raised by tax, so that

they cannot be used to pay the plaintiff. By law, also, all the real estate belonging to the defendants, and all their rents and income from markets, wharves, lands, &c., are pledged to the payment of the public debt, and cannot be used for any other purpose. It must be apparent, therefore, that the defendants can only make this payment by violation of law.

I cannot adopt the conclusion that the legislation is sufficient to impose on the defendants the liability for the plaintiff's claim, which he seeks to enforce by action.

If the legislature have provided by law for an increase of the salaries of the justices and clerks of these courts, and have omitted to provide the means by which the defendants could raise the moneys required therefor, the necessary legislation for that purpose has been omitted, and the defendants are not to be held liable. The effect of holding the defendants liable under such circumstances would be to expose their real and personal estate to be sold for the payment of a claim which they have not contracted, to which they have never given their assent. and which they are prohibited from paying out of any means within their control, by the various statutes above referred to.

This case may be distinguished from that of a contract made by the defendants, where, by their own act, they assume the liability. Even in such a case, it may be doubtful whether a liability can be enforced on a contract not provided for by law.

Whether it could or not be enforced in the case of a contract, there should be no liability incurred where the legislature have expressly deprived the defendants of all means of paying the claim, by the passage of laws for-

he use of the public funds except for specific pur-

operty owned by a municipal corporation is to
ted in the same manner as that of individuals.
. The Mayor, &c., of New York, 3 Hill, 531.)
islature cannot take away that property. either
r indirectly, from the Corporation, any more
individuals; and, if they can impose upon the
s the payment of moneys without providing
to raise such moneys by loan or tax, they in-
ppropriate the property held by the city in their
right to public use without their consent.
specially would this be so, when all the pro-
law forbid the making of this payment out of
s possessed by the defendants, and when a pay-
the officers of the city government out of the
aised by tax would expose them to punishment
a violation of the laws. (See Sec. 40, Act to
harter Laws, 1857, p. 446.)
case of The People ex rel. Lynch vs. The Mayor,
end. 680, it was held that an action would lie
e Corporation for the salary of a new officer
ke the present by statute; but that case arose
e restrictions now contained in the charter and
been adopted, and the points now urged were
lered in that decision.
d, in that case, that the payment of such a claim
corporate duty, for which they are liable as
they would be on a contract executed by them
ir corporate seal; conceding that such a liability
fore the restrictions, to which I have referred,
force, those provisions of law have rendered
gislation necessary.

It would be idle to say that moneys should be paid o of the treasury of the city for a special purpose, and at t same time, by law, to say that if any of the publ officers should apply the moneys in the treasury to a purpose other than was designated in the tax bill, th shall be subject to indictment for a misdemeanor.

The defendants, when they receive money from tax or any other source of revenue, which they are bound apply to any special purpose, may, by action, be compell to pay such money to the purposes contemplated, upon t principle that they hold the money so received by them be so applied.

In like manner, where authority is given to them raise the amount by tax, it is their duty to make t necessary provisions therefor; and the law allows the in case of delay in collecting the taxes, to resort to a lo for the purpose of anticipating the amount that may be n cessary for the purposes of the city government befo the taxes are paid.

In either of these cases they would be liable to actio if they neglected to provide for and pay such claims they become due; but there is no good reason why th should be compelled by a judgment and execution to what the laws have prohibited, or be compelled to pe with their property to meet payments which the legis ture has imposed without providing the necessary auth ity to collect means for that purpose.

It does not follow, because the defendants have n been authorized to provide the means for this payme that the plaintiff is remediless. The payment may delayed, and the consequences to those entitled to recei the salaries may produce temporary inconvenience; b it will be the duty of the Supervisors to provide for su

in their future application, and, if they neglect
ther means for redress may be resorted to; but,
ecessary legislation is adopted, I see no ground
the defendants can be held liable.

ction has been taken to the constitutionality of
ating to the district courts, &c., on the grounds
eventy-first section continues in office the clerks
ourts for a period of six years from the time at
justices now elected take their offices.

e effect of this provision would be the same as a
ntment by the legislature, after the terms of the
erks had expired, and that such a statute would
tion of the provisions of the Constitution, which
election or appointment of these officers to the
to the local authorities.

s much force in this objection; it is not, how-
essary for me to pass upon that question. If it
hereafter declared to be a violation of that
thr Constitution, the residue of the statute
t, on that account, be affected by it. This sec-
l be rejected, while the rest could be sustained.
Fishkill vs. Fishkill Plank Road Company, 22
.)

urged by the plaintiff's counsel, that there were
tions for the city and county contingencies, out
this money could be paid. The answer to this
n is, that on these pleadings it does not appear
such appropriations have been made; and the
admits the averments in the answer, that there
nds in the treasury out of which the increased
uld be legally paid, and that the defendants have
to raise the same either by loan or tax. If there

is any other fund from which payment can be made, the plaintiff must show that by evidence on the trial.

Although the point was not made by the plaintiff's counsel on the argument, it is proper to refer to the eighty-first section of the act relating to the district courts, chap. 344, Sess. 1857.

This section repeals all laws *in any case* provided for by that act, and also all laws inconsistent with its provisions. If the laws referred to in the defendants' answer are in any way affected by this section, they are absolutely repealed and abrogated.

The repeal is not so far as they are inconsistent, but it is absolute and entire; and, if so affected, then all the restrictions imposed by the legislature upon the city government, as to borrowing money, and as to the application of moneys raised by tax, are at an end. I cannot suppose that the legislature ever intended to pass such a law; nor, in my judgment, is there any inconsistency between them.

It is not inconsistent with the clause giving the justices an increased salary, that the Corporation should be prohibited from borrowing money; or that the moneys previously authorized to be raised by tax should be applied to the purposes for which they were authorized.

Those different provisions can all remain in force, and not interfere with any of the provisions of the act relating to the district courts. The repeal of statutes involving matters of so much importance, should be more explicitly stated, to justify a court in upholding such repeal.

The defendants are entitled to judgment upon the demurrer, with leave to the plaintiff to withdraw the demurrer on payment of costs.

DOCUMENT No. 5.

RD OF ALDERMEN,

FEBRUARY 1, 1858.

ing communication from the Commissioners of
ral Park, was received, laid on the table, and
to be printed.

D. T. VALENTINE, *Clerk.*

orable the Common Council
of the city of New York:

nmissioners of the Central Park, in compliance
ct entitled "An act for the Regulation and
nt of the Central Park in the city of New
ssed April 17th, 1857, respectfully

REPORT:

e 30th of April, 1857, the Board was organ-
shortly thereafter, the necessary proceedings
n for the purchase of the State Arsenal, and all
ls appertaining thereto, belonging to the state,
authority of an act of the legislature passed
1857, and such property now forms a portion of
l Park; by permission of this Board, the area-

nal building is still occupied by the state, for the storage of its arms.

The buildings on the park, except those which are retained for the purposes of the park, or for public use, have been sold, and with but few exceptions, have been removed from the park.

Under the authority conferred by the 13th section of the act first above-mentioned, this Board agreed with the Croton Aqueduct Board for an exchange of lands belonging to the city of New York, lying within the area bounded southerly by Fifty-ninth street, easterly by the Fifth avenue, northerly by One hundred and sixth street, and westerly by the Eighth avenue; and the maps and plans drawn with an object of combining as many features of beauty as was practicable with the preservation of convenience, strength and durability in the reservoir, have been accepted, and, after discussion and examination, determined on both by the Croton Aqueduct Department and this Board.

The Commissioners have deemed it a duty of the first importance to secure, for guidance in laying out the park grounds, the highest degree of taste and talent to be obtained. They have taken measures to secure designs from the landscape gardeners and rural artists throughout the world, and to invitations to contribute designs for the park, the Commissioners have added inducements of liberal money premiums to those competitors whose plans shall be selected.

Those intending to offer their designs will have an opportunity to do so until the first day of March next; and until these designs are received, and a selection is made

ost superior of them, the Commissioners will emselves to that portion of the work which is eliminary, and necessary to put the grounds in condition for the more delicate and tasteful pre-nprovement. Dilapidated and offensive build-s, pens, cross-walls and fences have been remov-, that disfigured the surface, have been gathered and such of them as have not been worked into and substantial wall that now incloses the park, being broken, preparatory to use on the roads oon to wind along the diversified surface of this iday ground of the metropolis; the natural nrses have been opened, swamps drained and eeds and useless undergrowth grubbed out and

rseries are established in the park, and after a rtilization of that portion of the grounds set this purpose, about twenty-five thousand of a iety of ornamental trees have been planted; the of trees on the ground being regarded by the economical, in point of the diminished cost of s over those of larger growth, in the less ex-transportation, in losses by injury in their de-d in adapting them, while young, to the soil in y are destined to flourish.

rude but essential preparatory operations, more en hundred men have found employment during arly favorable weather of the fall and winter nd it is only in this character of work that pro-advantageously be made, until the Board have d upon the designs and plans by which subse-gress of improvement is to be guided. The un-

dertaking of laying out the park is novel in its character; and while the work of its superficial ornamentation requires the exercise of a discriminating taste, high artistic skill, and the exercise of sound judgment, it is by no means the only feature requiring the study and attention of the Board. Proper regard for the salubrity of the neighborhood demands thorough and systematic drainage of the whole extent of the park—a branch of the work essential, but by no means free from difficulties. Many of the streets have been built over natural water courses, without culverts or sluice ways at proper levels, to allow the escape of the water, which, denied its natural courses, lies in stagnant pools upon the low grounds, deleterious to the health of the whole neighborhood.

In the drainage of the park; in the adaptation of its surface with reference to the elevations and depressions of the bounding streets and avenues; in the treatment of the ground bordering upon the Croton reservoir already constructed, and upon the more tasteful grand reservoir, probably to occupy three years in its completion—the Commissioners of the Central Park expect to find abundant opportunity for the exercise of taste, ingenuity and judgment.

The report of the treasurer of the Board, hereto annexed, exhibits a detailed statement of all the receipts and expenditures of the Board up to the first day of January instant.

The total receipts are.....	$304,050 39
" expenditures are.....	77,881 41
Leaving a balance on 1st of January of.....	$226,168 98

arent that in the prosecution of this work, its
vill be subserved by the co-operative action
norable Body; and this commission, on many
general interest to the public.

it is very desirable that the planting on the
t of the park should be commenced without
nnot be done properly until is inclosed so as
the cattle, goats and swine that run at large in
rhood, the incursions of which are fatal to the
e young trees; and, while the Commissioners
s to defer the closing of that portion of the
l that lies within the park, until convenient
e upper part of the island is otherwise pro-
in order to proceed with the work on the park,
ust soon be closed; and to afford conveniences
lic travel, the Board would respectfully sug-
r Honorable Body that the Fifth avenue be
od traveling condition, from Ninety-fifth street
dred and tenth street, which, having been par-
nplished, can be completed at a trifling expense,
able them to clear the road within the park,
convenience to the public.

er fertilization of the ground will require the
large quantities of street manure on the park.
has thought it practicable to effect an arrange-
the city authorities, by which the cleanings of
in most parts of the city, may be transported
railroads to the immediate vicinity of the
these means the necessary material for the en-
f the park may be obtained at the mere cost of
ion, which otherwise can be procured only at

a great expense. Indeed, it will be but a matter of justice that the city railroads, considering the privileges they enjoy at the hands of the public, should be required to contribute the use of their roads, without expense, for this purpose.

The subject of retaining walls along those portions of the park that are depressed below the grades established by the city authorities for the streets and avenues, inclosing the park, is one upon which the Board believes the public interest may be best subserved by a concurrent action of your Honorable Body and this Board.

Permission to remove the surplus earth from Hamilton square to the park, has already been suggested as very desirable; and the subject will, it is hoped, soon receive the favorable attention of the Common Council.

The propriety of adding to the park the rocky bluffs at its north end, between the Fifth and Eighth avenues, One hundred and sixth street and One hundred and tenth street, which are useless for any other purpose than that of the park, has already occupied the attention of the Board, and so soon as information relative to its probable cost has been gathered, the Board will take occasion to make its acquisition the subject of a future communication to your Honorable Body.

In the disposition of those questions of general interest that will continually arise in the progress of the work confided to them, the Commissioners feel assured, from the past action of the Common Council, that their efforts to prepare this pleasure-ground for public use, in as brief time as is practicable with the thorough and substantial

accomplishment of each step of its progress, and their determination to maintain strict order and discipline within the borders of the park, will meet, from your Honorable Body, ready and cordial co-operation.

By order of the Board,

JOHN A. C. GRAY,
Vice President.

DAVID H. HART, *Clerk.*

ANNUAL REPORT

OF THE

CHIEF ENGINEER

OF THE

FIRE DEPARTMENT

OF THE

CITY OF NEW YORK,

[illegible]

DOCUMENT No. 6.

NEW YORK:

[illegible] BAKER, PRINTER, No. 20 BEEKMAN STREET

1856.

BOARD OF ALDERMEN,

FEBRUARY 18, 1858.

The following Annual Report of the Chief Engineer of the Fire Department was received, laid on the table, and ordered to be printed.

D. T. VALENTINE, *Clerk.*

OFFICE CHIEF ENGINEER FIRE DEPARTMENT,
NEW YORK, February 18, 1858.

To the Honorable the Common Council of the city of New York:

GENTLEMEN:—By the ordinances of the city it becomes my duty as Chief Engineer, to present to your body an annual report of the condition of the Fire Department of the city of New York.

It is one year from this date that I was selected as Chief Engineer, and I submit for your consideration a detailed statement of the condition of the department, and statistics that will exhibit a prosperous and efficient management of its affairs under my direction.

Upon assuming the duties of my responsible position, I gave a strict and rigid investigation into the discipline, efficiency and condition of the department, and have from time to time found it necessary to make such alterations as in my judgment were demanded, to secure prompt and

vigilant services from this reliable volunteer department of our city government.

The condition of the hose and apparatus upon my inauguration into the office of Chief Engineer, I found in a measure unqualified to meet the exigencies of the department, or prepared to answer any sudden demand for their services.

By adopting a system of personal inspection, I have been enabled, after much labor, in placing nearly all of the apparatus in good order, and capable of doing duty at any moment.

The amount of repairs necessary to accomplish what was absolutely needed, has been large, but the amount expended has been more than compensated by increased efficiency, and consequently less loss or damage to the property of our citizens.

The state of the department in relation to good order and discipline has never been equaled in its history, and I can say, in fact, that rowdyism among fire companies has become entirely unknown, for which we are somewhat indebted to the prompt action of the Fire Commissioners, who in this particular have been of vast benefit to the department.

FORCE OF THE DEPARTMENT.

The department consists of fourteen engineers, eighteen hundred and fifty members of engine companies, twelve hundred and fifty-seven members of hose companies, and four hundred and fifty-two members of hook and ladder companies; making a total of three thousand five hundred and fifty-nine men, being an increase of four hundred and

seventy-four over the number stated in the last report of the Chief Engineer.

The above are divided into forty-eight engine companies, sixty hose companies, and fifteen hook and ladder companies.

There are forty-nine engines in good condition, nine ordinary, one building and two rebuilding; forty-three hose carriages in good condition, sixteen ordinary; eleven hook and ladder trucks in good condition, and four ordinary; twenty-seven hose tenders in good condition, seven ordinary and fifteen building.

There is in use in the department thirty-three thousand four hundred feet of hose in good order, thirty-seven thousand four hundred and fifty feet in ordinary condition, and ten thousand four hundred feet in very bad condition.

NUMBER OF MEN EACH COMPANY IS ALLOWED.

First class engine companies are entitled to					70.
Second class "	"	"	"	"	60.
Third " "	"	"	"	"	50.
Hook and ladder	"	"	"	"	50.
Hose	"	"	"	"	30.

As per resolution adopted by the Board of Councilmen, December 30, 1856.

Adopted by the Board of Aldermen, December 31, 1856.

LOSS BY FIRES.

I am gratified to be able to report that a large decrease in the amount of losses by fire has resulted during my administration of the duties of Chief Engineer, and submit the subjoined comparative figures as the schedule of loss by fires during the years 1856 and 1857.

SCHEDULE,

Showing the number of fires and alarms in each district, and the amount of loss from August 1st, 1855, to July 31st, 1856.

LOCATIONS DOWN TOWN.

The leases of several of the houses now occupied by companies in the lower section of the city will shortly expire, and as the services of these companies cannot, under any circumstances, be dispensed with, it is necessary that some measures should be taken at an early day to provide them with suitable locations. The great amount of property and merchandise located below Chambers street should be at least in a position of security in relation to fires; and it is a matter requiring prompt action from your Honorable Body to prevent serious and disastrous consequences from any want of force in the lower districts.

The scanty population below Chambers street renders the organization and continuance of fire companies down town a matter of great difficulty, and as the duty required is frequent and laborious, the accommodations are not of a suitable character to keep a fire organization together.

I would respectfully recommend that a portion of the unoccupied public property in the lower sections of the city be appropriated for this purpose, and suitable buildings erected thereon. I trust that my suggestions in this respect will receive the attention that the urgency of the case demands.

HOOK AND LADDER DUTY DOWN TOWN.

The department has, in a measure, suffered in its efficiency by the want of proper accommodations for hook and ladder companies doing duty down town.

There is but one hook and ladder company located within the limits of the seventh and eighth districts, and for some

the efficiency of this company has been seriously
from want of an adequate number of men to per-
duty.

consequently ordered a hook and ladder com-
is located within a convenient distance of the
trict, to do duty in the lower section of the city,
found their services to have proved valuable upon
asion.

nd ladder company No. 4, one of the most effi-
energetic in the department, have been out of
some time, in consequence of there not being a
rovided for them by the Common Council.

use formerly occupied by this company was pro-
nsafe by the fire wardens, and was taken down
of the Mayor last summer, since which time this
have not performed fire duty.

cessary that immediate measures should be taken
a location for hook and ladder company No. 4,
the company to resume active service. Several
ladder companies, located in the upper section of
olunteered to perform duty down town, and I ac-
eir services, in consequence of the emergencies of

hom no cause for complaint has ever existed, summarily dismissed, without cause being as- such action by the removing power. It is many deserving men, who have suffered in this at their removal was obtained, not from neglect ut for reasons never explained, and consequently r, and injurious to the welfare of the department. uggest the propriety of the ordinance being so to give the nomination of bell ringers to the Engineers, subject to confirmation by the Com- cil.

NEW HOSE.

mmunication to your Honorable Body, some time led attention to the necessity for advertising for e thousand feet of new hose. The supply of in use is entirely inadequate, and only by con- is kept in partial order. New hose is wanted, and secure an efficient discharge of duty by the t, and also to prevent a waste of water, that, at nnot be avoided.

essity for ar immediate contract is apparent at and it w dicious to direct the proper to ad ward the same as soon as

IM IRE HYDRANTS.

ecti drants now in use consists in even when in perfect order, n of water above the valve, hydrant useless.

e, worked by the pressure of

water, weights, springs, etc., liable at any moment to be out of order, and in which there is no surety of action; and, when out of order, it cannot be repaired without digging up.

In Hyde's patent fire hydrant all these objections are obviated. The part of this hydrant, the construction of which is new, consists principally in the waste pipe and its connections. The lower part of the rod is bored out, and a branch added, the branch being hollow—the two constituting a syphon, which, when the hydrant is closed, completely empties it, leaving no water to freeze.

The valve is opened and shut by means of the screw at the top in the usual manner, and is so constructed that it shuts the waste when open, and opens it when shut.

One of the recommendations of this hydrant is the simple manner in which it can be repaired, by taking off the upper part of the case in which it is inclosed; the head plate can be removed, and the entire works taken out—thereby doing away completely with digging up the streets for the purpose of repairs.

The whole construction of this hydrant is too simple to get out of order, or to be above the comprehension of any one.

I would recommend that the Croton Aqueduct Department be directed to use this hydrant when new ones are being put down for service.

FIRE TELEGRAPH.

l call the attention of your Honorable Body to iety of introducing the fire telegraph into the different fire companies located some distance towers.

y instances—from the peculiar position of their the alarm bells are not available in carrying an l consequently companies are compelled to rely r own resources to enable them to be prompt at ne expense of such introduction would not be le the great benefits are self-evident, and worthy onsidered and adopted.

REPAIRS TO BUILDINGS, ETC.

been assisted, in my efforts to advance the nt to a state of efficiency, by the co-operation of acting Street Commissioner, recognized by your e Body, under whose authority and written I have caused to be repaired such of the houses out of order, and transacted other necessary culiar to the wants of the department.

sition of the Street Commissioner's office has pre- any needful improvements, erection of buildings, iding apparatus for the use of the department, needed, and have been recommended by your e Body; but I have endeavored, while unable to or all the wants demanded, to so manage by small res, that temporary conveniences and accommoda- e been allowed, until the work ordered by your e Body should be completed. I would recom- t a bureau be established under my department,

to have control over all work and supplies to be furnished, and supervision over all expenditures connected with the Fire Department.

As the building and repairs to houses should naturally be a co-ordinate part of the duty of the Chief Engineer's Department, I would advise that an ordinance be adopted to place that duty in my department.

BADGES.

I find the law authorizing the issue of badges to members of the Department to be productive of much evil. It has not accomplished what was designed by its introduction, but has added largely to the cause for complaint it was designed to remedy. The number of badges that are either lost or stolen amounts to over one thousand at the present time, and it is growing to be a source of dissatisfaction among members of the department at the necessity of wearing them. The ownership of a stolen badge gives free access to thieves, and other dangerous persons, to the close proximity of fires, where, under the recognized shield of the Fire Department, they can perform their nefarious calling without suspicion or interruption. It is a well-known fact that coats, on which badges are worn, have been stolen from different apparatus while on their way to fires; and it is not difficult to conjecture that they were taken solely for the purpose of procuring badges to give recognized admittance to a building on fire.

I would advise an amendment to the law—that the badges be abolished altogether, save for the Engineer Board and officers of companies.

FIRE COMMISSIONERS.

ard of Fire Commissioners, to whom is delegated
: to try all cases of insubordination occurring in
tment, have discharged the duties of their position
and impartial manner. It is a delicate, and, at
ost an impossible task, to decide upon the many
ed cases that are brought before them; and
erhaps, there may be difference of opinion among
bers of the department, in relation to some of
sions, yet it is acknowledged by all parties that
issioners have been actuated only by a desire to
he interests of the department.

lection of the Commissioners' Board lies wholly
e department itself, and the Board is responsible
dy for a faithful discharge of the duties for which
lected, and any cause for complaint can be rem-
themselves at the proper time.

THE FIRE MARSHAL.

ease in the number of fires is owing, in a mea- active exertions of the Fire Marshal, Alfred E. ., who has succeeded, during the past year, in numerous persons charged with the crime of the conviction of two of their number.

owing arrests and convictions have been made e efforts of the Fire Marshal:

rrests from 1st February, 1857, to date.

y 5, Patrick Gavin, suspicion of an attempted

y 24, Abraham Rabb, suspicion of arson.

Francis Guinand, arson.

Edward Gillen and William McKinock, sus- rson.

Isabella Draper and Hannah McGliddon, sus- rson.

Thomas Gallagher, suspicion of arson.

Patrick Nalley, arson, acquitted on account of

James H. Magee, suspicion of arson.

Gabriel Schwab and Henry Markerwertz, sus- rson.

August 13, Philip Quirk, suspicion of arson.

August 27, William McLoughlin and James Chambers, suspicion of arson.

September 6, Joseph Hackett and Francis Solopeatar, arson, sentenced to one year each.

September 20, James Bradley, suspicion of arson.

September 29, John Bridget, suspicion of arson.

October 22, Henry Newell (colored), attempted arson; sentenced to four years and ten months.

October 28, Elena Exen, suspicion of arson.

December 7, Mrs. Pamasa Cox, Julia Cox, Mary Jackson, George Cox (colored), arson.

December 13, Charles N. Thibaudeau, suspicion of arson.

January 2, 1858, Robert Dixon, arson.

Names of persons convicted.

February 22, Michael Wogan, Jr., arson; convicted, and judgment suspended.

June 9, James Shepherd, arson, convicted, and sentenced to be hung.

I subjoin the following amounts paid into the city treasury for

OLD MATERIALS SOLD.

The following amounts have been received by me for old materials, paid to the City Chamberlain, and a copy of items filed in the office of the Comptroller:

1857.	From February 17th to May 25th.....	$300 86
	" May 25th to July 7th.....	215 58
	" July 7th to August 24th.....	400 99
	" August 24th to December 22d.....	274 04
	" December 22d to Feb'y 17th, 1858..	62 45
	Total.....	$1,253 92

ion to the above, there is paid to the Collector
Revenue, fifty dollars per annum, for rent of
orporation yard.

ousand and six dollars ($3,006) have been received
fifteen hundred and three initiated firemen's
, which amount, as the law directs, I have paid
Giles, Esq., Treasurer of the Widows' and Or-
d of the New York Fire Department.

the names of persons engaged as clerks at the
neer's office, and workmen in the Corporation

essary, to give proper attention to the details of
ment, that competent clerks and practical me-
l workingmen should be employed; and I have
oper persons, qualified and diligent, in the dis-
those duties.

owing persons are employed, at this office, and
oration yard:

CLERKS.

A. Gray, George T. Alker, John L. Cregier.
. Taylor, Messenger.

WORKMEN IN THE CORPORATION YARD.

. Mount, foreman; Ebenezer Chambers, Hugh
Michael J. Naddy, David Conlon, Henry Lewis,
nspake and John Gunson.

INSPECTOR OF FIRE APPARATUS.

ldey, appointed by Commissioner of Repairs and
elah) and Comptroller Flagg, October, 1856.

In consequence of severe fire duty, I was attacked with paralysis in July last, while proceeding to a fire.

Suffering from continued illness, for some time I was unable to attend to the duties of my position; but in my absence, the able and faithful manner in which the duty was performed by the Assistant Engineers merits the warmest praise.

I desire to bear grateful testimony to that body for the labors so well and honorably discharged by them.

The department is in a condition that our city may well be proud of, and in submitting this report to your Honorable Body, I trust the suggestions I have made to improve its efficiency may be carried out by speedy action.

Very respectfully submitted,

HENRY H. HOWARD,
Chief Engineer N. Y. Fire Department.

York Fire Department.

CHIEF ENGINEER.

HENRY H. HOWARD.

DOCUMENT No. 7.

BOARD OF ALDERMEN,

MARCH 4, 1857.

The following report of the Committee on Assessments, to whom was referred the petition of James McDonald, for remission of assessment, was received, laid on the table, and directed to be printed.

D. T. VALENTINE, *Clerk.*

The Committee on Assessments, to whom was referred the annexed petition of James McDonald, for remission of assessment, respectfully

REPORT:

That the petitioner was assessed for grading, curb, guttering, and flagging sidewalks in Forty-fifth street, between Second avenue and the East river, in the sum of one hundred and seventy-five dollars, on each of two lots, being upon improved property.

He asks to be relieved from a portion of the as
one hundred and seventy-five dollars, on the grou
by the grading of the street, his property was
more than the whole amount of the assessment;
willing to pay an amount equal to that paid by th
of vacant lots adjoining (one hundred dollars).

The annexed report of the Committee on Ass
made to the Board of Councilmen, December
among other matters, says: "Your Committee c
that this is an illegal assessment; but, in consid
the damage done his property, they are of th
that equity (if not law) upholds them in recon
that relief be granted to petitioner," &c.

If the undersigned were acting in the capac
dividuals, they might be disposed to grant re
petitioner, on equitable considerations alone.
officials, legislating for the whole people, th
grant relief to the petitioner, at the expense o
number.

No doubt the property of the petitioner ha
jured to a considerable extent—his houses stan
altitude of some fifteen feet above the grade. T
signed think that this party should have remon
the proper time, before the assessment list was
which would have thrown the expense of the w
persons who were benefited more than petiti
thereby, relieve the city treasury from the burd
the prayer of the petitioner be granted.

If parties will neglect to remonstrate at t
time, they alone are to blame if the assessment i

ive; if they fail to do this, the Common Council cannot compensate them for neglecting their own business.

Your Committee doubted the power of the Common Council to grant relief in this instance, as well as numerous others of the same nature, which have engaged their attention since January, and they determined to become familiar with the laws governing the remission of assessments; they communicated with the Counsel to the Corporation on the subject, and received from him the subjoined document in reply.

His views are elaborately given, and should receive the attention of both Boards of the Common Council.

The many petitions now before the undersigned, if reported on favorably, would amount to about three thousand dollars, with a prospect of double the number, before the year expires.

His Honor the Mayor, in his first message, January 5th, 1858, speaks at length on this subject, and doubts the power of the Common Council to remit assessments; his Honor's views are sustained by the opinion of the legal officer of the Corporation.

Where the proper course is observed by the heads of departments, in giving out contracts, &c., by the publication of all contemplated public improvements, there ought not to exist any good cause for parties asking relief from assessments, or the Common Council making donations to property owners, to reimburse them for paying their indebtedness to the city.

Unless fraud be perpetrated in awarding contracts, or

in making out the assessment lists, your Committ
it good policy to remit no more assessments; th
mend a strict adherence to the opinion of the C
the Corporation, and offer for adoption the
resolution:

Resolved, That the petition of James McDone
lief from the payment of one hundred and s
dollars, on lots Nos. 5 and 6, on map for grad
fifth street, between Second avenue and Eas
and the same is hereby denied.

THOS. STEPHENS,
THOS. McSPEDON,
GEORGE STARR,
C
A

LAW DEPARTMENT,
New York, Feb. 10, 1858.

THOMAS STEPHENS, ESQ.,
Chairman of Committee on Assessments,
Board of Aldermen.

DEAR SIR:—I have received your communication of the 5th inst., inclosing various petitions which have been presented to the Common Council, asking relief from assessments, imposed for the regulating or grading of the streets, for the laying out of the Central Park, and the extension of Walker street. You ask, whether the Common Council have the power to make a remission of the same, and I have the pleasure to reply: that the assessments which are imposed for the regulating and grading of streets, and those which are laid for the opening of streets and avenues, and the acquisition of lands for parks, are estimated and determined by different bodies, and their final confirmation is confided to separate and entirely dissimilar tribunals.

The former were, until the passage of the recent act of 1857, made out by the assessors of the Street Department, and are now, under that act, determined by the Deputy Tax Commissioners, and reviewed by the Board of Commissioners of Taxes and Assessments, the confirmation of the assessment being given, under the new act, as well as under the former laws, to the Common Council. The Common Council thus impose such assessment. The latter (the assessments for opening streets, avenues, parks, &c.) are determined by commissioners appointed by the Supreme Court, who make a report to the court, which has the power to review all objections laid before the

commissioners, and may either confirm the report
it back to them for revision and correction; and
of 1813, provides, that the report, "when so co
shall be final and conclusive, as well upon the Ma
as upon the owners, &c.; and also upon all other
whomsoever."

In a communication which I recently addresse
Comptroller, I had occasion to review the powe
Common Council to remit assessments confirme
Supreme Court, and I arrived at the conclusion
thorough examination of the matter, that it was no
their province to make such remission.

I annex a copy of that communication, and refe
it for a more full expression of my views upon
ject.

As the Common Council confirms the assessme
for the regulating and grading of streets, &c., it
first seem that they have also the power to rem
but, after a careful consideration of the matter,
reached a different conclusion.

It must be kept in mind, that the assessments
is proposed to remit, are a fund specifically set a
the payment of the expenses of the improvement fo
they are imposed. If they are remitted, then the
of that improvement will fall, not upon the partie
property has been immediately benefited by it, b
the city treasury, upon the tax payers at large; the
from an assessment, therefore, will be in effect
the party in whose favor the release is made.

I am convinced, that the remission of an ass

previously confirmed, is not within the power of the Common Council.

The thirty-first section of the charter of 1857, provides, "that no money shall be drawn from the city treasury, except the same shall have been previously appropriated to the purpose for which it is drawn."

By a reference to the tax bill, passed March 5, 1857, it will be seen, that no appropriation was therein made to meet expenditures incurred by the city, in refunding the amount of erroneous or illegal assessments; and that act expressly provides, that no portion of the respective sums therein named, shall be expended or applied to any other purposes than those for which the Supervisors are therein authorized to raise the same.

If these assessments are remitted, their amount will have to be paid directly from the city treasury. There is no fund in existence appropriated for this purpose, and, without this specific appropriation, I conceive that it would be a violation of the charter, on the part of the Common Council, to order such payment to be made.

In conclusion, permit me to say, that there is no hardship in refusing to grant the prayer of the petitioners. Parties whose lands are assessed, have abundant opportunities for correcting an erroneous or an oppressive assessment.

The law renders it incumbent upon the assessors to advertise, for ten days, in the Corporation papers, for the presentation of objections to their assessments, and a party has thirty days to make such objections; and if the Assessors (or Tax Commissioners under the new law) do not

amend the assessment to conform to such objecti
their duty to send the assessment, and the obje
the Common Council; and the parties may there
heard, and relieved, before the assessment is co
or if there is positive error or illegality in the ass
and the Common Council refuse to rectify it, a c
may be obtained, and the Supreme Court will re
proceedings, and, if there be sufficient ground
will set them aside. If, in this case, the petiti
relief have neglected to avail themselves of
remedies, which the law gives them, there certai
equity in their present application. I am of the
that the Common Council have no power to rem
ments which have been confirmed, either by the
Court or by themselves.

Very respectfully,

RICHD. BUSTEED,
Counsel to the Corpo

LAW DEPARTMENT,
New York January 28, 1858.

HON. AZARIAH C. FLAGG,
Comptroller of the city of New York:

DEAR SIR:—I have received your note of the 8th inst., inclosing a petition presented to the Common Council by Isaac C. Kendall, praying relief from assessments imposed upon certain lots belonging to him, for the opening of One hundred and nineteenth and One hundred and twenty-first and One hundred and twenty-second streets, with the accompanying resolution of the Common Council, referring the matter to you for settlement, upon certain terms therein specified. You state in your note that you have doubts as to the power of the Common Council over these assessments, and request my opinion thereon.

In reply, I have the pleasure to state that I have examined this subject with care, and have not only, on account of the importance of the immediate matter before me, but because it has been customary for the Common Council for some year past to remit assessments of this character, and I am not aware that their power to make such remission has ever been critically examined.

I am constrained to say, that I do not find, either in any of the laws relating to the opening of streets, and the imposition of assessments therefor, or in any of the charters now in force, that the Common Council have any power to absolve a party whose lots have been assessed for the opening of streets from such assessment. The 178th section of the act of April 9th, 1813, provides that the report of the Commissioners appointed to make the estimate and

assessment of the loss and damage, or of the ben
advantage to the respective owners, &c., shall, "
confirmed by the said (Supreme) Court, be final
clusive, as well upon the Mayor, Aldermen and C
alty of the city of New York, as upon the owne
and also upon all other persons whomsoever."

The assessments which are thus made by th
missioners, and confirmed by the Supreme Co
in my opinion, to be regarded as a judgment in fav
city against the parties upon whose lots they are i
It is true that a corporation, as an individual, ca
ally remit a judgment in its favor, but it seems to
the scope and tenor of the acts relative to the
&c., of streets, show that it was the intention of t
lature that assessments for such purposes should
remitted.

The assessments which are imposed under the
are a fund specifically set apart to defray the exp
the improvements which are made under them, a
Common Council should remit them, the payn
such improvements to the amount of the assessm
mitted would have to be made from the city treas
the burden would be transferred from those who
erty is immediately benefited by such improvem
the tax payers at large.

The Corporation is a trustee for the tax payer
city, and it would be a breach of an express tru
part to apply any portion of the funds of the ci
moneys owing to it, to other and different purpo
those to which they are appropriated by law.

Besides, the remission of an assessment would, in effect be a gift by the Common Council of the amount of the assessment to the individual in whose favor the remission was made; and I think it clear, that the Common Council have no power to make a gift of the amount of this assessment to Mr. Kendall.

If the legislature had intended that the Common Council should have the power to give away the public money, they would have said so.

I cannot find any express grant in the charters to the Common Council of the power to remit assessments, and I know of none from the grant of which it can be implied.

It appears that, by the resolution passed by the Common Council, it is made a condition, precedent to any settlement by you with Mr. Kendall, that he should pay five hundred dollars to the city. There is nothing in the papers before me to show what is the amount of the assessments from which he claims relief, but I infer that they exceed five hundred dollars, and, if so, the remission of the amount in which they exceed that sum, would, in my opinion, be an unauthorized act on your part, and on the part of the Common Council.

It is also recited in the resolution accompanying your note, that some of the assessments referred to have been "outlawed." If this is so, there can be no ground on which Mr. Kendall should seek relief from them, for the simple reason that they could never be enforced.

Mr. Kendall also alleges in his petition, that his lots were assessed through error, but he does not state in what

particular error was committed. Besides, if h
grieved, the law pointed out to him an easy a
remedy. He could have appeared before the
sioners, and have objected to their assessment, a
satisfied with their decision, he could have op
confirmation of their report before the Suprem
and have had his rights adjudicated upon by that
Failing to do so, he must be held to have acqu
the judgment of the Commissioners, and cann
late day, upon any ground, make a claim upon
poration for a waiver of the rights to which t
become entitled under the judgment aforesaid, or
words, he cannot now appeal to the legislative
ment of the city, and ask from it a reversal of t
ment.

Very respectfully, yours,

RICHARD BUSTE

Counsel to the Corpo

DOCUMENT No. 8.

BOARD OF ALDERMEN,

MARCH 31, 1858.

The following report from the Committee on Police, to whom was referred the communication of his Honor the Mayor, relative to the sanitary condition of the various Police Station-houses, was received, laid on the table, and ordered to be printed.

D. T. VALENTINE, *Clerk.*

The Committee on Police, to whom was referred the communication from his Honor the Mayor, with the report of the Police Commissioners relative to the sanitary condition of the various Police Station-houses, respectfully

REPORT:

That they have visited and inspected the several Police Station-houses, with a view of ascertaining their condition, both in reference to cleanliness and to the accommodations provided for the officers and men, as well as for prisoners and lodgers. And also, with a view of making such recommendations to the Board as were suggested from such investigation.

Your Committee find that a number of the buildings

are totally unfitted for Station-house purposes, a
recommend that the subject be considered by the
Council as soon as practicable, particularly in ref
the better accommodations for the officers and
duty—a judicious arrangement of the rooms—ma
vision for the classification of prisoners and lod
latter unfortunate class of beings are comp
occupy these miserable holes, deprived of pure
subject to miasma, arising from the overcrowded
the rooms, producing serious effects upon the cons
health of these unfortunate people, who are obli
necessity, to seek a night's shelter.

The general health of the city, is also liable
from these hot-beds of disease, and it is the in
duty of the Common Council, in a sanitary poin
to apply a speedy remedy for this evil.

In doing so, your Committee would recomm
particular attention be paid to the drainage and
of the buildings, and where necessary, proper
sufficient capacity be constructed, to carry off th
the sewers, and remove the present objection
that are now in some of the Station-houses;
remedy, in a measurable degree, the chief caus
plaint, and the present offensive condition of t
cells, especially in cases where they are located
surface of the street.

Your Committee beg leave, also to call the att
the Board to the present limited accommodatio
sleeping apartments for the patrolmen. In some
but one set of beds are used; this, owing to the wan

space; and when one platoon of men are turned out for patrol duty, the men relieved are compelled to occupy the same beds vacated a few moments previous.

In regard to the rooms set apart for lodgers, which are generally located under ground, and adjoining the cells occupied by prisoners, some improvement is much needed, not only in reference to better ventilation, but, if possible, some provision should be made whereby they would be entirely separated from the prison cells. This class of unfortunates, who seek a night's shelter at the public expense manage, in some way or other, to avoid becoming wholly dependent on the city's charity; many of them once occupied respectable positions in society, and although reduced to poverty, have never yet been guilty of any crime; they should not, therefore, even for one night, be compelled to become associated with the depraved and vicious.

For the information of the Board, the condition of the various Station-houses is reported as follows, viz:

FIRST WARD.

This house, located in Franklin market, Old slip, is in an ordinary condition, but greatly in need of more room for lodgers, and it is not central enough. There is also a Sub-station-house, which is in a deplorable condition, having no sewer to carry away the filth which accumulates therein; there is room enough for improvement, and it should be attended to immediately.

SECOND WARD,

Is in a good condition, and has all the accommodation necessary.

THIRD WARD.

There is more room needed for lodgers; a sitt is also required for the officers; there is sufficien the building for these improvements.

FOURTH WARD.

This building is entirely unfit for a station-ho too small. This is a case where they are in wan for sleeping apartments. There is but one se for the men; while one platoon rests, the other wait, and then retire, without their beds bein made up. The lot on which this house stands by the city, being twenty-five by one hundred feet, and an angle of thirty feet in the rear, whi a splendid site for a new house.

FIFTH WARD.

This house is in an ordinary condition, but v is greatly needed; the water-closets ought to ently located, as they are very offensive, havi tilation.

SIXTH WARD.

This house wants painting, glazing and ve also, room is needed for drying clothes; Croto needed in the officers' room.

SEVENTH WARD.

This house is located at the foot of Gouve over the market; there is not sufficient room fo a great number are turned away every night. no sitting-room for the officers, and very poo

apartments; cells in bad condition; in fact the whole place is poorly constructed. There is plenty of room here for improvement.

EIGHTH WARD.

This house is in a leaky condition, greatly in want of ventilation, and wants repairing immediately.

NINTH WARD.

This house is in an ordinary condition; wants a little repairing done to the locks, doors and chairs.

TENTH WARD.

This house is situated over Essex Market; have not sufficient accommodation for lodgers; ventilation is greatly needed; the cells are in a miserable condition; the lodging-rooms are in the upper stories, where the waste-pipes get overflowed and leaking constantly; there is room enough for improvement.

ELEVENTH WARD.

This house is situated over Union Market, in Houston street; not room enough for lodgers; there are more applying nightly than can be accommodated; the lodging apartments are in bad condition; there is sufficient room here for improvement.

TWELFTH WARD.

This house is in a good condition, with the exception of the roof being out of repair.

THIRTEENTH WARD.

The cells are located very badly; there is not room enough

for lodgers; the lodging apartments are in bad condition; ventilation is greatly needed; privys are poorly located.

FOURTEENTH WARD.

This house is in an ordinary condition; with some few improvements, can be classed as one of the best in the city.

FIFTEENTH WARD.

This house is in an ordinary condition, but wants better ventilation and cleansing; new chairs and oil cloth are needed; the Corporation owns the rear building.

SIXTEENTH WARD.

This house has no ventilation whatever; it is greatly needed; there is plenty of room here for improvement.

SEVENTEENTH WARD.

In this house, the only improvement needed is ventilation in lodging apartments.

EIGHTEENTH WARD.

This house is in a good condition.

NINETEENTH WARD.

This house is greatly in need of ventilation; there is not sufficient room in the building; an extension can be made, as there is room for it.

TWENTIETH WARD.

There is a sitting-room needed here for the officers; cleansing and furniture are needed, and an extension of the

house would secure all the improvements necessary; more room is needed for lodgers.

TWENTY-FIRST WARD.

This house is in a deplorable condition, almost ready to fall down; a new house is greatly needed.

TWENTY-SECOND WARD.

This house is not large enough; there are only three cells; no room whatever for lodgers. The Captain and Sergeants have to sleep in one bed; there is no sitting-room; the room that the men sleep in is only thirty-nine feet deep and twenty feet wide; a new house is greatly needed in this Ward; in the present house there is no ventilation.

Your Committee, in conclusion, will state that immediate action should be taken in the matter.

H. R. HOFFMIRE,
CHARLES WILLMOT,
THOMAS STEPHENS,
} *Committee on Police.*

ANNUAL REPORT

OF THE

CITY INSPECTOR,

OF THE

CITY OF NEW YORK,

FOR THE

YEAR ENDING DECEMBER 31, 1857.

NEW YORK:

CHAS. W. BAKER, PRINTER, 29 BEEKMAN STREET.

1858.

DOCUMENT No. 9.

BOARD OF ALDERMEN,

APRIL 26, 1858.

The following Annual Report of the City Inspector, for the year 1857, was received, laid on the table, and ordered to be printed.

D. T. VALENTINE, *Clerk.*

CITY INSPECTOR'S DEPARTMENT,
New York, April 26th, 1858.

To the Honorable the Common Council of the City of New York:

GENTLEMEN:—In conformity with the requirements of the ordinances, I herewith transmit the Annual Report of the number of deaths which occurred in the City of New York during the past year, (1857,) embraced in statements prepared in tabular form, showing the cause of death, together with the sex, nativity, color and age of the deceased; also statements showing the number of births and marriages in said city, which have been reported to this department, in compliance with the laws relative thereto, the same being accompanied with such suggestions and remarks as I have deemed to be demanded in connection therewith, and requiring the action of the municipal authorities, for the future improvement and preservation of the public health.

Respectfully submitted,

GEORGE W. MORTON,
City Inspector.

The subjects in this report, exhibited in tabular form, (both summary and detail,) of matters pertaining to this office, are presented in the following order, viz:

A General Summary, showing the total number of deaths reported to this department, divided into white and colored persons, males and females, adults and children, with the number of Still-born and Premature Births, Malformations, Old Age, Casualties, Suicides, &c., during the year.

[illegible] TO STATISTICAL TABLES.

PAGE.

[illegible] exhibiting the number of deaths in each month, [illegible] adults and children; also showing the number [illegible] boys and girls, for the year..... 6

[illegible] of nativity of the deceased, exhibiting the num- [illegible] sex, in annual and monthly statements..... 7

[illegible] showing the mortality in the different Public [illegible], with the number of native, foreign and unknown [illegible], in annual and monthly statements 8

[illegible] of mortality of white and colored persons, with [illegible] nativity, in monthly statements, for the year..... 9

EXPLANATIONS OF ABBREVIATIONS IN THE FOREGOING TABLES.

C. clear; when there are but few clouds and the sun unobscured. Cy. cloudy; when the sun is obscured and the sky mostly filled with clouds. C & Cy.; when the sun is unobscured most of the time, but a large part of the sky clouded. V. variable; fleeting clouds, sun occasionally obscured. F. fog. R. rain. St. storm. S. snow. N. north. S. south. E. east. W. west. T. S. thunder storm.

METEOROLOGICAL REMARKS.

The foregoing tables have been compiled from five daily recorded observations of the temperature, by the wet and dry thermometer bulbs, the barometer, and the direction of the wind, and state of the weather. These were made as in former years, at 6 and 10 A. M., and 2, 6 and 10 P. M., in addition to which the minimum and maximum points of temperature were also noted. The place of observation, No. 74 Ludlow street, extends through to the yard of the prison on Essex street, which gives a free circulation of air from street to street; it is also open to yards upon the north and south sides, extending to the street in each way about one hundred feet. Thermometrical observations were made upon all four sides, and the mean of these recorded, so that these tables give as nearly as possible the temperature of the air of the shaded side of the streets, which should always be the case in all city observations. Those aware of the topography of the city know that the southern and sheltered parts of New York, like that which this building occupies, are warmer in both summer and winter that the northern parts of the city. It was remarked that the winter of 1855 and 1856 did not commence till about the opening of the year 1856, but that the winter of 1856 and 1857 began with December, 1856. It can now be seen that its severity abated with February, but it continued through the nominal spring month, March. The temperature fell to Zero on only one day in all the year, viz: in January.

The mean temperature of the winter months is shown in the following table:

	Dec.	Jan.	Feb.	Mch.	Mean winter temperature.
Winter of 1853 and 1854	33	30½	30	34½	32
" 1854 and 1855	29½	32	23	34	30
" 1855 and 1856	34	20	24	32	27½
" 1856 and 1857	32	20	36	33	30¼
Mean four years	32½	25¼	28¼	38¾	30

It may be seen by the foregoing table that January was the coldest month of the last, as well as of the previous winter. It had a greater drying power, out-doors, than February, March, April, July and December, and having generally the least mean weight of water suspended in it of any month, the greatest in-door drying power when its temperature was raised above 60°

It may be necessary to remark here, in explanation of the twenty-fourth column of the preceding monthly tables, that the healthiest period of the year is that which has the smallest mortality, and in which out-door exercises can generally be taken with the most benefit to the well, and the least exposure to the ailing. It has been shown before, that the driest months of the winter were the most productive of disease to those who were much confined in-doors, on account of the great affinity of air raised from a low to a high temperature for moisture, and which, when artificial vapor was not supplied, absorbed it to an injurious degree from animal bodies and lungs.

To resume, January was a very fine month, out-doors, having but two snow storms; February was much warmer, and damper than any month of the past four winters, and March colder and drier than ordinary, although not more so than in 1856. There were not quite as many days of high wind as usual in this month. Ice, although not as plenty in the adjoining rivers and harbors as in the preceding severe winter, yet obstructed navigation to a greater extent than in some former years. April as usual had the most changeable weather and rain, and, also, the most easterly winds of any month, excepting November and December. It may be remarked here, that the weather for the last seven months of the year was more cloudy than that of the other five, and generally, also, much damper than formerly. May had more fine days than any other month, but was rather cooler than the average, although its last week was as warm as any in June, which month was also cooler than in former years; vegetation rather backward, did not generally commence till the latter part of May. June was a very damp month, and had as many rainy days as any other in the year. Summer did not commence till the second week of July; there were but few very hot days, and the whole of it was much cooler and damper than usual. The temperature rose above 90° upon only three days in July, and one in August; July was the dampest and most unhealthy month in the year. A remarkable hail and rain storm, from the south-west, occurred on the 23d of August, between 4½ and 5, P. M., doing great damage to dwellings and vegetation in the country; the hail descended in great quantities, for about twenty minutes, in unusually large flattened globes of ice, many weighing, singly, sixty grains, and being over half an inch in diameter; half an inch of water was precipitated into the rain gage. The wind and weather had

been variable during the day, from clear to rain, and from north-east to south-west, and the "barometer had fallen" during the previous twenty-four hours from 30· to 29·64 inches. The summer ended with the first week of September; this month was also the coolest and driest of the sultry season; it was also drier than October, which did not enjoy as many fine days as usual; this last was also a cool month, and nearly all of the latter half of it was rainy, with winds varying from north-east to north-west, very much like those in March; there was no severe north-easterly rain storm during the time. Winter weather commenced earlier than usual, in November the temperature fell during a gale from the south-west to 18°, on the 21st, which day was also colder than any in the succeeding month, and also colder than any day in the first three weeks of November, for twenty years; the last week of November was also cooler than any week of December excepting the last one. The first snow storm of the season occurred on the 22d of November. The mean temperature of November was lower, while that of December was higher than the average.

The following mean readings being omitted in the summary they are now supplied in this place. It is necessary, however, to say, that as the barometer ranged lower than usual, the fact of there being a great abundance of cloudy and rainy weather can be accounted for:

	1854.	1855.	1856.	1857.
Mean height of the barometer for the year.....*In.*	29·96..	30·00..	29·96..	29·89
Mean temperature.....*Deg.*	52½..	52¾..	50 ..	50¾
Mean temperature of evap0ration.....	47½..	47 ..	44 ..	45
Mean humidity, saturation at the mean monthly temperature being 1000.....	710 ..	665 ..	640 ..	700
Inches of rain and melted snow during the year....	36 ..	57 ..	46¼..	57½*
Days mostly clear in the year.....	195 ..	204 ..	168 ..	148
Days mostly cloudy.....	170 ..	161 ..	198 ..	217
Days mostly easterly winds.....	144 ..	160 ..	139 ..	170
Days mostly westerly winds.....	221 ..	205 ..	227 ..	195

* As the rain gage from which these observations are made seems generally to collect more than others in this part of the country, some explanation of its construction and situation is necessary—it has a large surface, and is placed more out of the wind than any other which the writer has noticed, being about twelve inches square at the top, and located in the interior of the yards of a large and lofty quadrangle of buildings, so that after the rain falls below the level of their roofs, even in a driving storm, the drops by their gravity descend nearly perpendicularly before reaching the rain gage.

REMARKS.

THE City Inspector, in his Annual Report for the year 1857, feels a pleasure in stating, that with much additional labor he presents to the Common Council, for their inspection and information a more complete collection of statistical matter than will be found in any former report emanating from this department. As the tables embraced in said report will be found, on examination, to be fuller and more explicit, the compiler, in prefacing the following remarks, begs leave to state, that as each table explains itself by its title and figures, little more will be written in the remarks than briefly reviewing each table as it appears in the index, making comparisons with the statements of former years, and showing the ratio that some prominent diseases bear to the total mortality, with such other explanations as may be deemed useful and instructive.

By examining the following table, which gives a comparative statement of the mortality of the city of New York for the last three years, *i. e.* 1855, 1856 and 1857, it will be seen that the decrease in the number of deaths in 1856 from the preceding year, nearly counterbalances the increase in the number of 1857 over 1856; the increase of 1857 over 1855, being only 291, which result, considering the increase of population from immigration and

other causes, should call forth our thankfulness to a benign Providence.

Total increase over the year 1855						291
Total increase over the year 1856						1675

The statement entitled "General Summary," (page 5,) shows the whole number of deaths reported to this department for the year 1857, to be of all classes 23,333, an increase over the year 1856, of 1,675, of which 1,639 were white persons and 36 were persons of color; of the total increase compared with 1856, there were, males 1,151, females 524, and compared with the year 1855, we have presented in the foregoing statement an increase over that year of 291 deaths.

The first table that presents itself is that entitled "Return of Death in each month, divided into Adults and Children, &c." which will be found on page 6, and which shows that of the total number of deceased persons, 23,333, for the year, 7,558 were adults, and 15,775 children, (or persons under 20 years, that being the age adopted for some years past for the division of adults and children, and being the best adapted to the formation of the tables,) the former being to the latter in the ratio of 1 to $2\frac{1}{11}$ nearly, and the deaths of children to the total deaths, as 1 to $1\frac{12}{25}$, or 67·60 per cent.; of the adults, 4,034 were males, and 3,524 females, being in the ratio of men to women as 8 to 7; and of the total number of children, 15,775, there were males 8,584, females 7,191, making the proportion the former bear to the latter as 6 to 5. By instituting a comparison with the corresponding table of 1856, we have the following result, viz:—of the total number of deaths in that year, 21,658, we have adults 6,769, against 7,558, and children 14,889 against 15,775 in 1857; the adults being to the children in the ratio of 1 to $2\frac{1}{8}$, and those of children are in the proportion of 1 to $1\frac{5}{11}$, or 68·75 per cent. to the total number. The month in

which the greatest mortality appears to prevail is August, which shows the deaths to have been 2,821, being nearly $\frac{1}{8}$ of the whole number of deaths for the year; yet, much as it outnumbers the others in the agregate, the deaths of adults are not as many by 25 as appear in October, although nearly 1000 more deaths occurred in the former than in the latter month.

The column of adult deaths, presents the remarkable fact that the number of deaths of adult persons varies but little as influenced by the seasons, since each of nine months of the year, range between 636 and 697, the latter being the highest number of adults in any one month, (occurring in October.) In June there were 492 deaths of adult persons, being the lowest number in any month,—next following in number is July 576, and February 592.

If to the number of days of the latter month, were added a period of three, to equal the month of March, the number of deaths, at an equal rate of its adult mortality, would be 655.

By the foregoing I have endeavored to show that, as regards the death of adults, the seasons have but little effect, as each month in the year shows nearly a similar number. Not so as relates to infantile mortality, for, by examining the column of the deaths of children, there appears a great disparity in the number of each month, which, in order to exhibit more clearly, I have arranged in numerical order, as follows:

	Children.
August	2149
September	1823
July	1445
	5417

	Children.	
January	1406	
March	1327	
February	1191	
		3924
October	1178	
April	1150	
May	1118	
		3446
December	1069	
June	970	
November	949	
		2988
TOTAL		15,775

Divided in the four seasons the deaths were as follows:

	Adults.	Children.	Total.
Spring—March, April, May	1935	3595	5530
Summer—June, July, Aug.	1740	4564	6304
Autumn—Sept., Oct., Nov.,	1993	3950	5943
Winter—Dec., Jan., Feb.	1890	3666	5556
	7558	15,775	23,333

Which arrangement shows that the two last months of summer, and first month of autumn are the most productive of infantile mortality. As the deaths for that period were 5,417, being to the total number of deceased children for the year in the ratio of 1 to $2\frac{9}{10}$, or 34·34 per cent.

It will be seen, that of infantile mortality, the most favorable months were November,—(in which 949 deaths of children occurred)—June (970,) and December (1,069,)—showing the number for these months, (compared with the total deaths of children) to be as 1 to $5\frac{7}{25}$, or 18·94 per cent.

During the month of August, when the greatest number of deaths occurred, the increase of the deaths of children mainly contributed to the startling total of 2,821—the mortality of children for the month having been 2,149—thus, while an increase of adult deaths to the number of 96 is shown between the months of July and August, the same months show a difference in the deaths of children of 704; the infantile mortality of the month compared with that of the year being as 1 to $7\frac{1}{3}$, or 13·62 per cent.

The following table will give an interesting analysis of the mortality of the year:

	Monthly Totals.	Children under 5 years.	Persons of 5 years and upw'd.	Foreign and Unknown Nativity.
January...	2047....	1262....	785....	487
February..	1783....	1066....	717....	461
March.....	1963....	1162....	801....	507
April.....	1791....	1029....	762....	454
May.....	1776....	972 ...	804....	493
June.....	1462....	852....	610....	361
July.....	2021....	1324....	697....	432
August....	2821....	2021....	800....	523
September.	2463....	1703....	760....	520
October...	1875....	1075....	800....	548
November.	1605....	837....	768....	494
December..	1726....	936....	790....	535
	23,333	14,239	9,094	5,815

From the foregoing it will be seen that nearly two-thirds of the total mortality were children, under the age of 5 years. The number of deaths of persons of 5 years and upwards being 9094. It may reasonably be sup-

posed, that while the greater number of children dying were of foreign parentage, a conclusion inevitable to all who are familiar with the mortuary statistics of our large cities—yet but few were themselves born in other lands—hence it will be readily perceived how large the number of foreigners who are included in the deaths of adult persons.

The proportion of deaths of persons of foreign birth to the total number of deaths in each month was as follows:

January,	in the ratio of	1 to $4\frac{1}{5}$	or 23·79	per cent.
February,	do	1 to $3\frac{20}{23}$	or 25·86	"
March,	do	1 to $3\frac{22}{25}$	or 25·83	"
April,	do	1 to $3\frac{13}{20}$	or 25·35	"
May,	do	1 to $3\frac{3}{5}$	or 27·76	"
June,	do	1 to $4\frac{1}{20}$	or 24·69	"
July,	do	1 to $4\frac{2}{3}$	or 21·38	"
August,	do	1 to $5\frac{2}{5}$	or 18·54	"
September,	do	1 to $4\frac{3}{4}$	or 21·11	"
October,	do	1 to $3\frac{5}{12}$	or 29·23	"
November,	do	1 to $3\frac{1}{4}$	or 30·78	"
December,	do	1 to $3\frac{3}{13}$	or 31·00	"

Of the whole number of diseases producing the mortality contained in this report, nearly one-half is classed under twelve headings of diseases, mostly, confined to children—these twelve enumerated causes of death having a total of 10,895.

The following table will prove valuable as illustrating the months when these diseases were most prevalent:

Table of Deaths of Children during each Month, showing the principal causes of Infantile Mortality.

CAUSE OF DEATH.	Monthly Total.	January.	February	March.	April.	May.	June.	July.	August.	Septemb.	October.	Novemb.	December	Highest Month.	Lowest Month.
Congestion of Brain	463	42	37	46	29	27	33	49	45	50	38	40	27	September.....	May & December.
Cholera, Infantum.	1308	5	....	1	7	8	17	225	623	351	57	11	3	August.....	February.

	10,895	954	801	896	759	747	668	1032	1603	1313	797	665	660		

The table of deaths resulting from external causes, with nativity, color, sex and ages, (pages 10 and 11,) presents the following noticeable features. The whole number reported being 3138, which compared with the total mortality for the year, is as 1 to $7\frac{3}{7}$, or 13·41 per cent. Of the number occurring directly from injuries, 757, more than one-half, (385,) were of foreign birth, and the nativity of 63 were returned as unknown.

In reviewing the accompanying tables many interesting facts are developed. The recapitulatory table, (pages 84 and 85,) show, in the total number of deaths, (23,333,) there was an excess of males of 1903, or 17·76 per cent.; and the deaths of foreigners were, as compared with the native born, in the ratio of a little over 1 to 3, or 33·41 per cent.

The first decade of life shows the greatest number of deaths--the number dying under 10 years, comparing with the annual total, as 1 to $1\frac{5}{9}$, or 64·39 per cent. The next decade in the rate of mortality is that between 30 and 40 years of age; the deaths between these years, being to the total deaths, as 1 to $12\frac{1}{5}$, or 8·20 per cent.

The following statement shows the relative ratio and per centage of deaths to the total number for the year:

Under 1 year	...as 1 to	$2\frac{3}{4}$	or 36·27	per cent.
1 to 2 years	...as 1 to	$7\frac{3}{5}$	or 13·54	"
2 to 5 "	..as 1 to	$8\frac{9}{10}$	or 11·22	"
5 to 10 "	..as 1 to	$29\frac{7}{10}$	or 3·37	"
10 to 15 "	..as 1 to	$81\frac{4}{7}$	or 1·23	"
15 to 20 "	..as 1 to	$50\frac{2}{7}$	or 1·99	"

20 to 25 years	..as 1 to	$26\frac{9}{10}$	or	3·72	per cent.
25 to 30 "	..as 1 to	$22\frac{4}{3}$	or	4·39	"
30 to 40 "	..as 1 to	$12\frac{4}{5}$	or	8·20	"
40 to 50 "	..as 1 to	$17\frac{9}{11}$	or	5·82	"
50 to 60 "	..as 1 to	$25\frac{1}{3}$	or	3·95	"
60 to 70 "	..as 1 to	$31\frac{3}{5}$	or	3·16	"
70 to 80 "	..as 1 to	$48\frac{1}{2}$	or	2·06	"
80 to 90 "	..as 1 to	$134\frac{1}{10}$	or	0·75	"
90 to 100 "	..as 1 to	$486\frac{1}{10}$	or	0·21	"
100 and upward	..as 1 to	$5833\frac{1}{4}$	or	0·17	"
Unknown ages	...as 1 to	$804\frac{1}{2}$	or	0·12	"

This calculation includes, as "under 1 year of age," all premature births and still-born reported.

The next table, in its order, is one recapitulatory of the deaths, specifying the sex, nativity, color, age, &c., (from page 86 to 101,) and presents the following facts worthy of notice:

Of the deaths by *Albuminuria*, 44 were natives, and 89, (two-thirds of the total number,) were foreigners. Of the deaths by Bronchitis, 248, (more than two-thirds of the whole number returned), were children under 5 years of age. *Cancer* was the cause of death to more persons of foreign than of native birth—the proportion of the former to the latter being as 3 to 2; under the head of Cancer, without other specifications, the number of deaths was 35—7 males and 28 females—of which 16 were natives and 19 foreigners. Cancer of the breast, 20 females, 16 of whom were of foreign birth. Cancer of the liver, total 20; males 13, females 7; natives 6, foreigners 14. Cancer of the stomach, 30; males 19, females 11; native

birth 11, foreign 19. Cancer of the womb, 43, of whom 19 were natives, and 24 foreigners. Of deaths by *Cholera Infantum*, the table shows a decrease of 73 from the preceding year.

The greatest number of deaths from *Congestion*, both of the "brain" and "lungs," were of children; the former, those under 10 years, in proportion to the remainder, are as $1\frac{2}{3}$ to 1. The latter shows 203 deaths of children, under the age 5 years, in a total of 307.

Consumption maintains its formidable ascendancy in the statements of mortality, showing 2814 deaths, nearly one-eighth of the whole number, and an increase of 336, or 13·56 per cent., over the record of 1856. The deaths of the foreign born exceed the native, as resulting from this disease, by 656; the deaths of native born reported, having been 1078; of the foreign, 1734; unknown 2.

The annexed table will show the most fatal months and ages wherein the deaths from this disease occur.

Statement of Deaths from Consumption reported during the year 1857.

Month.	Total.	Sex.		Nativity.		Colored.	Ages.																
		M.	F.	Native.	Foreign & Unknown.		Under 1	1 to 2	2 to 5	5 to 10	10 to 15	15 to 20	20 to 25	25 to 30	30 to 40	40 to 50	50 to 60	60 to 70	70 to 80	80 to 90	90 to 100	100 & up'd.	Unknown.

November.	272	150	122	93	179	12	3	5	5	5	3	10	32	34	84	50	27	8	3	2	..	..	1
December.	246	120	126	93	153	10	11	8	4	3	6	16	23	46	54	37	22	11	5	..	..	..	..
Total..	2814	1439	1375	1078	1736	110	128	69	57	41	41	175	366	424	666	449	235	122	59	18	1	..	3

The statement shows the most fatal months to have been November, 272, October, 260, and January, 259, and the months when the lowest number of deaths occurred from this disease, to have been June, 184, July, 190, and April, 213; the highest number in the remaining months having been September, 254, and the lowest May, in which 222 deaths were reported.

The greatest number of deaths from consumption, in any decade, or period of ten years, was that intervening between 20 and 30 years of age, the decease of 790 persons, by this disease, having been reported; the next highest decade is from 30 to 40 years, the number being 666; the third in number is, from 40 to 50 years, 419. The deaths of white persons, by consumption as compared with the mortality of this class from all other causes, are as 1 to $8\frac{4}{9}$, or 11·83 per cent.; those of colored persons dying of this disease, compared with the total deaths of that class by all other diseases, are as 1 to $4\frac{3}{9}$, or 22·82 cent., seeming to establish the fact that consumption is comparatively nearly twice as fatal to the latter as the former.

Of the whole number of deaths by *diarrhœa*, 550, it will be observed nearly one-half, 235, were of children under 1 year of age, and 402 were under 5 years.

Dysentery shows a decrease of 106 deaths, or 24·82 per cent. from the report of 1856, the total being 321, of whom 176 were under 5 years, or 54·83 per cent. of the whole number.

Erysipelas was the cause of 138 deaths, an increase of

30 over the last year. Of the number for 1857, 114 were persons of native, and 24 of foreign birth; 80 were of children under 1 year.

The various types of fever compared with 1856, were as follows:

	1856.	1857.	Increase.	Decrease.
Fever	56	37	—	19
" Bilious	37	26	—	11
" Chagres & Panama.	4	4	—	—
" Congestive	23	8	—	15
" Gastric	5	5	—	—
" Hectic	8	8	—	—
" Intermittent	33	28	—	5
" Miliary	1	1	—	—
" Nervous	25	14	—	11
" Puerperal	130	111	—	19
" Remittent	102	76	—	26
" Scarlet	1283	1325	42	—
" Ship	4	—	—	4
" Typhoid	133	141	8	—
" Typhus	227	171	—	56
" Yellow	13	—	—	13

It will be observed that the only increase was of scarlet and typhoid fever, numbering 50; while typhus, remittent, puerperal, congestive, bilious and all others showed a decrease of deaths amounting to 179. It is also observable that during the year 1857 there was not a case of either ship or yellow fever. Of the deaths by *puerperal fever* it is remarkable that 90 of the 111 returned during the year, were of foreign birth.

Of the deaths by *scarlet fever* 1325, the ages were as follows:

Under 1 year	122
Between 1 and 2 years	282
" 2 and 5 "	671
" 5 and 10 "	208
	1283

Leaving a remainder of 42 over the age of 10 years, of whom 31 were between that age and 20 years.

Diseases of the Heart give an excess of the foreign over the native born of 8; the deaths of children as compared with adults were as 1 to 4¼.

Hooping Cough was reported to have been fatal in 270 cases; the mortality from this cause for each of the past six years having been as follows; 1852, 187; 1853, 158; 1854, 340; 1855, 377; 1856, 248; 1857, 270.

Inflammation of the Bowels, the proportion of the native as to the foreign born is shown to have been as 2 to 1 and as adults compared with the children as 1 to 1⅓.

Inflammation of the Brain, exhibits a total of 416, of whom 347 were natives, 68 foreigners and 338 children, under the age of 20 years.

Inflammation of the Lungs produced 1093 deaths; of whom 618 were males, 475 females, 793 natives and 300 of foreign birth; 380 having been under one year of age, the whole number under five years being 665. The total shows an increase of 237 over the report of 1856.

Intemperance is alleged as the cause of 124 deaths during the year and 93 from Delirium Tremens, giving a total of 217.

The returns, as made give the following result, *Delirium Tremens*, males 85, females 8, natives 18, foreign born 75, of whom 67 were males.

Intemperance, males 71, females 53, native born 24, of whom 18 were males, foreigners 97, of whom 50 were males and 47 females; the nativity of three males, being returned as unknown.

Marasmus, next to consumption, stands prominent in the mortality tables of our city, 1662 deaths from this cause having been reported during the year.

It is shown that 204, (78 males and 126 females), died of *Old Age*; the nativity of the deceased was as follows: United States 28 males, 53 females; foreign birth 48 males and 72 females; unknown 2 males and 1 female.

The records show an increase of *Premature Births* of 72 over the year 1856, the whole number for the year 1857 having been 459. The number of Still-born compares favorably with the returns of the two years preceding, the number in each being nearly the same, viz: in 1855, the report showed 1564, in 1856, 1556, and in 1857, 1558.

An increase of deaths by *Small Pox* of 35 is shown over the year preceding: of the total for 1857, (423), it will be seen (137) nearly one-third, were children under one year.

The number of adults compared with that of children dying of this disease is in the ratio of 1 to 5.

The mortuary tables comprised in this report give cause for gratitude and congratulation for the continued healthfulness of our city. With a rapidly increasing

population the statements show the total number of deaths for the year 1857 were less in number than the annual average of the past six years, the mortality in these years having been as follows:

1852	21,601
1853	22,702
1854	28,568
1855	23,042.
1856	21,658
1857	23,333
Annual average	23,484

The census of 1855, it is generally admitted, did not give a correct enumeration of the population of the city, by many persons it was estimated to be upward of 700,000, instead of 629,810 as stated in the official returns; the census of 1850 gave the number at 515,394.

From the above figures it will be seen that each year has added but slightly to the number of deaths, with the exception of 1854, when the cholera largely increased the number for that year.

Free as has been our city from the prevalence of pestilence, much remains yet to be done to reduce the number of deaths resulting from preventable causes. It is the highest duty of government to provide for the safety of the health and lives of the people, and it is to be regretted that indifference to so great an extent has marked the lapse of years, without the adoption of important sanitary measures frequently urged in the annual reports emanating from this department, in connection with which I would again call the attention of your Honorable Body to the following:

SANITARY REMARKS.

Feeling sensibly the responsibility which attaches to the head of this department, I have deemed it my duty, in former reports, to direct your attention to topics, which a lengthened experience has proven to require the interposition of your Honorable Body, in the enactment of such repressive and restrictive ordinances as are necessary for the establishment and preservation of the public health. Before entering upon them, however, permit me to call your attention, briefly, to a few facts on which must depend, in a great measure,

THE HEALTH OF THE CITY.

It is generally conceded, though seldom adopted, as a rule of practice, that good air is an essential to the enjoyment of health, and that cleanliness is the promoter of this requisite. It is known, also, that the air is capable of retaining or holding in suspension or solution, particles of putrid animal and vegetable matter; hence, the idea of *febrific agents*, of a *gaseous* form, which are supposed to act on the animal system, through the medium of the atmosphere. This class of agents, we are told, consists of two orders, viz:—1st, *Infection*, comprehending those *febrific effluvia* which are generated by the decomposition of vegetable and animal matter; and 2d, *Aeriform*, contagion, generated by the animal system.

The first of these, viz: *Infection*, consists of *two genera*. 1st. Those which result from the humid decomposition of vegetable and animal substances, contained in the public filth of cities, &c.; and 2d. Those of febrific effluvia, which

are generated by the decomposition of the natural exhalations, and excretions of the human body, accumulated and confined in crowded and ill ventilated habitations.

Without undertaking to illustrate these truths, supposing them to be generally admitted, permit me to remark, that it is not improbable that to the above cause may be ascribed much of the ill health and mortality of this city. Of course, the modifications of disease produced by the agency of a poisoned atmosphere, in different localities, depend, in a great measure, on the different degrees of concentration, as well as on the particular character and proportion of the substances from which the putrid miasmal particles are derived. But, "so deep and pervading, indeed, are its effects on the system," remarks an experienced writer on this subject, "that it never fails to debase, in a remarkable manner, both the physical and moral constitution of the people. And not only does the stature and symmetry of the body suffer conspicuous deterioration, but, in course of time, the mind becomes torpid, feeble, pusillanimous, and the moral sentiments debased."

From these health destroying influences our city may be comparatively freed, by the enactment of stringent ordinances for the repression and removal of all inciting causes. Among which are the following:

1st. The too general practice, among a portion of our population, of casting their garbage, slops and offal in front of, and around their dwellings; in the streets, courts and alley-ways, generating, as is well known, (from those decaying animal and vegetable substances,) poisonous gases, to the manifest injury of the health and comfort of

all classes of society. All attempts to keep our streets even in a tolerable cleanly condition, must prove futile, unless an effectual check is given to this shocking habit, by a strict enforcement of this police regulation; and I would again call the attention of your Honorable Body to the absolute necessity of an ordinance for the regulation of boxes for the reception of garbage, their number, capacity, and right of use.

2d. The injudiciously selected docks for the reception of night soil, and other kindred matter. The offensive odors constantly arising; the noise of passing carts, at all hours of the night; the inconvenience of closed windows, during the hot summer months, are nuisances easier to be conceived than described, and admonish us of the necessity of the selection of docks in the lower part of the city, comparatively deserted after business hours, from which the soil should be removed in barges.

3d. The practice of packing tenement houses, from basement to attic, with human beings, to the manifest abridgement of comfort, health and life, should be no longer tolerated. The poor frequently are compelled to take up with small apartments, into which two, three and four, and sometimes five and six families are crowded; and in order to save fuel, and indeed, frequently from a total want of fuel, every access of the external cold air is carefully shut off. Add to this the filth, irregular and intemperate manner of living, and want of proper change of clothing, &c., which is almost inseparable from extreme poverty, and you have a combination of circumstances, peculiarly calculated to generate disease. Legis-

lative action in relation to these buildings, providing against the evil, is at once demanded

4th. The offensive odors arising from slips receiving the filth and animal and vegetable substances from the sewers, owing to the exposure, and from a deficiency of water, is an evil which can, and should be at once remedied, by authorizing the proper officers to cause the necessary dredging to be effected to maintain a proper depth of water.

5th. The avocation of the *chiffoniers* subjects every part of the city to their presence, and the foul effluvia of their filthy gathering contributes its quota to the mortality of the city. Their fuming chaldrons of bones, and putrid carrion and sickly effluvia, arising from every conceivable substance, in the upper wards where they mostly live, their filthy rags, containing the very seed of pestilence, spread out and hanging from every possible projection, combine in making each shanty a very leprous spot in the neighborhood in which they are located.

6th. The practice pursued by the owners of swine, of carting their swill, garbage and offal from hotels and slaughter houses, through the city in uncovered carts, is not only a nuisance—vitiating the air we breathe—but is in direct violation of the city ordinances. The keeping of swine within the confines of the city should be at once prohibited.

7th. The practice indulged in, along our wharves, of accumulating manure in heaps, for the purpose of "rotting," as it is termed, is a nuisance, long and justly com-

plained of. The process of turning it over from time to time, exposing it alternately to sun and rain, impregnates the air with its fumes and gasses, which contaminate the whole surrounding neighborhood. The remedy suggested in my former report I would again respectfully urge upon your attention as follows,—"to prohibit entirely the deposit of horse manure at any place within the city limits; to have the persons who collect the manure, work under license, and provide for the immediate removal of all manure as soon as it may be collected. The same will apply to the accumulation of street manure, which has been frequently permitted to lie on the Corporation piers for a needless length of time." Thus, what is now a most serious nuisance, may be, not only abated, but, be made a very productive source of city revenue.

8th. The practice of interring the dead within large cities must be condemned by any sane judgment, as highly pernicious, and dangerous to the public health, and I submit, should be prohibited without delay. Such burials are now prohibited south of Eighty-sixth street; but the prohibition should be extended; the rapid growth of the city demands it.

9th. From neglect of proper drainage in the yards, or area way of houses, rain and waste waters from hydrants and other sources is permitted in too many cases to take its own course, into vaults or cellars, producing dampness and jeopardizing the health of whole families. To obviate this, roof and surface water should be conveyed to and connect with the soil pipes and sewers, so that by every rain, all filth would be effectually washed away.

10th. The nefarious traffic in diseased meat continues to be pursued to a fearful extent, and although I have succeeded in detecting its sale, and seized and sent to the offal boat, beef, veal and pork, in large quantities, of a most unsound and unhealthy character; yet the want of a sufficient ordinance presents difficulties still in the way of preventing its sale. The effectual plan of prevention is, as I have stated in a former report, "to invest officers, selected by the City Inspector, with power to take, seize, and prevent the sale of meat deemed by them to be unhealthy, and bring the offending parties to justice." A proper consideration for the public health demands that such power should be conferred without delay.

11th. The removal of the contents of privies during the warm months, when the exhalations are most intense the windows being generally open, I have before referred to, and is to some extent the fault of the public. The ordinances contemplate the work to be done during the late fall, winter and spring months, and it is to be regretted that they are so generally disregarded by those for whose benefit they were enacted.

With slight additional expense and time, it is well known that privies may be rendered inodorous. I would therefore, again urge upon your attention, the expediency of adopting an ordinance requiring the deodorizing of all sinks before being emptied, especially during the time intervening between the months of March and November.

The suggestions presented by Dr. D. B. Reid, to the Commissioners of Health, especially having reference to the importance of adopting improved means for venti-

lating vessels detained at Quarantine, demand, in behalf of the best interests of the city, that a careful examination be given to the advantages of the proposed improvements· and I deem it not improper to append to this report the same in the hope that they may command the attention which I conceive them to merit.

I.—Ventilation and Fumigation of Ships, as a means of obviating the necessity of detention at Quarantine.

Ventilation is justly considered one of the most important means of combatting and removing disease on board ship, of preserving the ship itself from premature decay by dry rot, and of removing all noxious exhalations, whether arising from disease on board, from the timbers of the ship, from the well, from the cargo, or from any other materials it may contain.

In the great majority of cases, if not in all, where quarantine has been deemed essential, it is contended that proof may be obtained that a sufficient quantity of fresh air has not had access to the hold in such ships, or to the goods with which they are loaded, presuming them to have been placed on board in an unobjectionable condition. This is still more the case, in general, where these goods have been shipped under circumstances that rendered them liable to the action of impurities prone to produce disease, or to the conjoined influence of heat and moisture. And, even when detained at quarantine, it is considered that the ventilating arrangements commonly resorted to, might be rendered much more powerful, and contribute equally to the recovery of the sick and to the prevention of any prolonged detention at quarantine.

The opening of the hatches, and the action of wind-sails, are often too local in their effect; and in calm weather, when at the same time the temperature within and without the ship is nearly equal, the latter are comparatively inoperative.

It is suggested, accordingly, that a specific ventilating power should be provided and applied in all ships subjected to quarantine, so as to insure a more effective ventilation.

Air has a three-fold action in the effect it produces during ventilation:

(*a.*) It displaces vitiated air loaded with impurities.

(*b.*) It usually promotes evaporation from many materials prone to run into putrifaction when moist, but innocuous when dry, though under other circumstances it is apt to communicate moisture, if not heated to a proper temperature.

(*c.*) It exerts a specific purifying chemical influence on numerous animal and vegetable substances, tending ultimately to resolve them all into water, carbonic acid and nitric acid, and inorganic substances, such as lime, phosphate of lime, magnesia and oxide of iron, according to the elements which each may contain.

Hence the great power of ventilation, and its influence in subduing, or mitigating the severity of the most deleterious atmospheres, and the necessity of its action being sustained with vigor in ships subjected to quarantine. For, without entering into details as to the theory of contagion, or the origin of epidemics, fresh air incessantly

removes products more or less noxious from all objectionable materials, impurities must be dissipated in proportion to the amount of air passing over them in a given time; or, in certain conditions of the air, which can be imitated artificially when requisite, a state of dryness, or temperature can be induced that removes all apprehension of disease from special cargoes, as to which under other circumstances, strong objections may be justly entertained. In other cases, decomposing chemical agents may be necessary, whose number and power of operation give ample opportunity of selection, according to the peculiarities of each individual case.

When the quarantine station is crowded with ships, when it is near the land, and especially when there is a calm, or merely a gentle inclination of the wind in one direction, the health of the crew and passengers in contiguous ships and localities renders it important that the vitiated air escaping from an infected ship should be subjected in each individual case, at first, to the direct action of burning fuel, or special chemical agents, till its atmosphere shall have assumed a more wholesome condition.

Where ships are not crowded together at a quarantine station, and where the state of the external atmosphere secures a great and rapid dilution of the vitiated air as it escapes, it is not so necessary to subject it to the action of heat and of chemicals.

The great point to be attended to is the direct removal of vitiated air from the bottom of the hold, at the wells, at the bow or the stern, a direct connection being established between these places and the ventilating power.

Or, the ventilating power may be applied to the well alone, if by hatches and other special apertures the fresh air entering be made to traverse the whole of the ship's hold in proceeding from the stem and stern of the ship to the well.

As to the nature of the power to be employed, a fanner will be found most generally useful. When employed for exhausting air, the tubes that convey the vitiated air to it must be made of materials that do not collapse. On the other hand, when such tubes are not employed, the fanner must be made to propel fresh air into the ship. It is better to exhaust vitiated air than to blow in fresh air when the atmosphere in any ship, or in any part of it, is in a very bad condition. In this case it is directly withdrawn and good air enters all over the ship. If fresh air be blown into the well of a ship, or any other part where the air is very foul, that very foul air is diffused throughout the whole ship, instead of being directly removed.

The vitiated air, when withdrawn in a concentrated form, is more easily decomposed by the action of chemicals, or subjected to the influence of a destroying heat.

A chimney, with a fire in it, expanding where the heat is produced, so as to allow the air to escape freely around the fire, is a complete substitute for an exhausting fanner.

When a fanner is used, and vitiated air removed by exhaustion is further subjected to heat before being allowed to escape into the external atmosphere, the chimney proceeding from the fire does not require to be made higher than is requisite for the right discharge of the vitiated air.

But when a fire is used for exhaustion as well as for the decomposing effect it produces on noxious exhalations, it is scarcely necessary to state that an altitude and diameter must be given proportional to the amount of air which it is intended to exhaust.

At a large sea port, such as New York, it is suggested that in addition to the arrangements adopted in individual ships, one steam tug at least should be specially fitted for the purpose of ventilation and fumigation, and so constructed as to act with great power, consume the vitiated air it exhausts from any ship in the first instance, and then continue exhausting as long as may be required, blowing in an ordinary, warm, or other atmosphere, charged with fumigating gases, according to the peculiar nature of the ships and cargoes upon which it may have to operate.

It is in no way desired to supersede at the Quarantine station the general use of windsails or any ventilating cap, cowl or other apparatus dependent on the action of the external atmosphere, but to introduce in addition to such appliances an unfailing power that shall be as superior in the certainty and efficiency of its action under all varieties of weather as the steam ship is to the ordinary sailing vessel. It is also strongly recommended that all ships, and most especially those that have no port holes, that carry goods and sail from stations that render them liable to quarantine, should have one main ventilating channel running along the keel from stem to stern. The upper part of the hold on one or both sides has been preferred in some ships, descending branches being conveyed in such cases to the well and to each

separate compartment in ships having water-tight bulkheads. Such a main ventilating channel would not only greatly facilitate all necessary operations at Quarantine, but, if put in action daily at sea, prevent, in all cases, that excessive severity of contamination of air that is so frequently the cause of great mortality, and facilitate, at all times, the examination of the state of the atmosphere in the hold, by discharging a portion from time to time on deck.

Again, the general adoption of an exhausting power that can, after removing the more vitiated air, be made to propel warm air by a mere change of valves, or transmit directly fumigating materials to the place where they are most specially required, is an object of great practical importance. It facilitates general and local fumigation and all those specialties of action which each individual ship or cargo may require. In some cases, the cleaning and drying of the well of a ship, in others the removal of moisture by the action of quicklime in iron buckets, when the external atmosphere is very damp, and heated air cannot be used, and in some ships a local reduction of temperature by the use of ice, will often remove the greatest source of evil; but such measures cannot be applied most advantageously till the general quality of the air shall have been improved, and as much heat and moisture shall have been carried away as a free current of fresh air can discharge. In my published illustrations of ventilation, those referring to ships are taken principally from executed works in vessels of all dimensions, and numerous examples are given of some of the varied objects demanded in different classes of ships; but in meeting the great and

essential wants of a quarantine station, a power acting on the atmosphere in any part of a ship and the application of heat, cold or chemicals for fumigation are the greatest desiderata.

In some crowded quarantine grounds where ships can be stationed alongside a landing in which a tunnel or ventilating channel can be constructed, leading to a proper shaft furnace, and fanner, it will be found desirable to have a special auxiliary, ventilating power put in action on the shore, providing it with the same resources as have been described in adverting to the tug steamboat.

When the cargo of any ship, or any part of it is in such a condition that it cannot be adequately purified unless the bales or packages in which it may be contained shall be undone and exposed freely in a building, or in the open air, or to fumigations to an extent that may be impracticable on board ships, it should be transferred to a warehouse specially constructed for this purpose, and so arranged that part of it can be heated to any required temperature, and subjected to a powerful current of air by the action of a ventilating shaft or fanner. In general, a very moderate elevation of temperature aids greatly the power of the atmosphere in removing noxious exhalations, and arresting their production.

Each individual substance, capable of producing disease, is found to be most active within a special range of temperature, and with a particular amount of moisture; every change in these respects tends to arrest or retard the usual course of putrefaction.

Again, in reference to the Quarantine Hospital, the following suggestions are submitted to the consideration of the Board:

1. That a special ventilating shaft should be constructed in every quarantine hospital, and that its power should be such as to draw away the vitiated air, that may have passed over any patient, and become loaded with expired air, or exhalations from his person, so that little or none shall return and mingle with the general atmosphere of the ward in which he may be placed.

2. That the fire in the ventilating shaft shall be capable on all necessary occasions, of communicating such a temperature to the passing vitiated air, as shall entirely remove all apprehension as to the escape of any infectious atmosphere.

3. That when desired, no air whatever shall escape from the patients' wards, the dead room or any other place that may be a source of infection, except through the above-mentioned shaft.

4. That one room at least shall be provided in each such hospital that shall enable the superintending physician to direct any amount of warm, cold, dry, or moist air in an unceasing stream over any patient, and with any infusion of steam he may require, accompanied by the additional resources of a warm or cold shower bath, at any required temperature, or such special gasses or chemical vapors as may be deemed desirable.

5. That in the construction of any new hospital the site selected and the construction adopted shall admit a

pure external atmosphere, that may be cooled in summer, as well as warmed in winter; and the whole hospital be treated as a large pneumatic apparatus, to any required extent, and charged continuously with any amount of chemicals that may be prescribed. Such arrangements are not incompatible with the introduction of the ordinary resources afforded by windows, but they must be shut altogether, or to any required extent, to admit economically of the controlling action of the ventilating shaft.

The preceding observations, and the illustrations that can now be given, with the aid of the accompanying apparatus will enable the members of the Board to judge more precisely of the nature of the practice recommended. It has been provided, since the resolution was passed, which led to this report, and is not intended to present a precise and proportionate model of any works or machinery, though sufficient for the illustrations contemplated when it was proposed.

II. *Suggestions as to the preservation of Public Health in the city of New York.*

The general preservation of health in any large city is a wide and comprehensive subject, exclusive of the question of quarantine, and the quality of the food with which it is supplied; and in presenting the following suggestions, I have stated briefly the leading outlines of the principal points that have occurred to me from a personal inspection of the greater part of the city and of the contiguous islands.

1. It is suggested that a much more extensive system of cleansing the city should be introduced than is at present

enforced, and that the cost of removing refuse dust and debris from streets, habitations and other places, might be largely assisted by a right assortment of these materials, at suitable depots, where they might be sold at a higher rate than at present, for agricultural purposes.

Should any difficulty occur at first in the removal of the refuse, or in selling it at a proper price, it is considered that it would materially promote the necessary adjustments were a few blocks selected in some of the more crowded localities of the city, and all the refuse from them applied to agricultural purposes under the direction of a competent superintendent. This might be done at Blackwell's or at Randall's island, and the precise cost of collection and removal, as well as the value of the labor expended subsequently, being accurately determined, there would then be more correct data to guide the city authorities, and the farmer in making the proper allowance for its value.

2. Where a proper system of drainage and sewerage has not been introduced, it is suggested that large collections of putrefying refuse should be prevented, and arrangements instituted for replacing them by dry inodorous manure, formed by the actions of dried earth and other absorbents, in a different form of privy specially constructed for the purpose and capable of being cleansed with facility.

Further, looking to the importance of this question in an agricultural point of view, to the great amount of the probable increase of population in this city, and to the extent the contiguous waters and shores may be affected

in the course of time, it is desirable to adopt every available means for diminishing any contamination which can be economically presented, as well as to stop all infiltration of materials into the ground in the immediate vicinity of the habitations of the people, from a liquid pestilential refuse in a constant state of putrefaction.

3. The peculiarities of the geological structure of the district rendering it susceptible to many collections of stagnant water in its present condition, the more free use of quick-lime is recommended from time to time, to remove their noxious qualities.

4. The introduction of ventilating shafts, with appropriate furnaces, is recommended in all manufactories, or other places where smoke, fumes, or exhalation are disengaged, that are the cause of just complaint to the neighbouring population. These fumes can, in general, be destroyed and rendered innoxious in the manner that has been explained in the observations made on quarantine.

But, in cases where they resist the action of heat, they can be subjected to the influence of water or special chemical agents, so as to absorb or decompose them.

Such shafts should be erected, also, at all depots for the collection and disposal of any decomposable refuse, according to its condition, and the density of the population in the locality in which it may be placed.

Small locomotive fire-places and shafts are often used with advantage, in special manufactories, in ventilating drains loaded with noxious gases that require to be cleaned, or in removing the foul air from old wells or pits.

5. The ventilation of individual buildings, public and private, is perhaps more broadly connected with the general health of the population than any other question. External cleansing, drainage and sewerage are absolutely essential for the preservation of a proper external atmosphere; and while the wideness and general disposition of the streets is rightly conducive to the free circulation of air, the conviction has been pressed upon me, by what I have seen, on numerous occasions, that individual blocks of buildings require a more free supply of air, in the interior, than they at present receive, to facilitate the removal of vitiated air that is apt to stagnate in calm weather, within the area which they surround. When there are many sources of vitiated air within such areas, the effect is very marked, when the barometer is low. It is true that individual blocks are seldom so complete as to prevent altogether any access of air, except over the roofs, to this internal area; nevertheless, it appears to me this subject is well worthy of consideration, particularly where the buildings are high.

But, it is within doors that ventilation more especially demands attention; and, in this respect, notwithstanding numerous exceptions, the prevailing effect witnessed is imperfect ventilation, and numerous defects, such as prevail in European cities, that might be easily obviated, were the principles and practice of ventilation more generally understood.

The more numerous class of evils arising from this source are so extensive and powerful in their operation, that they well deserve the attention of those who are charged with the preservation of the public health; at the

same time, as they occur where direct interference would be challenged and resisted, it is only by the increasing intelligence of all classes of the community that they can be adequately met and overcome. Nevertheless there are two measures that would greatly promote the progress of ventilation, and penetrate the workshop, the office, the manufactory, as well as the habitations of individual men, and extend their influence to public buildings of every description. The first of these is the adoption of a system of instruction in schools and academies, and in popular institutions, for illustrations in practical science to adults, for diffusing, generally, correct information as to the nature and construction of the human frame, and of the consequences of defective ventilation. Secondly, the institution of a specific course of instruction in colleges and other institutions, by which students of medicine, architecture, engineering, arts and manufactures, and others specially interested in the subject might acquire the knowledge requisite for each, in their own departments.

The same enlightened views that have led to the general support of educational measures for the public good, call equally for the attainment of a great public object that has not hitherto been adequately met, and one calculated, if properly supported and carried into execution, to prevent thousands of deaths, annually, in the largest cities, and hundreds of thousands of cases of disease, if conformed with the other measures essential to sanitary improvement.

6. Tenement buildings are susceptible, perhaps of a greater amount of improvement than any other class of

habitations. They have been the subject of numerous experiments, on a large scale, in different parts of Europe, and many illustrations may be gathered from different buildings in this city; but it is impossible to examine the basement and the staircases, the individual habitations, the flues, or the roofs, without seeing that they are susceptible of very considerable improvements, with little or no material increase of cost. There, also, improvements in the present disposition of the stagnant refuse in their vicinity would be invaluable.

7. The same considerations that led to the arrangements for the protection of emigrants appear to render it desirable that some lodging houses should be subject to systematic inspection, and that they should also be under authority in reference to cleansing and ventilation.

8. It is suggested that an extended system of baths and wash-houses would be of great value in particular districts.

9. It is recommended that all stables within the city should be subject to inspection, control, and alteration, where they are not properly cleansed and ventilated. Many stables in New York contaminate, largely, the air in their vicinity.

10. There are, perhaps, few cities where the rising generation have fewer spaces available for out-door exercises, than in New York. It is recommended, accordingly, that every opportunity should be seized of increasing the play-grounds attached to public schools, of securing free spaces, when practicable, in rebuilding streets, or dis-

tricts where many buildings must be removed, and of making all squares and free spaces as useful as possible, for exercise and recreation. Though the new park will be invaluable for these purposes, still it cannot be too continuously kept in view, that the health and strength of numbers is often more dependent on the exercise and recreation which they can obtain in the immediate vicinity of their habitations, than on any other cause. A full appreciation of all the peculiar advantages which New York has, by its ferries, steamboats and railroads, to its noble bays and its magnificent rivers, and the contiguous districts in every direction, does not render less important the condition of the locality in which we may continue to live, as it must always produce the most persistent effect on the constitution.

In the general progress of its more recent architecture, many of the continuous groups of first-class habitations in this city rival any similar class of habitations in any European city, and perhaps few, if any of the more northern cities in Europe, including London and Paris, approximate to it in the quality and supply of water it receives, and of the capabilities of which this department is still susceptible; but the very causes that have accelerated the extension of this city, have, also, led it to partake of those defects connected with the habitations of the poorer classes of the community, which are now attracting so large a share of attention on both sides of the Atlantic.

And, looking to the probable future extension of New York, as well as to the rebuilding of old habitations, if long continued investigations in reference to sanitary improvements, the construction of experimental buildings,

with the view of testing, practically, the plans recommended, and the examination of many of the principal cities in Europe, for sanitary purposes, as well as the part taken in public works, lead you to attach any weight to my opinion, then I submit to your consideration the suggestions presented as to the institution of a college of architecture, or any equivalent measure, and for the general diffusion of information as to the principles of hygiene, among the great mass of the population, as the most important I have been led to advocate during the last twenty years, for attaining the great objects the Board of Health has in view, for securing the united co-operation of architecture and agriculture, with the views of the medical profession, and for promoting, from time to time, all those specific improvements which their resources, assisted by the chemistry and the engineering of modern times may render it desirable to introduce.

In no place can a college of architecture be founded with such advantage, as in a large city such as New York, where so much building is in progress, and from which improvements will naturally extend to the whole American continent.

Every city has its own special difficulties to contend with, but the principal obstacle in all cities, to the right progress of sanitary improvement, is the absence of sufficient information on this subject in the great mass of the population. Where there is an ample supply of water, where grave-yards are excluded from a city and its immediate precincts, where general cleansing, surface and deep drainage are placed on a proper footing, where all

manufacturing and other establishments producing offensive smoke and noxious vapors or exhalations are compelled to destroy them, or absorb them within the premises where they are formed; where large or small collections of decomposing refuse are absolutely interdicted, or subjected to efficient control before they are removed; where a strict quarantine excludes external sources of disease, and where sufficient open space is reserved for exercise and recreation, there are still innumerable operations and occupations in individual life that too often tell continuously in undermining the general tone of health, and which nothing can be expected to reach without the increased knowledge and intelligence of the population. As it advances in art and science, new materials, new operations and new structures require corresponding provisions and adaptations.

Finally, in concluding these observations, it may be remarked, that if it be demonstrable that human life is, in general, greatly and most injuriously abridged by many preventable causes, and that a larger amount of disease, suffering and death arises from their insidious operation, than is often produced by the most pestilential epidemics of modern times; it becomes a proper subject of inquiry, whether the experience of former days, the general progress of science, and particularly the elucidation which the origin of many diseases has derived from the discoveries of chemistry, do not emphatically point out that the combination of the skill and resources of different professions is the great object required to promote and sustain sanitary improvement, with adequate economy, and that the increased intelligence of a whole

state or nation, in the chemistry of daily life, would enable it to penetrate, largely, the habitations of all classes of society.

I have the honor to be, gentlemen,
Most respectfully,
Your very obedient servant,
D. B. REID.

New York, 22d October, 1856.

The following remarks from the "Fourth Annual Report on the Births, Marriages and Deaths, in the city of Providence for the year ending, December 31st, 1858, by Edwin M. Snow, M. D.," are appended, in the hope that physicians and others will appreciate the importance of stating in the certificates of death, (especially of children), the nativity of the parents of the deceased, in order that the report of the City Inspector may embrace information, the value of which is set forth in the remarks of Dr. Snow in a manner so able as to need no addition thereto, other than to call attention to the remarks, and to urge the fact of the value of such statistics in connection with the mortuary tables of the city of New York, where so great a foreign population is resident, and at which port so many thousands are landed every year, who pass through on their way to their future homes in other parts of the country.

"PARENTAGE *vs.* NATIVITY.

"The following remarks relate to what is believed to be an important subject. They will illustrate one particular in which the mortality reports of the city of Providence

differ from nearly all similar reports in this country, and will show the reasons for the plan adopted here.

"In reports upon mortality, it is customary to divide the population into classes, and show the number of deaths and other particulars, in relation to each class. Thus, we show the number of deaths of males and females, of whites and colored, of married and single, of native and foreign, the number in different localities, and the number at different periods of life.

"One most important object of this division into classes, is to show the effect of the different natural and artificial circumstances in which the population is placed, upon the mortality of the community; and thus to acquire knowledge in relation to the original cause of disease and death. The application of such knowledge to the removal of the causes of diseases, and its connection with measures for the improvement of the public health, is obvious.

"For the purpose of obtaining such information, particularly in the cities of this country, the most important of all these divisions into classes, is the classification according to parentage;—*the classification according to parentage* as distinguished *from the classification according to nativity.*

"In all reports upon mortality in this country, except in this city and in Boston, and in the last two Rhode Island Reports, no distinction is made between parentage and nativity; or rather, the nativity alone is given, and no reference is made to parentage.

"It is well known, that the foreign population, as a class, in this city, and in other cities in this country, are under entirely different sanitary influences from the American population. The greater portion of the foreign population live in a miserable class of tenement houses, with all the want of conveniences, and positively injurious influences of such houses; their social habits are not calculated to preserve health; and a knowledge of the laws of hygiene is entirely wanting among them. Of course, the children of foreign parents are subject to the same injurious influences upon health, and suffer from them more than the parents themselves.

"It is evident that any classification of mortality statistics should include the children in the same class with their parents. This is done by the classification according to parentage; but the classification according to nativity, would include nearly all the children of foreign parents with the American population. In other words, the division of the population, according to nativity, makes two classes, as follows:

"The first class includes Americans and their children, and also the children of foreigners. The second class includes only adult foreigners.

"The effect of the two kinds of classification, by parentage and by nativity, is shown by the following examples.

"The number of deaths, in Providence, during three years past, 1856 to 1858 inclusive, was 3007. Classed according to nativity, or birth place, there were of

"American nativity, 2443; foreign nativity, 564; total 3007.

" Classed according to parentage, there were of

"American parentage, 1576; foreign parentage, 1431; total, 3007.

"This shows that, in the classification according to nativity, 867 children of foreign parents are included with the American population, though they are really subject to all the sanitary, social, and other influences of the foreign population. For all purposes of sanitary, or any other investigation, it is evident that these children should be included with the foreign population.

"Take another example. During the month of September, 1858, there were 86 deaths in the city of Providence. Classed according to nativity, there were, of persons

"Born in the United States, 80 deaths; average age, 18·8 years.

Born in other countries, 6 deaths; average age, 39·00 years.

" Classed according to parentage, there were of

" American parentage; 42 deaths; average age, 34·3 years.

" Foreign parentage, 44 deaths; average age, 6·8 years.

"Can there be any doubt which is the correct classification?

" Take a third example. During three years, 1856 to 1858 inclusive, there were 156 deaths in the city, from cholera infantum. Classed according to nativity, there were of

"American nativity, 156; foreign nativity, 0; total, 156.

"Classed according to parentage, there were of

"American parentage, 55; foreign parentage, 101; Total, 156.

"Thus, nearly all the mortality reports of cities in this country, as they give only the classification according to nativity, show that none but Americans die from cholera infantum.

"These examples are sufficient to show, that the classification of mortality statistics, according to parentage, particularly in our cities, should be adopted for all purposes of sanitary and other investigation. They also show, that the classification, according to nativity, has no value whatever; but on the contrary, gives erroneous information, and is only calculated to mislead and deceive the inquirer after truth.

"Believing in the truth, and in the importance of these views, I have, in the mortality reports of the city of Providence, made all the classifications and analyses of the facts, according to parentage. The results obtained, as shown in this, and in the preceding reports, have been of a most surprising character, and, in my opinion, fully show the correctness of the plan adopted.

"One fact, resulting from the recapitulation of three years' statistics, may be given here. The number of deaths, in Providence, of persons of foreign parentage, during three years, 1856 to 1858 inclusive, was 1431. But if the deaths of persons of foreign parentage had been in the same proportion to the population living, as those of American parentage, the number would have been 1097, or 334 less than the actual number. In other

words, if the foreign population had been in the same circumstances, and under the same sanitary influences as the American population, 334 lives would have been saved, in the three years, or more than one in five of all who died, of the foreign population.

"This fact could not have been learned by a classification, according to nativity. On the contrary, the classification, according to nativity, would show that the annual mortality, during the last three years, has been one in 41 of the persons living, of American nativity, and only one in 70 of those living, of foreign nativity. It is difficult to perceive any value in a fact of that description."

In conclusion, it is earnestly hoped that physicians (and others concerned), will, in future, state the nativity of the parents of deceased children in the certificates of death returned to this office, so as to enable the head of the department hereafter, to form a correct classification of children of foreign parentage, compared with those of natives.

Respectfully submitted,

GEORGE W. MORTON,

City Inspector.

ANNUAL REPORT

OF

THE COMPTROLLER

OF THE CITY OF NEW YORK,

OF THE

Receipts and Expenditures of the City Government,

FOR THE

YEAR 1857.

NEW YORK:
CHAS. W. BAKER, PRINTER TO THE COMMON COUNCIL.
1857.

IN COMMON COUNCIL.

MAY 6, 1858.

THE ANNUAL REPORT OF THE COMPTROLLER, of the Receipts and Expenditures of the year, ending December 31st, 1857, was received, laid on the table, and ordered to be printed.

D. T. VALENTINE,
Clerk of the Common Council.

DEPARTMENT OF FINANCE,
COMPTROLLER'S OFFICE,
CITY OF NEW YORK, April 30, 1858.

To the Common Council:

The Comptroller submits herewith statements showing—

First. The appropriations, expenditures and receipts of the Corporation for the year ending December 31, 1857.

Second. The moneys borrowed on the credit of the Corporation, the authority for each loan, and the terms upon which it was obtained.

STATEMENT No. 1, appended to this report, gives the general heads of appropriations, expenditures and receipts for the year ending December 31st, 1857, exclusive of the Sinking Funds set apart for the payment of the principal and interest of the city debt.

The total amount received into the city treasury during the year, from all sources except the Sinking Fund, is.....	$16,256,858 71
Total expenditures in cash and assessment bonds	16,583,338 69
Excess of expenditures over receipts	$326,479 98

STATEMENT No. 2, shows the appropriations and expenditures on account of the city government proper for the year ending December 31, 1857.

The total expenditure under these heads amounts to the sum of.....	$4,571,633 97
The whole of this sum is paid by taxation.	
The amount expended during the year 1856, for the same purpose, was.....	4,589,925 72
Being less than for 1857.....	$18,391 75

STATEMENT No. 3, shows the appropriations and expenditures on trust and special accounts for the year ending December 31, 1857.

The total amount expended on these accounts, is...$12,011,704 72

A large portion of this sum is paid by taxation, under general or special laws, viz:

Asylum for Idiots	$260 00
Building Loan Stock	50,000 00
Charges on Arrears of Assessments	1,051 50
Common Schools, for State	231,460 31
" " for City	1,100,410 82
Central Park, interest on debt	255,760 00
Deaf and Dumb Asylum	2,870 00
Institution for the Blind	1,240 00
New York Juvenile Asylum	27,445 65
State Mill Tax	511,740 50
Redemption of Revenue Bonds	6,399,515 00
Society for the Reformation of Juvenile Delinquents	8,000 00
Commissioners of Record	275,000 00
Judgments	223,855 54
	$3,088,609 82
Total payments made for city account, as shown in statement No. 2	4,571,633 97
Total	$7,660,243 29

The above statement shows the amount of expenditures from appropriations which are raised by taxation for the year. The difference between this and the amount included in the tax levy of 1857, is produced by sums raised for various objects on which the sums expended have been less than the amount levied, as may be seen by reference to the appropriations and expenditures as given in Statement No. 1.

STATEMENT No. 4, appended, has been prepared for the purpose of showing, by comparison, the objects of expenditure which have caused the great increase of taxation.

In comparing the total amount of taxation in 1858 with 1857, it will be seen that the increase is $2,995,016 47. By a reference to the permanent items of expenditure, it will be seen that a large portion of this increase of expenditure is upon objects over which the Common Council and the Finance Department have no effective control. This is shown by a comparison of the following items:

	Increase.
Alms-house	$458,800 00
Common Schools for State	253,833 46
Common Schools for City	496,210 81
Commissioners of Record	350,000 00
State Mill Tax	408,332 27
Total	$1,967,176 54

Although two-thirds of the increase of expenditures during the last four years has been produced by causes beyond the control of the city government, it must be conceded that the items of expenditure under its control have greatly exceeded the sum required for an economical administration of the city government. The allusion to this subject is made not as a matter of reproach in regard to the expenditures first above alluded to, but merely as a matter of justice to all the parties concerned.

It is only by a rigid system of economy in all departments of the city government, and of the state government also, that the tax payers are to find relief from the present heavy burdens.

THE SINKING FUNDS.

The receipts and expenditures on account of the Sinking Funds for the year ending December 31, 1857, are shown by statements annexed to this report, as follows:

STATEMENT No. 5, shows the receipts of the Commissioners of the Sinking Fund, for the payment of the city debt:

Received on account of the fund for the payment of the debt	$1,699,539 49
Paid for the same fund	2,074,815 09
Advanced for the payment of interest	$375,275 60

STATEMENT No. 6, shows the receipts and expenditures on account of the Sinking Fund for the payment of interest on the city debt:

Received on account of the Sinking Fund for the payment of interest on the city debt, during the year ending December 31, 1857	$1,916,443 42
Balance in bank, January 1, 1857	1,071,677 97
Total	$2,988,121 39
Payments made from the same fund	942,104 20
Balance, January 1, 1858	$2,046,017 19

STATEMENT No. 7, shows the total amount of city debt and the means held by the Commissioners of the Sinking Fund for its payment.

The debt amounted, January 1, 1858, to	$16,489,168 00
The Commissioners held at the same time	5,858,629 04
Debt unprovided for	$10,630,539 96

STATEMENT No. 8, shows the stocks and other securities held by the Commissioners of the Sinking Fund for the payment of the city debt, equal to $5,858,629 04.

The various stocks held by the Commissioners of the Sinking Fund were examined by the Commissioners, January 20, 1858, and were found to correspond with the amount given in this statement, as is shown by their certificate of examination annexed to this report. See Statement No. 8.

REDEMPTION OF THE STOCK DEBT OF THE CITY.

On the 1st of February, 1857, $990,000 of the seven per cent. Water Loan was paid off and cancelled.

The sum of $3,000,000 of five per cent. Water Loan stock, issued under authority of chapter 126 of the laws of 1838, became payable, according to the terms of the certificates, "on or after the 1st of January, 1858." The Commissioners of the Sinking Fund held an accumulated fund in stocks and bonds and mortgages, applicable to the payment of this debt, of more than $5,000,000; but as all the stocks held by them, with the exception of about $100,000, bore interest at the rate of five per cent., the Comptroller did not consider it prudent to give notice during the money pressure in October and November that this debt would be paid in cash on the 1st of January, and that no interest would be paid after that date, as had been usual preceding the reimbursement of former loans. This stock had always been designated in the reports from the Finance Department as "Water Stock, redeemable January 1, 1858," and the holders of this stock would have been disappointed if payment had been deferred under the terms introduced into the certificate. In view of all the circumstances, the Comptroller, on the 1st of November, issued a circular to the holders of the stock, offering to exchange six per cent. stock, dollar for dollar, for the five per cent. certificates, "reimbursable on or after the 1st of January, 1858." These circulars were communicated to the holders of the debt in Europe, and the result was, that orders for making exchanges of stock exceeded the amount which the Commissioners were authorized to issue.

The six per cent. stock used in payment of the debt of 1858, was derived from the following sources:

The Sinking Fund held six per cent. bonds and mortgages on lots within the limits of the Central Park to the amount of $287,191 25, and on the 24th of October last, the Commissioners of the Sinking Fund passed a resolution to receive six per cent. Central Park fund stock in payment of these bonds and mortgages, which were virtually cancelled by the law for the acquisition of lands for the Park.

The common lands within the limits of the Central Park were valued by the Commissioners at $396,954 75, and this sum was awarded to the Corporation; on January 20, 1858, the Commis-

sioners of the Sinking Fund passed a resolution to receive six per cent. Central Park stock for the amount of this award, and to apply the same to the payment of the debt of 1858. The Commissioners also passed a resolution authorizing the cancelment of $310,000 of five per cent. stock, for which the Sinking Fund had advanced cash and six per cent. revenue bonds, and took the five per cent. stock as an investment, when it could not be made available for paying awards to unknown owners, and authorized the issue of six per cent. Central Park fund stock, as provided by chapter 25 of Laws of 1857, which sum was also applied to the payment of the debt of 1858. These several sums amount to an aggregate of $994,150.

The Sinking Fund for the payment of interest has a large surplus beyond the amount of interest annually required, and the Commissioners borrowed from this fund, to aid in paying the debt of 1858, the amount of which will be repaid to the Sinking Fund for the payment of interest, by transferring to that fund from the Sinking Fund for the payment of debt an equal amount of five per cent. stocks.

The operations before alluded to, have enabled the Commissioners to pay off and cancel, previous to the first of April, $2,578,559 of the water stock of 1858.

INCREASE OF THE STOCK DEBT OF THE CITY.

During the year 1857, the stock debt of the city has been increased two hundred and seventy-five thousand dollars, by an issue of six per cent. stock, as provided by the 3d section of chapter 630 of the Laws of 1857. This purchase adds about ten acres of land to the Central Park, and two hundred and seventy-five thousand dollars to the debt for the acquisition of land for the park. The principal of this debt is payable from the Sinking Fund in the year 1898, and the interest is to be added to the annual tax levy.

There has been issued during the same year, three hundred thousand dollars of six per cent. stock for the improvement of the Central Park, as provided by section 10 of chapter 771 of the Laws of 1857. The principal of this debt is chargeable upon the Sinking Fund, but

the interest is to be raised by an annual tax, provided the tax shall not exceed $100,000, in any one year. At six per cent., this law authorizes the creation of a debt for the improvement of the park, equal to $1,666,666 66.

There has been added to the permanent stock debt of the city for the purchase of land, and the construction of a new Croton reservoir, the sum of nine hundred and ninety-four thousand five hundred dollars, bearing interest at the rate of six per cent. per annum, and the principal reimbursable in the year 1875, as provided by chapter 24 of the laws of 1857. The principal and interest of this debt is payable from the Sinking Fund.

DEBT PAYABLE BY TAXATION.

STATEMENT No. 9 shows the amount of debt redeemable from year to year by taxation.

The total amount of this debt, January 1, 1858, was $1,104,000.

CENTRAL PARK ASSESSMENT STOCK.

STATEMENT No. 10 shows the amount of stock issued for the payment of awards for land taken in the Central Park, redeemable from the assessment for the Central Park, February 5, 1859. The total amount is $1,600,000.

TREASURY LOAN ACCOUNT.

STATEMENT No. 11 shows the amounts borrowed on revenue bonds during the year ending December 31, 1857; also the amounts paid during the same year:

The amount borrowed is	$5,598,050 00
Amount paid	2,107,150 00
Amount outstanding, January 1, 1858	$3,490,900 00

LOANS TO BE PAID FROM ASSESSMENTS.

STATEMENT No. 12 shows the amount borrowed on assessment bonds, to be paid from assessments on property benefitted by regulating, grading and paving streets, constructing sewers, filling sunken lots, &c.

The total amount of assessment bonds issued during the year 1857, is $691,100. Of this sum $513,100 bears interest at the rate of six per cent., and $178,000 at the rate of seven per cent.

STATEMENT No. 13 shows the total operations of the treasury, in its connection with A. V. Stout, City Chamberlain, for the year ending December 31, 1857:

The total amount paid into the treasury, during the year, including the balance January 1, 1857, is....	$17,741,061 14
Paid out.....	16,371,910 45
Balance in treasury, January 1, 1858...	1,369,150 69
The total amount paid into the Sinking Fund, during the year 1857, including the balance in the treasury January 1, 1857, is.....	4,687,660 79
Amount paid out, &c.....	3,016,919 20
Balance in Sinking Fund, January 1, 1858..	$1,670,741 59
Add treasury balance.....	1,369,150 69
Total balance in the bank, to the credit of the Corporation, January 1, 1858.....	$3,039,892 28

COLLECTIONS OF THE TAX LEVY IN THE YEAR 1857.

The total amount of tax levied on the city and county of New York, for the year 1857, was $8,066,566 52.

The tax books were opened by the Receiver of Taxes, September 7, 1857. The annexed statement, No. 14, shows the amount of tax collected in each month, to the close of the year 1857. It will be seen by this statement, that the collections for each of the four months, to the close of the year, were as follows, viz:

September.....	$914,691 03
October.....	1,282,321 22
November.....	3,390,377 67
December.....	708,060 51
Total.....	$6,295,450 43

This large sum was paid to the Receiver of Taxes, in the basement room in the new Court-house, and it is interesting to look at the progress of these payments, which, as to time, are made at the option of the taxpayers, in connection with the provisions of the law of 1843, by which the present system of collecting taxes was established. This law provides for an allowance of interest, at the rate of seven per cent. per annum, from the time of payment to the 1st of December, provided the payment is made previous to the 1st of November. During the month of November each taxpayer is required to pay the exact amount of the levy without any rebate on account of interest. If, however, he does not pay the amount assessed before the 1st day of December, one per cent. is added to the amount of his tax; if he omits to pay, until the 15th of December, an additional one per cent. is added; and if he delays payment until the 1st of January following, he is charged at the rate of twelve per cent. per annum, which is ordinarily equal to four per cent. addition on the 1st of January, being for the four months after the opening of the tax books.

The practical operation of these provisions of the law of 1843, in regard to the collection of city taxes, may be seen by referring to the three days preceding the first of December, when the increase of one per cent. takes effect, viz:

November 27	$321,563 24
" 28	695,383 89
" 30	722,858 30
Total amount	$1,739,805 43

On the first three days of December, it will be seen, the payments were as follows:

December 1	$20,793 53
" 2	11,104 97
" 3	14,483 56
Total amount	$46,382 06

On the three days preceding the 15th of December, when the second

addition of one per cent, took effect, (equal to two per cent.,) the collections were as follows:

December 11	$41,148 45
" 12	54,504 80
" 14	145,946 17
Total amount	$241,599 42

In the three days succeeding the 15th of December, the collections were as follows:

December 15	$13,045 98
" 16	4,219 84
" 17	5,835 41
Total amount	$23,101 23

The total sum collected, during the last three days of December, after which the penalty rose to four per cent., is as follows, viz:

December 29	$53,711 03
" 30	55,465 50
" 31	101,417 19
Total amount	$210,593 72

In the first three days of January, the collections were as follows:

January 2	$7,497 44
" 4	5,014 78
" 5	7,108 81
Total amount	$19,621 03

REMISSION OF TAXES IN 1857.

STATEMENT No. 15 shows the taxes remitted in the year 1857, by the Board of Supervisors and the Common Council.

The total is..... $53,059 98

TAXES ON INCORPORATED COMPANIES.

STATEMENT No. 16 shows the amount of tax assessed upon incorporated companies, doing business in the city of New York

Amount of personal estate....	$85,560,133 27
" real estate	11,741,612 00
Total valuation.....	$97,301,745 27
The amount of tax levied against the same companies, in 1857, is.....	$1,513,832 94

NON-RESIDENT TAX

The legislature passed an act in February, 1855, (chap. 37, authorizing the taxation of non residents doing business in New York.

In accordance with this act, a tax book is made up annually, containing the names of non residents who are doing business in the city, and who are subject to the provisions of the act. The first tax list of non residents was made up for the year 1855. This book contained the names of 1,206 persons, with a total valuation of $14,[illegible],130.

In the year 1856 the number of persons assessed was 1,894, the total valuation $18,[illegible]1,265

In the year 1857 the number of persons assessed is 1,954, and the total valuation is $17,227,986

The Receiver of Taxes, Wilson Small, has furnished the following statement, which shows the sums collected from nonresidents, thus far, the sums remitted, and the sums in arrear, viz.

Total amount of levy for 1855....		$174,767 40
Amount collected to January 1st 1858		11[illegible] 72
		$[illegible] 68
Remaining unpaid	....$46,155 19	
Remitted by Supervisors	9,943 4[illegible]	[illegible] 68
Total amount of levy for 1856		217,254 70
Amount collected to January 1st, 1858.....		159,832 85
		$ 7,421 85

Remaining unpaid	$85,903 28	
Remitted by the Supervisors	11,518 57	97,421 85
Total amount of levy for 1857		268,135 48
Amount collected to January 1st, 1858		156,699 90
		$111,435 58

STATEMENT No. 17 shows the Valuation of Real and Personal Estate for the years 1856 and 1857.

THE LOWBER JUDGMENT.

On the 2d of March, 1857, the Common Council passed a resolution to purchase a plot of ground at the foot of Sixteenth and Seventeenth streets, intermediate between those streets, on the East river, and to pay for the same the sum of $196,000. This the Comptroller declined to do, for the reasons assigned in a communication to the Common Council, April 23d, 1857.

The Counsel to the Corporation approved the title, and Mr. Lowber, after making the tender of a deed, the acceptance of which was refused, commenced a suit which was referred to a referee, who reported in favor of allowing the claim of Mr. Lowber, to the amount of $196,000, and judgment was entered for that amount in the Supreme Court.

The transcript of judgment was presented to the Comptroller, which he refused to pay, and execution was accordingly issued, and placed in the hands of the sheriff, who levied on all the personal property of the Corporation, and gave notice that the paintings in the Governor's room would be sold on a day fixed in the notice to pay the claim of Mr. Lowber.

The sale, however, was postponed at the suggestion of Mr. Lowber, and in the mean time application was made to Judge Whiting, who commenced proceedings to stay the execution, or get it set aside.

An injunction was obtained, on an affidavit of the Comptroller, as a tax-payer, on the 19th of August, 1857, and the case was argued by James R. Whiting, before Judge Roosevelt, in September, and an

rder staying proceedings was made by him, September 28th, 1857, a opy of which order, and the opinion of Judge Roosevelt in the case, re annexed, (see Statement No. 18.)

The case was appealed by Mr. Lowber, to the General Term of the upreme Court, before which Judge Whiting again argued the case, hen Judge Clark delivered an opinion, substantially confirming the e stone taken by Judge Roosevelt, a copy of which opinion, and the rder agreed on at the General Term are annexed, see Statement o. 19.)

In pursuance of this order Judge Whiting prepared a complaint hich was verified by A. C. Flagg, as a tax payer, and a bond was xecuted by himself, Orison Blunt and John J. Serrell, in the sum of ifty, as required by the order. It was necessary, in order to carry n the proceedings, to obtain the consent of the Attorney-General of he state, to use the name of the people; and to indemnify the people gainst costs A. C. Flagg and J. J. Serrell gave a second bond for he sum of $5,000, to protect the people of the state against costs. In ddition to this the Attorney-General required a stipulation from udge Whiting, that the taxed costs should be paid to the Attorney-eneral, and this stipulation he requested the Comptroller to approve, hich request was complied with. Subsequent to this proceeding the ounsel for Mr. Lowber moved to dissolve the injunction; the case as argued at great length, Judge Whiting contending alone for the rotection of the interests of the citizens against the able advocates mployed by Mr. Lowber, which resulted in favor of the tax payers, s shown by the opinion of Judge Davies, a copy of which is annexed, (see Statement No. 20.)

VACANT LOTS ON WARD'S ISLAND.

On the 31st of December, 1857, the late Common Council passed a esolution, authorizing the Mayor to appoint an arbitrator, who, in onnection with an arbitrator to be appointed by Alexander McCotter, should estimate the amount to be paid by the city for the vacant ots possessed by the said McCotter, on Ward's Island, and the

water rights connected therewith. Although the resolution passed on the last day of the year, and on the evening of the last session of the Board, the Mayor selected C. P, Schermerhorn to represent the interests of the city, in conjunction with S. Benson McGown, who had had been selected by Mr. McCotter. The arbitrators made an award on the 13th day of February, a copy of which was served on the Comptroller, on the 19th day of February, at 4 o'clock, P.M. A copy of this award is annexed, (See Statement No. 21.) It estimates a trifle over thirty-one acres of up-land, at $2,500 per acre, equal to about $77,500, and forty-eight acres of land under water, at $1,000 per acre, equal to $48,000, making a total of $125,500.

The present Common Council took into consideration the purchase of the above lands, and the payment of so large a sum by the tax payers at the present time, and very promptly adopted a resolution rescinding the one adopted by their predecessors in the last hour of their session. The last resolution is as follows:

Resolved, That the resolution to purchase certain lands on Ward's Island, at a price to be decided by arbitrators, and which passed the Board of Councilmen October 19, 1857, and the Board of Aldermen December 31, 1857, and was approved by the Mayor December 31, 1857, be, and the same is hereby rescinded.

THE BATTERY.

In the last annual report from this department, the attention of the Common Council was directed to the condition of the Battery, and of the contract for its enlargement. The attention of the Common Council is again invited to the suggestions made in that report.

INVESTIGATION OF FRAUDS IN PAYMENTS ON ASSESSMENT CONTRACTS.

This report has been delayed by an examination of numerous irregularities and frauds in payments on contracts for regulating and grading streets, and other contracts, paid by assessment on the property benefited. The results of these investigations are contained in statement No. 22, which embodies most of the facts communicated from time to time by the Comptroller to the Committee on Frauds of the Board of Councilmen, or to the Mayor.

As soon as the death of Joseph S. Taylor, late Street Commissioner which occurred on the 9th of June last) was announced to the public, a controversy arose as to the power of filling the vacancy.

On the 13th day of June, Daniel D. Conover presented to the Comptroller a bond, which he said the Mayor refused to approve, and showed a commission duly executed by the Governor of the State, appointing him Street Commissioner. On the 16th of the same month, Charles Devlin presented to the Comptroller an appointment by the Mayor and Common Council of himself as Street Commissioner, and a bond in due form, approved by the Mayor.

The Mayor gave notice to the Finance Department that he should not recognize Mr. Conover as Street Commissioner, and that he had not approved his bond. The Comptroller determined not to recognize either of the contestants until the courts decided which of them had a legal right to the office.

Charles Turner, the Deputy of Joseph S. Taylor, was continued in the same office by Charles Devlin, and by his and preparations were made to open bids for about eighty jobs on the 7th of July, about twenty days after Devlin got possession of the rooms in the Hall of Records. The Comptroller declined to attend at the opening of these bids, and the contracts were not made.

On the 18th of July, D. D. Conover was again in possession of the office, in the Hall of Records, and about that time the books and papers were placed in his custody by Judge Peabody. In the meantime numerous contracts made by the Street Department were in progress, and as these were finished, and the assessment rolls confirmed by the Common Council, the Comptroller was urged to pay the contractors, or their assigns, according to the stipulations in the several contracts; and on jobs exceeding in amount $10,000, the certificates of the surveyors on the work, backed by one from Mr. Turner, were produced as the best evidence within the reach of the contractors, and the parties interested claimed the payment monthly of the 70 per cent. on the work, as provided by the ordinance of December 30, 1864.

The Comptroller therefore adopted measures to have the assessment rolls, after they were confirmed by the Common Council, transmitted to the Assessors, and entered on their record, as provided by the 21st section of the act "in relation to assessments in the city of New York, and to amend the several acts in relation thereto," passed April 16, 1857; and then to have them placed in the hands of the Clerk of Arrears, to be entered on his books, as required by the 6th section of the act of 1853, for organizing the Bureau of Arrears. This being done, a transcript of the summary of each assessment roll, showing the sum to be raised for the contractor, surveyor, assessors, collectors, &c., was entered on the ledger kept by J. B. Smith in the Finance Department, as the basis of settlement with the parties named.

In regard to monthly advances on work in progress; the Comptroller directed that these should be limited to the sums found to be due on remeasurement by D. Ewen or J. J. Serrell. This rule, had its operation not been frustrated by the infidelity of J. B. Smith, the bookkeeper, would have retained the thirty per cent. contemplated by the contract.

In cases of contracts confirmed by the Common Council, the ordinances, as well as the contracts themselves, provide that payment shall be made in full on the confirmation of the assessment roll; and in regard to contracts under $10,000, no payments are required to be made to the contractor until the work is finished, and the assessment roll is confirmed by the Common Council. When, therefore, the contractor produces a certificate from the head of the department that the contract is completed to his satisfaction, and that the assessment roll has been confirmed, the Comptroller, by the terms of the contract and the ordinance of 1854, is bound to pay.

After the death of Joseph S. Taylor, on the 9th of June, and the litigation incident to that event, a literal compliance with the ordinance in regard to a certificate from the head of the Street Department was impracticable, and the Comptroller paid the persons recognized as entitled to compensation, on the evidence furnished by the assessment rolls, confirmed by the Common Council, and transcripts from the original rolls, authenticated by the Clerk of the Common Council.

In relation to the ledger entry of one of the confirmed contracts, a fraud of $10,000 was perpetrated by placing a figure 1 before $2,823 10, thus giving to the assignee $12,823 10, instead of $2,823 10, the sum due. When this fraud was discovered, a thorough investigation was instituted to ascertain whether other confirmed assessment rolls had been tampered with in a similar manner. This examination embraced the ledger transcripts of confirmed assessment rolls for the years 1855, 1856 and 1857.

In the three years the number of jobs confirmed was 568, covering total assessments to the amount of $1,829,907 91, and in all these cases, except the one before referred to, the transcripts on the ledger, were found to correspond with the record of the original assessment rolls in the office of the assessors. In regard to many other contracts, there have been frauds in the measurements, and computation of quantities, and frauds by the introduction of wall, culverts and other work not embraced in the original contract, at enormous prices; and advances have been made on these fraudulent computations, and illegitimate contracts, and covered up by false entries in the books kept by J. B. Smith, in the Finance Department. Payments have also been made apparently on jobs with which the recipient of the money was connected, and falsely charged by J. B. Smith, on the books kept by him to jobs on which payment had been previously made in full, or to those with which the recipient had no connexion; most of these cases are enumerated in Statement No. 22.

The excepted cases are now given, and two of them have been under consideration before the recorder, and are as follows, viz:

On the 11th day of November 1857, a warrant upon the Chamberlain was drawn in the hand writing of J. B. Smith, purporting to be for amount collected for construction of sewers on Forty-fourth street, for the sum of $5,790 91, in favor of John Fitzpatrick. It purports to be indorsed by Fitzpatrick, and certified underneath the indorsement of Fitzpatrick's name, "Correct, Charles Devlin," in his handwriting. This warrant was deposited by Devlin, to his credit, in the Broadway Bank, on the 14th day of November, and was paid by the Chamberlain.

An inspection of the books and documents in the Comptroller's and Street Commissioner's Office, shows that the original contracts for sewers on Forty-fourth street were entered into with other persons, who performed the work and were paid as early as 1856. Neither Fitzpatrick nor Devlin had anything to do with the construction of those sewers.

The son of Devlin testified, before recorder Barnard, on the 4th day of March last, that the indorsement of Fitzpatrick's name upon that warrant was in the hand-writing of his father. On the 30th day of October 1857, an assessment was confirmed by the Common Council for paving Forty-ninth street, from the Sixth to the Eighth avenue, and laying a cross-walk on the westerly side of the Sixth avenue, for which work C. Sharp was contractor, but who had assigned his contract to John Fitzpatrick. The total amount of said contract was $2,823 10. Said assessment, and the amount thereof, was entered in the ledger of Assessment Contracts, in the Comptroller's office. Subsequently the amount was fraudulently altered, by placing before the figures $2,823 10, the figure 1, so as to make the total amount, $12,823 10, instead of $2,823 10.

Afterward, on the 23d or 24th day of November, 1857, J. B. Smith presented a statement to the Comptroller, showing the amount due on the said contract to be $12,823 10, as aforesaid; and there were thereupon issued to John Fitzpatrick therefor, three assessment bonds, two for $5,000 each and one for $2,800, and a check given to him for the balance, of $23 10. One of said bonds for $5,000, was assigned by said Fitzpatrick to Charles Devlin, and was afterward assigned by said Devlin, under his own hand, to Hawley & Bradford, and was by them again assigned to one Jacob A. Robertson, who, on the 3d day of December, 1857, presented said bond at the Comptrollers' Office, when it was cancelled, and another issued to the said Robertson in its place.

The check for $23 10, was indorsed by said Fitzpatrick, and deposited by said Devlin, to his own credit in the Broadway Bank, and was paid by the Chamberlain.

On the 5th of October 1857, a warrant upon the Chamberlain was drawn, in the handwriting of J. B. Smith, purporting to be for an award in opening and extending the Bowery, for the sum of $1,325 62, in favor of Edwd. H. Cambrelling, attorney. It has on the back the name of Edwd. H. Cambrelling, attorney, and passed through the Bowery Bank, the endorsement bears strong marks of being a forgery, and, as no award is found, the whole transaction is believed to be fraudulent.

There is also a fraudulent payment of $2,000, in settling the awards for land taken in the Central Park, the particulars of which are given under the head of Central Park, in another part of this report.

There is also a fraudulent payment of $863 05, in settling the award in the New Reservoir, the particulars of which are given under the Head of New Reservoir, in another part of this report.

CENTRAL PARK.

From a thorough examination and computation of the awards in Central Park, the following results are given, viz:

Total amount of awards	$5,069,693 70
Total amount of taxed costs and expenses before the confirmation	57,943 60
Total	$5,127,637 30

This is $41,832 60 less than the sum reported to the Common Council immediately after the confirmation of the report of the Commissioners.

The payments on account of awards to January 1st, 1858, amount to the sum of	$4,712,078 89
And for costs and expenses	57,943 60
Total	$4,770,022 49

The balance of awards unpaid on the 1st Jan. 1858, is $361,453 70 as shown in Statement No. 23.

Payments have been made in cash and Central Park stock, as follows, viz:

6 per cent. stock, payable in 1859	$1,085,400 00
6 per cent. stock, payable in 1887	1,092,300 00
5 per cent. stock, payable in 1898	385,700 00
Cash	2,148,678 89
Total	$4,712,078 89

The ordinance passed February 29, 1856, for the payment of the awards for land taken in the Central Park is as follows, viz:

SEC. 7. "The said Comptroller shall receive the money payable for or upon said loan and shall pay the same into the city treasury, and keep a separate account thereof.

SEC. 8. The said money so to be received shall be applied by the said Comptroller in payment of the awards for the lands aforesaid."

Previous to the date of this ordinance all payments from the appropriation of "Street Opening," on account of the opening of streets or parks were made by the Street Commissioner, where the receipts for all such payments were taken and kept. As the ordinance in relation to the Central Park, prescribed that payments should be made by the Finance Department, the Comptroller applied to the Clerk of the Supreme Court for a certified copy of the awards for the Central Park, as confirmed by that court. This statement was furnished to the Comptroller, which is the first authentic record of awards furnished to the Finance Department, as a basis for payments on the millions of dollars appropriated and paid for "Streets Opening."

The settlements with the various persons having awards was confided to A. S. Cady, under the direction of the Comptroller; a separate set of books, as required by the ordinance were opened, and the filling up of the checks according to the memoranda of settlements made by Mr. Cady was attended to by J. B. Smith. In consequence of the frauds and irregularities found to exist in the settlements for assessment contracts with which this person was intrusted,

a thorough scrutiny has been made in regard to all the operations connected with the payment of awards on the Central Park. The total number of awards is 1853, of which number 418 were awards made to unknown owners, for which the money was paid into Court, leaving 1,435 awards to be settled in the Comptroller's Office.

To test the correspondence between the principal of the awards settled and the checks drawn, a ledger account was opened with each person having an award, crediting him with the amount of the award, and charging him with the payments made in cash and stock, and with mortgages held by the Corporation. This test showed that all the settlements made by A. S. Cady, and for which he furnisned memoranda of the amounts, were correctly paid, with the exception of an over-payment of $30, which was made by erroneously transcribing an award. This was paid to a citizen of undoubted responsibility, and the amount will be replaced by him.

The opportunity enjoyed by J. B. Smith, in drawing the checks, was made use of by him to commit a fraud to the amount of $2,142 66; this was done March 12, 1857, by making a check payable to John Gardiner, executor of the estate of Nancy Gardiner, for that sum, and charging the same to the Central Park Fund, when no such name was furnished to him by Mr. Cady, and no award of that description is found among the awards in the Central Park.

This check was endorsed John Gardiner, executor, and passed through the Bowery Bank. The charge on the journal referred to page 217 of the ledger, and appeared to have been posted; but on referring to the ledger, no such account is found on that page or any other.

The payments on account of interest have not yet been fully tested.

NEW RESERVOIR.

There has been a thorough examination of awards for land taken for the New Reservoir, to which the same test has been applied as to the awards for land taken in the Central Park. The result of this examination shows the awards to amount to the sum of $729,964 50.

The amount of the awards given to the Finance Department, from the office of the Commissioners, was $708,000, as given in the Comptroller's annual report for the year 1855. It is thus seen that an accurate statement of the awards, made up from a certified copy furnished to the Finance Department, by the clerk of the Supreme Court, is $21,964 50 more than the amount as understood at the time of the confirmation of the report of the Commissioners.

The amount paid to the 1st of January, 1858, towards the principal of awards is	$497,656 39
Thomas Parsons	863 05
Maria A. Moore	400 00
	$498,919 44

The balance unpaid is $232,308 11, of which $193,980 is awarded to the Corporation.

The amount paid for interest is $22,537 01. The awards were settled by A. S. Cady, under the direction of the Comptroller, and on his settlement checks were drawn for the payment, by J. B. Smith. It is found by the examination which has been made, that in drawing the checks for the payment of the awards a fraudulent payment was made from this fund.

On the 13th of October, 1857, a warrant was drawn on the Chamberlain for $863 05, to the order of Thomas Parsons, and on the back of the warrant the name Thomas Parsons appears; no such award is found in his name. This warrant passed through the Bowery Bank, and is evidently fraudulent in every particular.

There appears to be an over-payment of $400 to Maria A. Moore, who had an award of $2,140.

On the 10th of September, 1856, five per cent. stock was issued to John McKechnie, as assignee of part of this award, for $1,300.

On the 13th of October, 1856, another amount of five per cent. stock for $400 was issued to Maria A. Moore, and on the 5th of March, 1857, a payment was made of $840; this payment, in cash, was equal

to the balance of the award, after the first issue of $1,300; and the second issue of $400 seems to have been overlooked by Mr. Cady in settling the award.

BELGIAN PAVEMENT.

During the year 1857, 50,788 cubic yards of this pavement have been laid in the streets of New York, as follows, viz:

	Cubic Yds.
Canal street	19,751
Bowery and Chatham street	27,966
Thirty-second street	3,071
Total	50,788

PIERS AND SLIPS.

The amount of revenue collected in the year 1857, on account of rent of piers and slips, by the Collector of City Revenue, is $159,799 37.

STATEMENT No. 24 shows in detail the allowances made for dredging slips, repairing the piers, for damages on account of delays in rebuilding piers, filling in to connect them with the streets, incumbrances, &c. The total amount of these allowances during the year, ending December 31st, 1857, is $20,918 45.

FERRY RENT.

STATEMENT No. 25 shows the different ferries in operation, with the lessees in each case, the annual rent paid, and the expiration of the leases.

STATEMENTS No. 26 to 54, show the receipts of the Commissioners of the Sinking Fund, for the payment of principal and interest on the City Debt.

All of which is respectfully submitted.

A. C. FLAGG, *Comptroller.*

STATEMENT No. 1.

Appropriations, Expenditures and Receipts of the City Government, including Trust Accounts, from January 1, to December 31, 1857.

STATEMENT No. 18.

THE LOWBER JUDGMENT.

OPINION OF JUSTICE ROOSEVELT, ON PRELIMINARY OBJECTIONS.

A motion is made, on behalf of the Comptroller, as the chief financial officer of the city, and as a citizen and tax-payer, and one of the members of the corporate body denominated "the Mayor, Aldermen and Commonalty," the ultimate of which, in effect is, to obtain a perpetual stay of proceedings on a judgment for about $200,000, entered up, as he in substance alleges, by a quasi confession, without any just or real cause of action against the city.

The preliminary objections are raised:

First—That the presiding judge is not holding a court, and,

Secondly—That the applicant has no standing in court.

The answer to the first objection is, that by the 41st section of the Code it is declared, that every application for an order is a motion, and that motions, in the First Judicial District, with one exception, (which this is not,) may be made "to a judge or a justice, out of court."

As to the second objection, it is contended that the Comptroller, whether officially or individually, cannot be heard on mere affidavits; that he must file a regular formal bill of complaint, and that such bill must be filed on behalf of all other tax-payers as well as himself.

Whether a person not a direct party to a confessed judgment, but complaining of its injurious operation on his interests, shall be heard summarily, on informal affidavits, or be put to the more tedious remedy of a bill in equity, depends, according to the settled practice of the court, upon the special circumstances of each particular case, to be judged of after the affidavits on both sides have been read.

The more usual course in modern times, especially in this state, has been to grant the same relief on motion, as might be obtained on formal suit.—4 Johns' C., 191; 2 Kernan, 215.

If the facts can be sufficiently ascertained from the affidavits, a duplicate suit is unnecessary. But, if on the papers presented, the facts are involved in doubt and contradiction, the court may either

order a reference, where a cross-examination of the witnesses can be had, or leave the parties to a formal bill of complaint, with its consequent pleadings, issues and trial by jury or otherwise, as the law may require.

To determine, therefore, the course to be taken, it is obvious that all the papers must first be read.

OPINION AND DECISION OF JUDGE ROOSEVELT.

A judgment has been entered up (by collusion it is alleged, on the part of the public authorities, or some of them,) in the records of the court, on the report of a referee, for about $200,000, to be levied, of course, out of the property of the city, including whatever funds may come into the treasury from taxation, to the great prejudice of the citizens generally, and especially of those whose earnings are to be assessed to satisfy this unjust demand.

On an affidavit of the facts, as he understood them, the Comptroller of the city applied to one of the judges of the court, and obtained an order to stay all further proceedings, and to compel the parties to show cause why the judgment so entered should not be set aside, and a proper defence be made to the action.

At the day appointed cause was accordingly shown, and a large portion of a week was consumed in its discussion. Among other papers presented by Mr. Lowber's counsel, and relied on by him, was a written document, prepared in open court, signed "Richard Busteed, Attorney for defendants," and "John M. Barber, Attorney for plaintiff," dated after the order to show cause, whereby it was "stipulated that the motion made herein, to let the defendants into a further defence in said cause, and to amend their answer therein, be denied." This paper, as it appeared to the court, was of itself wholly insufficient for the purpose intended; and while furnishing no adequate ground for denying the motion for relief, it suggested the most conclusive reason for permitting it to be made by the Comptroller, whether in his official capacity as head of the "Finance Department" of the city, or in his individual capacity of a corporator and contributor to its

revenues. It showed, especially in connection with Mr. Busteed's affidavit, that the Aldermen and Councilmen were opposed to any defence being made, and that the "Law Department," under their direction, entertained the same views. If, therefore, the case as alleged, was one of gross injustice to the tax-payers, they had no alternative but a resort to direct intervention, or to that of another department of the city government, or to both. And, what officer, for this purpose could be more appropriate than the chief of the "Department of Finance," having, by the terms of the charter (§ 22,) "control of all the fiscal concerns of the Corporation." It is an erroneous impression, although a very prevalent one, that the members of the Common Council constitute the Corporation. The city of New York, in the language of the Dongan Charter, "is an ancient city, and the *citizens* of the said city have anciently been a body politic and corporate;" and in the language of the Montgomerie Charter, it was, "the *inhabitants* and *citizens* of said city," whom the crown "thought fit" to constitute "a body politic and corporate, by the name and style of the Mayor, Aldermen and Commonalty of the city of New York." It is the "citizens" and not the Aldermen and their associates merely, who form the corporators, and, in their aggregate character, the Corporation Aldermen, like other officers, are elected, not to supersede, but to aid the citizens in "the better government of the city;" and, so far as questions of property and revenue are concerned, they may be likened to directors of banking and railroad companies. They are trustees of the common fund, of which the citizens are the stockholders, or, as the law expresses it, the cestui qui trusts.

Mr. Flagg, then, in both his capacities, certainly in one or other of them, having from necessity a right to be heard, the question is, taking all the evidence together on both sides:—What is the case presented, and is it of sufficient magnitude and public importance to warrant a departure from the ordinary course of the judicial action?

The expediency of establishing a great market at the foot of Seventeenth street, on the East river, was a matter purely of legislative discretion. In the exercise of this discretion, although at the instance

of certain petitioners whose names do not appear in the papers before me, the Common Council, on the 13th of August, 1856, by resolution, "authorized and directed the Comptroller to advertise for proposals for a block of ground, and to report the same in thirty days, to the Common Council, for its further action." Among the proposals sent in was one dated November 6, 1856, from Mr. Lowber, for two blocks between Sixteenth and Seventeenth streets, east of Avenues C and A, including the bulkhead on the river, for $196,000, free of all incumbrances except taxes. And subsequently, in February of the present year, a resolution was passed by the two Boards, but neither approved nor disapproved by the Mayor, "directing the Comptroller to purchase without delay, the Lowber lots for $196,000; the property to be conveyed by a good and sufficient warranty deed, free and clear of all liens and incumbrances, except taxes *and assessments*, upon the title to the said premises being approved by the Counsel to the Corporation."

The resolution also "appropriated" $196,000 for the purpose, provided that the taxes and assessments to be assumed should not exceed $2,500.

On the passage of this resolution, as soon as the ten days had elapsed to render it operative without the express approval of the Mayor, Mr. Lowber immediately prepared and executed a deed, dated and acknowledged 10th of March, and submitted it to the Corporation Counsel for his approval. It is suggested that Mr. Busteed, at the time, was lying on a bed of sickness. In six days, nevertheless, a remarkable instance, certainly, of expedition in such matters, his indorsement was procured certifying that "he had examined the title, and approved the same."

By the terms of the resolution, the Comptroller, it will be recollected, was *to make* the purchase. It was not made by the mere passing of the resolution. The Common Council were no doubt aware that a "purchase" was a contract, and that all contracts in such cases were required by law, (sec. 23, act of 1849,) to be made "by the appropriate heads of departments."

The Common Council as they did, might direct the Comptroller to make a contract, and if without good cause, he refused, they might (through the Court) compel him by mandamus. But until he made or was compelled to make the contract, no contract existed, and neither Lowber nor the city was bound. Lowber, notwithstanding, without consulting the Comptroller, and seemingly considering his intervention, and any financial difficulties which he might suggest, such for instance as an empty treasury, without money to "appropriate," or a recent judicial decision against the title, as matters of no consequence, immediately, "on the same day," as he says himself, tendered his deed and demanded the consideration money, and although, as he admits in his complaint, both the Mayor and the Comptroller, "wholly refused to accept such deed, or in any way to recognize or complete said purchase," he insists that the purchase was made, and demands judgment, that the Corporation be compelled to "accept and receive the said deed, or such other suitable and proper assurance of the said premises as the court may approve, and to pay the said $196,000, with interest from the 16th of March, 1857, and in all things specifically to execute the aforesaid contract of sale."

On the statements in Lowber's complaint, the title, it is obvious, whatever it may be, still remains in him. Deeds take effect by delivery. Without acceptance there can be no delivery. A tender, merely, passes no title. The complaint admits there was no acceptance of the deed. Had there been, the action, instead of assuming the shape of an equity suit for a specific performance, would have been a common suit for money due. It assumes, therefore, that the contract, if any, was unexecuted, and it shows as clearly, in my opinion, that none was ever finally made. Details, as every one knows, are incident to such contracts. They must first be settled by a contracting officer and the party. A disagreement as to these, may, and often does take place. Until adjusted, there may be general proposals, but no binding engagement.

The complaint, as it seems to me, for these and other reasons, might have been demurred to; and had it been brought before the court in

that form, would, I think, have been dismissed without requiring any further answer. A demurrer however, was not interposed.

But the objections, being not formal but substantial, going to the foundation of the action, were not waived by the omission. They might still be taken by answer; and even after answer, and without answer or demurrer. The code (§ 148) provides, that "the objection that the complaint does not state facts sufficient to constitute a cause of action," shall not be deemed to have been waived, even by its omission, in both demurrer and answer.

The answer which was put in, so far as relates to matters of fact, confined the defence to a few simple objections:

First. That at the time of the passage of their resolution directing the Comptroller to make the purchase, and professing to appropriate the requisite amount, and ever since, there were no moneys in the treasury to meet such an appropriation, or out of which it could be paid, and no power under existing laws to borrow the same; and

Second. That, although the Common Council, after passing their resolution, had applied to the legislature for authority to raise by loan the requisite funds, that body had adjourned without granting the request.

From the pleadings it will be seen, in connection with affidavits to which I shall presently advert, that there was at that time no question of fact really in dispute. The code, (§ 270,) unless by consent of both parties, impliedly prohibits "a reference" in "cases where the investigation will require a decision of difficult questions of law." It assumes that the judges, specially chosen and commissioned for that purpose, are the proper persons to determine such matters; and that there is neither necessity nor fitness in subjecting the parties, or either of them, to the heavy expense of appointing a judicial substitute for the occasion. In the present instance, however, a different course was taken; and, on the application of the attorneys on both sides, a reference was directed to Mr. Sickels, "to hear and determine" the whole matter; who, on the 12th of June, among other things, reported:

"I find generally, that each and all the several facts set forth in the complaint, (it will be observed, the *facts* were not disputed,) are true as therein stated, and upon the facts so found by me, my conclusions of law, are" as follows:

First. That the plaintiff Lowber, by all that had occurred, had become "legally and equitably bound" to convey.

Second. That the defendants in like manner had become legally and equitably "bound to receive and accept the said deed from him, and to pay to the plaintiff the sum of $196,000, with interest from the 16th of March, 1857;" and

Third. That the plaintiff is entitled to a judgment in "this action for the said sum of," &c., "amounting in all to $199,353 77, together with his costs," &c.

On this report, and on the same day of its date, without the intervention of any judge of the court, (none being required by law in such cases,) a judgment was entered up in favor of Mr. Lowber against the city for $199,910 71; leaving the title to the lots, (as I understand the facts, and as I believe to be their legal effect,) still in him, as well as possession of the rejected deed, which had been tendered by him to the Mayor and Comptroller for their acceptance; an omission the more remarkable when it is recollected that the proceeding was not a common law suit, but a bill in equity for the specific performance of an alleged executory contract.

It now appears further, (for such is the clear preponderance of the affidavits,) that the value of the property—its market value I mean, and not as some of the plaintiffs affidavits express it, "its value for market purposes," was enormously exaggerated.

But the more decisive objection, unanswerable, as it seems to me, in every view of the case, is the fact that long before the Law Department gave its certificate, the Superior Court, at special term, as respects more than two-thirds of the property, had in effect pronounced the title bad. Mr. Lowber's counsel, it is true, while admitting that

Mr. Justice Hoffman, in the decision given by him, "was of a different opinion," says: "I have never been able to concur in the views taken;" but he adds, in the document signed by him and his associates: "The case referred to is now before the general term of the Superior Court for review; and its decision, (when rendered,) may throw further light upon the subject, if the court find it necessary to determine the question." Strange as it may seem, a strangeness only to be accounted for by the then recent illness of the head of the Law Department, the pressure of business upon him, and the consequent necessity of relying upon professional clerks and assistants, this document, with the notification I have cited from it, was submitted, and bears date a few days before the certificate was given. The appeal, too, from Judge Hoffman, was not only pending, but had been elaborately argued, and, it was supposed, would shortly be, (as it was in July following) decided;—a decision which, as the counsel thought it might, did "throw further light on the subject." It affirmed the decision of Mr. Justice Hoffman, and showed that though Mr. Lowber's counsel did "not concur in the views taken by the learned judge," his colleagues did.

The decision of the general term of the Superior Court, it may be said, was not pronounced, and of course was not known, till some months after the title in this case was passed, and even some weeks after the judgment in the present action was entered. But that fact, while it affords matter of vindication to the Corporation Counsel, is at the same time, of itself, a sufficient reason, under the circumstances, for opening the judgment;—a reason, as it seems to me, not only sufficient, but controlling—leaving, in any just view of the subject, no alternative. To say that the citizens in such a case, are to hazard more than half a million of dollars, the probable cost of land and market, and that there is no relief, would be monstrous. The proposition shocks all our notions of law and of judicial proceedings, and especially when broached in a court having, by the constitution, "general jurisdiction in law and equity."

"As matter of law," says the counsel of the city in his second point, "I deny that the Corporation can be ordered by this or any court to

defend a suit." The Counsel seems to forget that if the Corporation (by which he means the Aldermen, and other officers of the Corporation,) cannot be ordered to defend a suit—the corporators may be permitted to do it for them; and that if the court cannot compel the Corporation to resist an unjust claim, it can refuse to permit its records to be used as the machinery for enforcing it.

If this were not so, of what avail would be the legislative restrictions on the power of contracting debts, and on the power of exercising executive functions? All the property of the city, and all its revenues, past, present, and prospective, from taxation or otherwise, might be disposed of without appeal, by a single act of mortgage or conveyance, clothed in the form of a concerted judgment—a judgment, at the most, nominally defended, but really confessed—and of which, as in this case, the court itself, without its knowledge, might be made to figure as the innocent author.

As matter of law, I deny that the *court* can be made, and thus in effect "ordered" by the boards of direction, by whatever name called, of this or of any corporation, thus to lend its aid to violate the law, and ruin the corporators. Nor is it true, either that the Corporation Counsel, in the defence of suits in this court brought against the city is subject to the absolute orders of the two boards, and "only responsible" to them. Although, in the loose language of ordinary discourse, the Aldermen and Assistant Aldermen are commonly called the "Corporation," they are in fact, only its legislative, as distinguished from its executive organs. The Corporation of the city, as we have seen, consists of the whole body of the citizens. The citizens are the *quasi* stockholders. The "charter officers," whether legislative or executive, including the "Head of the Law Department," are merely the agents and trustees of the citizens, and all ultimately responsible to them.

It is an error on the part of the Corporation Counsel to assume, as he does in his third point, that he is "responsible only to his client," and that that client is the Common Council, as distinguished from the "commonalty." His office is the direct gift of the people, made elect-

ive for the express purpose of putting an end to the subserviency previously supposed to exist, and of creating a check or counterpoise in its stead. Nor is this all; the Corporation Counsel, when conducting the prosecution or defence of a suit in court, is an officer of the court, and as such, and like any other attorney in like case, responsible to the court. Although subject, within certain limits, to the legally authorized resolutions of the Common Council, while acting in his general character of "Counsel to the Corporation;" when acting as an attorney of the court, he is subject to the rules and regulations of the court, and with this intimation will, I have no doubt, be "perfectly prepared (see his communication) to perform any duty which such a result, or the office he holds, may devolve upon him."

SUPREME COURT ORDER.

September 28th, 1857.

Robert W. Lowber *against* The Mayor, Aldermen and Commonalty of the city of New York.

Present:—Hon. J. J. ROOSEVELT, *Justice.*

A motion having been made in this action on the part and behalf of Azariah C. Flagg, Comptroller, of the city of New York, and a tax payer of the said city, to set aside the judgment in this action, and the same being opposed as well by the plaintiff as by the defendants, by Richard Busteed, Esq., Counsel for the Corporation, and the plaintiff having also objected to the said Comptroller's appearing to make said motion, and moved to dismiss said motion on that ground, which motion was denied; and now on reading and filing said writs and papers in support of said motion, and affidavits and papers in opposition thereto, and after hearing Mr. Whiting on behalf of the Comptroller, and Mr. Busteed for the defendants, and Messrs. Noyes and Field counsel for the plaintiff.

It is ordered that the judgment entered in this action be, and the same is hereby set aside and vacated, together with the execution and all proceedings thereon; and that the answer in this action, interposed by the said Corporation Counsel, be, and the same hereby is also set aside, together with the stipulation to refer the order of reference,

report thereon, and the order affirming the said report, and that another answer in the said action be prepared by the said Corporation Counsel within twenty days, to be approved by the said Comptroller, to be interposed and filed in lieu of the preceding answer, unless the said Comptroller, within thirty days from this date, shall elect, as he may, officially, and as a tax payer and corporator, or otherwise, on behalf of himself and others, to file an original complaint, setting forth such matters, and making such parties, and praying such relief in the premises as he may be advised.

STATEMENT No. 19.

SUPREME COURT—GENERAL TERM.

Lowber *against* The Mayor, &c., of the city of New York.

OPINION BY JUDGE CLERKE.

December 7, 1857.

I presume that it will not be disputed, even by the counsel for the plaintiff, that it belongs to the essential inherent powers of this court, to exercise such an efficient control over every proceeding in an action pending in it, as effectually to protect every person actually interested in the result from injustice and fraud; and that it will not allow itself to be made the instrument of wrong, no less on account of its detestation of everything conducive to wrong than on account of that regard which it is proper it should entertain for its own character and dignity. And it will not only rectify proceedings of this nature, when brought to its notice by the intervention of any person having an interest in the result, whether formally a party to the action or not, but it is the solemn duty of every judge upon the bench to employ a vigilant eye, without waiting for the suggestion of others for the purpose of avoiding and detecting the perpetration of wrong which may be attempted by the instrumentality of legal forms.

And this vigilance should be exercised through every stage of the action, from the issuing of the summons to the levying of the excution. This superintendence, and this exercise of power, should indeed be regulated by a sound discretion, and with the utmost caution. Rules,

orders and decisions of the court, deliberately made, should not be lightly disturbed. As a general rule, none but parties to an action will be allowed to meddle with its management, or will be recognized as having any standing in court, in relation to it. When the litigants consist of adults, not under restraint and not insane, acting in their own right, the presumption that every man is the proper director of his own iterests, and the serious inconvenience that would ensue from allowing the unsolicited interference of persons not interested, render it expedient that the court shall lend no attention to any but the parties on the record. But even this rule must yield to the circumstances of the case. Even adult parties, apparently acting in their own right, and presenting themselves apparently in the adverse position of plaintiffs and defendants, may, by seeming to adjust only their mutual rights, compromise very seriously, and perhaps irrecoverably, the rights of others.

The familiar instance referred to on the argument will at once present itself. Where one party confesses a judgment without consideration, or for too large an amount, or when it is not made in strict compliance with the directions of the code, the judgment will be set aside on the application of a party not named on the record, but who is a creditor of the defendant. Now, on what principle is this interference allowed? Is it merely because the moving party has also obtained a judgment against the defendant? Even if this were the precise reason, it would be a very palpable instance of recognizing the right of a person not a party to the record to claim the interposition of the court in regard to it. But the reason of allowing this has no such restricted limits. In the particular instance referred to, indeed, the court will only hearken to a judgment creditor, because it is expedient to have his claim judicially established before it will be judicially recognized.

But the broad reason for the interference of the court is, that the plaintiff and defendant, in the fraudulent confession of judgment, have by their combined action, employed its forms to accomplish an act which affects the interests of persons having an interest in the dis-

position of the property affected by the judgment; and whenever this is done, the court has the essential inherent power to interfere, although, as a general rule, as I have said, in order to avoid confusion and contention, it will not do so when the parties to the record are adults, acting in their own right, and are free from restraint.

On the general principle which I have stated, the court would never allow a trustee to concede away any portion of the trust estate without ample consideration; and if he was a defendant in an action, and was about compromising the rights of his *cestui que* trust, by a confession, by letting a judgment go by default, or by carelessness, or even by a palpably mistaken view of his duty, the court, at the instance of the person having the beneficial interest in the controversy, would interpose. The power of a trustee over the estate vested in him exists only for the benefit of the *cestui que* trust, and in equity trusts are so regarded that no act of a trustee will be recognized as valid which is calculated to prejudice the *cestui que* trust, although a purchaser without notice will be protected. Courts are equally jealous in watching all the acts of a trustee by which the interests of the trust may be compromised. The instances quoted by the plaintiff's counsel, in which the court refused to recognize the acts of unauthorized persons to bind parties to a suit, have no application to this case. If the Comptroller attempted, during the progress of the suit, to consent, of his own accord, to a reference or an arbitration without any authority from the defendants, of course the consent would not be binding on them, and would be entirely void; but by this application he does no such thing. As a tax payer, and as an officer of the Corporation, particularly identified with the administration of its financial concerns, he presents himself before this court, and informs us that the defendants, who are in fact the mere trustees of the property and the other interests of the people of this municipality, the corporators of whom it is composed, are, by their conduct in relation to the plaintiff's demand, wasting the property of their *cestui que* trusts. It is not necessary to suppose that this is a case of bribery or corruption on the part of the individual members of the Common Council, or of

any other officers of the city government, or that the Counsel of the Corporation has intentionally betrayed the city.

It requires much stronger proof than I have discovered in the papers before me, to induce me to believe that he for a moment contemplated any injury to his constituents. That officer, and even the members of the Common Council, may be sincerely of opinion that to litigate this claim would involve the city in considerable expense without any reasonable hope of ultimate success; and indeed, that seems to be the conviction of many others who cannot be suspected of any unworthy motives to influence their opinion. But it is enough for us on this appeal to be convinced that the court below had the power to interfere, and that the evidence of the facts on which it might rightfully interfere is such that if they had been presented to a jury and the jury had found the same way, their verdict would be sustained. The title of the plaintiff had been condemned by one court as to part of the property to be sold, and is now subject to doubts which can be removed only by a judicial investigation. On the evidence a jury might have found, as the court below has, that the value of the property was excessively overrated. The objection that by the terms of the resolution of the Corporation the contract was not then complete, but was to be made in form by the Comptroller, also deserves consideration. These matters seem to have been overlooked at the trial. As they should be re-examined, we express no formal opinion upon them. The form of the judgment is also incorrect. The payment by the defendants should have been required on the plaintiff's executing and delivery to the defendants (or filing in court for them if they refused to receive it,) a warranty deed of the premises, free from all incumbrances (except as excepted in the contract,) and with a good title in all other respects. Justice to all parties would be best promoted by modifying the order below, and allowing the answer and subsequent proceedings to be set aside, provided the Comptroller or any other tax payer, who may be sustituted in his place, shall, within thirty days from a written notice of the entry of this modified order, file an original complaint as a tax payer, corporator or otherwise, on behalf of himself and others, setting forth such matters and making

such parties and praying such relief in the premises as he may be advised. In the meantime, let the plaintiff's proceedings in this action be stayed, and if another suit shall be commenced, as above provided for, let the plaintiff's proceeding be further stayed until the final decision of the other suit. Let the plaintiff in the new suit give security in the sum of five thousand dollars.

STATEMENT No. 20.

THE LOWBER JUDGMENT.

MOTION TO DISSOLVE THE INJUNCTION DENIED.

The People, &c., *against* R. W. Lowber, the Mayor, &c.

BY JUDGE DAVIES.

I regard the complaint in this cause as amended by striking out therefrom the words, "on the relation of." It therefore stands as a suit wherein the People, &c., and Azariah C. Flagg, corporator and tax-payer, are parties plaintiff.

The order made at the General Term of the Supreme Court on the the 7th of December, 1857, in the case of Lowber against the Mayor, &c., declares that the answer interposed in that case, and all subsequent proceedings therein, including the recovery of the judgments mentioned therein, were set aside and vacated, provided the Comptroller or any other tax-payer or corporator should, within thirty days after the service of that order, file and serve an original complaint as a tax-payer, corporator or otherwise, on behalf of himself and others, setting forth such matters, and making such parties, and praying such relief as he may be advised, together with a bond as thereinafter provided; and in the mean time all proceedings in that action were stayed. And it was further provided, that if such action should be commenced, then that all proceedings therein should also be stayed until the final judgment in this action, provided a bond was given to Mr. Lowber, in the sum of $5,000, conditioned to pay him all damages which he might sustain by reason of the commencement of this action. It appears from the papers before me that the time limited for the commencement of the suits, by the order of the General Term, expired on the 30th day of January last. That the complaint in this cause was

filed in the Clerk's office, on the 29th day of January last, together with the bonds or undertaking required by said order. That on the same day the summons and complaint were served on the Mayor of the city, but that ineffectual attempts were made to serve the same on that day and the succeeding, on the defendant, Lowber. I cannot doubt that the order of the General Term, requiring an original complaint to be filed and served within thirty days, has been complied with, and that, that condition having been fulfilled, the order of the General Term, which directed the answer and all subsequent proceedings, in the case of Lowber against the Mayor, &c., including the judgment, to be set aside and vacated, took effect according to its terms, and the same were accordingly set aside and vacated. It cannot be said that that order has not been complied with, because the people have been made parties plaintiffs with the tax-payer and corporator. Permission was expressly given by the General Term to the tax-payer and corporator, of making such parties in the suit to be instituted as he might be advised. It was, therefore, perfectly proper for him to make the people parties to the action; and if they, by their proper officer, consented to be made parties plaintiffs, rather than defendants, there can be no objection to such a procedure.

It was further urged that the order of the General Term required a bond to be executed on the commencement of the suits, and that that provision of the order has not been complied with, by the execution of an undertaking. The court manifestly intended to require security to the party stayed in the suit pending against the Corporation, and whether it is called a bond or an undertaking is a matter of no moment. It is the substance we are to look at. Has Mr. Lowber received the security contemplated by the order of the General Term? Undeniably he has, and whether it is in the form of a bond, as used under the old system of practice, or that of an undertaking, known and exclusively used under the new, is not a just cause of objection. He has the security required by the order, and which will be effective for him in case the contingency arises in which he can use it. All the conditions required by the order of the General Term having, in my judgment, been complied with, is the order of Justice Ingraham, made on the 30th of January, correct?

If I am right in the view I have expressed, it was not necessary, as the order of the General Term stayed all proceedings in the suit therein referred to, and as soon as this suit was commenced there was no longer any judgment or execution to be stayed. The argument, therefore, that such order was irregular, because a bond in accordance with the provision of the Revised Statutes, was not given, has no force. This court, by virtue of the control and authority which it has over its own proceedings and records, has set aside and vacated the judgment mentioned in the complaint in this cause, whether rightfully or not, is not for me to say. Such, I understand to be the order of the General Term, and as long as it remains unreversed it is binding upon this court. The injunction order, therefore, should, in my judgment, have been to restrain any further proceedings in the suit instituted by Mr. Lowber, against the Corporation, until the final determination of this suit, and the injunction order will be modified accordingly. The complaint presented good grounds for such an order, being in furtherance of that made at the General Term, and the undertaking executed and filed was all the security required by the Code. The motion to vacate the injunction order in this case, made January 30, 1858, is denied, but the same is to be modified according to the suggestions above.

STATEMENT No. 21.

AWARD FOR LAND ON WARD'S ISLAND.

We, the undersigned arbitrators, having been duly appointed, to ascertain, award and determine as to the value of certain property, consisting of lands and water-rights, claimed to be owned by Alexander McCotter, situate on Ward's, (formerly Great Barn) Island, and offered for sale by said McCotter, to the city of New York, pursuant to a resolution of the Board of Councilmen, passed on the twenty-second (22d) day of October, one thousand eight hundred and fifty-seven (1857); and by the Board of Aldermen of said city, on the thirty-first (31st) day of December, one thousand eight hundred and fifty-seven (1857,) and approved by the Mayor of the said city, on the said thirty-first (31st) day of December, one thousand eight hundred and fifty-seven (1857); S. Benson McGown having been appointed such arbi-

trator on the part of Alexander McCotter, and C. P. Schermerhorn. on the part of the said city, pursuant to the said resolution so passed and approved as aforesaid.

Now, therefore, we the said arbitrators, having had submitted to us, for our consideration and award, the value of said lands and water-rights of said McCotter, so offered for sale to said city, and having examined and inspected the same, and having heard the proofs and allegations concerning the said value, and having duly considered the same, and mature deliberation being thereupon had, do find, award, adjudge and determine the value of the upland owned, or claimed to be owned, by the said McCotter, or to which he may furnish a good and valid title, and situate on said island, consisting of thirty-one (31) acres, one (1) rood, thirty (30) perches, be the same more or less, to be of the value, and to be worth the sum of twenty-five hundred ($2,500) dollars per acre.

And we, the said arbitrators further find, award, adjudge and determine the value of the water-rights, and land owned, or claimed to be owned by said McCotter, or to which he may furnish a good and valid title, situate on said island aforesaid, and lying between high water mark and the bulkhead line, as established by the Harbor Commissioners, the same consisting of forty-eight (48) acres, three (3) roods, sixteen and one quarter (16¼) perches, be the same more or less, to be of the value, and to be worth the sum of one thousand ($1,000) dollars per acre; said lands and water-rights of the said McCotter, so awarded, adjudged and valued as aforesaid, being numbered, described and designated upon a certain map of said island, prepared by Kurth & Rosa, Civil Engineers and Surveyors, which said map accompanies this report, and forms a part thereof.

In witness whereof, we have hereunto subscribed these presents, this thirteenth day of February, one thousand eight hundred and fifty-eight.

S. B. McGOWN,
C. P. SCHERMERHORN.

In presence of
JOHN H. COLGATE.

STATEMENT No. 22.

This statement shows the results of the investigations made in the Finance Department by A. S. Cady and R. A. Storrs, under the direction of the Comptroller, between the 26th of December, 1857, and the 30th of April, 1858.

These examinations relate principally to the books and vouchers connected with assessment contracts, which have for the last two years been kept by J. B. Smith.

Soon after the examination was commenced, a fraud was discovered in one of the confirmed assessments, by the addition of $10,000 to the transcript on the ledger, purporting to be a true copy from the original assessment roll. This induced a comparison of all the transcripts on the ledger with the assessment rolls confirmed by the Common Council during the year. The whole number of assessment rolls confirmed in 1857, was 144: on comparing these as transcribed on the ledger, with the original record of assessments confirmed, as kept by the assessors, the transcripts on the ledger kept in the Finance Department were found correct, with the single exception before referred to. The entries of payments to contractors on the ledger were found to correspond with the amounts confirmed, except in the one case before alluded to. The payments to surveyors and assessors, were also found to correspond with the confirmed rolls. In six cases the inspectors appear to have been paid an amount exceeding the sums put in the assessment rolls, equal to a total of $1,235 91. The Collectors of Assessments have not presented their accounts, or drawn their fees for the year. The total amount of assessments confirmed in the year 1857, is $559,212 50.

The transactions connected with the monthly payments of seventy per cent. on assessment contracts, under the ordinance of December 30th, 1854, present many cases of irregularity and fraud.

In order to ascertain the condition of the accounts connected with the works in progress, on which payments were made monthly, it was deemed necessary, in many cases, to have the wholework re-measured

by a competent surveyor, to test the accuracy of the monthly measurements of the surveyors, on which the seventy per cent. payments were based; in making these re-surveys, the Comptroller engaged the services of Daniel Ewen and John J. Serrell. The surveyor in charge of work of this decription possesses advantages in making measurements which the surveyor who follows him after the work is done, does not possess; an exact correspondence therefore in measurements made under circumstances so dissimilar, is not to be expected. In the measurements of Vidall and Dryer, when compared with those made by Ewen and Serrell, the disparity is so great on the works of which the former have had charge, as to be wholly irreconcilable with the belief that they were honestly made; this is most conclusively shown by a comparison of the two surveys on Fifty-second and Fifty-seventh streets, from the Third to the Fifth avenue, and on Fifty-fifth street, from the Third avenue to the East river.

Regulating Fifty-second street, Fourth avenue to East river.

On the 29th of October, 1856, a contract was made by Joseph S. Taylor, then Street Commissioner, with Charles Devlin, to regulate Fifty-second street, from Fourth avenue to East river.

The total amount of work on this street, covered by five certificates of Mr. Vidall, the surveyor on the job, and the Street Commissioner or his deputy, amounted to $22,790 00.

The whole sum paid on the five requisitions on this job, amounted to $18,617 00.

The last payment made on this job was September 11th, 1857.

In the month of October, the Comptroller requested Daniel Ewen to make an examination of the work done, and to report in writing, which was done October 24th, 1857. It appears by the report of Mr. Ewen, that the amount of work done up to the time of his examination, would entitle Mr. Devlin to the payment of $14,365 60. The preceding comparison does not include a certificate of the surveyor on the work, dated November 28th, 1857, which amounted to $10,631 12. It is worthy of particular notice in this case, that on the certificates

of the Surveyor and Street Commissioner or his deputy, the payments of seventy per cent. already made, exceed the whole amount of work done, as estimated by Mr. Ewen, (not including, however, the last certificate of Mr. Vidal, the surveyor on the job.)

Regulating Fifty-seventh street, Third to Fifth avenue.

On the 27th day of July, 1854, a contract was made by James Furey, then Street Commissioner, with John Quinn, to regulate Fifty-seventh street, from Third to Fifth avenue. The contract appears to have been assigned to the Bowery Bank, and the work done by Charles Devlin, by an arrangement with the bank.

The total amount of work on this job covered by eight certificates of P. H. Dryer, the surveyor on the job, and the Street Commissioner or his deputy, was $76,406 45.

Seventy per cent. of the above sum is equal to $53,484 53.

The sum paid on this job, if we include the sum of $8,100, paid September 10th, 1857, and $11,200 included in a payment of October 17th, 1857, neither of which sums were posted to Fifty-seventh street by Mr. Smith, is equal to a total of $55,270 79.

In a report made to the Board of Councilmen, December 31st, 1857, in regard to Fifty-seventh street, it was stated that the payments made on this street amounted to $35,970 79; these items were put into the report, as they were given to the Comptroller by J. B. Smith. In the recent examination, it satisfactorily appears that the sums of $8,100 and $11,200, above referred to, must have been based on the work done on Fifty-seventh street, as shown by the certificates of the Surveyor and Street Commissioner.

In confirmation of this, it is found that on the 19th of August, a certificate was presented on behalf of the Bowery Bank, with a certificate of the Surveyor and of Charles Turner, Deputy Street Commissioner, amounting to $8,160.

On these papers, the Bowery Bank was paid, August 28th, an amount equal to seventy per cent., $5,712.

Which was receipted by Enoch Dean, President of the Bank. On the presentation of this claim, the Comptroller directed Daniel Ewen to re-survey the whole work, and to report the quantities, with a view of testing the accuracy of the certificate of Mr. Dryer, the Surveyor, and Mr. Turner.

The parties interested in the payments of this job, doubtless apprehending that the report of Mr. Ewen would curtail the payments on Mr. Dryer's measurements, presented a claim under cover of the Bowery Bank, and obtained payment for the exact amount of the previous requisition of August 19th; for this payment, covering the full amount of the previous requisition, no receipt was taken, nor was it charged to Fifty-seventh street on the day book, or posted to any account on the ledger, and the combined parties were thus enabled, through the infidelity of the clerk in whom the Comptroller confided, to obtain for the Bowery Bank, on the 10th of September, a bond for $8,100.

On the 17th of October, 1857, bonds were issued to the Bowery Bank for.....	$23,900 00
The charges on the books kept by Mr. Smith, were for a sewer.....	12,700 00
This leaves the sum of.....	$11,200 00

which appears to be charged to no particular job.

All these bonds were receipted for by John Branigan, for the Bowery Bank, under an order of Enoch Dean, the President, October 19th. On making inquiry of the Receiver of the Bank, it has been ascertained that all these bonds except $8,000, were delivered to Charles Devlin, and in confirmation of this statement, we have the fact that two of these bonds, one for $1,900, and the other for $1,000, have been presented at the Comptrollor's office to be transferred, by the person who leased or sold to Joseph S. Taylor, the house and lots where he resided, and which house and lots are now in the possession of Charles Devlin; and the person who presented the bonds, stated that he received them

of Charles Devlin, on account of the sums due to him by the arrangements made with Joseph S. Taylor for the said premises. Both of these bonds show that they were transferred to Charles Devlin by Enoch Dean, President of the Bowery Bank, on the very day they were issued.

Mr. Ewen's report of November 18th, 1857, embracing the eight certificates of the Surveyor and Street Commissioner, or his deputy, shows an amount of work done equal to $51,875 00. This does not include a certificate of the surveyor on the job, December 8th, 1857, covering work to the amount of $8,820.

The estimate of Mr. Ewen, it is to be understood, embraces 160,000 cubic feet of wall, equal to 6,000 cubic yards, which wall was not embraced in the original contract.

The measurement of quantities embraced in the contract as given by the Surveyor on the job, and Mr. Ewen, are as follows:

	Earth Filling.	Rock Excavation.
P. H. Dryer.....	137,040 cubic yards.	12,247 cubic yards.
D. Ewen.....	78,000 "	3,500 "
	59,040	8,747
The excess of earth filling, is.....		59.040 "
" rock excavation.....		8,747 "

Regulating and Grading Fifty-fifth street, Third to Fifth and Seventh to Eighth avenue.

On the 21st day of November, 1855, bids were opened by James Furey, then Street Commissioner, to regulate and grade Fifty-fifth street, from Third to Fifth avenue and from Seventh to Eighth avenue.

The contract was made by Joseph S. Taylor, then Street Commissioner, May 5th, 1856, with Oscar Taylor. The specifications, compared with the estimates of Messrs. Ewen & Serrell, who were employed to examine the work, are as follows:

	Earth Filling.	Rock Exc.	Culverts.
Specification.....	62,400 cubic yards.	8,900 cubic yards.	110 feet.
Ewen & Serrell...	44,480 "	6,813 "	330 "
	17,920	2,087	

The report of Messrs. Ewen & Serrell shows, that Mr. Vidal, in seven certificates, the last one being April 28th, 1857, accompanied in each case by a requisition of Joseph S. Taylor, or his deputy, Charles Turner, certified to 25,979 cubic yards of earth filling; to 3,974 cubic yards of rock, and 135 feet of culvert, more than had been done.

On the requisitions of the Street Commissioners, advances were made to the amount of $15,450 74.

The estimate of work done, as reported by Messrs. Ewen & Serrell, amounted to $17,897 35. This includes 681 feet of culvert, at $20 per foot.

The specification on which the bids were computed, called for only 110 feet of culvert, which was increased, by the order of the Street Commissioner, and the culvert already paid for, exceeds, by 351 feet, the quantity considered necessary by Messrs. Ewen & Serrell.

A full statement of this case was reported by the Comptroller, to the Board of Aldermen, June 29, 1857.

Regulating Fifty-seventh street, Ninth to Eleventh avenue—Curb, Gutter and Flagging Fifty-seventh street, Eighth to Eleventh avenue.

On the 3d of December, 1856, a contract was made by Joseph S. Taylor, then Street Commissioner, with Oscar Taylor, to regulate, curb, gutter and flag Fifty-seventh street, Eighth to Eleventh avenue; by him assigned to Charles Devlin, and by him assigned to Christopher C. Ellis, who assigned the same to the Bowery Bank. Soon after the Bowery Bank went into the hands of John A. Stewart, as Receiver, application was made for a payment on this contract; before making this payment, the Comptroller had the work examined by Daniel Ewen, who reported, that the measurements of John T. Dodge, the Surveyor on the job, in three certificates made by him, were not materially different from the measurements made by himself.

The total amount of work done, as shown by Mr. Dodge, was equal to.....	$15,972 00
Less thirty per cent.....	4,791 60
	$11,180 40

On the 4th of December, 1857, a payment was made to Mr. Stewart of $7,000, in assessment bonds, leaving, as was supposed, at that time, the sum of $4,180 of the seventy per cent., or $8,972 of the whole amount of work done.

After this payment was made to Mr. Stewart, it was discovered that the sum of $3,993 66 had been paid to Mr. Ellis, October 9th, 1857. In this case, Mr. Ellis received bonds to the amount of $3,300, which, as he says, were intended as an advance on his contract on Fifty-seventh street. No receipt was taken from him at the time, and Mr. Smith, instead of charging the bonds to the contract on Fifty-seventh street, made the following entry on his book, viz:

C. C. Ellis, Seventy-eighth street, Third and Fifth avenues, regulating:

Bond.....	$3,300 00
Check.....	693 66
	$3,993 66

The charge in this form would not be posted to the contract of Mr. Ellis, on Fifty-seventh street; and when Mr. Ellis and the Receiver of the Bowery Bank came to the Comptroller's office to make a settlement under the assignment, the books appeared as if nothing had been paid on this job. On the computation made up from the surveyor's return, the Comptroller decided to pay only $7,000, which was fifty per cent. on the whole amount of work done; and thus the account stood, until the examination showed the issue of bonds to Mr. Ellis, on Seventy-eighth street, where he had been fully paid. Mr. Ellis was then called on, and he has given a receipt for the bonds on Fifty-seventh street; and he says Mr. Smith did wrong in charging the bonds to the job on Seventy-eighth street.

At the same date of the bonds, a check was given to Mr. Ellis, for $693 66: It has his endorsement on the back, and yet he declares that the avails were not received by him; but, as he does not explain who had the money, he will be required to pay the amount of the check in the settlement of his account on Fifty-seventh street, which is sufficient to cover that amount, after paying the sum due on the assignment.

This case most strikingly illustrates the object which Smith and his associates had, in charging to fictitious or paid up jobs, checks and bonds, which had been issued on jobs actually in progress. Thus, if this $3,993 66, payable on Fifty-seventh street, and charged to Seventy-eighth street, had not been discovered, the account of Mr. Ellis with the Bowery Bank would have been paid, with a loss to the city, and a gain to the recipients of the bonds and check of $3,993 66.

In the case of Terrence Farley, an examination has been made of four contracts, viz:

Regulating Fifth avenue, Forty-ninth to Sixty-first street.
Regulating Sixth avenue, Fifty-fourth to Fifty-ninth street.
Regulating Fifty-fifth street, Sixth and Seventh avenues.
Regulating Fifty-sixth street, Fourth and Fifth avenues.

On the Sixth avenue, a payment was made, October 20, 1857, of $3,877 03, when Farley was only entitled to $1,077 03, being an overpayment of $2,800. On being called on, Mr. Farley proposed to settle the same, when the final certificate of the Surveyor was made. Within a few days the certificate has been furnished.

The total amount of work covered by the final certificate of the Surveyor, is	$16,586 25
The total amount paid	16,577 28

By these operations, it will be seen that the contractor, instead of leaving in the hands of the Corporation a reserve of thirty per cent., has realized, at the time, within about nine dollars of the whole amount of work done, when the interest chargeable to the time on the confirmation of the assessment will amount to several hundred dollars.*

* On a re-survey of all the work done by Mr. Farley, on the Sixth avenue, by Daniel Ewen, he makes the total amount of the work done, equal to $17,367 65

The final estimate of Mr. Graves, the Surveyor on the work, gives a total amount of	16,586 25
Excess, as shown by Mr. Ewen's survey	$781 40

On Fifty-sixth street, one payment was made October 16th, 1857, of $8,438 77, being the total amount of the certificate furnished, when Mr. Farley would have been entitled to only seventy per cent., equal to $5,938 77, and a receipt was given for the seventy per cent., but, on being called on, he has receipted for the total payment. This work is still going on.*

This secures the city for the payment of $8,438 77, on the 16th of October last, and leaves a balance in favor of the contractor of $4,040 08.

A payment was made, October 2d, 1857, of $3,196 10, to Mr. Farley, on Fifty-fifth street. This included $2,077 30, charged for regulating the intersections of different streets not included in his contract, but which was done, as the contractor alleges, by the direction of Joseph S. Taylor, and afterwards by Mr. Devlin. Mr. Farley was, therefore, called on by the Comptroller, to receipt, on the contract for the amount thus paid to him on these intersections; this he has done. This makes the whole payment on Fifty-fifth street $5,348 39; whereas, the certificates of D. Ewen, for the whole amount of work done, is only $4,200, showing an overpayment on this work of $1,148 39.†

---

* Since the preceding statement was prepared, Mr. Ewen has surveyed the whole amount of work done on Fifty-sixth street, and the following is the result of his estimate, viz:

10,830 yards of rock excavation, at $1	$10,830 00
3,665 yards of earth excavation, at one cent	36 65
2,320 feet of curb and gutter, at 35 cents	812 00
9,840 feet of flagging, at eight cents	787 20
1,300 yards of gravel, at one cent	13 00
	$12,478 85

† Mr. Ewen has since measured up the work on Fifty-fifth street, and the following is the result of his estimate:

Ten thousand yards of rock, at 99 cents	$9,900 00
Two thousand yards of earth, at 49 cents	980 00
Total amount for work done	$10,880 00

On the contract with Mr. Farley, for regulating Fifth avenue, from Forty-ninth to Sixty-first street, it appears by the certificate of the surveyor on the work, that there is a balance due Mr. Farley, after deducting the payments made, of $8,711 51. It thus appears, that on the four contracts referred to, notwithstanding the irregular payments on some of them, an adjustment can be made on Mr. Farley's jobs, by the amount of work already done.

I have called on the Receiver, John A. Stewart, Esq., for a list of the notes discounted by the Bowery Bank, for James B. Smith, with the amounts, the name of the endorser, and for whom the notes were discounted; the list is as follows, viz:

Maker.	Discounted for.	When Discounted.	Amount.
J. B. Smith,	Charles Devlin,	January 15, 1856.....	$300 00
Do.	do.	do. 18, "	75, 00
Do.	do.	August 22, "	500 00
Do.	do.	do. 22, "	600 00
Do.	do.	Nov. 11, "	600 00
Do.	do.	May 22, 1857.....	500 00
Do.	do.	June 16, "	4,258 00
Do.	do.	do. 23, "	4,307 67
Do.	do.	July 14, "	2,000 00
Do.	do.	August 12, "	5,000 00
Do.	do.	Sept. 1, "	5,000 00
H. Quackenboss &	J. B. Smith,	Chas. Devlin, May 22, '57.	200 00
C. Westcott, &	do.	do. " 22, "	419 50
			$23,760 17
H. Quackenboss,	J. B. Smith,	January 23, 1857...	250 00
Do.	do.	" 30, " ...	250 00
C. Westcott,	do.	July 31, " ...	670 00
			$24,930 17

It will be seen by referring to the preceding statement that the endorsements of Mr. Devlin commenced about the time that J. B.

Smith took charge of the books connected with the payment of assessment contracts. The transactions were limited to a few hundred dollars at a time, until the 16th of June, 1857, when the amount rose to $4,258, and from that date to the 1st of September, a period of seventy-six days, Smith's notes, endorsed by Devlin, were discounted at the Bowery Bank to the amount of $20,000, and of the large sum $24,930 17, discounted on Smith's notes in two years, the sum of $23,760 17 was done for Devlin, leaving a balance of $1,170 for Smith.

The following amounts in checks or bonds have been paid on claims of the Bowery Bank, under pretence of contracts assigned to that bank, and which, in some cases, are charged on the books kept by J. B. Smith, to jobs over which the Bowery Bank never had any control, or to jobs that had previously been paid in full, viz:

August 29, 1857—Bowery Bank, assignee of P. Masterson, check No. 944, $820 76, for regulating Fifty-sixth street, Fifth avenue and Broadway, endorsed by Enoch Dean, President.

October 9—Bowery Bank, assignee, check No. 1046....	$2,209 00
Bond.....	4,800 00
For balance reg. Forty-second st., Tenth av. to Hudson R..	$7,009 00

The whole amount is receipted for by John Branigan, and the check is endorsed by Enoch Dean, President, and Charles Devlin.

This precise sum, as the balance on the contract, was paid to the Mechanics' and Traders' Bank, February, 1857, on the same job, and it is not known that the Bowery Bank had any connection with that contract.

October 8, 1857—Bowery Bank, assignee, check No. 1055,	$354 30
Bond.....	2,400 00
For balance Thirty-eighth st. sewer, Second and Third avs..	$2,754 30

This check is endorsed by Enoch Dean, President, and Charles Devlin.

October 19, 1857—Bowery Bank, check No. 1060, $2,146 65, for amount collected, Fortieth street sewer. This check is endorsed by Enoch Dean, President.

October 19—Bowery Bank, check No. 1072, $1,756 71, for amount collected on Forty-eighth street paving. This check is endorsed by Enoch Dean, President. This contract had been assigned to the Bowery Bank by Hugh McCabe, but was paid in full February 2, 1857.

July 27, 1857—An assessment bond for $2,900, was directed to be made to P. Connolly, and was assigned so that the bond was issued directly to the Bowery Bank, for flagging Fifty-fifth street, First and Third avenue. This Bond was assigned by Enoch Dean, President, to the Manhattan Savings' Institution, August 14, 1857.

The contract for flagging Fifty-fifth street, First and Third avenues, appears to have been assigned by D. Gallagher, and paid in full to the Mechanics' and Traders' Bank, December 31, 1856.

The total payments to the Bowery Bank as shown in the items before named is $17,387 42.

All the preceding payments but one, were in the month of October, the very month the Bowery Bank failed; and several of these transactions were after the appointment of N. G. Bradford as receiver.

It is worthy of remark, also, that as soon as the affairs of the Bank went into the hands of Mr. Stewart, a petition was presented to the Supreme Court by Mr. Fitzpatrick, the general assignee of all the contracts of Charles Devlin, claiming that the contracts in the hands of the Bowery Bank, should be re-assigned; and an order for such reassignment was made about the 20th November, 1857.

It is thus seen that the preceding payments to the Bowery Bank, apparently based on assignments in its hands, so far as they were connected with contracts in which Fitzpatrick or Devlin had an interest, were placed beyond the reach of the receiver of the bank.

February 25, 1857—A check, No. 129, for $3,742 86, payable to Henry Bigelow, assignee, for paving, curb and guttering, &c., Thirty-sixth street, Eighth and Ninth avenues, is endorsed by "Charles Devlin, assignee."

We do not find that any contract, as described in the check, has been performed since 1852.*

On the 2d of February, 1857, payments appear to have been made as follows:

To Henry V. Archer, for regulating Thirty-seventh street, Ninth to Tenth avenues, on account	$786 43
Do. balance	532 18
	$1,318 61

The above payments were charged upon the check book, and were checked as having been passed to the appropriate job, but no such assessment or work is found to correspond with the page of the ledger, or the work to which the payment can be made to apply.

Both these checks bear an endorsement of H. V. Archer, and by the entry of the bank where they were deposited, appear to have been passed to the credit of J. B. Smith.

The above items, amounting to $22,448 89, do not include two bonds of $5,000 each, and a check for $5,790 91, which are now under investigation before the Recorder.

In this aggregate of $22,448 89, it will be seen that the sum of $17,000 was paid to the Bowery Bank; but instead of being charged on the books kept by Smith, to any of the numerous contracts in pro-

* NOTE.—There was an entry on the back of this check, in the hand-writing of Smith, and signed by the Comptroller, as follows: "This may be paid to the order of Charles Devlin, assignee." When this check was found, it was supposed that an assignment had been made to Devlin by a responsible person by the name of Bigelow, who supplies contractors with large quantities of flagging. This person, however, has been consulted since this report was prepared, and states that no such assignment was made by him.

gress, for which the bank had assignments, they were charged in some cases to jobs over which the bank never had any control, in others, to jobs which had been assigned to the bank, but which had been paid in full, and in others, to jobs which do not appear to have any existence.

On the two contracts assigned by Charles Devlin to the Bowery Bank, more than $20,000 have been paid for retaining wall, which it is believed was not included in the original contract, although it now appears in the record book of contracts in the Street Department. The Comptroller addressed a note to Mr. Devlin, asking him to furnish a copy of the agreement for the construction of the wall, but to this request no reply has been received.

The preceding statement is limited to the payments on account of assessment contracts for the year 1857. Similar examinations for the years 1856 and 1855, and a general examination, going back to the commencement of year 1854, have since been completed.

The examination for the year 1856, shows that the assessment contracts confirmed by the Common Council in that year numbered two hundred and eight, amounting to the total sum of $514,845 55.

The transcripts made from the confirmed assessments upon the ledger kept by J. B. Smith have been compared with the record kept by the assessors, and are found in every instance to correspond with that record.

The payments on these confirmed contracts, so far as the contractors, assessors and surveyors are concerned, correspond with the sums in the assessment rolls.

The total amount paid inspectors in 1856, is..... ...	$21,834 50
Whilst the sum included in the assessment rolls confirmed in the same year, for the pay of inspectors, is only..	9,357 28
Showing that the sum paid from the treasury, on account of inspectors, beyond the amount that will be reimbursed, if all the assessments are collected, is.....	$12,477 22

In the semi-annual report from this department, September 21, 1854 (Document 54, of Councilmen), the Comptroller stated the amount paid to inspectors, for the Street Department, at $30,105 50 for the preceding twelve months, and added that the employment of inspectors in the Street Department was of no practical benefit to the property holders or the city.

On the 24th of October, 1855, the Common Council passed a resolution to discontinue the employment of inspectors in all contracts for regulating and grading streets, setting curb and gutter stones, flagging sidewalks, filling sunken lots, fencing vacant lots, and digging wells.

On the 28th of April, 1856, a resolution was adopted by the Common Council, rescinding the repealing resolution before referred to, and authorizing the appointment of inspectors in the Street Department.

On the 28th of May—one month after the approval of the resolution by the Mayor—the bills of inspectors paid were eighty-six in number, amounting to $2,417 25. On the 23d of July, another requisition, covering the pay of one hundred and twenty-seven inspectors, and amounting to $2,921 50, was paid. The drafts on the treasury were so excessive from the multiplication of inspectors, that the Comptroller determined he would not pay the inspectors on jobs of $10,000 and under until the work was completed, and the assessment confirmed, and then that the amount to be paid to the inspector should be limited to the sum put in the assessment roll. This practice was adhered to in 1857, and probably accounts for the small difference between the amount paid and the amount in the assessment rolls of that year on account of inspectors.

The following cases of fraudulent payments are found in 1856:

Feb. 6th, 1856—C. Devlin, assignee; check No. 154; for paving Forty-seventh street, Third avenue to East river..... $5,113 59

This was a second payment for the same work. The assessment

was confirmed December 2, 1855, and paid to the Bowery Bank, as assignee of P. Connolly, December 24, 1855.

Dec. 10*th*—E. L. Beebe, assignee; check No. 2870; flagging Thirty-fifth street, between First and Second avenues. $1,166 02

This payment cannot be located, and no such work is found.

Dec. 10*th*—J. B. Floyd; check No. 2885; regulating and paving Eleventh avenue..... $2,471 36

This payment cannot be located.

Dec. 24*th*—A. K. Williamson, assignee; check No. 2912.. $1,258 68

Which appears to be a second payment for grading Eleventh street, Dry Dock street to East river.

This check bears also the endorsement of J. L. Miller. The original assessment was confirmed August 15, 1856, and paid to E. McGuire, the contractor, August 20th of the same year.

The examinations for 1855, show the assessments confirmed by the Common Council in that year to be two hundred and sixteen, amounting to the total sum of $755,849 86.

The transcripts made from the confirmed assessments upon the ledger in the Finance Department, compared with the records kept by the assessors, are found to correspond. The payments on these contracts, so far as the contractors, surveyors and assessors are concerned, correspond with the sums in the assessment lists.

The following fraudulent payments are found in 1855:

Curb, gutter, and flagging Eighty-second street, Second and Third avenues.

On the 3d of February, 1855, James Furey, then Street Commissioner, made a requisition on the Finance Department, as follows:

" Curb, gutter, and flagging Eighty-second street, from the Second to Fourth avenue.

"This is to certify, that the contract for the above work was awarded to Bernard McCabe, and that the same has been completed to the satisfaction of this department; and that there is now due on account thereof to the said Bernard McCabe, or to his assigns, the sum of three thousand three hundred and fifty-seven dollars and fifty-nine cents $3,357 59
Less 15 per cent..... 503 37

$2,854 22

And is payable to the Bull's Head Bank."

This payment was made under an ordinance passed October 13th 1852, for the payment of 85 per cent. on the contract, when the work was completed, by check No. 387, for $2,854 22, which was delivered to President Williamson, by N. A. Beach, as appears by the Auditor's book, and is endorsed by C. S. Vanderhoff, Cashier of the Bull's Head Bank. It does not appear that the reserve of 15 per cent. was paid on the confirmation of the assessment, but on the 2d of April, 1855, only two days after the confirmation, the Street Commissioner, James Furey, certified to the Finance department, as follows:

" Contract to curb and gutter and flag Eighty-second street, Second to Fourth avenue.

" This is to certify that the contract for the above work was awarded to B. McCabe, and that the same has been completed to the satisfaction of this department, and that there is now due on account thereof to the said B. McCabe, or his assigns, the sum of three thousand three hundred and fifty-seven dollars and fifty-nine cents, ($3,357 59)" which sum was paid April 2d, 1855, by check No. 797, for $3,357 59, being the whole amount of the contract.

This check was delivered, as appears by the Auditor's book, to President Williamson, but is endorsed by Bernard McCabe, to whose order it was made payable, and to whom the Street Commissioner certified the same to be due; both these requisitions before given, are filled up in the handwriting of Charles Turner, who had particular charge of all payments on contracts, and of keeping the accounts of payments made on them.

The over-payment in this case is 85 per cent. on the whole amount of the contract, equal to $2,854 22, and all done in a period of fifty-six days.

Regulating Fifty-fifth street, Fifth and Sixth avenues—P. MASTERSON, *contractor.*

On the 27th October, 1854, the assessment for regulating Fifty-fifth street, Fifth to Sixth avenues was confirmed by the Common Council. The contract amounted to the sum of $4,964 82. On the 28th of October, a requisition was made on the Finance Department, for the full payment of the contract, and is signed by Charles Turner, Deputy Street Commissioner; payment was made on this requisition October 30th, 1854, by check No. 3,253, $4,964 82, to the order of P. Masterson and M. Tracy, executors, and is endorsed by them as executors. On the 22d of December, 1854, a requisition was made out in the hand-writing of Charles Turner, and signed by James Furey, then Street Commissioner, and a list made up in the hand-writing of Mr. Mathews for a payment on the contract with Masterson to regulate Fifty-fifth street, Fifth and Sixth avenues, of $1,700.

On the 26th December, a check was drawn in the hand writing of Mr. Beach, No. 3,614, for $1,700, to the Bowery Bank, assignee, which was delivered to Charles Turner, (as appears by the Auditor's book,) by the Assistant Auditor, Mr. Beach, and is endorsed by M. G. Bradford, Cashier.

On the 3[illegible]th of April, 1855, a payment was made to P. Masterson, by check No. 1,095, for $3,264 82, upon a requisition from the Street Commissioner, as follows:

"Requisition for pay, of May 2d, 1855 Trust Account—Regulating and Paving Streets, &c.—Contractor, P. Masterson, per Bowery Bank; Regulating Fifty fifth street, Fifth and Sixth avenues, $3 264 82."

This requisition appears to be in the hand-writing of W. H. Mathews, the clerk of Mr. Turner. On the back of this check a memorandum was made, in the hand-writing of Charles Turner, as a voucher to the Comptroller that he held an assignment of this contract to the Bowery

Bank, and this memorandum of Mr. Turner is signed, "A. C. Flagg," which check was then delivered to Enoch Dean, President of the Bowery Bank, who receipted for the same; and the check is endorsed by N. G. Bradford, Cashier.

The two checks of December 22, 1854	$1,700 00
And April 30th 1855	3,264 82
	$4,964 82

Made the exact amount which had been paid on the 30th October, 1854, upon the requisition signed by Charles Turner, Deputy Street Commissioner. The over-payment in this case is for the whole amount of the contract, equal to $4,964 82.

Contract for regulating and grading Forty-fifth street, Second avenue to East river.

On the 28th October, 1854, a requisition was signed by James Furey, Street Commissioner, for the sum of $19,406 39, which embraced, as shown by list annexed thereto, the sum of $11,117 02 on a contract of Edward Dennis, confirmed September 12th, 1853, for regulating Forty-fifth street, from the Second avenue to the East river.

A warrant was drawn on the treasury, (No. 3,170,) payable to the order of Edward Dennis, for the sum of $11,117 02; this warrant was delivered to Enoch Dean, President of the Bowery Bank, as shown by an entry in the Auditor's book, in the hand-writing of Mr. Timpson. The following memorandum was made by Mr. Turner, on the back of this check, and signed by himself and the Comptroller, viz:

"The within amount is payable to the Bowery Bank, assignee of Edward Dennis. This assignment is on file in the Street Department. Charles Turner, Deputy Street Commissioner; A. C. Flagg, Comptroller."

On the 15th of February, 1855, a requisition was signed by James Furey, Street Commissioner, for the sum of $12,269 02. It is shown by the list accompanying this requisition that it embraces a second payment to the Bowery Bank, for the same sum, which was paid on a requisition of the 28th October, and a warrant, the 30th of October

1854, for regulating Forty-fifth street, from the Second avenue to the East river. The entry on the list is as follows:

"Edward Dennis, per Bowery Bank—regulating Forty fifth street, Second avenue to East river, $11,117 02."

On this second requisition a warrant was drawn, (No. 422,) dated February 19, 1855, for the exact sum, $11,117 02, previously paid to the Bowery Bank, as assignee of Edward Dennis. This warrant as appears by the Auditor's book in the handwriting of the Assistant Auditor, Mr. Beach, was delivered to Enoch Dean, President; and it also appears by the book kept by Mr. Turner, in the Street Department, that the check was paid to Enoch Dean, in that department. This check also was endorsed by N. G. Bradford, Cashier of the Bowery Bank.

This shows a double payment on the same job of $11,117 02. Both requisitions were made out in the form used for drawing on the appropriation for "Streets Paving," previous to the adoption of the 70 per cent. ordinance.

Note. The Comptroller has had an interview with Edward Dennis, who finished the contract and in whose name it was confirmed, in September 1853. It appears however that the original contract was made with Lynch & Hagan March 21st, 1850 but the first payments were made to Dennis directly, or through the Bowery Bank, to wit:

January 21, 1854	Dennis	$[illegible]
March [illegible]	Bowery Bank	[illegible]
[illegible]	"	11,117 02
		$14,117 02

Mr. Dennis states that the whole amount received by him from the Bowery Bank, or from the city, was the above sum, being the amount as confirmed in the assessment roll. The second payment seems to have been obtained by the President of the Bowery Bank, as a double payment, to the amount of $11,117 02, on the original assignment of Mr. Dennis, which had once been paid in full and the money went to the Bowery Bank, as shown by the endorsement of the check by the cashier.

Under date of January 31, 1855, an entry is made in the Auditor's book for check issued for $778 19 to the Bowery Bank, for interest due on contractors on this contract. This check is entered on the book of checks paid by the treasury bank, as returned under date of March 1st, 1855, but the check is not found in the Auditor's Bureau.

The 159th section of the ordinance of 1849, under which the preceding requisitions were drawn, both of which were signed by James Furey, provides as follows, viz:

"All moneys payable by the Corporation, for the performance of the contracts mentioned in the last section, or for work done under any Bureau in the Street Department, shall be paid by the warrant of the Comptroller, drawn upon the requisition of the Street Commissioner, against the appropriation applicable thereto; and all such contracts and the accounts, vouchers and certificates relating thereto, shall be kept and filed in the office of the Street Commissioner."

This ordinance, it will be seen, required all the accounts and vouchers in relation to contracts, to be kept in the Street Department; and the Finance Department was not furnished, even with a copy of the original contract. In February 1854, the Comptroller called the attention of the Common Council to this subject, in Document No. 16, Board of Aldermen, as follows:

"It is necessary to the proper settlement of accounts, that copies of all contracts made by any of the departments, should be filed in this department. When payments on contracts are made by instalments, reserving 10 per cent. as authorized by the second section of the ordinance, which took effect on the 1st January, 1852, (page 16 of ordinances relating to contracts,) it will be necessary to open an account both in the Disbursing Department, and by the Auditor, in the Finance Department; and when the Auditor's Department is fully organized under the new charter, such an account should be opened with every contract of every description."

The ordinance of December 30, 1854, authorizes and requires the Comptroller to pay assessment contracts on being furnished with a copy of the original contract, and a certificate from the head of the department, showing the amount of work done, and the sum due the contractor. It also required the Comptroller to make monthly advances of 70 per cent. on the certificates of the head of the Contracting Department, and to charge the contractor with interest, at the rate of 7 per cent. per annum, on the sums thus advanced, to be adjusted

on the confirmation of the contract, and to be paid from the reserve of 50 per cent.

In executing this ordinance the Comptroller directed a set of books to be kept, for the purpose of opening an account with every assessment contract, and, if these books had been honestly and faithfully kept, they would have protected the city against the frauds which are shown to have existed for many years, and which rapidly increased towards the close of the year 1857.

DOCUMENT No. 11.

BOARD OF ALDERMEN,

MAY 13, 1858.

The following communication from the Comptroller, in relation to settlement of awards in the Bowery Extension, was received, laid on the table, and ordered to be printed.

D. T. VALENTINE, *Clerk.*

FINANCE DEPARTMENT, COMPTROLLER'S OFFICE,
New York, May 13, 1858.

To the Common Council:

The Comptroller respectfully submits to the Common Council an explanation in regard to that portion of the report of the Joint Committee on Accounts, made to the Board of Aldermen May 6th, which relates to the payment of awards on the Bowery Extension. This becomes necessary, in consequence of the manner in which the Committee has mixed up the receipts taken in the Street

Department with the accounts kept in the Finance Department, and also in consequence of a misapprehension by the Committee in regard to the amount of the awards paid to the executors of Mahlon Day, and to Mrs. Juliana Gardiner. The posting of the books in the Finance Department had been neglected by J. B. Smith, but these have been brought up by Mr. Storrs within a few days, and we are now enabled to give a precise and correct statement in regard to the payment of awards on this improvement. In doing this, the exhibit will be confined to the transactions in the Finance Department, and excluding all allusion to the books and receipts in the Street Department, for which the Finance Department cannot properly be held responsible.

The Committee made the following statement in regard to the award to Juliana Gardiner, viz:

"The Commissioners awarded to Juliana Gardiner seven awards, amounting in the aggregate to $62,990.

"The receipt book shows three receipts of Juliana Gardiner for payments of awards in Bowery opening and extension.

One dated October 24, 1856, for	.....	$53,957 00
" " 25, "	.....	9,033 00
" December 13, "	.....	41,999 00
Aggregate of receipts	.....	$104,989 00"

The three receipts above alluded to, it must be remembered, are on the book kept in the Street Department,

and not on the check book, or any other books in the Finance Department.

These awards were settled by A. S. Cady, under the direction of the Comptroller, and paid in the Finance Department. In closing the settlement in the Finance Department, a receipt and release was taken from Mrs. Gardiner for the sum of $62,990, being the exact amount of the principal of the award, which release is acknowledged before a Commissioner of Deeds, and completes the title of the city to the land acquired. A copy of this release is annexed, marked A.

An arrangement was made with Mrs. Gardiner to make advances on the awards, as she required the money for certain improvements, and to allow her interest until it was convenient for the treasury to pay the whole amount of awards. The principal of the award was $62,990.

Payments were made as follows:

October 31st, 1856	$21,000 00
December 10th, 1856	41,990 00
	$62,990 00

Interest was paid on $21,000 to date of payment, October 31, 1856	$207 32
Interest was allowed on $41,990 to date of payment, December 10, 1856	815 36
Amount paid for interest	$1,022 68

This is a simple statement of the condition of the account, as it appears in the Finance Department, with Mrs. Gardiner, and it shows that there was no over-payment.

In regard to the payment of an award to the executors of Mahlon Day, the Committee say—

"The over-payments are on the following awards:

Award No. 78, to unknown owners.....	$9,116 00
" " 79, " "	9,795 00
" " 80, " "	6,355 00
Total of the three awards ordered paid to estate of Mahlon Day.....	$25,266 00

"Paid as follows:

Warrant No. 2004.....	$3,100 00	
" " 2079.....	3,100 00	
" " 2080.....	22,166 00	$28,366 00
Over-payment		$3,100 00

"The over-payment on awards Nos. 78, 79 and 80, was by warrant No. 2004, as per receipt dated September 2d, 1856, signed by W. N. Thurston, Jr., executor—amount, $3,100. An ink line is drawn through the signature of this receipt; but not having been able to elicit any information in regard to it, your Committee can offer no opinion as to the purpose for which, or by whom, it was done. The warrant was regularly entered, as issued for payment on these awards, and no entry can be found to indicate that it was ever canceled."

The fact, stated by the Committee, that an ink line was drawn through the name of the person signing the receipt for warrant No. 2004, was a strong indication that the warrant was canceled. When the attention of the Comptroller was called to this matter by Mr. Franklin, one of the examiners for the Committee, the Comptroller suggested, that, if two warrants for this sum had been issued, neither of them would perish in the hands of the possessor, whether they were obtained honestly or fraudulently, and both certainly would be presented to the Treasury Bank for payment: and that this fact could be ascertained by an examination of the book in which the Chamberlain enters the date, number and amount of the checks, which he returns to the Comptroller's office, in order to obtain credit for the amounts paid by him. The Comptroller added, that, if both checks were returned on this book as paid by the Chamberlain, it would afford conclusive evidence that a double payment had been made by the issue of two warrants for the same sum. If, on the contrary, the Chamberlain had returned only the amount of the check which Mr. Franklin held in his hands at that time, it would be equally conclusive that the missing check had been canceled and not issued.

The book above referred to was examined by the clerks in the Finance Department, and it was found that only the check No. 2079 for $3,100 was returned, and credited to the Chamberlain.

After the publication of the report of the Committee on Examining Checks, which had been made out and cancelled, before being signed by the Mayor and clerk, and issued, the identical check No. 2004, for $3,100, dated

September 2, 1856, was found, signed only by the Comptroller. The following memorandum appears to have been made in the hand writing of the Comptroller, on the face of the check, viz: "Unknown owners, canceled," thus corresponding with the cancelment of the receipt of the executor on the margin of the check-book.

Mahlon Day was a well known citizen, who had possessed the property in question, for a long series of years, and the first check for an advance to the executors of his estate was probably made out without supposing that such an estate would be awarded to unknown owners. It appears, however, that application had to be made to the Supreme Court, and the order of the court for payment was deferred till October 9, 1856; this probably explains the withholding of the first check, its cancelment, and the erasure of the name of the executor, after he had signed the receipt in the margin of the check-book.

The amount of three awards, for property owned by the estate of Mahlon Day, is..... $25,266 00

Payments were made as follows, viz:

October 9, 1856, warrant No. 2,079.....		$3,100 00
" "	2,080.....	22,166 00
Total.....	.....	$25,266 00

Interest was allowed, as directed by the order of the Supreme Court, to the time of payment, by warrant No. 2,083, October 13, 1856.... ..... $188 96

And receipts and releases were executed by the exe-

cutors, in the form annexed, in relation to the award to Mrs. Gardiner.

The total amount of awards for the land taken in the opening and extension of the Bowery, was..	$532,268 00
The amount paid on the principal of awards is	509,979 00
Leaving the amount yet unpaid, on two awards.....	$22,289 00

In all these settlements made by A. S. Cady, as shown by memorandums entered in a book, it is found by the examiners in the Finance Department, that the account of the principal of the awards and the interest is correct.

In regard to the payment of $1,325 62, in the name of E. H. Cambrelling, Attorney, the examiners in the Finance Department concur in the opinion with those who made the examination for the Committee, that this case bears unmistakable indications of fraud and forgery, perpetrated by J. B. Smith.

This latter case was referred to in the Comptroller's annual report, as the only irregularity connected with the payment of awards, on account of the Bowery extension, and subsequent examinations by Mr. Storrs afford very satisfactory evidence that this conclusion was correct.

Memorandums of the settlements made by Mr. Cady, were entered in a book, and the checks for those payments were filled up from this book by J. B. Smith. In the case of the fraudulent check above referred to, there is no shadow of a pretence to warrant it in any memorandum made by Mr. Cady.

All the settlements and memorandums made by Mr. Cady, authorizing payments of awards on this job, amounting to $509,979, appear to have been correct in every particular.

All which is respectfully submitted,

A. C. FLAGG, *Comptroller.*

STATEMENT A.

KNOW ALL MEN BY THESE PRESENTS, *Whereas:* In and by the report of the Commissioners of Estimate and Assessment, duly confirmed by the Supreme Court, on the ninth day of April, in the year one thousand eight hundred and fifty-six, in a certain proceeding, entitled, "In the matter of the application of the Mayor, Aldermen and Commonalty of the city of New York, relative to the opening and extending of the Bowery, from the southerly side of Chatham square to Franklin square, in said city," an award for taking certain lands, to wit:

Nos. two (2), three (3), four (4), five (5), seventeen (17), eighteen (18), and nineteen (19), on the map of the said Commissioners, was made to Juliana Gardiner, in the sum of sixty-two thousand nine hundred and ninety dollars, as by reference to said report and the maps of said Commissioners, on file in the office of the Street Commissioner of the city of New York, will more fully appear.

Now, therefore, know ye, That I, Juliana Gardiner, the person named in and entitled to the said award, do hereby acknowledge to have received from the Mayor, Aldermen and Commonalty of the city of New York, the aforesaid sum of sixty-two thousand nine hundred and ninety dollars, in full payment and satisfaction of said award; and, in consideration thereof, I do hereby, for myself, my heirs, executors and administrators, grant and release unto the said Mayor, Aldermen and Commonalty aforesaid, the said lots and parcels of land, and all my right, title, and interest therein.

In witness whereof, I have hereto set my hand and seal, this twenty-fifth day of October, in the year one thousand eight hundred and fifty-six.

(Signed,)

JULIANA GARDINER, [L. S.]

Sealed and delivered in the presence of
A. S. CADY.

City and County of New York, ss:—On this 25th day of October, in the year one thousand eight hundred and fifty-six, before me, a Commissioner of Deeds, in and for the city and county of New York, personally appeared Juliana Gardiner, and acknowledged that he executed the same.

(Signed,) A. S. CADY,
Commissioner of Deeds.

City and County of New York, ss:—Juliana Gardiner, the person above mentioned, and who has executed the preceding release and satisfaction, being duly sworn, deposes and says, that she is the person named in the report of the Commissioners, and entitled to the award therein referred to, and that there are no liens of any description against said premises.

(Signed,) JULIANA GARDINER.

Sworn, this 25th day of October, 1856. }
A. S. CADY,
Commissioner of Deeds.

DOCUMENT No. 12.

BOARD OF ALDERMEN,

MAY 3, 1858.

The following acts passed by the Legislature of the State, relative to this city, were received, laid on the table, and ordered to be printed.

D. T. VALENTINE, *Clerk.*

AN ACT

RELATIVE TO NOTARIES PUBLIC, IN THE CITY AND COUNTY OF NEW YORK.

Passed March 25th, 1858.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The notaries public in and for the city and county of New York, whose commissions have not expired, and who have qualified according to law, are hereby authorized to continue in the discharge of the duties of their respective offices until the expiration of their commissions; and the official acts of the several notaries shall have the same force and effect as if no irregularity had existed in their several appointments.

§ 2. The Governor may appoint, by and with the advice and consent of the Senate, as many notaries public in and for the city and county of New York, as he may deem necessary; provided the number in commission at any one time shall not exceed four hundred.

§ 3. All acts or parts of acts inconsistent with this act, are hereby repealed.

§ 4. This act shall take effect immediately.

AN ACT

FOR THE RELIEF OF THE MEMBERS OF THE COMMON COUNCIL AND BOARD OF SUPERVISORS OF THE CITY AND COUNTY OF NEW YORK, FOR THE YEAR EIGHTEEN HUNDRED AND FIFTY-SEVEN.

Passed April 12, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. Every person who was elected to the office of Alderman, or to the office of Councilman, for any ward or council district of the city of New York, for the political year commencing on the first of January, eighteen hundred fifty-seven, and who qualified as such Alderman or Councilman, and who acted as such, is hereby declared to be entitled to receive the sum of two hundred and eighty dollars from the city treasury, for his services, in addition to any moneys received for such services, during any part of the said political year.

§ 2. It shall be, and is hereby declared to be the duty of the Comptroller of said city of New York, to draw his warrant for said sum in favor of each of the persons above spe-

cified, upon the production to him of a duly certified copy of the oath of office of such member of said Common Council.

§ 3. The Supervisors of the county of New York are hereby authorized and empowered to raise by tax, or otherwise, the sum of twenty-three thousand and twenty-four dollars, and such other sum as may be required for the purposes of this act.

§ 4. The members of the Board of Supervisors of the city and county of New York, for the year eighteen hundred and fifty-seven, are hereby declared to be entitled to compensation at the same rate per diem as the Supervisors of the other counties of the state, and that the Comptroller of the city of New York is hereby authorized and directed to draw his warrant in favor of each member of the said Board of Supervisors, for the year eighteen hundred and fifty-seven, for such amount as he shall be found entitled to under the provisions of this section, upon the presentation of a certificate of the clerk of the said Board of Supervisors, of the number of days he shall have been present at the meetings of said board, between the first day of May and the thirty-first day of December.

§ 5. All acts and parts of acts inconsistent with the provisions of this act, are hereby repealed.

§ 6. This act shall take effect immediately.

AN ACT

TO LEGALIZE CERTAIN ACTIONS OF THE BOARD OF SUPERVISORS OF THE CITY AND COUNTY OF NEW YORK, IN RELATION TO THE PAYMENT OF MONEYS TO DAVID A. FOWLER.

Passed April 12th, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The several resolutions passed in the years eighteen hundred and fifty-three, eighteen hundred and fifty-four, eighteen hundred and fifty-five, eighteen hundred and fifty-six, and eighteen hundred and fifty-seven, by the Board of Supervisors of the county of New York, directing the payment of moneys to David A. Fowler, as secretary to the board of county canvassers, be and the same are hereby declared to be lawful and of binding force.

§ 2. This act shall take effect immediately.

AN ACT

TO CONTINUE THE COMMISSION APPOINTED TO SECURE THE MORE PERFECT ESTABLISHMENT, GOVERNMENT REGULATION AND ECONOMY OF COMMON SCHOOLS IN THE CITY OF NEW YORK.

Passed April 14, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The act entitled "An act to provide for the appointment of a commission to secure the more perfect establishment, government, regulation and economy of common schools in the city of New York," passed seventh April,

eighteen hundred and fifty-seven, shall continue in force until the first day of January, eighteen hundred and fifty-nine; and the powers of the commission appointed thereunder, shall also continue in force, and it shall be lawful for the said commission to report to the Governor, pursuant to the provisions of said act, at any time previous to the said first day of January, eighteen hundred and fifty-nine.

2. This act shall take effect immediately.

AN ACT

TO EXTEND THE CHARTER OF THE FIREMEN OF THE CITY OF NEW YORK.

Passed April 14, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The act entitled "An act to incorporate the firemen of the city of New York, passed March the twentieth, seventeen hundred and ninety-eight, and all acts and parts of acts relating to the said corporation, and which are now in force, shall be continued in force until the first day of May, eighteen hundred and eighty, unless sooner altered, modified or repealed by the legislature.

AN ACT

IN RELATION TO THE NEW YORK DISPENSARY, THE NORTHERN DISPENSARY, THE EASTERN DISPENSARY, THR DEMILT DISPENSARY, AND THE NORTH-WESTERN DISPENSARY OF THE CITY OF NEW YORK.

Passed March 6, 1858.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The New York Dispensary, the Northern Dispensary, the Eastern Dispensary, the Demilt Dispensary, and the North-western Dispensary of the city of New York, are, and each of them is authorized to change the time for holding their annual meeting and electing their officers; provided, however, that no such change shall be made excepting in the manner prescribed for altering or amending their by-laws, or by vote at an annual meeting.

§ 2. This act shall take effect immediately.

AN ACT

IN RELATION TO THE NEW YORK JUVENILE ASYLUM.

Passed March 25, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The twenty-eighth section of the act entitled "An act to Incorporate the New York Juvenile Asylum," passed June thirtieth, eighteen hundred and fifty-one, is hereby amended, and shall read as follows, viz:

§ 28. In each and every year thereafter, the said Board

of Supervisors shall, in the same manner, levy and collect by tax, and pay over to the said New York Juvenile Asylum, for the uses and purposes thereof, a sum not exceeding seventy-five dollars per annum, and proportionally for any fraction of a year, for each child which, by virtue and in pursuance of the provisions of this act, shall be entrusted or committed to the said asylum from the city and county of New York, and shall be supported and instructed therein; but the sum to be collected and paid by the said Board of Supervisors for each child so received, supported and taught in said asylum, shall in no case exceed the lowest cost of support and government of a child of the same age in any of the public institutions at present under the care of the Ten Governors of the Alms-house and prisons department of the said city. The moneys so to be received from the said Board of Supervisors, together will all other moneys raised by the said New York Juvenile Asylum, to be applied to the payment of the current expenses, and for the perfect establishment and general support of the said asylum.

§ 2. To provide the pecuniary means for the purchase of land, and the erection of a house of reception for the New York Juvenile Asylum, and to aid in furnishing said building and in defraying the expenses thereof, whenever it shall be proved to the Board of Supervisors of the city and county of New York, by the affirmation or affidavit of the president and secretary of the said asylum, that in addition to the sum specified in section twenty-seven of "An act to incorporate the New York Juvenile Asylum," passed June thirtieth, one thousand eight hundred and fifty-one; and also in addition to the farther sum specified in section one of "An act to amend an act to incorporate the

New York Juvenile Asylum," passed March twenty-seventh' one thousand eight hundred and fifty-six, the further sum of twenty thousand dollars in money or approved securities, have, by voluntary subscriptions or otherwise, been raised for the purposes of said asylum, the said Board of Supervisors may, in their discretion, raise and collect a like sum of twenty thousand dollars by tax upon the real and personal property of the said city and county to be so levied and collected at the same time and in the same manner as the contingent charges and expenses of the said city and county are levied and collected; provided, however, that if any balance of the sum of forty thousand dollars levied and collected for the year eighteen hundred and fifty-seven by the said Board, in pursuance of the twenty-eighth section of the act of June thirtieth, eighteen hundred and fifty-one, incorporating the said asylum, shall yet remain unexpended, then it shall be lawful for the said Board to direct such unexpended balance of said moneys to be immediately paid to the said asylum on account of the sum of twenty thousand dollars authorized by this act; and in such case only so much as shall yet remain of the said last mentioned sum of twenty thousand dollars, shall be levied and collected by virtue hereof. All such moneys so to be raised by the said New York Juvenile Asylum, and to be paid or levied and collected by the said Board, to be together expended by the said New York Juvenile Asylum, for the purposes specified in the first clause of this section.

§ 3. This act shall take effect immediately.

AN ACT

TO INCORPORATE THE NEW YORK PURE MILK COMPANY.

Passed April 12, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. Jonathan A. Kellar, Robert M. Stratton, Henry C. Banks, and their associates, and all other persons who hereafter shall, from time to time, be associated with them, are hereby constituted a body politic and corporate by the name of the New York Pure Milk Company, for the purpose of furnishing and supplying the city of New York and vicinity with pure and wholesome milk, and of having, holding, exercising and enjoying all the rights, power and privileges necessary to the establishment of such a business, and to that end the said corporation may acquire, take, hold and transfer real and personal estate, and sue and be sued by their corporate name.

§ 2. The capital stock of said company shall consist of the sum of one hundred and fifty thousand dollars, which shall be deemed personal property, and shall be divided into shares of ten dollars each; no assignment or transfer of any share shall be valid until such transfer shall be registered in the book to be kept for that purpose, and in accordance with the by-laws of said company.

§ 3. In addition to the general powers granted to corporations by the third article of the eighteenth chapter of the first part of the Revised Statutes, the said Corporation shall have power to purchase and erect such buildings and other appliances as shall be deemed necessary to carry out

the purposes and objects of the association, and to make divisions of the capital stock.

§ 4. The concerns of the said corporation shall be managed by a board of directors, to consist of not less than five nor more than seven members, who shall be stockholders of said company, and who, except the first directors hereby appointed, shall hold their offices fore* one year, and until others are chosen in their places.

§ 5. So soon as twenty-five thousand dollars of the capital stock have been subscribed and paid in, the company may go into operation, and the said Jonathan A. Weller, Robert M. Stratton, Henry C. Banks, and such other persons as a majority of them shall elect, (but not so as to exceed in number seven members) shall be the first directors of said company, with power to fill vacancies and elect officers, and such board of directors shall hold their offices for the first year, and until others are chosen in their places by the stockholders, of whom a majority shall constitute a quorum for the transaction of all business; and said directors shall select from among themselves, a president and secretary, for the time being.

§ 6. The stockholders shall, every year except the first, elect the directors, together with a president and secretary; said president and secretary shall be chosen from among the stockholders, and shall be ex-officio members of said board of directors; public notice of the time and place of such election shall be given by the directors for the time being, for at least two weeks previous thereto, in one ore† more of the newspapers published daily in the city of New York.

---

* So in the original. † So in the original.

In case it should at at* any time happen that an election of directors should not be made on the day appointed by the by-laws of the said corporation, a new election shall be held with proper despatch, and on public notice; and the officers of the preceding year shall hold over until their successors shall be elected and inducted into office.

§ 7. The milk to be furnished by the said association shall be placed in metallic cans, which shall be locked before leaving the premises of the company, and the keys thereof retained by the officers, and the said milk shall in all cases be drawn by means of a faucet. The cows from whence the said milk shall be obtained shall be fed exclusively on hay, grain, grass, or other dry vegetable provender, and shall be allowed such free air and exercise in the open fields as may be necessary to preserve them in good, sound and healthy condition. Any violation of either of the provisions of this act shall be and is hereby declared to be a forfeiture of this charter, and all corporate rights thereto pertaining.

§ 8. A majority of all the directors of said company shall have power to pass such by-laws, rules and regulations, from time to time, and to alter or repeal the same, as shall be deemed necessary for the proper and legitimate prosecution of the business aforesaid, provided the same shall be consistent with the provisions of this act and the laws of this state.

§ 9. The said company shall cause to be prepared a corporate seal, on which shall be engraven the corporate name of said company, together with the date of incorporation, with such characteristic device as may be deemed appropriate.

* So in the original.

§ 10. The directors may require payment of subscriptions to the stock of said company, at such time and in such proportions as they may deem proper, under penalty of forfeiting all stock and previous payments thereon; and the said company may sue for and recover all such subscriptions. Notice of the time and place of such payments shall be published two weeks previous to such time, in one or more of the newspapers published in the city of New York.

§ 11. The stockholders of this company shall be severally individually liable to the creditors of the company to an amount equal to the amount of stock held by them respectively, for the debts and contracts made by such company, until the whole amount of capital stock fixed by the company shall have been paid in, and a certificate to that effect filed in the county clerk's office of the county of New York.

§ 12. This act shall take effect immediately.

AN ACT

TO AMEND AN ACT "TO ESTABLISH REGULATIONS FOR THE PORT OF NEW YORK," PASSED APRIL SIXTEENTH, EIGHTEEN HUNDRED AND FIFTY-SEVEN.

Passed April 15th, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. Section three of chapter six hundred and seventy-one of the session laws of eighteen hundred and fifty-seven, is hereby amended so as to read as

§ 3. It shall not be lawful for any person to throw any ballast, rubbish, ashes or cinders from any vessel or lighter, or from any pier or bulkhead, into the waters of the docks,

slips, or harbor of the port of New York; nor from out of any vessel upon any pier or bulkhead in the port of New York, unless to discharge the same immediately into carts. Any person who shall violate any of the provisions of this section shall forfeit and pay to the commissioners the sum of five dollars, and the further sum of two dollars for each and every cubic yard of material so thrown out; and such fine shall be a lien, until paid, upon any vessel from which such material shall be thrown or discharged.

§ 2. Section four of said act is amended so as to read as follows:

§ 4. Every person wilfully throwing or putting any stones, earth, shavings, night-soil, dirt or rubbish, into any dock or slip in the port of New York, or on any public pier or bulkhead in said port, shall forfeit and pay to the commissioners the sum of twenty-five dollars for each offence; one half of all fines recovered under this section shall be for the use of the person or persons lawfully entitled to the occupation of such docks, slips or piers. Whenever any horse or cart shall be employed in dumping stones, earth, shavings, night-soil, dirt or rubbish, into any dock or slip, or any public pier of the port of New York, the fine prescribed by this section shall be a lien, until paid, upon such horse and cart.

§ 3. Section five of said act is amended so as to read as follows:

§ 5. It shall be the duty of every owner, master, mate, or other person having the charge or management of any vessel from which, or into which, ballast, coals, cinders, stones, bricks, tiles, dung, or any loose matter or thing, shall be

conveyed, to fasten canvas, mats, or cloths, between the pier or bulkhead and vessel, and between vessels lying alongside each other, to or from which such ballast or other loose material shall be conveyed, so as to prevent any part thereof falling into the waters of the port; and if to be landed, to place such material at least two feet from the edge of the pier or bulkhead, under the penalty of ten dollars for the violation of any of the provisions of this section, and for each offence, to be paid to the commissioners; and such penalty shall be a lien, until paid, on the vessel from which such ballast, coals, cinders, stone, brick, tiles, dung or other matter or thing shall be so conveyed or landed.

§ 4. Section six of said act is amended so as to read as follows:

§ 6. It shall not be lawful to throw iron, lead, or any metal, or any package of merchandise, weighing over fifty pounds, from a vessel on to a pier in the port of New York, without adequate protection to the planking of such pier, under the penalty of five dollars for each offence, to be paid to the commissioners, and to be a lien on the vessel until paid; nor shall it be lawful for any person or persons to draw, or cause to be drawn, or trail, or drag over any pier in the port of New York, any anchor, or blocks of stone, otherwise than upon carts, rollers, wheel carriages or sleds, under the penalty of five dollars for every offence, one half of which shall be for the use of the person or persons lawfully entitled to the occupation of such pier.

§ 5. Section eight of said act is amended so as to read as follows:

§ 8. Whenever any pier or bulkhead in the port of New

York shall be encumbered, or its free use interfered with by merchandise, lumber, or any other obstruction, whether of loose material, or built upon, or affixed to the pier or bulkhead, it shall be the duty of the commissioners to notify the person or persons placing or keeping such merchandise or obstruction on such pier or bulkhead, to remove such merchandise or obstruction within twenty-four hours after such notice; and in case of failure to comply with such notice, and to remove such merchandise or obstruction, the person or persons so notified shall be liable to pay to the commissioners the sum of twenty-five dollars for each and every day during which such merchandise or obstruction shall remain on such pier or bulkhead; and the commissioners shall have power, in their discretion, to remove any merchandise so encumbering any pier or bulkhead, and to store the same in a warehouse or other proper receptacle; and a sum equal to the amount of the expenses of removal, together with the charges for storage, shall be paid by the owner of such merchandise to the commissioners, and shall be a lien on such merchandise until paid.

§ 6. Section eleven of said act is amended so as to read as follows:

§ 11. It shall be the duty of the said commissioners to require the lessees or occupants of the public piers and bulkheads in the cities of New York and Brooklyn, to keep the said piers and bulkheads clean and in good repair; and they shall specify in such notice the particulars of the repairs required by them to be made; and if, when so notified to clean and repair any public pier or bulkhead, the lessee or occupant shall refuse so to do, in accordance with the notice and specification of the commissioners, he shall

be liable to pay to the said commissioners a fine of five dollars for each and every day during which he shall neglect or refuse to clean or repair such pier or bulkhead.

§ 7. Section seventeen of said act is hereby amended so as to read as follows:

§ 17. All fines and penalties incurred and recovered under this act, which are recoverable by or in the name of the commissioners under this act, shall be paid, except as otherwise provided in this act, into the treasury of this state, and the treasurer shall keep account of the same; and he shall pay to the said commissioners annually, the expenses incurred and hereafter to be incurred by the said commissioners under the act, to be certified to him by the president and secretary of said board, not exceeding five thousand dollars per annum, and the further sum of five thousand dollars to be divided between them, as follows: To the President of the Board the sum of two thousand dollars, and to each of the other commissioners the sum of seven hundred and fifty dollars per annum.

§ 8. Section eighteen of said act is amended so as to read as follows:

§ 18. All the fines and penalties incurred under this act, shall be recoverable by and in the name of the said commissioners. In all cases where the fines and penalties prescribed by this act are made liens upon property, they shall be enforced by attachments issued by the court where the proceedings for the recovery of such fines and penalties shall be pending, to the officers to whom executions of such courts are issued, and shall be enforced and discharged in like manner as attachments against property of non-resident

debtors; and the said commissioners shall have power, in their discretion, to remit any fines or penalties incurred under this act. For the purposes of this act, all piers and bulkheads shall be deemed and taken as extending into the adjoining streets in the rear thereof, a distance of six feet.

§ 9. This act shall not be deemed applicable to private wharves, piers and bulkheads occupied by the respective owners thereof for special purposes.

§ 10. This act shall take effect immediately.

AN ACT

TO LEGALIZE THE RESOLUTIONS PASSED BY THE BOARD OF SUPERVISORS OF THE COUNTY OF NEW YORK, OCTOBER 19, 1857, DIRECTING THE COMPTROLLER TO DRAW HIS WARRANT IN FAVOR OF EDWARD TIMSON AND HENRY SCHNORR.

Passed April 15, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The resolution passed by the Board of Supervisors of the county of New York, October nineteenth, eighteen hundred and fifty-seven, in the words following: "Resolved, That the Comptroller be, and he is hereby authorized and directed to draw his warrant in favor of Edward Timson and Henry Schnorr, for three hundred and forty dollars, the same having been expended by them in testing, in the Supreme Court, the right of holding their position of assessors of the Twenty-second Ward," be, and the same is hereby declared to be lawful and of binding force.

§ 3. This act shall take effect immediately.

AN ACT

TO AMEND AN ACT ENTITLED "AN ACT TO ALTER THE MAP OR PLAN OF THE CITY OF NEW YORK, IN RESPECT TO CERTAIN STREETS IN THAT PART OF THE SAID CITY, KNOWN AS THE VILLAGE OF MANHATTANVILLE," PASSED MAY FOURTH, EIGHTEEN HUNDRED AND THIRTY-SIX.

Passed April 15, 1858.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The second section of the act entitled "An act to alter the map or plan of the city of New York, in respect to certain streets in that part of the said city, known as the village of Manhattanville, passed May fourth, eighteen hundred and thirty-six, is hereby amended so as to read as follows:

§ 2. Those parts of One hundred and twenty-sixth, One hundred and twenty-seventh and One hundred and twenty-eighth streets, respectively, which are laid out on the said map or plan of the city of New York, between the streets so known and distinguished as Manhattan street and Lawrence street, respectively, and also that all that part of One hundred and twenty-eighth street, which is laid out on the said map or plan of the city of New York, between the said street so known and distinguished as Lawrence street, and the street known and distinguished on the said map as the Tenth avenue, are hereby discontinued on the said map or plan.

§ 3. This act shall take effect immediately.

AN ACT

TO REGULATE THE USE OF WHARVES AND SLIPS IN THE CITY OF NEW YORK, WHICH SHALL BE LEASED TO CERTAIN STEAMBOAT LINES.

Passed April 15, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. Whenever the owners of any wharves and slips on the East river, now occupied by any of the steamboat lines hereinafter mentioned, or the owners of any wharves and slips on the North river, in the city of New York, shall lease the same to the owners or proprietors of any of the regular lines of steamboats heretofore established and now engaged in the business of transporting passengers and freight between the city of New York and any place on the Hudson river, or between the city of New York and any place on Long Island Sound, or the rivers emptying into Long Island Sound, or between the city of New York and any place on Narragansett Bay, or the bays adjacent thereto, or any such steamboat running to and from the city of New York, the wharves and slips so leased shall, during the term of the lease, be kept and reserved for the exclusive use and occupancy of the steamboats of the lessees, to the extent necessary for the conducting and doing the business in which they are engaged.

§ 2. It shall be the duty of the harbor masters, or of any officer or officers of said city, who are now or hereafter shall be empowered by law, or by any ordinance of said city, to regulate and station ships and vessels in the harbor

of said city; and they shall have power to prohibit and prevent all other boats, ships and vessels from entering any of the slips, or approaching or lying at any of the wharves so let or leased, under the provisions of the first section of this act, when such slips and wharves shall be required for the use and accommodation of the lines of steamboats owned by the persons hiring or leasing the same. In case any boat, ship or vessel, not entitled, according to the provisions of this act, to use said wharves or slips, shall have entered any of said slips, or shall be lying at any of said wharves, during the continuance of such letting or lease, when such slip or wharf shall be needed or required for the use or accommodation of any of the lines of steamboats referred to in the preceding section, it shall be the duty of the said harbor masters, or other officer or officers, and they shall have power forthwith to remove such boat, ship or vessel from such slip or wharf, so far as may be necessary to accommodate the steamboats entitled, as aforesaid, to the use of said slip or wharf.

§ 3. Any person resisting, or refusing, or neglecting to comply with any order or direction of any harbor master, or other officer, given in pursuance of this act, in relation to any boat, ship or vessel, under command or control of such person, and any person whatever, who shall resist or oppose any harbor master or other officer, in the performance of the duties of his office, under this act, shall, for every such offence, forfeit and pay the sum of fifty dollars, to be recovered, collected, and applied in the manner provided for the recovery and application of the penalties imposed and specified in the third section of the act entitled "An act relating to the harbor masters of the port of New York," passed March sixteenth, eighteen hundred and fifty.

§ 4. Nothing in this act contained shall be so construed as to give to any owner or owners of wharves and slips, designated in the act passed April thirteenth, eighteen hundred and fifty-seven, entitled "An act to regulate the use of slips and wharves of the city of New York, between piers number two and number twelve, East river," power to let or lease the same, or any of them, for the purposes designated in this act. Nor shall anything herein be construed to prevent the free use of the wharves and slips so let or leased, under the provisions of the first section of this act, when such wharves and slips are not required for the use and accommodation of the steamboats, for whose use and accommodation they were hired or leased.

§ 5. The speed of the said steamboats shall not exceed eight miles per hour in passing up the East river to Corlear's Hook.

§ 6. The legislature may alter, amend, or repeal this act, and any rights or privileges conferred thereby.

§ 7. All acts, and parts of acts, inconsistent with this act, are hereby repealed.

§ 8. This act shall take effect immediately.

AN ACT

IN RELATION TO THE APPOINTMENT OF POLICE JUSTICES' CLERKS IN THE CITY OF NEW YORK, AND THEIR DUTIES.

Passed April 16th, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The police justices in the city and county of New York, shall severally have power to appoint a clerk,

to be denominated "police justices' clerk," whose term of office shall extend to the end of the term for which the justice so appointing him is elected; subject, however, to removal by the Board of Supervisors of the county, upon charges duly preferred, and upon a fair trial by said board. The accused must be served with a copy of the charges and specifications, and shall be entitled to appear by counsel.

§ 2. It shall be the duty of the clerks so appointed to attend daily at the police courts at which the justices by whom they are appointed shall severally be assigned, and, among other things, to reduce to writing all examinations and depositions, and to make out, in due form, all recognizances, and all warrants or other precepts which shall be made, taken, or issued before or by any magistrate in the said police court, and generally to do and perform all such service and business in the said police court, as shall be necessary to be done and performed in writing, and to do and perform every such other resonable service and business relating to their trust, as shall be required of them by the magistrate or magistrates, who at the time shall be and attend in the said police court; and they shall have the charge, under the direction of the magistrates, of all recognizances, examinations, and depositions, which shall have been taken or lodged in said police court, until the same shall be delivered to the district attorney, or otherwise filed in the proper office, according to law, as the case may be, and of all other papers in the said police court.

§ 3. All fines imposed by the several police courts, shall be received by the justices' clerks thereof respectively, who shall return the same monthly, under oath, to the chamberlain of said city.

§ 4. Before entering upon the duties of their office, the said clerks, appointed as aforesaid, shall severally take and subscribe, before the clerk of the county, the oath of office prescribed by the constitution, which oath shall be filed in the office of said county clerk. They shall also severally execute a bond, to the people of the state, in the penal sum of one thousand dollars, with sufficient sureties, to be approved by the city comptroller, conditioned for the faithful performance of their duties according to law, which bond shall be filed in the office of the said comptroller.

§ 5. The salary of the clerks appointed under this act shall be the same as now fixed by law for the present police court clerks, and the same shall be paid to them in monthly payments.

§ 6. The police justices shall have power to appoint, for the respective courts at which they may be assigned, such other clerical help, to be denominated "assistant clerks," as shall be deemed to be necessary by the Board of Supervisors of said county, upon the application of the said justices. The salary of the said assistant clerks shall be fixed by the Board of Supervisors, and their term of office shall be the same as the clerks aforesaid, subject to the same power of removal by the Board of Supervisors.

§ 7. The offices of clerk of police, or police court clerk, and of scrivener, as now existing, are hereby abolished.

§ 8. All acts, and parts of acts, as well as all ordinances, inconsistent herewith, are hereby repealed.

§ 9. This act shall take effect immediately.

AN ACT

TO ENABLE THE SUPERVISORS OF THE CITY AND COUNTY OF NEW YORK TO RAISE MONEY BY TAX.

Passed April 17th, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The Board of Supervisors of the city and county of New York are hereby empowered, as soon as conveniently may be, after the passage of this act, to order and cause to be raised by tax, on the estates, real and personal, subject to taxation according to law, a sum not exceeding three million four hundred and forty-one thousand and ninety-five dollars, for the objects and purposes following, to wit: Alms-house, six hundred and five thousand dollars; aqueduct repairs and improvements, twenty thousand dollars; board of health, ten thousand dollars; pavement, two hundred and thirty-two thousand dollars; county contingencies, fifty thousand dollars; city contingencies, eighty thousand dollars; city inspector's department, eleven thousand eight hundred and seventy-five dollars; coroners' fees, twenty thousand dollars; cleaning streets, by contract, two hundred and eighty thousand dollars; charges on arrears of taxes, five thousand dollars; charges on arrears of assessments, five thousand dollars; county jail reconstruction, twenty-five thousand dollars; contingencies, mayor's office, three thousand dollars; donations, fifteen thousand dollars; docks and piers, building and repairing, and cleaning and dredging slips, one hundred and fifty thousand dollars; election expenses, fifty thousand dollars; errors and delinquencies, five thousand dollars; fire telegraph, six thousand four hundred do lars; fire department, sixty-two thousand five hundred dollars; interest on revenue bonds,

three hundred and twenty-five thousand dollars; interest on assessment bonds, eleven thousand dollars; intestate estates, seven thousand dollars; lands and places, twenty-five thousand dollars; monument to Major-General Worth, and rail, ten thousand dollars; markets, seven thousand dollars; officers' fees, twenty-five thousand dollars; obstructions, removal of, in streets and harbor, ten thousand dollars; printing, eighty-five thousand dollars; rents, thirty thousand dollars; real estate, thirty-three thousand five hundred dollars; real estate expenses, one hundred thousand dollars; roads and avenues, and arrearages of eighteen hundred and fifty-seven, fifty thousand dollars; roads, macadamizing Second avenue, above Sixty-first street, fifty thousand dollars; working as a country road the Eleventh avenue, between One hundred and seventh and One hundred and forty-fourth streets, twenty thousand dollars; repairs to public buildings, including new buildings and buildings for fire department, eighty-three thousand dollars; Russ pavement improvement, twenty-six thousand dollars; supplies for public offices, fifteen thousand dollars; stationery, twenty thousand dollars; sewers, repairing and cleaning, thirty-five thousand dollars; salaries, five hundred and eighty-four thousand four hundred and ninety dollars; sunken vessels, removing, five thousand dollars; street expenses and paving, ninety thousand dollars; society for the reformation of juvenile delinquents, eight thousand dollars; Tompkins square, railing, twenty thousand dollars; Twenty-second Ward station-house, twelve thousand dollars; wells and pumps, repairing and cleaning, one thousand seven hundred dollars; water-pipes and laying, one hundred and sixteen thousand six hundred and thirty dollars; and for such other expenses as the Mayor, Aldermen and Common

alty of the city of New York may be put to by law, such portion of the expense of the said city and county of New York, as relates to repairing, repaving and cleaning streets, in that part of the city lying south of a line running through to the centre of Forty-second street, shall be assessed only on that part of the said city lying south of the said line.

And also, a further sum not exceeding eight hundred and eighty-eight thousand five hundred and forty-eight dollars and sixty cents, by tax, on the estates, real and personal, subject to taxation according to law, within the said city and county, to be collected according to law, to be applied toward defraying the expenses of police in said city and county.

And also, a further sum of four hundred and sixty thousand six hundred and thirty-four dollars, by tax, on the estates, real and personal, subject to taxation according to law, within that part of the city and county of New York which is, or may be designated by the Common Council of the city of New York, by resolution or ordinance, as the Lamp District, to be collected according to law, and applied toward the expense of lighting such part of the city last mentioned.

And also, a further sum of five hundred and ninety-three thousand nine hundred and sixty-six dollars and nineteen cents, by tax, on the estates, real and personal, subject to taxation, according to law, within the said city and county, to be collected according to law, and applied toward defraying the deficiency on taxation in said city and county, for the year one thousand eight hundred and fifty-seven.

And also, the further sum of two hundred and fifty dol-

lars, by tax, on the estates, real and personal, subject to taxation, according to law, within said city and county, and to be collected according to law, to be applied to the payment for a set of plans furnished by Ira Buckman, junior, for fire look-out on the City Hall.

And also, the further sum of one hundred thousand dollars, by tax, on the estates, real and personal, subject to taxation, according to law, within the said city and county, and to be collected according to law, to be applied to the erection of a building on Blackwell's Island, to be used as a hospital, said building to be erected under the control and direction of the "Board of Ten Governors" of the Alms-house.

And also, the further sum of thirty-eight thousand two hundred and seventy-eight dollars and ninety-five cents, by tax, on the estates, real and personal, subject to taxation, according to law, within the said city and county, and to be collected according to law, to be applied towards defraying the salaries of Daniel D. Conover, who has executed the office of Street Commissioner in said city, the Deputy Street Commissioner, the heads of bureaux, clerks, and other employees of said Conover.

And also, the further sum of thirteen thousand eight hundred dollars, towards defraying the expenses incurred by said Conover in various proceedings at law.

The Comptroller of said city shall draw his warrant in favor of said Conover, to pay himself and each and all of his subordinates for salaries, upon the sworn certificate of said Conover of the time and employment by himself and each of his employees. The Comptroller shall also draw his warrant in favor of said Conover for said further sum

of thirteen thousand eight hundred dollars to reimburse him for legal expenses incurred in the various proceedings at law, arising out of the controversy relating to the Street Department.

And also, the further sum of sixteen thousand five hundred and fifty dollars, by tax, on the estates, real and personal, subject to taxation according to law, within the said city and county, and to be collected according to law, to be applied towards defraying the expenses incurred by the Board of Police for the Metropolitan police district in various proceedings at law, and the said sum to be disbursed upon the order and receipt of the treasurer of the said board of police.

§ 2. No portion of said respective sums herein-before named, shall be expended or applied to any other purposes or objects than said objects and purposes respectively, for which the Board of Supervisors of the city and county of New York are herein-before empowered to raise the same as aforesaid.

§ 3. This act shall take effect immediately.

AN ACT

TO AUTHORIZE THE MAYOR, ALDERMEN AND COMMONALTY OF THE CITY OF NEW YORK TO CONVEY CERTAIN LOTS OF GROUND TO THE NEW YORK STATE WOMAN'S HOSPITAL.

Passed April 17, 1858.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

§ 1. The Mayor, Aldermen and Commonalty of the city of New York are hereby authorized to convey to the Board

of Governors of the New York State Woman's Hospital the block of ground in said city, bounded by the Fourth avenue, Forty-ninth street, Lexington avenue and Fiftieth street, containing thirty-two lots of ground, or thereabouts; the said conveyance to be in consideration of one dollar lawful money of the United States, and to remain in full force and virtue so long as the ground herein specified shall be used for the purposes of said New York State Woman's Hospital, and no longer.

AN ACT

TO AMEND AN ACT ENTITLED "AN ACT TO EXTEND THE JURISDICTION OF THE COURTS OF GENERAL AND SPECIAL SESSIONS OF THE PEACE IN AND FOR THE CITY AND COUNTY OF NEW YORK," PASSED APRIL TWELFTH, EIGHTEEN HUNDRED AND FIFTY-FIVE.

Passed April 17th, 1858.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The third section of said act is hereby amended by striking out therefrom the words: "from the Courts of Oyer and Terminer of this State, or;" and said third section, as hereby amended, shall read as follows:

§ 3. Every conviction for a capital offence, or for one punishable as a minimum punishment, by imprisonment in State Prison for life, shall be brought before the Supreme Court and Court of Appeals, from the said Court of General Sessions of the Peace, in and for the city and county of New York, by a writ of error, with a stay of proceedings as a matter of right; and the said appellate court

may order a new trial if it shall be satisfied that the verdict against the prisoner was against the weight of evidence, or against the law, or that justice requires a new trial, whether any exception shall have been taken or not in the court below.

AN ACT

IN RELATION TO THE JURISDICTION OF THE MARINE AND DISTRICT COURTS OF THE CITY OF NEW YORK, IN RELATION TO THE PROCEEDINGS IN CERTAIN ACTIONS THEREIN.

Passed April 17th, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The district courts of the city of New York shall hereafter have no jurisdiction in actions against the Mayor, Aldermen, and Commonalty of the city of New York.

§ 2. The Marine Court of the city of New York shall hereafter have no jurisdiction in actions against the Mayor, Aldermen and Commonalty of the city of New York, in which the amount claimed by the plaintiff shall exceed two hundred dollars.

§ 3. The service of a notice of appeal to the general term of the said Marine Court, by the said Mayor, Aldermen and Commonalty of the city of New York, within the time required by law, from a judgment rendered by a single Justice of said Court, or to the Court of Common Pleas for the city and county of New York, from a judgment rendered by the said general term of said Marine Court, in an action in which the said the Mayor, Aldermen and Com-

monalty of the city of New York shall be a party, shall operate as a stay of all proceedings against the said the Mayor, Aldermen and Commonalty of the city of New York, upon such judgment, until the final determination of said general term of the Marine Court, or of the said Court of Common Pleas, upon the said appeal; and in no case shall it be necessary for the said the Mayor, Aldermen and Commonalty of the city of New York, upon either of the appeals herein mentioned, to pay to the Justice or Justices of said Marine Court, the costs awarded against them upon said judgment appealed from, or to file or execute any undertaking or security whatever, upon such appeal; nor shall the said Justices of the said Marine Court be entitled to demand or receive any fee hereafter, for making a return to the said Court of Common Pleas of the city and county of New York, upon an appeal taken by the said the Mayor, Aldermen and Commonalty of the city of New York to the said Court of Common Pleas, of the city and county of New York, from the judgment of the general term of said Marine Court, but it shall be the duty of the said Justices of the said Marine Court, in all cases of appeals by the said the Mayor, Aldermen and Commonalty of the city of New York, from a judgment of the general term of the said Marine Court, to make a full return to the said Court of Common Pleas for the city and county of New York, of all proceedings in the action in which said judgment shall have been rendered, and such return may be enforced by attachment.

§ 4. In all actions hereafter prosecuted in the said Marine Court of the city of New York, against the said the Mayor, Aldermen and Commonalty of the city of New York, a copy of the summons and complaint therein shall

be personally served upon the Mayor, or the acting Mayor of said city, and in addition thereto, a copy of such summons and complaint shall be served on the Counsel to the Corporation, in said city, at his office, by leaving the same with said Counsel in person, or with a person having charge of his said office during his absence; and no action in the said Court against the said the Mayor, Aldermen and Commonalty of the city of New York, shall be deemed to be commenced until such service shall have been made as aforesaid.

§ 5. The second subdivision of the third section of chapter three hundred and forty-four, of the laws of eighteen hundred and fifty-seven, is hereby amended so as to read as follows:

"In an action upon the charter, ordinance, or by-law of the Corporation of the city of New York, or a statute of this state, where the penalty shall not exceed two hundred and fifty dollars."

§ 6. This act shall take effect immediately.

AN ACT

IN RELATION TO FRAUDS IN ASSESSMENTS FOR LOCAL IMPROVEMENTS IN THE CITY OF NEW YORK.

Passed April 17th, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. If in the proceedings relative to any assessment or assessments for local improvements in the city of New York, or in the proceedings to collect the same, any fraud or irregularity shall be alleged to have been com-

mitted, the party aggrieved thereby, may apply to a Judge of the Supreme Court, in special term or in vacation, who shall thereupon, upon due notice to the Counsel of the Corporation of the city, in which the lands so assessed are situated, proceed forthwith to hear the proofs and allegations of the parties.

§ 2. If, upon such hearing, it shall appear that the alleged fraud or irregularity has been committed, the said assessments shall be vacated, and the lien created thereby, or by any subsequent proceedings, shall cease.

§ 3. On the production of the certificate of the Judge, before whom the proceedings shall be had, that a judgment vacating any assessment has been made by him, it shall be the duty of the officer having charge of the assessment lists to cancel thereon the assessments so vacated, and all proceedings under the same.

§ 4. Any person applying for relief, under the provisions of this act, may embrace in one proceeding any or all assessments for local improvements in which he is interested.

§ 5. Any lands which may be discharged from any lien for an assessment for any local improvement, may be again assessed in the manner now provided by law for such amount as would have been justly chargeable, if fraud or irregularity had not been committed; but the amount so assessed shall be a lien on said lands until paid, and shall be collectable in the manner now provided by law for the collection of assessments, but all proceedings to make a new assessment shall be at the expense of the Corporation of the city in which the lands may be situated.

§ 6. This act shall take effect immediately.

AN ACT

TO PROVIDE FOR THE APPOINTMENT OF A CLERK AND DEPUTY OF THE COURT OF SPECIAL SESSIONS IN THE CITY AND COUNTY OF NEW YORK, AND IN RELATION TO THE JUSTICES OF SAID COURTS.

Passed April 16, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. There shall be appointed by the police justices in the city and county of New York, in the manner hereinafter provided, a clerk and deputy clerk for the Court of Special Sessions in said city and county.

§ 2. It shall be the duty of said clerk or his deputy, to enter all the proceedings of the said court, and the sentences on all convictions had therein, in full, in a book of minutes to be by him kept for that purpose; to administer the oath or affirmation required by law to be administered in the said court; to issue all subpœnas for witnesses on the part of the people, and to furnish, when required, the necessary blanks for witnesses on the part of the defence.

§ 3. Whenever sentence shall be pronounced upon any person convicted of any offence in the said Court of Special Sessions, the clerk thereof shall, as soon as may be, make out and deliver to the sheriff of the said city and county, or his deputy, a transcript of the entry of such conviction in the minutes of the said court, and of the sentence thereupon, duly certified by the said clerk, which shall be sufficient authority to such sheriff or deputy to execute such sentence, and he shall execute the same accordingly.

§ 4. All fines imposed by the said court, shall be received

by the clerk thereof, who shall return the same monthly, under oath, to the Chamberlain of the said city.

§ 5. Transcripts of convictions had in the said court, shall not be required to be certified by the magistrates holding the said court, or filed; but a duly certified copy of any such conviction, made by the clerk of the said court, shall be evidence in all courts and places, of the facts therein contained.

§ 6. The salary of the said clerk and deputy clerk, shall be fixed by the Board of Supervisors, and shall not be increased or diminished during their continuance in office; such salaries shall be paid out of the treasury of the city and county of New York, in equal monthly payments. Before entering upon the duties of their respective offices, the said clerk and deputy clerk shall severally take and subscribe, before the clerk of the county, the oath of office prescribed by the constitution, which oath shall be filed in the office of the said county clerk. They shall also severally execute a bond to the people of the state, in the penal sum of one thousand dollars, with sufficient sureties to be approved by the city Comptroller, conditioned for the faithful performance of their duties according to law, which bond shall be filed in the office of the said city Comptroller.

§ 7. The police justices of the said city shall, within twenty days after the passage of this act, meet together in the court room of the Special Sessions, at the Halls of Justice in said city, and proceed to appoint the said clerk and deputy clerk of the Special Sessions, and a majority of the whole number of police justices elected in said city shall be necessary to a choice in each instance. The term

of office of the clerk and deputy clerk first appointed under this act, shall expire at the same time with that of the police justices aforesaid; and their successors shall be appointed for the term of six years, in the same manner herein provided; in case of vacancy in either of said offices, it shall be filled in the same manner for the unexpired term.

§ 8. The said court of Special Sessions may be held by any three of the police justices, who shall sit alternately, except that one of their number may be selected to preside; and the said justices shall meet in convention and assign the justices to hold the several terms of said court. The resolution of the Board of Supervisors of said county fixing the compensation of said justices for holding said court, shall take effect from the time the said justices entered upon the performance of such duty, and said compensation shall not be increased or diminished during their term of office. The said Board of Supervisors shall fix the compensation of the temporary clerks employed in said court up to the passage of this act.

§ 9. All acts or parts of acts inconsistent with this act, are hereby repealed.

§ 10. This act shall take effect immediately.

AN ACT

TO DECLARE THE LEGALITY OF THE USE OF CERTAIN FLOATING DOCKS, FOR THE PURPOSE OF REPAIR, COPPERING OR FINISHING OF SHIPS AND VESSELS.

Passed April 17, 1858.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. It shall be lawful for the floating docks of the New York Balance Dock Company to be used, with the consent of the owners of the piers or bulkheads occupied for such use, or of the persons entitled to collect wharfage for such piers or bulkheads, for the purpose of taking up ships and vessels for repair, coppering or finishing in the manner heretofore practised in the port of New York; subject to the existing authority of the Common Council of the city of New York, by ordinance, to regulate the use of the slips, piers and wharves of said city.

2. This act shall take effect immediately.

AN ACT

IN RELATION TO THE CITY HALL IN THE CITY OF NEW YORK.

Passed April 17th, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The Mayor of the city of New York shall nominate, and the Board of Supervisors shall confirm, not more than three Commissioners of the new City Hall, who shall hold their offices during the pleasure of the said Mayor and Supervisors, and all vacancies which may occur among

said Commissioners, shall be filled by said Mayor and Supervisors, as aforesaid.

§ 2. It shall be the duty of the said Commissioners to direct and superintend the erection of a building in the Park in the rear of the City Hall, of suitable dimensions and arrangement, to accommodate therein the Supreme Court, the Superior Court, the Court of Common Pleas, the Courts of Oyer and Terminer, General and Special Sessions, Surrogate's Court, Marine Court, their various offices and chambers, Grand and Petit Juries, the Sheriff, Clerks of those courts, Commissioner of Jurors, District Attorney and Law Institute.

§ 3. The said commissioners shall have power to decide upon the plans and specifications, to advertise for and receive proposals, to make contracts, and to do all things necessary for the building, completing and furnishing ready for use the said building and its several rooms, in such manner as shall, in their judgment, be best calculated to conduce to the due and convenient administration of justice in the city of New York, and the preservation of the public records therein.

§ 4. The said Commissioners shall have power to employ architects, engineers, superintendents, clerks and such other necessary assistants as may be required for the purposes of this act; the compensation of such architects, engineers, superintendents, clerks and assistants, to be fixed by the said Commissioners, by and with the consent of said judges of the said Superior Court and ——— Common Pleas, but the said Commissioners shall receive no compensation for their services.

§ 5. The said Commissioners shall keep full minutes of all their proceedings, and shall file the same with the clerk of

the Common Council, within ninety days after the completion and furnishing of said building.

§ 6. It shall be the duty of the Board of Supervisors of the county of New York, whenever called upon by said Commissioners, to raise a sum not exceeding two hundred and fifty thousand dollars by the creation of a public stock to be called the City Hall Stock, which shall be redeemable in the year eighteen hundred and seventy-five, out of the Sinking Fund of the city of New York, and shall bear an interest of six per cent. per annum, and the said building, with all its finishing and furnishing, ready for use, shall not cost any more than the said sum of two hundred and fifty thousand dollars.

§ 7. The aforesaid amount shall be paid out by the Chamberlain of the city and county of New York, in such sums and to such persons as said commissioners shall, from time to time, direct.

§ 8. It shall be lawful for said Board of Supervisors to determine what shall be the nominal amount or value of each share of said stock, and of what number of shares the same shall consist, and to sell and dispose of said shares at public auction, or otherwise, and issue certificates therefor.

§ 9. The provisions of the act entitled "An act to regulate the Finances of the city of New York," passed June eighth, eighteen hundred and twelve, shall apply to said stock, so far as the same are not inconsistent with this act.

§ 10. It shall be the duty of the said Board of Supervisors, to cause to be raised by tax, in addition to the ordinary taxes, yearly and every year, a sum sufficient to pay the interest, semi-annually, on said stock.

§ 11. The moneys to be raised by virtue of this act, shall be applied to the erection, completion and furnishing, ready for use of said building and all its parts, and for no other purpose whatever.

§ 12. The act entitled "An act authorizing the Mayor, Aldermen and Commonalty of the city of New York, to erect a new City Hall in said city, to raise money by loan for that purpose, and to appoint Commissioners for that purpose," passed April fifteenth, eighteen hundred and fifty-seven," is hereby repealed.

§ 13. This act shall take effect immediately.

AN ACT

TO AUTHORIZE THE BOARD OF SUPERVISORS OF THE CITY AND COUNTY OF NEW YORK, TO AUDIT AND ALLOW CERTAIN CLAIMS AGAINST SAID CITY AND COUNTY.

Passed April 17, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The Board of Supervisors of the city and county of New York, are hereby authorized to audit and allow such charges as may be reasonable and proper for services actually rendered during the year eighteen hundred and fifty-seven, for the protection and taking care of the various police station-houses in the city of New York, while not occupied by the police; and which services have not already been paid by order of the Board of Supervisors of the said city and county.

§ 2. This act shall take effect immediately.

AN ACT

TO AMEND AN ACT ENTITLED "AN ACT RELATING TO THE BOARD OF SUPERVISORS OF THE COUNTY OF NEW YORK," PASSED APRIL FIFTEENTH, EIGHTEEN HUNDRED AND FIFTY-SEVEN.

Passed April 17, 1858—three-fifths being present.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The first section of the act entitled "An act relating to the Board of Supervisors of the county of New York," passed April fifteenth, eighteen hundred and fifty-seven, is hereby amended to read as follows:

The Mayor and Recorder of the city of New York shall cease to be members of the Board of Supervisors of the county of New York; the members now composing the said Board of Supervisors shall continue to be members thereof, as hereinafter mentioned; on or before the first Monday of May, eighteen hundred and fifty-eight, the present members of said Board shall meet at their usual place of meeting in said county, and the six members thereof, elected by the votes of the electors, shall then and there, in the presence of the Mayor of said city, classify themselves respectively, by lot, into six classes, and the six members of said Board appointed in December, eighteen hundred and fifty-seven, by the Mayor of said city, shall also classify themselves respectively, at the same time and place, and in the same presence and manner, into six classes; the terms of office of the two members of the first class shall expire on the thirty-first day of December, eighteen hundred and fifty-eight; the term of office of the two members of the

second class shall expire on the thirty-first day of December, eighteen hundred and fifty-nine; the term of office of the two members of the third class shall expire on the thirty-first day of December, eighteen hundred and sixty; the term of office of the two members of the fourth class shall expire on the thirty-first day of December, eighteen hundred and sixty-one; the term of office of the two members of the fifth class shall expire on the thirty-first day of December, eighteen hundred and sixty-two; and the term of office of the two members of the sixth class shall expire on the thirty-first day of December, eighteen hundred and sixty-three. At the general election to be held in the city of New York in this year, and at every succeeding general election, two Supervisors shall be voted for upon a separate general ticket, but only one name for Supervisor shall be on any one ticket, and any ticket having thereon more than one name for Supervisor, shall not be counted. The person having the highest number of votes shall be declared elected by the Board of County Canvassers, who shall canvass the votes, and all the provisions of law relating to the election of county officers in said county, are hereby applied to the election of Supervisors. On or before the fourth Wednesday of December, in each and every year, the Mayor of said city shall appoint, as a Supervisor, the person who received the highest number of votes for Supervisor, next to the votes received by the Supervisor having the return of the Board of County Canvassers, as having been elected at the election last held.

§ 2. The second section of the said act is hereby amended so as to read as follows:

The vote of seven of the members of the said Board of Su-

pervisors in the affirmative, or in favor thereof, shall be necessary to pass any ordinance or resolution appropriating money, or to fill any vacancy in said Board, or to do any act or thing, except to adjourn from day to day, and every act, ordinance or resolution, which shall have passed the said Board of Supervisors, except such as levy any special tax or taxes, or fill a vacancy in said Board, before it shall take effect, shall be presented, duly certified, to the Mayor of the city of New York, for his approval; if he approve, he shall sign it; if not, he shall return it, with his objections, to the Board, within ten days thereafter, or if said Board be not in session, at its next meeting after that period; the Board shall enter the objections at large on their journal, and cause the same to be published in one or more of the daily papers of the city of New York.

§ 3. In case of any vacancy in said Board by death, resignation, or otherwise, the same shall be supplied by the remaining members thereof, and the person thus appointed shall hold his office as a member of said Board for the unexpired term of the member thereof in whose place he shall have been appointed.

§ 4. This act shall take effect immediately.

STATE OF NEW YORK,
Secretary's Office.

I have compared the preceding with the original laws on file in this office, and do hereby certify that the same is a correct transcript therefrom and of the whole of said original laws.

Given under my hand and seal of office, at the city of Albany, this nineteenth day of May, in the year one thousand eight hundred and fifty-eight.

[L. S.]

L. W. MORTON,
Deputy Secretary of State.

DOCUMENT No. 13.

BOARD OF ALDERMEN,

MAY 27, 1858.

The following report of the Joint Committee on Accounts in relation to unreclaimed warrants and checks found in the Comptroller's office, was received, laid on the table, and ordered to be printed.

D. T. VALENTINE, *Clerk.*

The Joint Committee on Accounts respectfully

REPORT:

That they have found a large number of warrants and checks, amounting in the aggregate to $75,984 47, and bearing date from 1833 to 1856.

They were found in a safe in the Comptroller's office, the larger portion wrapped up in a piece of paper, on which was written "Charles Turner's private papers," having been deposited with Mr. Timpson, First Auditor, by Mr. Turner, at the time the controversy in the Street Department commenced, for safe keeping.

The warrants were drawn by different Comptrollers on the city treasurer, payable at such banks as kept that officer's account, at the dates when they were signed, and the checks were drawn by different Street Commissioners on the banks keeping the accounts of these officers, they having received the amounts from the city treasury, and deposited the same with the banks.

The following summary shows the number, by whom, and on what banks the warrants and checks were drawn, to wit:

By T. J. Waters, Comptroller, on the city treasurer, payable at the Mechanics' Bank; 16 warrants.....	$1,679 57
By John Ewen, Comptroller, on the city treasurer, payable at the Mechanics' Bank; 1 warrant.....	7 25
By John Ewen, Comptroller, on the city treasurer, payable at the Mechanics' Banking Association; 6 warrants.....	246 91
By John Ewen, Comptroller, on the city treasurer, payable at the Bank of the State of New York; 7 warrants	485 79
By D. D. Williamson, Comptroller, on the city treasurer, payable at the Mechanics' Bank; 7 warrants.....	170 00
By D. D. Williamson, Comptroller, on the city treasurer, payable at the bank of the State of York; 23 warrants.....	769 41
By Alfred A. Smith, Comptroller, on the city treasurer, payable at the Bank of the State of New York; 71 warrants.....	5,798 36
Carried forward.....	$9,157 29

Brought forward.....	$9,157 29
By J. J. Bedient, Deputy Comptroller, on the city treasurer, payable at the Bank of the State of New York; 1 warrant.....	304 68
By A. C. Flagg, Comptroller, on the city treasurer, payable at Mechanics' Bank; 608 warrants.....	61,324 14
In all, 740 warrants, amounting to....	$70,786 11

Also, the following checks, to wit:

By Elias L. Smith, Street Commissioner, on the Mechanics' Banking Association; 4 checks.	33 38
By Martin E. Thompson, Street Commissioner, on the Mechanics' Banking Association; 2 checks.....	67 40
By Samuel S. Doughty, Street Commissioner, on the Mechanics' Banking Association; 1 check.....	3 40
By John T. Dodge, Street Commissioner, on the Mechanics' Banking Association; 10 checks.....	334 80
By John T. Dodge, Street Commissioner, on Pacific Bank: 18 checks.....	976 17
By John T. Dodge, Street Commissioner, on Bowery Bank; 23 checks.....	923 49
By John T. Dodge, Street Commissioner, on Broadway Bank; 2 checks	239 88
By James Furey, Street Commissioner, on the Broadway Bank; 49 checks.....	1,122 54
By James Furey, Street Commissioner, on the Pacific Bank; 26 checks.....	1,420 77
Carried forward.....	$5,121 33

Brought forward.....	$5,121 33
By James Furey, Street Commissioner, on the Nassau Bank; 1 check.....	9 86
By James Furey, Street Commissioner, on the Seventh Ward Bank; 2 checks.....	17 17
In all, 133 checks, amounting to.....	5,148 36
Total amount of warrants and checks.....	$75,934 47

Of the whole number, 92 warrants are drawn to the order of the Corporation, being for awards for damages in streets opening, and amounting to the sum of..... $21,598 51

Leaving the amount of.....$54,335 96 to the several parties to whose order the warrants and checks are made payable.

Your Committee have caused inquiries to be made at the banks named in the foregoing statement, and find that the amount for which the checks are drawn are on deposit to the credit of the several Street Commissioners therein named, excepting that only $15 40 appears to the credit of M. E. Thompson's account with the Mechanics' Banking Association, which is fifty-two dollars less than the amount of his checks upon this bank.

There also appears on the ledger of the same bank a balance to the credit of John Ewen, Comptroller $29 43

John Ewen, Redemption account..... 256 87

In all..... $286 30

which seems to have been overlooked in the transfers subsequently made of the city's funds.

All these balances should be deposited with the City Chamberlain.

So far as your Committee can judge, many of the persons to whose order the checks and warrants have been drawn, are not aware of their existence.

Many probably have not been called for, because the assessments to the parties are in excess of the awards for which the warrants are drawn, and many have doubtless neglected or forgotten their claims, in cases where they were for very small amounts.

Your Committee recommend that the accompanying list be advertised as the most convenient method of bringing them to the notice of those interested, and for facilitating their settlement, and the collection of such sums as may be due from the same parties to the city for assessments, &c.

That portion of the warrants drawn to the order of the Corporation should have been transferred to the proper account on the treasury ledger by charge thereto and credit to real estate account, and the warrants duly cancelled.

Either from neglect or ignorance of the proper method of keeping the real estate account of the city, that account, as it stands at present, is incorrect and unreliable, as it does not show the cost of the property to the city. In every case of awards for damage, or assessment for benefit on property of the Corporation, the real estate account should be duly credited or debited. This seems to have been overlooked by the Comptroller, and his accountants, and consequently, nothing but an examination

of the entire list of awards and assessments affecting the property of the city will enable such entries and corrections as will make the real estate account what it always should have been, a true statement of the disbursements and receipts thereupon.

Great care should be taken before payment to any parties to whom the warrants and checks described in the annexed list, are seemingly due, that any indebtedness to the city on their part be first discharged.

Your Committee recommend the adoption of the following resolutions:

Resolved, That the list of warrants and checks accompanying this report, be advertised for three days in the Corporation papers, omitting from such advertisement, the warrants drawn to the order of the Corporation.

Resolved, That the Comptroller be, and hereby is instructed to take the proper proceedings for the withdrawal of all sums which are standing to the credit of any of the former Street Commissioners, or of the present or any of the former Comptrollers, in any of the city banks, and to deposit the same with the City Chamberlain, crediting the same on the treasury ledger to a separate account, to be termed "unclaimed accounts," and that he cause to be canceled the warrants and checks, described in the annexed list, which the Street Commissioner is hereby directed to deliver to the Comptroller for this purpose, taking his receipt for the same on delivery.

Resolved, That the Comptroller be, and is hereby directed to make payments to the parties for whose accounts the checks and warrants were drawn, referred to in the

preceding resolution, upon their claims therefor, duly authenticated, and upon the discharge of any indebtedness on their part to the city, by the issue of new warrants, to be charged to the account termed "unclaimed accounts."

Resolved, That the Comptroller be, and is hereby directed, to make or cause to be made, proper entries on the books of the Finance Department, on canceling the warrants drawn to the order of the Corporation and described in the annexed list.

Resolved, That whereas proper entries have not been heretofore made on the books of the Finance Department for warrants drawn in payment of awards and assessments to the Corporation, the Comptroller be, and hereby is notified of this neglect, and be and hereby is directed to cause intelligible and suitable entries to be made for all awards for damage and all assessments for benefit to the property of the Corporation.

All of which is respectfully submitted.
